PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, SECOND SESSION

HOUSE OF REPRESENTATIVES—*Wednesday, December 1, 1982*

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. WRIGHT).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C., *November 30, 1982.*

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore on Wednesday, December 1, 1982.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Almighty God, in whom we live and move and have our being, grant us Your blessing as we seek to serve this Nation and all people. Give us a sense of fairness in all we do, that Your message of peace and justice will be known in the lives of all citizens. Make us aware of the needy and unfortunate among us who need our concern and care, and seeking to be Your servants, we may truly do the good work You have placed before us. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's preceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

A PROGRAM IS NEEDED TO CREATE JOBS

(Ms. FERRARO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. FERRARO. Mr. Speaker, unemployment is now at 10.4 percent, and is expected to rise again this month. More than 11 million Americans are officially unemployed, and millions more have been out of work so long they have given up looking for jobs.

The Chairman of the President's Council of Economic Advisers says that if we "stay the course," it will take 6 years to bring unemployment down to 7 percent, the level it was when this administration took office.

That is not good enough. We need a program to create jobs now to get our economy moving again. Jobs generate other economic activity, which in turn will generate revenues, which will help bring down the deficit.

And there is plenty of work to be done. The need to repair bridges, roads, water and sewer systems, and other public facilities is second in importance only to reducing unemployment. A major Federal effort to put people to work fixing the infrastructure could go a long way toward solving both problems as well as giving the economy a needed boost.

SECRETARY BLOCK: YOU BETTER BE TOUGH

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, Agriculture Secretary Block is starting trade talks in Paris today. He has got to be tough with them.

While we are working to cut back domestic production to reduce the level of price-depressing carryover stocks, the European Economic Community has pushed full speed ahead with expanded production and massive export subsidies. Their approach is nothing short of cutthroat, and we should not stand for it. Secretary Block needs to drive that point home while he is in Paris. He also needs to make the point that we will not sit idly by if they decide to continue their present policies of pitting their treasuries against our farmers. They need to know that, if they persist, we will fight back and we will win.

IMMIGRATION CONTROL AND REFORM ACT OF 1982

(Mr. FISH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FISH. Mr. Speaker, it is looking increasingly likely that during this postelection session Simpson-Mazzoli, the Immigration Reform and Control Act of 1982, will come before this body. This has been the work product of 2 years of the Select Commission on Immigration and Refugee Policy, review at the Cabinet level by the administration of the Commission's findings and subsequently a year and a half effort by the Senate and House Judiciary Committees. The Senate has already acted on this bill.

While overwhelmingly the American people want action in this area, I am aware that constitutent groups have voiced reservations over certain parts of the bill to my colleagues. These reservations center largely on two areas, the fifth preference, brothers and sisters of U.S. citizens, and on the legalization provisions of Simpson-Mazzoli.

I want to give this assurance to my colleagues that the bill we will be bringing from the House Judiciary Committee makes absolutely no changes in the current preference system and has the full fifth preference embodied in it. Second, that I will protect the rights of members of the subcommittee who wish to bring up an amendment, a motion to strike the entire legalization section of that bill. That will be available for a vote by all Members of this body.

THE FOLLY OF CURRENT MONETARY POLICY

(Mr. PAUL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PAUL. Mr. Speaker, the stock market is soaring and so is the money supply. In the last 3 months, checking account and cash money (M_1) rose at a

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

rate of 17.6 percent. The Federal Reserve has assured the market that its restrictive money policy of the past 3 years is a thing of the past. No tears should be shed over dropping the experiment with monetarism, but no joy should be expressed over the return to interest rate manipulation by massive monetary inflation. It is true the economy will feel better for a short while with more inflation, but so does the alcoholic as he returns to drinking after a short period of abstinence. This is not to say that the cure for our economic malaise is prolonged agony with monetarism, but it is important for all of us to realize that these are not the only two options available to us. We will never achieve a sound monetary system by jumping back and forth between concentrating on the money supply one year, and manipulating interest rates the next.

The ultimate solution will only come when we realize that central planning in money is no more efficient than the 5-year plans in Russia for agriculture. We can talk forever about controlling the supply of money and controlling interest rates, but if we continue to ignore the fact that the quality of money is that which instills the trust in money, we will get nowhere. Manipulating monetary aggregates and interest rates is economically identical to the planner's obsession with controlling production, wage rates, prices, and profit levels. It is based on the illusion that politicians and bureaucrats somehow know what only the freely operating marketplace can determine. The monetary policy of today can create a false euphoria, but it is a guarantee that tomorrow's price inflation will return with a vengeance.

It guarantees that on the longrun economic stagnation, high rates of unemployment, soaring interest rates, and the threat of runaway inflation will be with us until we admit the truth—that paper cannot serve as money, and only commodity money such as silver and gold will suffice.

STATES SHOULD BE TREATED EQUALLY IN FINANCING AND REHABILITATION OF NATION'S TRANSPORTATION SYSTEM

(Mr. FAZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FAZIO. Mr. Speaker, I fully support the intent of the proposal to finance the rehabilitation of our Nation's transportation system by increasing the gasoline tax and similar user fees.

This legislation is needed urgently to help protect the enormous investment we have already made in a national road and bridge network, a network that has fallen into the depths of decline.

This legislation is also needed for the jobs that it will create, particularly in the greatly depressed construction trades. The bill will create over 170,000 construction-related jobs, jobs that are sorely needed in districts like my own where the unemployment rate among construction workers is well over 20 percent.

But despite my support for the proposal, Mr. Speaker, I have two concerns that I would like to raise. First, the administration's version of the proposal would apparently penalize States, such as California, who have gone to extraordinary lengths to complete their interstate systems on a timely basis, often at the expense of the rest of the highway network. In California, only 56 of the 2,387 miles of interstate roadway approved by the Congress remain incomplete.

Second, it remains uncertain whether the administration intends for money to be made available to help cities and counties repair their own vast network of deteriorating highways and bridges. In California alone, the cost of making repairs to the 100,000 miles of city and county secondary roadways could easily exceed several hundred million dollars.

The 5-cent increase in the gasoline tax is an appropriate response to the decaying conditions of the Nation's transportation system and the nearly unprecedented rate of joblessness; but the revenues generated must be distributed fairly to the States and localities.

A DEPARTMENT OF AGRICULTURE AND RURAL DEVELOPMENT

(Mr. WATKINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WATKINS. Mr. Speaker, I rise today to offer a bill to change the name of the U.S. Department of Agriculture to the Department of Agriculture and Rural Development. The Federal Government has a Department of Housing and Urban Development, but it has forgotten the rural people of America.

My bill will give greater emphasis to the Department's existing responsibility as the lead Federal agency for rural development and point out the critical linkage that exists between agriculture and rural development. The bill leaves agriculture as the dominant force of the department but focuses needed and long-overdue attention on rural development.

The critical linkage between agriculture and rural development is best and most dramatically highlighted by the fact that during 1981 only one-third of the Nation's farm income was derived from the farm while two-thirds came from off-farm jobs. This indicates without question the vital linkage existing between the availability of jobs and the survival of the American farmer.

For at least three decades, rural development has been an objective of the Federal Government, with the Department of Agriculture the lead agency for carrying out Federal programs. The Rural Development Act of 1972 and the Rural Development Policy Act of 1980 made explicit the intent of Congress that the Department exercise leadership responsibility within the executive branch and in conjunction with State and local governments in developing, coordinating and implementing a nationwide rural development program.

Despite the clarity of the 1972 and 1980 laws, assumption of the rural development leadership role by the Department has been sporadic. Federal rural development programs remain uncoordinated and their effectiveness reduced. The current administration has yet to develop the nationwide rural development strategy mandated by the Rural Development Policy Act.

Urban areas have the Department of Housing and Urban Development as their standard-bearer in the Federal Government. If only in the name of basic fairness and equity, there should be a Department of Agriculture and Rural Development for rural America.

It is imperative that we, the Congress, as a matter of fairness and equity, focus attention on the needs and problems of those forgotten citizens of rural America whose economic plight in many areas of the country is far more severe than that of their city cousins in urban America.

My bill, Mr. Speaker, will provide a measure of fairness and a positive and effective focus for the needs of rural America at the Cabinet level in the Federal Government. I urge my colleagues to join with me as cosponsors of this important bill.

JOBS PROGRAM MUST INCLUDE FED

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, virtually all of the discussion about putting unemployed Americans back to work centers around one of several jobs bills being discussed in the U.S. Congress.

A jobs bill is a fine idea if it is properly crafted but it is important for us to understand we are not going to begin to solve this country's economic troubles until we rein in the Federal Reserve Board who masquerades its crushing monetary policies under the term "monetarism" while they "stay

the course" with their recession policies.

The late Wright Patman of Texas spent decades in this House trying to change the Federal Reserve Board. He did not succeed. It is time for all of us in this House to get serious about what the Federal Reserve Board is doing to this country. The Federal Reserve Board's high interest rate policies have been a major cause of recession and high unemployment. This Congress is simply not going to solve our economic troubles until we turn the policies of the Federal Reserve Board back to the people of America, where the Constitution says they should reside.

Talking about jobs bills and ignoring the Federal Reserve Board which has helped bring about the lack of jobs, is a triumph of convenience over logic.

GENERAL LEAVE

Mr. NATCHER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter, with tables and charts, on the bill, H.R. 7205.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION AND RELATED AGENCIES APPROPRIATION ACT, 1983

Mr. NATCHER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7205) making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1983, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to 2 hours, the time to be equally divided and controlled by the gentleman from Massachusetts (Mr. CONTE) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Kentucky (Mr. NATCHER).

The motion was agreed to.

The SPEAKER pro tempore. The Chair designates the gentleman from Florida (Mr. FUQUA) as Chairman of the Committee of the Whole and requests the gentleman from Ohio (Mr. HALL) to assume the chair temporarily.

□ 1015

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7205) with Mr. HALL of Ohio (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN pro tempore. Under the unanimous consent agreement, the gentleman from Kentucky (Mr. NATCHER) will be recognized for 1 hour, and the gentleman from Massachusetts (Mr. CONTE) will be recognized for 1 hour.

The Chair recognizes the gentleman from Kentucky (Mr. NATCHER).

Mr. NATCHER. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, today we take up H.R. 7205, the annual appropriations for the Departments of Labor, Health and Human Services, and Education and Related Agencies, one of the largest and most complicated of the 13 regular annual appropriation bills which come before this House each year. As usual, our subcommittee held extensive hearings over a period of 3 months on the President's budget request, in which all of the subcommittee members participated. We took testimony from over 300 administration witnesses, and some 450 other witnesses, including Members of Congress, representatives of private organizations and other interested individuals. Our hearings are published in nine volumes, which have been available for some time. We think we have produced a good bill and we ask the House to support it today. This bill was reported from the Committee on Appropriations on September 29.

The bill and the accompanying report (Rept. No. 97-894) identify amounts for hundreds of separate programs administered by 3 Departments and 11 related agencies of the Federal Government. Primarily, these are grant-in-aid programs—grants to States, cities, counties, and other agencies of local government, as well as grants to public and private organizations such as hospitals or educational institutions and to individuals throughout the United States. The committee develops a great deal of information about these programs in its formal hearings as well as outside of them, and takes this information into consideration in arriving at recommendations. We must also keep in mind the current level of spending for each program, the President's budget request, the amount authorized by law, and the overall targets contained in the budget resolution, as subdivided among subcommittees by the Appropriations Committee. The total budget authority for 1983 provided in the bill is $85,359,030,000. This is $5,322,087,000 more than the President's budget request, and $1,189,994,000 more than the comparable appropriations for fiscal year 1982.

Of the funds provided in the bill, $5,980,130,000, or 7 percent, are for the Department of Labor; $64,213,214,000, or 75 percent, are for the Department of Health and Human Services; $14,287,390,000, or 17 percent, are for the Department of Education; and $878,296,000, or 1 percent, are for the 11 related agencies which are funded in this year's bill.

Although the amounts in the bill are far in excess of the President's budget estimate, this is primarily because the budget proposed to cut back or eliminate so many programs. Congress did not approve these cutbacks in the budget resolution, and the amounts in the bill are consistent with the amounts in the 1983 budget resolution.

I would like to insert in the RECORD at this point a chart which shows a few of the important programs funded in the bill which would be terminated or cut back in the President's 1983 budget request:

The chart follows:

PROGRAMS DELETED OR DRASTICALLY REDUCED IN THE 1983 BUDGET

	1982 appropriation	1983 budget request	H.R. 7205	Increases over budget
Community Service Employment for Older Americans (Title V)	$277,100,000	0	$277,100,000	+$277,100,000
Low Income Energy Assistance	1,875,000,000	$1,300,000,000	1,850,000,000	+550,000,000
Work Incentives	280,760,000	0	280,760,000	+280,760,000
Title I, Elementary and Secondary Education	3,033,969,000	1,942,000,000	3,033,969,000	+1,091,969,000
Follow Through	19,440,000	0	19,440,000	+19,440,000
Impact Aid "B" Payments	72,600,000	0	72,600,000	+72,600,000,000
Impact Aid "A" Payments	345,000,000	275,080,000	362,400,000	+87,320,000
Handicapped Education	1,068,580,000	845,668,000	1,103,680,000	+258,012,000
Vocational Rehabilitation	923,414,000	623,316,000	1,006,474,000	+383,158,000
Vocational Education	648,625,000	500,000,000	734,500,000	+234,500,000
Pell Grants	2,419,040,000	1,400,000,000	2,419,040,000	+1,019,040,000

PROGRAMS DELETED OR DRASTICALLY REDUCED IN THE 1983 BUDGET—Continued

	1982 appropriation	1983 budget request	H.R. 7205	Increases over budget
Supplemental Opportunity Grants	355,400,000	0	355,400,000	+355,400,000
Direct Student Loans	178,560,000	0	178,560,000	+178,560,000
State Student Incentive Grants	73,680,000	0	73,680,000	+73,680,000
Libraries	80,080,000	0	80,080,000	+80,080,000
VISTA	16,000,000	231,000	11,831,000	+11,600,000
Corporation for Public Broadcasting	130,000,000,000	85,000,000	130,000,000	+45,000,000

BUDGET RESOLUTION TARGETS

Section 302(b) of the Budget Act requires the Committee on Appropriations to subdivide among its subcommittees the total allocation of budget authority and outlays assigned to the committee under the budget resolution. The subcommittee targets for 1983 are published in House Report 97-669. The total budget authority in H.R. 7205 falls well within these targets. The numbers are as follows:

[In millions of dollars]

	Mandatory	Discretionary	Total
Section 302(b) target	62,939	27,950	90,789
H.R. 7205 adjusted for advances	57,366	23,867	81,233
Ceiling remaining	5,573	3,983	9,556

While the bill is technically $9,556,000,000 below the 302 targets, we believe that most or all of this amount will be required for future appropriations for programs whose needs are not fully addressed in this bill. We know that many entitlement programs, including medicaid, assistance payments, guaranteed student loans, social services block grants, and advances to the unemployment trust fund, are not adequately funded in the President's budget. We expect to receive supplemental budget requests for these entitlement programs. In the meantime they will be operating on a deficiency basis. We believe that supplemental appropriations of $4.5 to $5.5 billion will be required for these payments which are clearly mandated by existing law. In addition, the bill does not include appropriations for several discretionary programs which had not been reauthorized at the time of subcommittee markup. These include the health planning, refugee, employment and training, and utilization review activities. The President's budget for 1983 includes $3,068,770,000 for these programs. 1982 appropriations for them amounted to $3,969,910,000.

In summary, the bill which we bring to the House today is well within the targets set by the 302(b) report, but when all appropriations actions for 1983 are completed, we expect we will need every penny in budget authority which was allocated to the subcommittee in that report.

DEFERRED ITEMS

The committee has deferred consideration of appropriations for certain programs which lacked authorizing legislation for 1983 when the committee acted on the bill. The deferred programs are employment and training assistance in the Labor Department, and health planning, professional standards review organizations, and refugee and entrant assistance in the Department of Health and Human Services. The 1982 appropriations for these programs amounted to $3,969,910,000. The 1983 budget requests for them total $3,068,770,000. These programs will receive continued funding under the continuing resolution until regular appropriations can be provided for them in supplemental appropriations bills.

ENTITLEMENT PROGRAMS

The great bulk of the appropriations in this bill are for mandatory or entitlement programs. These are programs in which payments are mandated by law, or are fixed by Federal matching formulas. The major programs in this category are:

	Amount in the bill
Federal unemployment benefits and allowances	$35,000,000
Advances to unemployment trust funds and other funds	3,798,000,000
Special benefits	339,600,000
Black lung disability fund	673,544,000
Medical facilities guarantee and loan funds	32,000,000
Retirement pay and medical benefits for commissioned officers	78,861,009
Grants to States for medicaid	18,284,162,000
Payments to health care trust funds	15,576,000,000
Payments to social security trust funds	855,213,000
Special benefits for disabled coal miners	1,102,000,000
Supplemental security income	8,543,616,000
Assistance payments	6,611,838,000
Child support enforcement	397,377,000
Social services block grants	1,974,126,000
Child welfare services	238,251,000
Guaranteed student loans	2,484,631,000
Higher education—interest subsidy grants	20,143,000

Out of the total budget authority of $85,359,030,000 provided in the bill, entitlement programs account for $61,361,686,000 or 72 percent. As a general rule, the committee includes in the bill the amounts which the Congressional Budget Office estimates to be required under the currently prevailing legislation. In cases where the CBO estimate exceeds the budget request, the committee usually provides the amount of the budget request, recognizing that a supplemental appropriation may be necessary at a later date.

The remainder of the bill, or $23,997,344,000, consists of discretionary appropriations which are relatively controllable through the annual appropriations process. Compared with fiscal year 1982, the bill includes a net increase of $827,252,000 for entitlement programs, and a net increase of $362,742,000 in budget authority for discretionary programs. It should be emphasized that spending for entitlement programs can be controlled or limited through changes in basic law but not through the amounts included in annual appropriations bills.

In the absence of bill language which would place a dollar limit on total spending for any one of these entitlements programs, the amount in the bill does not constitute such a limit.

TOTAL BUDGET AUTHORITY

In addition to the amounts appropriated in the bill, very large sums are automatically appropriated each year for Labor, Health, and Human Services, and related programs without consideration by the Congress during the annual appropriations process. The principal components of this category of permanent appropriations are amounts in the social security, unemployment compensation, and railroad retirement trust funds. Passage of H.R. 7205 as reported by the committee would increase total permanent and annual budget authority for these activities from $301,100,595,000 in 1982 to $318,050,376,000 in 1983. When final appropriations are made for deferred items and for appropriated entitlements, the 1983 total is expected to exceed $327 billion, an increase of more than $26 billion. These programs constitute about 42 pecent of the total Federal budget for fiscal year 1983.

DEPARTMENT OF LABOR

For the Deparment of Labor, the committee recommends $5.98 billion for fiscal year 1983. This is a reduction of $502 million from the President's budget request and $872 million below the 1982 appropriation. In addition, the bill includes authorization to expend $2.4 billion from trust funds, an increase of $55 million over the request. The reduction from the budget request results from a lower estimated need for advances to the Unemployment Trust Fund, as reflected in the administration's midsession budget review. It now appears that those estimates may have to be increased considerably because of the severity of the unemployment problem. The bill as reported includes no funds for training programs authorized by the new Job Training Partnership Act. That bill was in conference when this apropriations bill was marked up; con-

sideration of it was deferred pending receipt of a budget request from the administration.

MAJOR PROGRAMS

Older Americans employment: We recommend $277 million, the same as the 1982 level. This provides for continuation of the current level of 54,200 part-time jobs. The budget proposed to eliminate the program. The committee strongly supports this highly successful program.

State employment security agencies: the bill includes $2.4 billion, an increase of $55.7 million over the budget request. The committee added $84.8 million to maintain employment service staffing at the 1982 level and added $42.5 million to finance the administration of the recently enacted unemployment benefit extension. An offsetting reduction was made in contingency funding, pursuant to the administration's midsession budget review estimates.

Black lung trust fund: The bill includes $674.3 million to pay black lung benefits during 1983. The Department estimates that about 190,000 people will be receiving benefits.

Worker safety and health: We recommend a total of $356.1 million, including $202.3 million for OSHA and $153.8 million for MSHA.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

The bill includes $64,213,000,000 for programs administered by the Department of Health and Human Services including $5,920,000,000 in advance appropriations for 1984. This amount is $1,305,000,000 more than requested by the President and $2,346,000,000 more than the comparable amount provided for these activities in fiscal year 1982. The bill does not include funding which will be required for the refugee, health planning, and medicare and medicaid utilization review activities. These programs were not reauthorized at the time of subcommittee markup of the bill and will therefore need to be provided for initially under the continuing resolution. The President's budget requested $534 million in new budget authority for these three programs.

Of the funding recommended for this Department in H.R. 7205, only $13,243,000,000 or 21 percent is controllable through the annual appropriations process. The remaining $50,970,000,000 or 79 percent is for payments mandated by existing law. This includes principally the income maintenance, health insurance, and social services entitlements authorized by titles IV, XVI, XVIII, XIX, and XX of the Social Security Act. The bill includes a variety of increases or decreases from the President's budget or from 1982 spending for programs under control of the committee. The committee has frequently recommended that large reductions proposed by the President for HHS activities not be made and that programs be maintained at as near as possible to their 1982 levels. Examples of major increases over the President's budget recommended by the committee includes the following:

	Million
Community health services	+$29
Maternal and child health block grants	+23
Preventive health services	+19
National Institutes of Health	+255
Alcohol, drug abuse, and mental health	+22
Health professions education	+88
Low income energy assistance	+550
Programs for the aged	+79
Work incentives (WIN)	+281
Community services block grants	+248

Of these programs only the health research activities of the National Institutes of Health are recommended to be funded at a level significantly above 1982. The $4,004 million recommended for NIH is $362 million above last year. Most of the increases over the President's request are to restore activities which the budget proposes to eliminate or drastically reduce.

As discussed earlier the committee expects that substantial additional sums will be required for the entitlement programs administered by the Department of Health and Human Services. The committee bill includes the full amounts requested by the President in his budget. These requests were, however, in many cases based upon legislative proposals which were not enacted by the Congress. Since existing law entitles States or individuals to certain benefits, the additional sums to administer these activities must be appropriated and should be requested by the President in January. The Congressional Budget Office estimates that as much as $4 billion in additional funds may be required in fiscal year 1983 for these activities over the amounts in the bill. The largest affected programs are medicaid, AFDC, social services and foster care. I want to make clear to Members and to others that unless the law is changed, that the States and individuals are entitled to these funds and the Congress will have no alternative but to provide them in the spring supplemental.

The following items are some of the highlights of the recommendations made by the committee for the various agencies of this Department.

HEALTH SERVICES ADMINISTRATION

The bill includes $1,002,997,000 for programs administered by the Health Services Administration. This is $65 million more than requested by the President but $193 million less than 1982 spending for this agency. The reduction from 1982 is due principally to the closure or transfer of the Public Health Service Hospitals last year. Subsequent to subcommittee markup of the bill, the Secretary of Health and Human Services announced a reorganization of this agency merging its activities with those of the Health Resources Administration. A spending plan for this new agency is expected to be submitted within a few weeks. The committee does not, however, expect spending for programs in this account to be substantively changed as a result of the reorganization.

Recommended is $446,217,000 for the community health centers, family planning, migrant health, and black lung program—approximately the same level provided in fiscal year 1982. This is $29 million more than requested in the budget. The President proposed to consolidate these four activities into a single block grant. This change was not approved by the Congress and the committee recommendations follow the current categorical grant format. The committee also recommends that $373 million be appropriated for the maternal and child health block grant—the maximum authorized and an increase of $23 million over the budget.

The bill includes $129,306,000 for the health professions education programs of which $93 million is to support the field program of the National Health Service Corps. The committee has recommended a decrease of $10 million from the amount requested for the Corps. This recommendation is based on greater than expected success in placing Corps members in private practice settings. This procedure reduces cost and increases the likelihood that a professional will permanently locate in a shortage area. While the committee has agreed to the phaseout of new Corps scholarships based on testimony that sufficient personnel can be recruited for the Corps without such aid, we intend to review this matter carefully each year. The committee has, however, not agreed with the President's proposal to terminate exceptional financial need scholarships. This program provides 1 year of assistance to the neediest students and the committee has included the full amount authorized, $6.5 million for this program. Last, the committee has not approved the request to limit through appropriations language the amount of loans available to health professions students under the HEAL program. This matter should be taken up in connection with the authorizing legislation, which sets a limit of $225 million for this program.

PREVENTIVE HEALTH ACTIVITIES

The bill includes $318.4 million for programs administered by the Centers for Disease Control. This is an increase of $18.6 million over the President's budget request and $5.5 million over the 1982 level. The committee recommends increases over the budget for venereal disease control, childhood immunization grants, fluoridation, childhood lead poisoning, tuberculosis

project grants, and occupational safety and health training.

NATIONAL INSTITUTES OF HEALTH

The bill includes a total of $4,004,075,000 for the National Institutes of Health, an increase of $255,304,000 over the 1983 budget and $362,200,000 over the 1982 appropriations. The Institutes are funded through 16 appropriations, the largest of which is the appropriation of $981,441,000 for the National Cancer Institute, followed by $620,947,000 for the National Heart, Lung, and Blood Institute, and $408,508,000 for the National Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases. The other major NIH appropriations for 1983 included $80,304,000 for the National Institute of Dental Research, $294,361,000 for the National Institute of Neurological and Communicative Disorders and Stroke, $276,367,000 for the National Institute of Allergy and Infectious Diseases, $367,009,000 for the National Institute of General Medical Sciences, $251,561,000 for the National Institute of Child Health and Human Development, $138,763,000 for the National Eye Institute, $162,695,000 for the National Institute of Environmental Health Sciences, $96,104,000 for the National Institute on Aging, $227,642,000 for the Division of Research Resources, and $46,043,000 for the National Library of Medicine.

The bill provides increases over the 1982 appropriation and over the 1983 budget request for each of the institutes and research divisions. The funds added by the committee will permit the support of additional investigator-initiated research projects, the payment of the full indirect costs approved for each project, continued support of about 10,000 research trainees, initiation of a number of new clinical trials to test new methods of treatment, and provide additional support for technological resources, instrumentation, animal breeding, and clinical facilities. To the extent possible, the committee has followed the general principles adopted in recent years for dealing with the NIH budget, namely to stabilize support for investigator-initiated research projects at about 5,000 new and competing projects per year; to support about 10,000 research trainees per year, and to allocate research funds among the institutes so that all institutes are able to fund research projects of comparable promise as measured by the priority scores awarded to competing applications by study panels. The committee members are concerned about the problem of the rising costs of research, both direct and indirect, but we believe that the budget proposal to make an arbitrary cut of 10 percent in indirect costs is unwise, and we have not approved this proposal.

Progress within the NIH has been reported to the subcommittee on several fronts.

The National Cancer Institute notes the results of a new program instituted in 1973 called the surveillance, epidemiology, and end results program (SEER). This program was instituted to determine survival rates of those stricken with cancer. The NCI, in reporting the results of its 5 year SEER program, gave the subcommittee hopeful information concerning cancer detection and cure rates. As much as a 5-percent increase in the survival rate has been cited. In an effort to expand this percentage, NCI will continue to focus its efforts on early detection and prevention. Beta-carotene and vitamin A derivatives are still being studied as deterrents to the spread of cancer.

The National Heart, Lung, and Blood Institute, in addition to working with NCI on its study of vitamin A, is moving ahead with work on the detection of risk factors in heart attacks and the dissemination of this information to the public. Of several clinical trials being conducted by the Institute, one has shown particular promise. The drug, propranolol, a beta-blocker which aids in preventing additional heart attacks has tested successfully. Another major concern of the Institute continues to be educating the public on the dangers of high blood pressure.

Within the National Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases, researchers looking for possible causes of arthritis have come up with data linking arthritis to genetic tendency, viral or bacterial infection, and defects in the immune system. This knowledge is essential in treatment of the disease. In the case of the immune system, there have been several discoveries in the last few years, some of which lend themselves to treatment of arthritis—for example, lymphoid irradiation is used to treat rheumatoid arthritis in cases where standard treatment is not effective. In further developments, hip and joint replacement surgery has advanced to a high state of the art. In diabetes, scientists are questioning whether controlling levels of glucose will effect the severity of the disease. Another development is the production of synthetic human insulin. The Institute has also been working on the disease, epidermolysis bullosa (EB) which is a severe blistering of the skin. They have discovered a possible cause, the enzyme collagenase, and a potential cure, the drug dilantin.

The National Institute on Aging has been working on causes and treatment of Alzheimer's disease, one of the senile dementia illnesses. This disease is a prematurely debilitating disease which can strike as early as the forties. Treatment has been tried with a drug called physostigmine with promising results.

Another of the Institutes, the National Institute of Child Health and Human Development is working on health problems of infants, children, and families which touch upon such areas as fertility, birth defects, nutrition, infant mortality, et cetera, and which effect the general welfare of the entire population.

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH ADMINISTRATION

The bill includes $844,611,000 for activities under the Alcohol, Drug Abuse, and Mental Health Administration. This is $39 million more than requested in the budget but $16 million less than appropriated in fiscal year 1982. This amount includes $432 million for the services block grant—the amount requested and the same level as last year. The committee has also included $8 million for the services demonstration program known as CPS, community support program. While no funds were requested in the budget for this ongoing activity, the committee believes that these small grants have been very successful in helping communities improve their services to chronic patients who are discharged from inpatient settings—usually State mental hospitals.

Included is $233,158,000 for research into the cause, prevention, and treatment of these devastating problems. This is an increase of $28 million over 1982. The committee has been encouraged by recent progress in these areas and believes that increased funding will broaden our basic and applied knowledge about alcohol abuse, drug dependency and mental disease. The amount recommended includes $3.9 million not requested to continue payment of 100 percent of the indirect costs associated with research grants under this account.

The committee bill includes $18 million for clinical training. This is $28 million less than appropriated in 1982 but $18 million more than requested by the President. The budget proposed to terminate all support for the training of clinical personnel in these specialties. The executive branch presented convincing evidence of the dramatic increase in the numbers of psychiatrists, psychologists, social workers, and psychiatric nurses which have been trained over the last 15 years. While this evidence supported the proposal to terminate existing general support programs, the committee continues to believe that there is an important Federal responsibility to train certain specialties, to assist disadvantaged students, and to address the problem of geographic maldistribution. The bill therefore includes $18 million to initiate a new targeted training program aimed at these more limited problems.

The bill also includes $76,505,000 for the direct support of St. Elizabeths Hospital. The committee report describes in detail a spending plan for this facility which maintains services but which also begins the process of increasing the share of costs paid by the D.C. government. While 90 percent of the patients seen at the hospital are D.C. residents, the District currently pays less than 20 percent of the costs. In 1983 the D.C. share is expected to increase to $26.5 million from the 1982 level of $22.9 million.

HEALTH RESOURCES

The health resources programs relate to health planning, health facilities, and health professions education, including nurse training. Since the 1983 budget was presented to the committee, the Health Resources Administration has been merged with the Health Services Administration. Since no revised budget has been presented, the 1983 bill continues to reflect the old organization. We expect the 1984 budget presentation to follow the lines of the new organization. The President's budget for 1983 proposed to reduce appropriations for health resources programs from the 1982 level of $292,436,000 to $136,411,000 in 1983, a reduction of $156,025,000, or 53 percent. A major element in this reduction is the proposed phaseout of the existing health planning program, which accounts for $62 million of the reduction. Authorization for health planning programs has expired. The committee has elected to defer consideration of 1983 appropriations for health planning programs until new authorizing legislation is enacted. In the meantime the programs will be funded by the continuing resolution at the 1982 operating level. H.R. 6173, the Health Planning Block Grant Act of 1982, which passed the House on September 24, 1982, authorizes a new health planning block grant to replace the existing program.

The 1983 budget request for the health resources programs considered by the committee was $134,328,000, a reduction of $93,676,000 from the comparable 1982 appropriation of $228,004,000. The bill includes $213,573,000, an increase of $79,245,000 over the budget request, but a decrease of $14,431,000 below the 1982 appropriations. Some of the major elements of the increase over the budget recommended by the committee are: $5,800,000 to assist Morehouse Medical College in Atlanta, Ga., to convert from a 2-year to a 4-year medical education program; $29 million to assist Meharry Medical College in Nashville, Tenn., by paying the outstanding balance of a federally guaranteed loan made in 1968 to finance the construction of a teaching hospital for the school; $4,176,000 for grants to schools of public health; $5,012,000 for training in family medicine; and $4 million for area health education centers. The bill also includes $42,667,000 for nursing programs, an increase of $30,129,000 over the amount budgeted for these programs. The increase maintains 1982 dollar levels for most of the nursing programs, including advanced nurse training, training of nurse practitioners, traineeships, fellowships, and research grants. In general, the committee's action on all of the health resources programs maintains them at current levels to the extent that legislative authorizations are in place in 1983. This requires substantial increases over the 1983 budget request.

INCOME MAINTENANCE ACTIVITIES

A large portion of the funding provided to the Department of Health and Human Services is for cash or in-kind payments to the elderly and the indigent. This includes primarily funds for the assistance payments program (including AFDC), supplemental security income, black lung benefits, refugee assistance, social services programs, and low-income energy assistance. The 1983 bill includes $19,352 million for these programs. When final appropriations are made for fiscal year 1983 this total is expected to exceed $21.7 billion. Many Members have asked about energy assistance programs. The committee bill includes $1,850 million for low-income energy assistance grants. This is $25 million less than appropriated in 1982 but $550 million more than requested by the President. The bill also includes the full amount requested to administer the social security program—$3,408,451,000. These are trust funds that can only be spent as provided in this bill.

HEALTH FINANCING PROGRAMS

In addition to the income maintenance activities, the bill also includes approximately $34 billion in Federal funds for the medicare and medicaid program; $17.9 billion is for the Federal share of State medicaid costs. This amount is substantially below the current estimate of the Congressional Budget Office which indicates that an additional $1.6 billion will be required over the amounts currently requested by the President. These additional amounts will have to be provided in a supplemental which should be requested by the President in January. In addition to funds for medicaid, the bill includes a $15.6 billion subsidy payment for the medicare part B program which is now 74 percent supported by general funds. The committee has deferred consideration of funding for utilization review activities under medicare and medicaid. The PSRO program has recently been repealed and insufficient information is currently available on 1983 costs for the utilization control program which is to replace PSRO's. Interim funding will be provided in the continuing resolution.

ASSISTANT SECRETARY FOR HUMAN DEVELOPMENT SERVICES

For the social services block grant (title XX of the Social Security Act), the bill includes $1,974,126,000, the amount requested in the budget and $425,874,000 below the 1982 appropriation. The committee wants to make clear that in approving the amount requested in the budget it is not endorsing the legislative changes proposed by the administration to lower the Federal expenditure ceiling and to substitute the social services block grant for the work-incentive program. Such changes must be made through the regular legislative process by amending the authorizing legislation. If Congress does not approve any legislative changes in the current authorization for the social services block grant, the committee expects the administration to submit a supplemental budget request to cover the full entitlement cost of the program for fiscal year 1983.

The committee recommends $912 million for the Head Start program. This is the amount requested in the budget, and about the same as the amount for 1982. Under this program, about 1,300 projects are supported throughout the country involving close to 380,000 children.

The bill includes $646,726,000 for programs for the aging, an increase of $78,590,000 over the budget request, and an increase of $10,263,000 over the amount for fiscal year 1982. Within the amount is included $296,749,000 for congregate meals and $59,350,000 for home-delivered meals to elderly persons.

The committee bill includes $410,920,000 for various child welfare programs. This amount includes $233,251,000 in partial funding for foster care activities. This is an entitlement program and appropriations are required to match State costs for the maintenance of AFDC-eligible children who are in foster care situations. The committee expects the administration to submit a supplemental budget request to meet the full entitlement costs of the program.

DEPARTMENT OF EDUCATION

For the Department of Education, the committee bill includes a total of $14,287,390,000, an increase of $4,388,145,000 over the President's budget request. The 1983 budget submitted by the President was based on abolishing the Department of Education and sharply reducing Federal support for education. As Members know, this Department was created by an act of Congress in 1979. The proper way to abolish the Department is through a subsequent act of Congress—not through an appropriation bill. Congress has taken no action to abolish

the Department; therefore, the committee bill is based on continued funding for the Department of Education as currently authorized.

Generally, the committee recommends continued support for education programs at the fiscal year 1982 funding level. However, for certain programs, the committee includes increases over the 1982 amounts, such as education for handicapped children, rehabilitation of the disabled, vocational education, higher education and aid to federally impacted school districts.

For chapter 1 of the Education Consolidation and Improvement Act of 1981—grants for the disadvantaged—the committee recommends a total of $3,033,969,000. This is the same as the 1982 level which includes a one-time appropriation of $148 million to ease the transition in shifting from the 1970 census data to the 1980 census data as the basis for allocations to local educational agencies. Most of these funds go to approximately 14,000 school districts and are used to assist about 6 million educationally disadvantaged children.

For block grants to States for elementary and secondary education, the committee recommends $483,840,000, the same as the comparable amount for 1982, and $50,840,000 over the budget request. This program is authorized by chapter 2 of the Education Consolidation and Improvement Act. Under the provisions of chapter 2, State and local educational agencies establish the purposes for which funds may be used. The three main categories of approved activities are basic skills improvement, educational improvement and support services, and special projects.

In the bill, we include $138,057,000 for bilingual education. This amount is $43,523,000 over the budget request, but is the same as the amount appropriated for fiscal year 1982. About 250,000 children of limited English ability would be assisted through this program.

For the impact aid program, the committee recommends $475 million the full amount authorized for 1983. The distribution of payments for children under category A and category B would follow generally the same pattern as used during fiscal year 1982. Under this procedure, priority is given for category A payments and for category B payments in heavily impacted school districts particularly those with a high proportion of children from military families.

The committee bill includes $1,103,680,000 for educating handicapped children. This figure is $258,012,000 over the President's budget, and $35,100,000 over the 1982 appropriation. Included in this total is $962,428,000 for the State grant program which will help educate about 4 million handicapped children.

For programs directed toward rehabilitating the disabled, we recommend $1,035,227,000, an increase of $385,227,000 over the budget request. Within this total, we include $943,900,000 for basic State grants, the full amount authorized and $80,860,000 over the 1982 appropriation. These funds will help rehabilitate over 1 million disabled persons.

For vocational and adult education, the committee recommends $829,500,000. This amount is $329,500,000 over the President's budget request and $94,475,000 over the 1982 appropriation. Vocational education funds are used to support programs that provide education, training, and basic instruction needed by persons to successfully compete and advance in the labor market. Enrollments in vocational education have increased by more than 85 percent in the last 10 years, with current enrollment totaling 16.5 million secondary, postsecondary, and adult students. The total includes an increase of $8,600,000 over 1982 for adult education to help States provide literacy training for nearly 2,100,000 adults.

The committee bill includes $3,569,480,000 for various college student aid programs. This figure is the same amount as appropriated for 1982 but it is $1,769,480,000 over the President's budget. Within this total we provide $2,419,040,000 for the Pell grant program which will assist about 2,600,000 needy students. The maximum Pell grant would be $1,800, the same as the current year. Supplemental opportunity grants, work study, direct loans, and State incentive grants would also be continued at current funding levels.

The bill includes $2,484,631,000 for the guaranteed student loan program. This is the same as the budget request. Activities carried out under this program enable students and their parents to borrow at low interest rates to help finance the cost of postsecondary education or training at universities, colleges, and vocational schools. This is an entitlement program and appropriations are required to pay interest subsidies, default claims, and other expenses related to guaranteed student loans. There are indications that the amount requested in the budget may be insufficient to cover the full year cost of the program as presently authorized. Since this is an entitlement program a supplemental budget request would have to be submitted as soon as the full year cost can be more accurately determined.

For various programs designed to assist postsecondary institutions, the bill includes $400,990,000. This amount is $129,638,000 over the budget request, and $18,834,000 over the 1982 appropriation. Some of the programs in this grouping are special programs for the disadvantaged (sometimes called TRIO), aid to developing institutions, cooperative education, international education, and graduate training programs.

We include $80,080,000 to continue all library programs at the 1982 appropriation level. The President included no funds for these programs in the budget request. We feel that the budget was wrong in proposing to eliminate assistance to public and college libraries.

RELATED AGENCIES

The bill includes $878.3 million for 11 related agencies, an increase of $131.5 million over the budget requests and $39.7 million over the 1982 level.

ACTION

We recommend $129.1 million for ACTION's volunteer programs, an increase of $11.3 million over the budget request and a reduction of $2.8 million for 1982. Included are $11.8 million for VISTA, $48.4 million for Foster Grandparents, $12 million for the Senior Companion program, and $28.4 millllion for the RSVP program.

PUBLIC BROADCASTING

We recommend $130 million for the Corporation for Public Broadcasting, the full amount authorized by law. This is an advance appropriation for fiscal 1985. The President's budget request was only $85 million.

RAILROAD RETIREMENT BOARD

We provided $430 million for dual benefit payments, the amount required to fully fund them. The budget request was only $350 million. We added $2.3 million to the Board's administrative budget and specified staffing levels in the bill. The committee does not want to see the Board's staff diminished any further.

The CHAIRMAN (Mr. FUQUA). The time of the gentleman from Kentucky has expired.

Mr. NATCHER. Mr. Chairman, I yield myself 2 additional minutes.

Mr. Chairman, this is a good bill. I want the members of the committee to know that it is a distinct honor and a privilege for to work with my friend, the distinguished gentleman from Massachusetts (Mr. CONTE), the ranking minority member on this subcommittee, and the ranking minority member on the full Committee on Appropriations and, Mr. Chairman, one of the able Members of this House. It is a distinct honor and privilege for me to work with the gentleman from Massachusetts (Mr. CONTE) and to work with all the other members of the subcommittee on both sides.

Mr. Chairman, we have very few votes, if any, on this subcommittee when we mark this bill up. We hold hearings that last from 12 to 13½

weeks. We carefully consider all the budget requests. We have hundreds and hundreds of witnesses and when we mark the bill up, as a general rule, Mr. Chairman, we are in agreement.

We have very carefully held this bill under the amounts allocated to us in the section 302 report.

I would like to close by saying that it is a distinct honor and a privilege for me to serve with the chairman of the full Committee on Appropriations, the distinguished gentleman from Mississippi (Mr. WHITTEN). This bill at times becomes right complicated, and at all times we have had the full support of our chairman, the distinguished gentleman from Mississippi. It is only through his effective leadership of the Committee on Appropriations that we are able to bring this bill to the floor today.

Mr. CONTE. Mr. Chairman, I yield myself such time as I may use.

I am pleased to join with the distinguished chairman of the subcommittee, the gentleman from Kentucky (Mr. NATCHER), in bringing to the floor of the House H.R. 7205, making appropriations for the Departments of Labor, Health and Human Services, Education, and related agencies for fiscal year 1983.

This bill has been a long time in the making. It gives the committee's recommendations on a budget request that was presented to Congress on February 8, nearly 10 months ago. It reflects the 302(b) spending targets set on July 22.

These targets were in turn based on the first budget resolution that was not passed until June 22, more than 2 months after its statutory deadline. Then we had reconciliation and the Tax Act in August, and we were finally in a position to mark up this bill.

As unbelievable as it may sound, H.R. 7205 comes to the floor setting funding levels for a fiscal year that started 2 months ago.

We need to act on this bill and the remaining appropriations bills quickly, so that we can get them over to the Senate and to the President. And I think we need to take a hard look at our budget process, which is seriously calling into question our ability to act on funding matters in a timely fashion.

What is contained in this bill is the result of hard work on the part of the subcommittee members, and particularly on the part of the chairman, whose knowledge and fairness are legendary. The committee held 9 weeks of hearings and heard 750 witnesses testify on the budget request. On September 15, the day after the Massachusetts primary, the subcommittee spent over 9 hours marking up this bill. And we came up with a good bill, within our budget targets, that balances the needs of the millions of people reached by the programs in this bill with the requirements of continued fiscal restraint. I can recommend this bill to you as a sound product put together with much care and consideration.

Overall, the bill provides a total of $85,359,030,000 in new budget authority, of which $79.3 billion is current year authority and $6 billion is advance appropriations.

Compared with last year's total, the bill is nearly $5 billion below, in current year authority, mostly in entitlement programs. Compared with the fiscal year 1983 budget request, the bill is a little over $5 billion above, mostly in discretionary programs. But when compared with the 302(b) allocation, it is right on target.

The total 302(b) allocation for Labor, Health and Human Services, and Education is $90.8 billion. In comparable figures, the bill appropriates $81.2 billion, which is $9.6 billion below the target. The committee estimates that further appropriations of $8.5 billion will be required, due to entitlement overruns, as estimated by CBO, and deferral of funding of four discretionary programs pending reauthorization.[1]

After taking accounting of these contingencies, H.R. 7205 is still under its target. The bottom line is that the bill is nearly $1.1 billion below its 302(b) allocation, $789 million below in entitlement, and $286 million below in discretionary authority.

Included in the bill are: $6 billion for the Department of Labor; $58.3 billion in current year authority and $5.9 billion in advance authority for the Department of Health and Human Services; and $14.3 billion for the Department of Education.

In striking the balance between the needs of people and fiscal restraint, the emphasis in this bill is on restraint. Many of the most important programs in this bill, programs that serve the neediest, like mothers and children and the elderly, are funded at exactly the same level as last year. And remember that all of these programs sustained large and absolute decreases in funding last year. Let me give a few examples:

For community health centers, there was $281.2 million appropriated in 1982, and the bill provides $281.2 million for 1983;

For the maternal and child health block grant, $373.8 million was appropriated in 1982, and this bill provides $373 million for 1983;

For child welfare assistance, $156.3 million was appropriated in 1982, and this bill provides the same amount in 1983;

For child abuse, $16.2 million was provided in 1982, and there is $16.2 million in this bill for 1983.

Let me say a word about what level funding means. In one or two of the bills that will be coming up, debate centers on the notion of "real growth." Billions of dollars are accounted for by the phrase "keeping up with inflation." By comparison, none of the programs I mentioned are protected from inflation. In a time of inflation—less severe than in the past, I would add—in a time of rising costs, level funding means a real cut in funding, especially in health, where inflation is still in double digits.

If there is one place that the committee had to do some balancing, it was with respect to the Department of Education. The bill provides $14.3 billion for the Department, an increase of $4.4 billion over the President's request. But if that increase sounds large, it is because the administration's proposed cuts were large, and Congress rejected those cuts in the first budget resolution.

Even with the addition of $4.4 billion to the budget request for education, the bill is more than $300 million below last year's funding level.

In student financial assistance programs, the committee's bill provides $3.6 billion, double the administration's request of $1.8 billion. And do you know where that puts us in comparison with last year's appropriation? It puts us at level funding. And let me tell you what else that increase means. It means that 1,620,000 more grants and scholarship awards will be made than under the President's request. It means that a million students will not be faced with the choice of dropping out of college for lack of resources, a choice that many are faced with as student aid remains level while tuition continues to increase rapidly.

Three programs funded under the Department of Education contain significant increases over last year's level, and when I explain the justification to you, I think you will see how compelling the case is for those increases and how carefully the committee has acted in weighing the balance.

For vocational rehabilitation State grants, the largest Federal program aimed at helping handicapped persons maximize their potential for employment and independent living, the bill provides an increase over 1982 of $80 million, for a total of $943.9 million. That increase was needed because a $120 million rehabilitation program in the Social Security Administration has been terminated. The 148,000 people who formerly received services now rely on this program for services. This

[1] CETA/jobs training, health planning, refugees, and PSRO's $3.699 billion was reserved for these programs, which is based on the first budget resolution funding assumptions for these programs. Jobs training and refugees authorizations have subsequently been enacted. No request for the newly authorized programs have been received from the administration. All these programs are being funded under the continuing resolution at current operating levels.

is in addition to the 1.2 million people already served by it. This new funding is greatly needed to serve these additional people.

For vocational and adult education, the bill provides $94 million over last year, and no one would deny that, at a time when thousands of permanently unemployed workers need retraining, this increase in spending is warranted.

The bill provides an increase of $35 million for handicapped education State grants over last year's level. The education for all Handicapped Children's Act has been responsible for the mainstreaming of thousands of handicapped children into regular classrooms. The act originally contemplated that by this time the Federal Government would be paying 40 percent of the extra cost of educating the handicapped. This increase is enough to maintain the Federal Government's contribution at 10 percent.

These increases are provided for compelling reasons. It gives you a sense of how cautious the committee was in providing any increases at all.

The one other significant increase in this bill is for the National Institutes of Health and Mental Health. For NIH, the bill provides for an increase of $255 million over the request and $362 million over the fiscal year 1982 level, for a total of $4 billion. This is the one program in this bill for which the committee has provided an appropriation meant to keep up with inflation.

For several years, it has been our goal to fund 5,000 research grants and 10,000 research trainees as the minimum necessary to sustain the momentum of biomedical research, which is one of this Nation's greatest accomplishments, in the fight against diseases like cancer, heart disease, and diabetes. Last year we began to slip from those goals, and this year's proposal would have reduced grants to 4,100 and researchers to under 9,000. Without the additions provided by the committee, we are on the verge of letting one of our national treasures slip away. The money we appropriate here is an investment, an investment that pays off handsomely in saved lives and improved health for all Americans. I think it is fully justified.

I could go on and talk about some of the areas we cut over last year's level, like the National Health Service Corps, or clinical training in mental health, alcohol and drug abuse, or health teaching facility grants. I could go on about other areas where we restored funding to last year's levels, like in nursing student programs, where we are experiencing a severe nationwide shortage of nurses.

However, it is more important for me to make the point that we have a good bill here, carefully crafted and meant to make the best decision for each of the more than 300 accounts in this bill.

This is a good bill.

It is both fiscally responsible and humanly responsive.

I believe you can support this bill in good faith and in good conscience.

There are two quick points about the bill and the report that I would like to clarify.

The first is that with respect to title XX social services block grant, funds are to be allocated and distributed to the States based on the full entitlement amount authorized for the program, $2.45 billion.

The second is that with respect to mental health clinical training, I would like to reemphasize the intent of the committee as expressed in the report that funds be distributed with a reasonable balance among the four core disciplines.

The programs in this bill are more important than in any year since the Great Depression. There are more than 11 million unemployed in this country now. More than half have exhausted their unemployment benefits. They have no prospect for a job. They have lost their medical insurance, and are postponing needed medical treatment.

On Monday, in the early segment of the Today Show, there was a report on the closing of a plant in the town of Chester in my district. Chester is a small town, isolated in the hills of western Massachusetts. This plant was the one source of jobs in the community. It had been producing industrial grinding wheels since 1888. The 65 workers had an average of 18 years on the job. And now there is really nowhere for them to turn.

One of the workers, a young man with a wife and two children, was asked how he would make out, with winter coming on. You have to picture the background—the old, white colonial house nestled among the bare trees in the back hills of New England. His answer could have been given by millions of people in this country today. "There is fuel assistance," he said, "but I really am used to providing for my family on my own."

There are many, many people who will be depending on the programs in this bill for the first time in their lives. They will do so with reluctance, but with nowhere else to turn. The Government cannot take care of everyone's problems all of the time, but it can meet some serious needs in the nick of time. We have balanced, we have compromised, we have struggled, in this bill, to do the best job we can with the resources available to us. Our resources are not as free flowing as they once were, that much is clear. And the need to exercise restraint at a time of record Federal deficits is also clear. But as you think about this bill and what it does, there is one thing I would like to leave you with—for every ounce of fiscal restraint in this bill, there is a pound of unmet need.

□ 1030

In closing, I want to compliment my chairman, BILL NATCHER, and all of the other committee members, including my good friend JOE EARLY.

I want to take this opportunity to say, in addition, that we have one of the finest staffs of any committee in this Congress, headed up by Henry Neil, Fred Pfluger, Bob Knisley, Mike Stephens, and over on our side, Jim Kulikowski and Betti Lou Taylor over in the subcommittee room—and we are proud of all of them.

□ 1045

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I will be glad to yield to my good friend from Pennsylvania.

Mr. WALKER. Mr. Chairman, I thank the gentleman for yielding to me. There had been some concern expressed that I would like to get clarified about the educational block grant program, that some of the language in the report might tend to make people believe that there were categorical funding streams being created for programs that supposedly had been folded into the block grant.

Can the gentleman give us some assurance that the block grant has not been tampered with in this legislation?

Mr. CONTE. Yes, I can assure the gentleman from Pennsylvania. We have checked that out. I know Secretary Bell has called, me, and he is very concerned about it. It is a new block grant created in 1981, and it should not be tampered with by re-creating the categorical programs it was desiged to replace.

Mr. WALKER. I thank the gentleman.

Mr. NATCHER. Mr. Chairman, I yield such time as he may consume to the gentleman from Missouri (Mr. VOLKMER).

Mr. VOLKMER. Mr. Chairman, I would like to engage in a colloquy with the gentleman from Kentucky, but prior to doing so I first wish to commend him and the rest of the committee on this legislation, and on their ability to stay within the purview of the budget.

I understand that in the past some emphasis has been placed on the National Cancer Institute in the establishment of comprehensive cancer centers, designed to serve as a national resource for basic clinical research and multidisciplinary patient treatment. Some concern has also been voiced to the NCI to insure that these cancer centers be geographically balanced throughout the United States enabling all to receive comprehensive

treatment within a reasonable driving distance for all, is this not correct?

Mr. NATCHER. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Kentucky.

Mr. NATCHER. It is.

Mr. VOLKMER. Within the budget justification for the NCI lump-sum appropriation there is an item of two hundred thousand dollars for exploratory grants toward the establishment of such centers. I was wondering if the subcommittee chairman was aware of this and the fact there is a complete lack of cancer centers in the Midwest region.

Mr. NATCHER. I am.

Mr. VOLKMER. Fortunately, there is a high quality cancer facility now existing in Columbia, Mo., the Ellis Fischel State Cancer Center. I have been informed that this State supported hospital may make an application to the NCI for the exploratory grant and because of their existing facilities I believe the application has an excellent chance for a favorable review. This being the case, the absence of a comprehensive care center in the Midwest region and the facilities at Columbia, should the application be favorably reviewed by NCI, would the gentleman support the grant of these moneys listed in the budget justification at the full amount.

Mr. NATCHER. I believe the gentleman has stated the case well and yes I would support the money granted at the full amount should the application be favorably reviewed.

Mr. VOLKMER. Mr. Chairman, I thank the gentleman from Kentucky.

Mr. CONTE. Mr. Chairman, I yield 5 minutes to my good friend, the distinguished gentleman from Louisiana (Mr. LIVINGSTON), a member of the committee.

Mr. LIVINGSTON. Mr. Chairman, I thank my distinguished ranking member of the committee for yielding to me. I first want to say how much of a pleasure it is for me to serve with him and with my distinguished chairman of the committee. Having been here in Congress and served for about 5½ years, I can tell the Members that there are no finer gentlemen than these two, and they do an outstanding job for this body.

First, Mr. Chairman, I think it is important to note that the funding levels approved for the majority of the programs in this bill are right at about 1982 levels. That means that this bill is in line with the general theme of the first concurrent budget resolution, which passed with bipartisan support earlier this year. Second, while this bill's aggregate budget authority for its programs is almost $21 billion over the 1982 levels, $20 billion of that increase comes in the form of trust funds and permanent appropriations which we commonly refer to as "uncontrollables." Therefore, we can do nothing about them unless we actually change the law.

Increases in discretionary programs under their jurisdiction amount to really only about $1.1 billion over the 1982 levels. Now, that does not mean that we have ignored the key social priorities that are encompassed within the jurisdiction of the subcommittee. One only really has to take a look at pages 5 and 6 of the committee report to appreciate the full degree of the dedicated service exhibited by our distinguished chairman, Mr. NATCHER, and our most talented ranking minority member on the committee, Mr. CONTE, and the work that they have put in on the 1983 bill.

I want to also particularly commend Mr. EARLY and the other members of the subcommittee, as well as Chairman NATCHER and Mr. CONTE, for their efforts in funding vocational education programs at practical levels above the administration's original 1982 request and above the fiscal year 1982 levels. It is my firm belief that vocational education programs go hand-in-hand with the President's new job training initiative, and that they are vital in providing practical and alternative job skills for our present and future job hunters.

Now, at this point, Mr. Chairman, I would like to address a couple of questions to the distinguished chairman of the subcommittee, and just reiterate a couple of things I heard him and our distinguished ranking minority member point out.

Mr. Chairman, is it not true that the bill as reported to the House floor is approximately $9.5 billion under the committee's 302(b) allocation level?

Mr. NATCHER. Mr. Chairman, if the gentleman will yield—

Mr. LIVINGSTON. Delighted.

Mr. NATCHER. First, I would like to say to the gentleman from Louisiana that it is a distinct honor and privilege for me to serve with him on this subcommittee. The gentleman is an able member of our subcommittee, and, Mr. Chairman, I would like to say that to the committee.

The gentleman is correct. At this point we are $9,556 million under our allocation. With the additional amounts for the entitlements and unauthorized programs which will have to be provided in a supplemental next year, we will still be approximately $1 billion under our section 302 allocation.

Mr. LIVINGSTON. That is not withstanding any foreseeable supplemental request that might be made by the administration?

Mr. NATCHER. The gentleman is correct, Mr. Chairman.

Mr. LIVINGSTON. I thank the gentleman for his responses, and again I want to commend him for his leadership. It has been an inspiration to me as I served on the committee for the last 2 years. I also want to commend again my ranking minority leader and the distinguished chairman for the sound decisions that they have reached. This has not been an easy bill to address over the extended period of time that we have considered it.

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

Mr. CONTE. Mr. Chairman, I yield 2 additional minutes to the gentleman from Louisiana.

Mr. LIVINGSTON. Mr. Chairman, I also appreciate the invaluable assistance that both the majority and the minority staff have provided to me and my staff. They have made all the work on this subcommittee not only enjoyable but productive and fruitful.

Mr. Chairman, I also appreciate the gentleman's clarification on the budgetary aspects of this bill. While there are some question I do have about outlays that still concern me, I think it is important that we all realize just where this bill stands in terms of budgetary authority in relation to the first budget resolution that many of us on both sides of the aisle supported earlier this year. In view of that standing, I intend to support the passage of this bill, and I urge both my Republican and Democratic colleagues to do likewise.

Mr. CONTE. Mr. Chairman, I yield 5 minutes to my good friend, the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Chairman, I thank the gentleman from Massachusetts for yielding me the time.

Mr. Chairman, at the time of the last election just finished, we came out with a variety of interpretations about the mandate of that election, but I think that one thing was clear from all the various interpretations, and that is that the American people spoke clearly and said that they want America put back to work, that they want jobs for our citizens. Congress now appears ready to respond to that particular mandate with a variety of job creation proposals. Those proposals range over a wide spectrum as well. Some of them would raise taxes; some of them would increase the deficit; all of them that have been suggested in some way favor increased Government spending.

I, at the appropriate time in the consideration of this bill, will offer an amendment that seeks to create jobs, thousands of jobs, but does none of those things. It does not raise taxes or increase the deficit, and will not increase Government spending. It is a simple statement, and I think it is a statement with which we should all agree, that the activities of the Federal Government should not be denying job opportunities.

We might all agree that the Federal Government should not be actively

preventing people from getting jobs, but in fact it is, and it has been. A compendium of recent studies shows that the policies of the Federal Government may be keeping more than 500,000 people—more than a half million Americans—off the job rolls. At these times of unacceptably high unemployment, at the very least we of the Congress should act to stop the bureaucracy from keeping people from working. We should create a presumption in favor of jobs throughout the Government.

We in the Congress should say clearly that jobs are our highest priority, that no program and no set of regulations is more important to us than Americans going to work.

My amendment will help assure that kind of priority. It says clearly and simply that the funds appropriated in this legislation may not be used to deny job opportunities. I cannot imagine that there would be any controversy about such a provision in these times of economic downturn. I cannot imagine that anyone who has jobs as the highest priority would oppose this amendment.

My language does exactly what nearly all of us said in recent weeks that we want to see done. We want to see jobs provided. My amendment would see to it that the Federal Government does not stand in the way of more jobs in the future. I urge its adoption when it is presented.

Mr. Chairman, I yield back the balance of my time.

Mr. NATCHER. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time on this side.

Mr. CONTE. Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Chairman, I ask the gentleman to yield for a question and colloquy. As I understand it, presently discretionary programs are $4.269 billion under the 302(b) allocation.

Mr. CONTE. That is my understanding.

Mr. REGULA. And further as I understand it, the subcommittee has reserved a total of approximately $3.854 billion for the three deferred items: Employment and training assistance; refugee and entrants assistance; and the ETA program amendments.

Mr. CONTE. That is what we reserved under this bill.

Mr. REGULA. And if I would understand it correctly, even if you add what is reserved to what the bill provides in discretionary spending, total discretionary programs would still be about $400 million under the 302(b) allocation.

Mr. CONTE. The gentleman from Ohio is exactly right.

Mr. REGULA. Given those numbers on the amount reserved for discretionary programs and recognizing that there will be additional entitlement spending of about $5 billion, it is my understanding that the administration supports the bill at the levels that we have just discussed.

□ 1100

Mr. CONTE. Mr. Chairman, that is my understanding. There may be some question in regard to the new jobs training bill and what the price tag is going to be on that. Now, I cannot stand here on the floor and say what it is going to be and what it will do to our projections, but that is the only thing about which I am at all hesitant.

Mr. REGULA. But at least at the present anticipated funding levels for the deferred discretionary programs, the resulting bill would be $400 million less than the 302(b) allocation, and we should still be well within the budgeted amount; is that correct?

Mr. CONTE. The gentleman is absolutely right. The committee reserved $3.1 billion in accord with the first budget resolution for jobs training, and I do not think the committee will take any action until the President comes up with a request.

Mr. REGULA. Mr. Chairman, I appreciate the gentleman's responses. I think the committee has done a good job on this, and the bill deserves the support of all the Members.

● Mr. FRENZEL. Mr. Chairman, H.R. 7205, the Labor, Health, and Human Services and Education and related agencies appropriation for fiscal year 1983, is described in a House Budget Committee early warning report for the week of November 29, 1982, as over the budget resolution ceilings by $1.9 billion in discretionary spending outlays.

Except for the objectionable $1.9 billion overage in discretionary outlays, H.R. 7205 gives an appearance of budget conformity. However, appearances are deceiving. Closer examination reveals that within this bill there are hidden instances of substantial underfunding. The inevitable result will be a huge supplemental appropriation next year.

Discretionary programs are underfunded by about $4.6 billion, mainly because moneys for employment training assistance and refugee assistance were not included in the bill. The Committee deferred action on these programs, but their funding requirements will have to be met. According to the early warning report, funding for these programs will exceed the budget resolution by $522 million in outlays.

The worst feature of this bill however, is the funding shortfall for certain entitlements and mandatory programs. Together, underfunding for mandatories and entitlements comes to about $5.5 billion, making the bill's total for underfunding about $10 billion. Supplementals will be needed in the spring for GSL's, Human Services block grants, medicaid, SSI, and AFDC.

It is surely not the intention of the committee to deprive this body. Nonetheless, the underfunding hidden in this bill gives a false image of spending restraint which clearly does not exist.

Budgeting by supplemental is wrong. The passage of a bill without full funding for mandatory and entitlement programs gives the committee a smokescreen behind which discretionary programs can be overspent. The underfunding in this bill results in the bill's total outlays being over the budget resolution outlay targets by approximately $6 billion. That is an overage which cannot be tolerated. This bill should be returned to the committee for rehabilitation, or it should be defeated.●

● Mr. CROCKETT. Mr. Chairman, I rise in strong support for the two amendments being offered today by my colleague TOM FOGLIETTA to the Labor/HHS/Education appropriations bill, H.R. 7205.

Mr. FOGLIETTA, through these amendments, is voicing the frustration and outrage many of us feel at the insufficient funding for domestic programs being passed by this Congress. The amendments, which seek to add funding to the low-income energy assistance program and the social services block grant for meals for the elderly, are vital to meeting the needs of our constituents this winter.

I have been contacted by the State of Michigan, by many public and private agencies, and by concerned groups and individuals in Detroit about the shortfall in Federal funding for the low-income energy assistance program, and about the serious shortfalls in Federal assistance to nutrition and feeding programs for senior citizens.

People are afraid—and rightly so—that the Federal Government has abandoned them to hunger and cold, in the name of more defense spending or a balanced budget.

The increased appropriations being suggested by Mr. FOGLIETTA do not jeopardize in any way the budget totals we have set for ourselves. In both cases—for the low-income energy assistance program and for the social services block grant—the Foglietta amendments would bring the appropriations level up only to the authorization level. This would add $25 million to the low-income energy assistance program, and $49.5 million for meals for senior citizens.

I have taken the floor several times during this Congress to relate to my colleagues the desperate conditions under which many of my constituents in Detroit are forced to exist. Unemployment is 25 percent in the core city,

and much higher among minorities and teenagers. The auto industry is still in decline; unemployment benefits have run out for tens of thousands of men and women. The Federal Government has cut education funding and housing assistance. Health care delivery and training systems have been drastically cut.

I would like to read to my colleagues from just a few of the hundreds of letters my office has received protesting these cuts:

Miss Margaret Waterman writes:

Surely we cannot offer bread for the world if we do not feed the hungry here. Programs like school hot lunches and Women, Children, and Infants have already been cut. I hope you will use your influence to slice a mere half-billion from our overgrown military budget, and use the money where it is needed.

Mr. Ignacio Morales says;

I feel that you spend too much money on bombs when people are so hungry in the street.

Robert and Christine Santoro ask:

Why should our hungry citizens pay the price with misery, hunger, and ill health in their lives just because President Reagan wants to look strong to the Russians? I'm sure he eats good dinners.

And, one of the most poignant letters came from Mr. Norbert Kidd, who says:

As you know, our country has been blessed by God with resources and good farm land. It is a shame to see people going through garbage cans outside Burger King, as I recently have seen. It is a shame to see our elderly going hungry near the end of a month, because their sparse funds have been eaten up by inflation. I am also disturbed to see our budget for bombs, missiles and multiplication of armaments growing and growing. As my Congressman, I ask you to fight for more food, more money for the hungry, the disabled, the elderly. Common decency demands we provide the necessities of life for people, that we allow them to live with the dignity to which they are entitled.

I urge my colleagues to heed these cries of anguish, and to begin reversing the policies which have brought us to this point, by accepting the Foglietta amendments today.●

● Mr. ZEFERETTI. Mr. Chairman, I rise in support of H.R. 7205, the fiscal year 1983 appropriation bill for the Departments of Labor, Health and Human Services and Education, and related agencies. In doing so I want to say a few words, as chairman of the House Select Committee on Narcotics Abuse and Control, about certain items in the bill relating to drug abuse prevention and treatment.

H.R. 7205 includes $61,352,000 for Federal drug abuse programs administered by the National Institute on Drug Abuse (NIDA). It also contains $432 million for the alcohol, drug abuse and mental health (ADM) block grant enacted last year to replace a number of separate, Federal categorical programs. These block grant funds are allocated to the States to support a broad range of prevention, treatment, and rehabilitation services including those for the drug abusers.

Although the combined total of these funds is substantially less than 1 percent of the $85.4 billion recommended for appropriation in this bill, the importance of this relatively small amount cannot be overstated. Drug abuse continues to be one of the Nation's most pervasive and serious public health problems. A recent study conservatively estimates that drug abuse costs our society $16.4 billion each year. This estimate includes the direct costs of treatment and rehabilitation and the indirect costs stemming from reduced economic productivity caused by drug abuse. It does not include the enormous cost of criminal activity associated with drug abuse. Nor does it measure the immense pain, suffering, and family disruption that often accompany drug abuse. Clearly the benefits to be gained by reducing the incidence of drug abuse and its attendant social costs more than justify the small expenditure of funds H.R. 7205 would allow.

For nearly a decade, NIDA has been the agency with lead responsibility for Federal efforts to reduce the demand for drugs. Although the new ADM block grant has shifted primary responsibility for delivery of drug abuse services from NIDA to the States, NIDA continues to be responsible for providing national leadership in the critical areas of research, research, training, data collection and analysis, and information dissemination. Budget cuts enacted in 1982, however, severely weakened NIDA's ability to perform these functions effectively.

The $61.4 million provided for NIDA in H.R. 7205 is slightly more than $1 million for the administration's request for 1983 and $4 million over the 1982 appropriation. Funds for research are increased by more than 15 percent over the 1982 level. This increase will permit NIDA to award 63 new extramural research project grants in 1983 as compared to 26 in 1982 and will enable NIDA to increase research support in two of its highest priority areas, marihuana and cocaine. Even with the increases requested by the administration and the additional amounts approved by the Appropriations Committee, however, the number of new extramural research projects NIDA expects to fund in 1983 is still substantially below the average annual level of 78 awards for all previous years. The amounts provided in the bill will also allow NIDA to support the same number of research trainees in 1983 that were supported in 1982 and will restore data collection and analysis programs and information dissemination activities to 1981 levels. Without the increases approved for these latter two areas, NIDA would have been forced to choose between one or the other. Both functions could not have been continued at the reduced 1982 funding levels. In short, while H.R. 7205 includes significant increases for NIDA, the amounts provided are only adequate to sustain NIDA's activities at a minimally acceptable level.

For 1983, H.R. 7205 freezes funds for the ADM block grant at the 1982 level of $432 million. This amount is 20 percent below the total 1981 appropriations for the predecessor categorical programs that were consolidated in the new block grant.

In a recent report discussing the first year transition to new block grants enacted in 1981, GAO indicates that the full impact of reduced block grant funding levels has yet to be felt by most States. The effects of the cuts have been blunted by a number of mitigating factors including continued Federal outlays from awards made under the superseded categorical programs. The report notes that about 97 percent of previous categorical awards for alcohol, drug abuse, and mental health services extended into 1982. Two thirds of these awards extended into the third quarter of 1982 and many into 1983. As a result, States had drawn only 15 percent of their ADM funds through the first half of fiscal year 1982.

I am greatly concerned that the ADM appropriation in H.R. 7205 is dangerously low. As the pipeline of Federal funds from previous categorical awards dries up during 1983, States will increasingly feel that pinch of reduced block grant funding levels. In the area of drug abuse, this could cause treatment capacity to shrink dramatically and contribute to increased addict crime and human tragedy. I urge the House to monitor carefully the States' ability to meet needs for drug abuse services under the ADM block grant and to be prepared to act quickly to avert any treatment crisis that may develop.●

● Mr. BONER. Mr. Chairman, I wish to rise in support of the pending legislation, H.R. 7205, the Labor, Health and Human Services appropriations for 1983.

Title II of this legislation contains appropriations which enable the Secretary of Health and Human Services to enter into appropriate financial arrangements to repay in full any loan to Meharry Medical College guaranteed under section 726 of the Public Health Service Act.

While we in our budgetary process consider 13 appropriations, I believe that this is the most important one for those of us who have compassion for our fellow man.

An important component of this legislation contained on page 22 deals with Meharry Medical College which is located in my district. Meharry Med-

ical College was founded in 1876 in Nashville, Tenn. Today, it is recognized as one of the leading national institutions dedicated to the training of black physicians and dentists in this country. In fact, almost half of all black physicians and dentists in the United States received their training at Meharry. Currently, about 10 percent of all blacks enrolled at American medical colleges attend school there. On an international level, Meharry has educated more political leaders on the entire continent of Africa than any other institution of higher learning in America.

Over the years, its graduates have established a longstanding record of providing health care to communities that are traditionally underserved. Today, 80 percent of Meharry's graduates are practicing in our rural and inner-city areas. Primary medical care is desperately needed in these communities where there is a great shortage of doctors and a high concentration of minorities. Meharry graduates have consistently met the challenge of providing needed medical attention to our country's most frequently neglected neighborhoods, but the school's ability to maintain its reputation in this field is in a precarious status.

Because of the diminishing State and local support and the fact that most of its students come from disadvantaged backgrounds, the school is now facing complex financial difficulties. This financial instability poses a threat to the college's future medical mission. More importantly, because of its historic role and its outstanding reputation both at home and abroad, the future steadiness of the college has far-reaching national and international consequences.

In June of this year President Reagan established an intergovernmental task force to study the appropriate role for the Government in assisting Meharry achieve self-sufficiency.

On June 25, Secretary Schweiker announced the President's decision to assist Meharry by adopting four recommendations made by the task force. The recommendation that the Department of Health and Human Services arrange to acquire the balance of the $29 million loan made to finance the construction of Meharry's teaching hospital is included in this appropriation.

I have been working diligently to implement the other recommendations made by the task force. In September, I chaired a special oversight hearing of the House Veterans' Affairs Committee in Nashville to investigate the administration's request to expand the affiliation between the Murfreesboro VA Medical Center and Meharry Medical Center. Based on testimony given at that hearing, the Veterans' Affairs Committee authorized the full $17 million needed for construction and renovation at the hospital. The initial money needed for the development of a design and site preparation was contained in the HUD and Independent Agencies Appropriations which passed the House on September 29. The Veterans' Administration has already awarded the architectural contract and the first phase of the construction should be scheduled soon.

Mr. Chairman, the House of Representatives has always taken the lead in the fight to provide adequate resources to Meharry Medical College, I am personally urging the Members of the Senate to accept this House provision in their legislation. It is time that the Federal Government recognized Meharry Medical College as the national resource that it is. By adoption of this legislation, we are taking a step in that direction.

I would like to particularly commend my colleague from Ohio (Mr. STOKES) for his leadership and diligent efforts to achieve this noble goal. And I urge my other colleagues in the House to support this effort.

Thank you, Mr. Chairman.●

● Mr. PERKINS. Mr. Chairman, I just want to say a few words about the great contribution that has been made by my Kentucky friend and neighbor, Congressman WILLIAM H. NATCHER, the distinguished chairman of the Subcommittee on Labor, Health and Human Services Appropriations.

Frankly, I do not know how he has been able to do so well contending with the conflicting interests that were involved in passing the Labor-HHS bill today.

Given the severely limited resources available under the Budget, I think BILL NATCHER and his colleagues have done a monumental job.

We all know of his enormous ability as a legislator, honed and sharpened by 29 years in the House. We have all been impressed by his firmness and fairness as a presiding officer.

I think that even now the country is coming to know him as a statesman of the first rank who is able to consider and balance the forces and counterforces that seek to influence what this Congress does.

He is certainly known as one of the great friends of education in America. Without his leadership, his patience, and his preeminent fairness at a time when some in this Government do not place such value upon fairness, the whole educational system of the country would be suffering.

The appropriation bill he brought to the floor and successfully steered to passage this morning provides basically for level funding for the Federal Government's major education programs. He forcefully fought off the Reagan administration's attempts to inflict severe cutbacks on our Nation's basic education and training programs.

For the title I compensatory education program, there will be an appropriation of $3 billion. For Pell grants an appropriation of $2.4 billion is provided. For supplemental grants $355 million; for work-study $528 million; and for direct loans $193 million.

Mr. NATCHER was even able to provide for some small increases in his bill above current funding. Vocational and adult education is increased from $742.3 million last year to $836.8 million this year. Education for the handicapped is increased from $1,068.6 million to $1,103.7 million. Impact aid is raised from $456.2 million to $475 million.

Mr. Speaker, the House completed its consideration of the Labor-HHS bill so promptly this morning that many members of the Education and Labor Committee, including myself, could not get over to the floor in time to speak on the bill. I especially wanted to congratulate and commend BILL NATCHER for his fine work before the membership of the House. But, unfortunately, our committee was in the midst of a markup session on the foreign labor portions of the new immigration legislation which we had to report today to comply with the rules of the House. Consequently, all of us were not able to be on the floor during the consideration of the appropriations bill.

Therefore, I want to take this opportunity to commend the distinguished Labor-HHS Appropriations Subcomittee chairman, BILL NATCHER, for his fine work with that bill. He is indeed a dedicated and farsighted fighter in behalf of educational opportunity.●

● Mr. BIAGGI. Mr. Chairman, I wish to commend Chairman NATCHER and ranking Republican Member CONTE for their leadership in fashioning this legislation. I am especially pleased that the committee has approved a modest increase of $11.352 million for ACTION agency programs at a level of $129.073 million. As a senior member of the House Education and Labor Committee and an original member of the Select Committee on Aging, I have a special interest in the operation of ACTION's older American volunteer programs. This bill provides a total of $87 million for these programs, an increase of $2.3 million for fiscal year 1982. Specifically it appropriates $27.4 million for the retired senior volunteer program, $48.4 million for the Foster Grandparent program and $12 million for the Senior Companion program.

While I support these funding levels, I wish to raise the concurrent concerns that I have with the way ACTION has been administering these programs, especially the Foster Grandparent program. The Agency, under the aegis of better management practices, has been attempting to decentralize a number of Foster Grandparent pro-

grams which are operated by State agencies and supplemented by State dollars. The net effect of this "decentralization"—while on its face it is supposed to allow programs to be run at the "local level" with community sponsors—would be to reduce or close down a number of FG programs and thus, depriving many of the developmentally disabled children served under this worthy program from services. It would also terminate many of the volunteers who depend upon these programs for a daily opportunity to feel useful and to feel productive. In addition, these volunteers receive a host of related services from State-sponsored programs, such as transportation, and daily meals, that they might otherwise not receive under locally run programs with sponsors who have little experience or resources in this area.

Of personal concern to myself is the imminent crisis facing the New York State Foster Grandparent program, sponsored by the State's office of mental retardation and developmental disabilities. For the past 10 years, this agency has been successfully providing services to more than 1,000 developmentally disabled children through more than 530 Foster Grandparents in 11 counties of the State. ACTION has announced its intention to terminate this grant to OMRDD on February 28, 1983 despite the fact that they have not acquired alternative sponsors to provide the service in the 11 counties. ACTION contends that no current services will be reduced by this move but the fact is that some $2.5 million in State funds would be jeopardized. This is because the State appropriation for this program cannot be transferred under contract to community-based organizations—which is the only way the program could expect to be continued since local units of government would be especially hard pressed to secure the necessary local revenues during fiscal year 1983.

It would be my intention to pursue this issue further if a continuing appropriations measure becomes necessary prior to the adjournment of Congress for this session. I have been advised that ACTION plans to begin decentralization in a number of other States which have State agency sponsors—21 in all—and I believe that we must send a strong message to ACTION now that we will not tolerate this backdoor attempt to cut back on these vital OAV programs which are the lifeblood of 18,000 Foster Grandparents nationwide and the 54,000 children with special needs which they serve.●

● Mr. YOUNG of Florida. Mr. Chairman, included in the Department of Labor appropriations bill we are considering today is $277.1 million to provide full funding through June 30, 1984, for the senior community service employment program.

The threat of elimination of this program earlier in the year created a great deal of anxiety among the 54,200 older Americans throughout our Nation who are employed by this program. The approval of this appropriations bill today will reaffirm our commitment to these workers, their jobs and the communities they serve by assuring full funding for the next 18 months.

The outcry of support for this program earlier this year by senior community service employees and employers from all parts of the United States is testament to the success of the program and the high regard with which it is held. Just as in 1975 and 1976, when the elimination of the program also was recommended, my colleagues and I on the Appropriations Committee were successful in September in adding the needed funds for this program in the proper appropriations bills.

With the senior employment program's future guaranteed by the funding approval today, the employees of this program can now devote their attention to serving their communities without the fear associated with an uncertain future.●

● Mr. PURSELL. Mr. Chairman, I rise today to support the funding recommendations of the House Committee on Appropriations for the Departments of Labor, Health and Human Services, and Education for fiscal year 1983. The funding recommendations fall well within the limitations contained in the fiscal year 1983 budget resolution for these departments making this legislation a well-balanced funding measure. It represents the best attempt possible at fiscal restraint while at the same time providing essential financial support for the bulk of our Government's most necessary responsibilities and commitments. The funding recommendations of this legislation reflect the outstanding leadership of the distinguished chairman of the House Appropriations Subcommittee on Labor, Health and Human Services, and Education, Congressman BILL NATCHER, as well as the unmatched contributions of the committee and subcommittee's ranking Republican, Congressman SILVIO CONTE.

As most Members realize, the appropriations bill provides funding for services and programs ranging from employment and training to public broadcasting. Of particular importance to me are those portions which fund the research and training activities of nurses. Within the Alcohol, Drug Abuse, and Mental Health Administration, the Health Resources Administration and the Health Services Administration are found programs which are as important to the profession of nursing as nursing is to our health care. Much to my regret, Federal financial support for nursing research, training and basic education has fallen at a faster pace and greater percentage than other areas of health care. My experience with the contributions of nurses to health care convinces me that Federal funds spent in this area must be maintained.

I am also interested in the funding recommendations for student financial assistance. No other Federal investment holds as great a promise for America's future as the funds we spend to educate and train America's youth. From title I educational grants to supplemental educational opportunity grants, to financial assistance for higher education and professional training, this legislation will help to insure the education of Americans of all ages. In my estimation, it is an investment in our future that must continue.

I am further encouraged by the bill's recommendations on a number of issues including indirect costs associated with research projects. Although the administration had recommended for the budgets of the National Institutes of Health that only 90 percent of these indirect costs would be borne by the Federal Government, the legislation provides sufficient funds to restore the proposed 10-percent across-the-board reduction in indirect costs on research grants. Passage of this legislation will insure that the Department of Health and Human Services will continue the established practice of paying full indirect costs for research conducted during fiscal year 1983.

Of concern to me are two matters not entirely resolved by the legislation. These involve the formula allocation of title X family planning funds and the issue of State administrative funds for chapter I of the Education Consolidation and Improvement Act. The legislation includes a funding recommendation of $124 million for family planning services, a sum equal to the appropriation for fiscal year 1982. However, Federal family planning assistance decreased significantly from fiscal year 1981 to fiscal year 1982. This funding decrease was accompanied by a temporary change in the formula allocation of the funds. The combined result of these factors was a disproportionate decrease in family planning funds to region V.

There is an unresolved difference of opinion between the Department of Health and Human Services and service providers in region V about the funding reduction absorbed by the region. Unfortunately, meetings with the Department and region V providers have failed to resolve the problem. Language in the report accompanying this legislation requires the Depart-

ment of Health and Human Services to review its system for allocating family planning resources to determine its accuracy and fairness. This report is anxiously awaited by providers in region V and hopefully will be available in the near future. In the meantime, I sincerely hope the Department will continue to devote itself to a resolution of the funding difficulties which occurred during fiscal year 1982.

I was encouraged to hear the colloquy between our distinguished subcommittee chairman, Congressman NATCHER and another distinguished member of the committee, Congressman FAZIO, on the subject of State administration of the Education Consolidation and Improvement Act. To my knowledge, this issue has not been fully resolved. According to section 194(a)(1) of the Elementary and Secondary Education Act, State administration funds should equal 1 percent of the State grant for that year. An inequitable distribution of State administration funds, however, has occurred this year. The administrative portion was calculated on the initial State grants and not on the subsequent supplement allotments. Consequently, one State received as little as 0.79 percent for State administration. This is simply a matter of equity and has considerable importance to many States, including my home State of Michigan. I would hope the Department of Education will seek resolution of this inequity by reprograming needed funds to those States which have not received the required 1 percent.

Mr. Chairman, I urge the adoption of this legislation and again express my admiration for the work of Chairman NATCHER, Congressman CONTE and my colleagues on the Subcommittee on Labor, Health and Human Services, and Education.●

● Mr. GILMAN. Mr. Chairman, I rise to commend the gentleman from New York for his excellent comments on the need for more adequate funding for the impact aid program. I wholeheartedly support his statement and share his concern about the problems faced by our secondary school next to West Point, which has recently become a part of the gentleman's new congressional district. I have been involved in a number of battles over the years to assure sufficient funding for the impact aid program which is such a vital source of assistance to the 4,300 school districts across our Nation whose residents are affected by Federal installations in varying degrees. Up until the recent redistricting in New York, I had the privilege of representing the people living in the town of Highlands and the village of Highland Falls where the U.S. Military Academy at West Point is located.

Of the several school districts in my former congressional district which participated in the impacted area program, the Highland Falls-Fort Montgomery Central School District, containing within its borders the U.S. Military Academy at West Point, has been particularly heavily impacted by reason of the fact that not only does it educate many Federal students but also that its physical, taxable territory is taken up almost entirely (more then 90 percent) by the Academy. Due to funding cuts over the last few years in the Department of Education appropriations for impact aid, this school district is hard pressed to pay its bills to maintain quality education for the children of local families and the families of West Point employees. Because West Point takes up over 90 percent of the land, the property based on which this school district is dependent for the levying of property tax for assuring adequate education has been significantly reduced. Yet the payment of impact aid funds has been substantially cut this year and would be further cut by an additional 10 percent in fiscal year 1983. Needless to say, this has caused the relationship between the townspeople and the Federal employees at West Point to reach a breaking point. The citizens of Highland Falls are honored to have the Academy located there, but we cannot ask these same citizens to shoulder the greater part of the burden of educating the children of the Federal employees attending the public schools there. This considerable reduction in impact aid funding has forced the Highland Falls-Fort Montgomery School District to pursue every avenue over recent months for petitioning for more funds. All doors have been shut, and as a last resort these citizens are considering action to bar West Point families from sending their children to the local high school or as an alternate, charging tuition to the students from West Point.

The cuts have left the school district short some $200,000, with the resulting reductions in staff and programs that such funding shortages bring about. In 1980, the village's impact aid allocation was approximately $621,000. For this year it is approximately $410,000. Accordingly, I urge this body to consider the importance of assuring the best possible education to the children of those who serve our Nation through the military and the equally crucial need for fairness and justice in assisting the local school districts responsible for this task. I also urge my colleagues to support sufficient funding to keep the high school in Highland Falls in operation in any measures we may be able to devise in the next weeks acceptable to the Appropriations Committee, the Department of Education and the Department of Defense. Our U.S. Military Academy and its neighbors deserve our best efforts.●

● Mr. STOKES. Mr. Chairman, I want to express my strong support of H.R. 7205, a bill making fiscal year 1983 appropriations for the Departments of Health and Human Services, Education, Labor, and related agencies.

Mr. Chairman, this bill is one of the largest and most complex appropriations bills that comes before the House each year. In my mind, it is one of the most important because it serves the people of this Nation. The quality of life for many millions of Americans of all ages, races, and creeds is significantly affected by the vital human needs programs which are funded through this legislation.

I want to compliment and commend our subcommittee chairman, BILL NATCHER, for one of the finest jobs he has ever done. He has brought forth a bill which is responsible and responsive, even given the fiscal straitjacket placed upon our subcommittee by budget resolution targets that are too stringent and unrealistic. Our subcommittee really struggled to balance funding for key programs like maternal and child health, biomedical research, low income energy assistance, compensatory aid for poor children, student financial assistance, and so forth, with the harsh realities of the budget contraints facing the subcommittee.

Under the leadership of Chairman NATCHER, however, this bill continues to provide strong Federal support for the programs which are essential to the well-being of millions of American families. While I personally would support much higher funding levels for most of the activities in this bill, I feel confident in knowing that this bill is our best hope of maintaining some measure of compassion and commitment to our Nation's disadvantaged citizens, who have suffered the human tragedy of the Reagan economic program.

I would also mention that this bill is well within the budget targets established under the fiscal year 1983 budget resolution. It is over the President's budget by $5.3 billion, because the budget cuts proposed by President Reagan were simply too drastic and detrimental. Nevertheless, even with the $5.3 billion in restorations made to the President's budget, the total amount provided for in this bill is $85.3 billion, only 1.4 percent more than the $84.2 billion provided in fiscal year 1982. So, in real terms, considering inflation, we are actually spending less for the agencies funded in this measure.

Mr. Chairman, some of the subcommittee's recommendations regarding the special and deserving programs in H.R. 7205 should be highlighted.

The bill includes $277.1 million to maintain 54,000 jobs for our Nation's senior citizens under title V of the

Older Americans Act. The budget request made no provision for this program.

Our subcommittee also recommended funds important for the continuation of health services to disadvantaged mothers and children through the community health center program, the maternal and child health block grant, and the family planning program. Restorations were made to the President's budget in light of the growing need for these services from families which are now unable to receive medicaid benefits and also for the newly unemployed who have lost health benefits.

Our subcommittee recognized the continuing importance of a strong investment in biomedical research, which ultimately leads to reduced health care costs and an increase in human productivity. A total of $40 billion is recommended for the NIH in order to foster new research advances and research training opportunities.

Continued progress in attacking sickness and disease also depends on having an ample and well-qualified care of medical care providers. Reports have documented, most recently from the U.S. Civil Rights Commission, that the black population still enjoys less access to high quality medical care and providers than should be the case. Our committee has recommended funding for several programs, financial distress, construction grants, and disadvantaged assistance, which will assist Meharry Medical College, Morehouse School of Medicine, and several other predominantly minority health professions schools in training professionals who are committed to serving blacks and other people lacking good health care. These schools serve as a national resource and should be provided the financial resources to accomplish national goals.

In the area of education, our subcommittee simply could not accept the detrimental budget reductions proposed by President Reagan. These proposed reductions totaled more than $4 billion in programs providing direct assistance to our Nation's disadvantaged and handicapped school children and to millions of college students. Dozens of witnesses testified as to the devastating effects which would result if reductions of this magnitude were implemented. Indeed, the Department of Education's own justification for cuts in outstanding programs like title 1, education for the handicapped, Pell grants, and TRIO were weak and unsupported by the facts. Consequently, H.R. 7205 maintains fiscal year 1982 levels of spending for most of the Department of Education programs. A few particularly deserving programs, such as education for the handicapped, rehabilitation services, vocational education, TRIO, and the graduate and professional opportunities program were recommended for small increases to help offset the effects of inflation.

Additionally, it is noteworthy that H.R. 7205 maintains fiscal year 1982 funding levels for Head Start, senior citizens nutrition programs, and senior centers, the community services block grant, and keeps the VISTA program intact. Each of these programs plays a vital role in addressing the needs of the children, the elderly, and other special population groups who depend upon their Government in times of need.

Mr. Chairman, the amounts recommended in this bill have been arrived at after much careful deliberation and debate. We have considered the needs of millions of children, youth, families, and the aged in the areas of employment, education, preventive and primary health care, nutrition, and welfare services. I believe that we have struck a careful and sensitive balance between these needs and available resources, so I urge you to support the adoption of the fiscal year 1983 Labor-HHS-Education appropriations bill as reported by the Appropriations Committee.●

● Mr. WEISS. Mr. Chairman, it is with great reservation that I rise in support of the Labor-HHS appropriations bill before us today. Restricted by the parameters of the Republican budget resolution, the appropriations bill provides woefully inadequate funding levels for vital health, education, labor and human services programs. The cuts directed by the budget resolution and codified by reconciliation constitute an unconscionable tearing down of programs that help people, particularly those in need. While money is literally thrown at wasteful and unnecessary military projects, this crucial appropriations bill, and the constraints under which it has been built, will once again ask the weak and the poor, the young and the old, and the disabled and the sick to tighten their belts and to make sacrifices that they can ill afford. The bill largely reflects the will of an administration that chooses to forget that there are real people across our Nation who face real hardships and who very much need the assistance of a compassionate Federal Government.

While this bill falls far short of providing needed funding, it must be stressed that it exceeds the President's request by $5.3 billion and funds many programs that the administration attempted to eliminate or drastically reduce. These important programs include: title V senior employment, work incentives (WIN), women's educational equity program, libraries, supplemental opportunity grants (SEOG), direct student loans (NDSL), Follow Through, Pell grants, title I, and impact aid. For the increased funding, I would like to commend the distinguished chairman from Kentucky and his colleagues on the subcommittee. I fully appreciate the limits under which they had to work and I sympathize with their difficult position.

Most of the discretionary health, education, and human services programs in this bill are funded at approximately last year's reduced levels. However, we can take little comfort in "holding the line" on further budget cuts. Let us not forget that continuing funding at 1982 levels means maintaining cuts of $84 million in maternal and child health, $108 million in alcohol and drug abuse programs, $600 million in title XX, $158 million in community services, $57 million in the new education block grant, $22 million in college work study, $70 million in compensatory education, and $282 million in impact aid from pre-Reagan 1981 levels. Inflation will further erode the services and benefits that these programs are set up to provide. As the recession deepens and unemployment rises, the need for many of these programs increases. These human and social needs do not disappear simply because the administration and the Congress choose to ignore them.

I am also concerned that several of the entitlement programs, including medicaid, AFDC, title XX, and foster care and adoption, are significantly underfunded in this bill. While I understand that the committee intends to provide additional money through a supplemental appropriation for these programs, this process is not guaranteed and leaves the States and cities with tremendous uncertainty about the operation of programs. In particular, title XX will be seriously jeopardized in my own state if funding is not maintained at its current level of $2.4 billion. Under this block grant, New York State funds adoption, day care, family planning, foster care services, protective services for children, and senior citizen centers. Faced with large deficits in its own budget, New York can only plan to fund title XX programs based on the reduced appropriation of $1.9 billion. This 18 percent cut will result in a loss of $33 million to New York and the closing of day care and senior centers throughout the State. In New York City alone, it is projected that 21 senior centers and 46 day care centers would have to be shut down. This unnecessary disruption of services could be avoided by increasing funds for title XX in conference or in the continuing resolution.

Another serious concern with this bill involves the emergency assistance to families program. Although the committee report specifically acknowledges the administration's failure to eliminate the program the bill provides no funding for this program. If funds are not appropriated for EAF, New York State will lose $20 million to

assist needy families with heating fuel costs and emergency shelter costs.

This bill also contains the by now expected prohibitions on Federal funds being used to finance abortion and to bus students for purposes of achieving racial integration in public schools. I strongly believe that these unwarranted and repugnant provisions should be stricken. The abortion provision, in particular, is an inexcusable violation of the rights of individuals. It allows abortions only when the life of the mother is endangered by the prospect of giving birth. Thus, it forbids the financing of abortions for rape and incest victims and for women whose health would be jeopardized by continuing the pregnancy. This provision discriminates against low-income women who rely on medicaid for all health care and poses a fundamental threat to our most basic notions of decency.

Mr. Chairman, this appropriations bill deals a harsh blow to those individuals and families who are most in need. It provides only bare bones funding for programs that help soften the blow of recent economic downturns. It is time that we draw the line and insist that this critical appropriations bill meet the needs of our people rather than the demands of the administration's reckless budget priorities.●

Mr. CONTE. Mr. Chairman, I thank the gentleman from Ohio (Mr. REGULA).

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The Clerk will read.

Mr. NATCHER (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The CHAIRMAN. Are there any points of order against the bill?

POINT OF ORDER

Mr. WALKER. Mr. Chairman, I have a point of order against a section of the bill.

The portion of the bill to which the point of order relates is as follows:

HIGHER AND CONTINUING EDUCATION

For carrying out titles III; VI, part A; VIII; IX, parts B, D and E; title X; and sections 417, 420, and 734 of the Higher Education Act; section 406A(2) of the General Education Provisions Act (20 U.S.C. 1221e-1b(2)); section 102(b)(6) of the Mutual Educational and Cultural Exchange Act of 1961; title XIII, part H, subparts 1 and 2 of the Education Amendments of 1980; H.R. 3598 as passed the House on November 4, 1981; and title V, section 528(5) of the Omnibus Budget Reconciliation Act of 1981, without regard to section 512(b) of the Omnibus Budget Reconciliation Act of 1981, $400,990,000: *Provided,* That $9,000,000 shall be available in connection with the establishment and construction of the General Daniel James Memorial Education Center at Tuskegee Institute, Tuskegee, Alabama, and such sums shall be used for an aerospace science and engineering center and shall remain available for obligation until September 30, 1988: *Provided further,* That funds made available in Public Law 96-536, section 110 for the Wayne Morse Chair of Law and Politics shall remain available for obligation until September 30, 1985: *Provided further,* That $3,000,000 shall be available until expended for the Carl Albert Congressional Research and Studies Center: *Provided further,* That $25,000,000 made available for interest subsidy grants under section 734 of the Higher Education Act shall remain available until expended: *Provided further,* That sections 922(b)(2) and 922(e)(2) of the Higher Education Act shall not apply to funds in this Act.

The CHAIRMAN. The gentleman will state the point of order.

Mr. WALKER. Mr. Chairman, on page 44, lines 11 through 13, there is a section of the bill which is in violation of rule XXI, clause 2, because there is no authorization legislation that has been passed by the Congress for the funding which is appropriated in the bill, and I make a point of order against that language in the bill.

The CHAIRMAN. Does the gentleman from Kentucky (Mr. NATCHER) desire to be heard on the point of order?

Mr. NATCHER. On the point of order, yes, Mr. Chairman, I would like to be heard, but I would like to have a colloquy at this time, with the permission of the gentleman from Pennsylvania (Mr. WALKER).

The CHAIRMAN. The Chair will permit the gentleman from Pennsylvania to yield to the gentleman from Kentucky although ordinarily the Chair controls debate on a point of order.

Mr. WALKER. I am glad to yield to the gentleman from Kentucky.

Mr. NATCHER. Mr. Chairman, let me say to the gentleman from Pennsylvania that, as he knows, this project has been authorized in the House. As I understand, it is before the committee on the other side. I would hope that the gentleman from Pennsylvania would not insist on his point of order at this time. This facility, as the gentleman knows, is being utilized at the present time in honor of one of the great Members who served in this body, the Honorable Carl Albert from Oklahoma, a distinguished Member of the House for many years, later serving as Speaker of the House before his retirement.

I would hope that the gentleman would not insist on his point of order. As the gentleman knows, this project has not yet been authorized on the other side. It has been authorized on this side. We would hope that the gentleman would not insist on his point of order. Then we would see if it could not be handled quickly on the other side by way of authorization, so that this amount could stay in the 1983 bill and not have to wait until the next appropriation bill.

Mr. WALKER. Mr. Chairman, I thank the gentleman for his explanation, and certainly it would be this gentleman's wish that we could get a proper authorization so we could proceed with the project.

My problem is that in checking with the Members on the other side, it is my understanding that they do not intend to proceed with the authorization, so, therefore, we would be in a position of having appropriated funds without appropriate authorization.

I went through the process of doing that, of checking to make certain that we were not in a situation here where the authorizing legislation would follow within a few days after the appropriation. I am assured that that is not the case, that in fact we would have ended up appropriating money here without authorization, and that is what concerns this gentleman in terms of the procedures of the House.

Mr. NATCHER. Mr. Chairman, will the gentleman be kind enough to yield to the gentleman from Oklahoma, Mr. MCCURDY, on the point of order?

Mr. WALKER. I am glad to yield to the gentleman from Oklahoma.

Mr. McCURDY. Mr. Chairman, let me ask the gentleman from Pennsylvania (Mr. WALKER), it is a fact, though, since there is an authorization, we are concerned here only with the House appropriation at this time? Are we concerned about this body?

Mr. WALKER. Mr. Chairman, I will say to the gentleman that the rules make it quite clear that the authorizations have to completely clear the Congress. We have tried in some cases to operate in an ad hoc way to assure that, where there is a matter of a few days separating the two bodies, we do not prevent proper authorizations from going forward and then not having a funding stream to follow them.

In this case, though, I do not believe we are ever going to get the appropriate authorization, from my understanding, so, therefore, we would be in a position of totally violating the rules of the House by appropriating that which has never been authorized.

Mr. McCURDY. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I am glad to yield to the gentleman from Oklahoma.

Mr. McCURDY. Mr. Chairman, let me ask, what if we were to confine it to the House and were able to take it to conference with the Senate and again, having a couple of days, perhaps there could be some more persuasive argument taken to the other body?

Mr. WALKER. Mr. Chairman, I will say to the gentleman that I understand his point, and I certainly understand that he has worked very hard

for this particular bill. I think the House passed the authorization in large part because of the persuasiveness that the gentleman exhibited in this body in this matter.

But we do have a very severe problem in that the Senate does not appear ready to act on the authorization and, of course, we are bound by those Senate decisions as well. That is this gentleman's concerns about the procedures, not only on this sum of money but on further sums of money. I do not believe we can permit the pattern to develop that we in this House are appropriating sums of money that have not been properly authorized as the rules require.

Mr. McCURDY. Mr. Chairman, will the gentleman yield further?

Mr. WALKER. I am glad to yield to the gentleman from Oklahoma.

Mr. McCURDY. Mr. Chairman, does the gentleman have personal problems with the authorization in this body or with the project? Does he understand that this is for matching funds, that this is not a direct appropriation of the amount prescribed in the bill, that this has had broad support from the leadership on both sides of the aisle and certainly the Speaker and former Members of this body, including even former President Ford, who came to Oklahoma and spoke on behalf of the establishment of the Center, and that there is again a wide range of people who have supported it on both sides of the aisle and also in the Senate?

It is true that there is some difficulty in authorization on the Senate side, but I think there is sufficient time to again work with them if we can overcome this first hurdle.

Mr. WALKER. Mr. Chairman, this gentleman certainly has no problem with the specifics of the project if it is properly authorized. I would simply say to the gentleman that in all likelihood we may have to go to a continuing resolution at some point in the near future. There is a good chance that some parts of this appropriation may be included in that continuing resolution.

If there is in fact a chance of getting an authorization through the Senate, I would think that that would give us time between now and the time that that continuing resolution comes before us to work out an authorization so that this point of order would not rest against the continuing resolution when and if that is brought forward. I would say to the gentleman that that seems to me to give him an opportunity to attempt to work it out there.

But insofar as this legislation is concerned, I do feel constrained to see that the rules of the House are upheld and that this particular project not go forward without proper authorization.

Mr. McCURDY. Mr. Chairman, will the gentleman yield further?

Mr. WALKER. I am glad to yield to the gentleman from Oklahoma.

Mr. McCURDY. Perhaps the gentleman and I can discuss the possibility of a continuing resolution and see if we can work something out. I appreciate the gentleman's response.

Mr. WALKER. I will be glad to do that with the gentleman.

The CHAIRMAN. Does the gentleman from Iowa (Mr. SMITH) wish to be heard on the point of order?

Mr. SMITH of Iowa. Not on this point of order, no, Mr. Chairman. I do have a parliamentary inquiry concerning another point of order.

The CHAIRMAN. The Chair will protect the gentleman.

Will the gentleman from Pennsylvania (Mr. WALKER) clarify for the Chair the exact language to which he objects in insisting on his point of order?

Mr. WALKER. Mr. Chairman, the language the gentleman objects to under the point of order is beginning at line 11 on page 44, "That $3,000,000 shall be available until expended for the Carl Albert Congressional Research and Studies Center:" ending with the colon on line 13.

The CHAIRMAN. The appropriation is not yet authorized by law and the Chair sustains the point of order. Are there any other points of order against the bill?

PARLIAMENTARY INQUIRY

Mr. SMITH of Iowa. Mr. Chairman, I have a parliamentary inquiry.

The portion of the bill to which the parliamentary inquiry relates is as follows:

SPECIAL PROGRAMS

For carrying out the consolidated programs and projects authorized under chapter 2 of the Education Consolidation and Improvement Act of 1981; title IX, part C of the Elementary and Secondary Education Act; title IV of the Civil Rights Act of 1964; the Follow Through Act; sections 1524 and 1525 of the Education Amendments of 1978; and Public Law 92-506, $538,920,000: *Provided*, That $454,810,000 to carry out chapter 2 of the Education Consolidation and Improvement Act shall become available for obligation on July 1, 1983, and shall remain available until September 30, 1984: *Provided further*, That $29,030,000 for the purpose of subchapter D of the Education Consolidation and Improvement Act shall become available for obligation on October 1, 1982: *Provided further*, That $3,000,000 of the amount appropriated above shall be for the purpose of Public Law 92-506 of which $1,500,000 shall become available on July 1, 1983, and shall remain available until September 30, 1984.

The CHAIRMAN. The gentleman for Iowa (Mr. SMITH) will state his parliamentary inquiry.

Mr. SMITH of Iowa. Mr. Chairman, is it possible, since the bill is open to amendment to any point, to reserve a point of order and to make it at a later time against certain lines in the bill?

The CHAIRMAN. The Chair will state that the point of order must be made at this time, before amendments are offered.

Mr. SMITH of Iowa. Then, Mr. Chairman, if it is made at this time, would it be possible to replace the language to which I am making a point of order at a later time?

The CHAIRMAN. The Chair will state to the gentleman that a proper amendment could be offered to replace the language.

Mr. SMITH of Iowa. Mr. Chairman, I am constrained to do something there, and it is with regard to the language at page 38, line 23, through line 2 on page 39. It involves the closeup or the Ellender programs.

The problem is this: In the Senate they are objecting to two or three other programs that are in this bill, and they are getting everything they want in these lines, which is in excess of the authorization. They do not even want to go to conference on another bill that includes all these programs. I just have difficulty seeing how the House can protect its position if we let them have everything they want in this bill.

Mr. Chairman, would the chairman of the subcommittee tell me if he can relate to me some way we can protect ourselves without making a point of order here?

Mr. NATCHER. Mr. Chairman, if the gentleman will yield, I would like to say to my friend, the distinguished gentleman from Iowa (Mr. SMITH) who is an able member of this subcommittee, that I would hope that he would not insist upon his point of order at this time. This is a matter that has been before the subcommittee, as the gentleman well knows, for a number of years.

It is true that as far as the amount is concerned, it exceeds the authorization. This bill has contained the Ellender fellowship funds for a number of years.

I would hope that the gentleman would go along with us and see if we can handle it in another manner. I cannot say to the gentleman exactly how it could be handled, but I am going to be on his side and work with him in resolving this matter.

Mr. Chairman, I would hope that the gentleman would not insist on his point of order at this time on this particular project.

Mr. SMITH of Iowa. Mr. Chairman, we are likely to go to a continuing resolution, and in the continuing resolution, if it is the lower of the two Houses and they have in their bill the same as we have in our bill for Ellender, which is over the authorized amount and they do not put in their bill the amounts we have for law-related programs, how are we going to protect ourselves in conference?

Is the gentleman going to insist on our position? I think if he does, it will

be done. Is the gentleman going to insist that we will not permit the continuing resolution to come back to the House until we protect all these programs?

Mr. NATCHER. Mr. Chairman, I will say to the gentleman that I intend to insist and that I will join with the gentleman in conference on the matter that he has in mind.

I think the gentleman is exactly right as to these other programs and these other matters that will come up in the conference on this bill and on the continuing resolution. I will say to the gentleman that I intend to walk right down the road with him.

Mr. SMITH of Iowa. Mr. Chairman, I just want to point out that the House has authorized all of these programs together. The Senate at this time, for some reason, is refusing to even go to conference on the authorization legislation. They are playing hardball, and I just want to make it clear we are just not going to roll over, that we intend to stick with these programs.

Mr. NATCHER. Mr. Chairman, I say that the intention of the gentleman is good. I say that to him at this time.

Mr. SMITH of Iowa. Under those circumstances, Mr. Chairman, I will not make my point of order, but I am serving notice now that if we do not get our way, in this continuing resolution that we expect to pass that goes to March 1 or March 31, I am going to make a point of order before that one expires.

Mr. Chairman, I withdraw my point of order.

The CHAIRMAN. The gentleman from Iowa (Mr. SMITH) withdraws his point of order.

Are there any further points of order?

Mr. NATCHER. Mr. Chairman, I ask unanimous consent that all debate on the bill and all amendments thereto conclude not later than 5 p.m. today.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

□ 1115

Mr. WALKER. Reserving the right to object, Mr. Chairman, I do so simply to ask the gentleman if he has some idea of the number of amendments we are talking about.

Mr. NATCHER. Mr. Chairman, would the gentleman yield at this time?

Mr. WALKER. I am happy to yield to the gentleman from Kentucky.

Mr. NATCHER. Mr. Chairman, we have been advised there will only be two or three amendments that will not consume much time, and I say that to the gentleman frankly.

Mr. WALKER. I thank the gentleman.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I am glad to yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, we have five or six amendments. I wish the subcommittee chairman would make that 4 o'clock. I do not think we will even take until 5 o'clock.

Mr. WALKER. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

AMENDMENT OFFERED BY MR. O'BRIEN

Mr. O'BRIEN. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

SEC. 208. Notwithstanding section 306 of Public Law 96-272 or section 1132 of the Social Security Act, no payment shall be made, in any fiscal year, under this or any other Act to reimburse State or local expenditures made prior to October 1, 1978, under title I, IV, X, XIV, XVI, XIX, or XX of the Social Security Act unless a request for reimbursement had been officially transmitted to the Federal Government by the State within one year after the fiscal year in which the expenditure occurred.

The Clerk read as follows:

Amendment offered by Mr. O'BRIEN: On page 37, strike lines 3 through 11.

Mr. O'BRIEN. Mr. Chairman, this amendment offers a technical way of placing language now in effect in the continuing resolution at the proper place in this appropriation bill. It has been cleared with the chairman and with the ranking member.

Mr. NATCHER. Mr. Chairman, would the gentleman from Illinois yield to me at this time?

Mr. O'BRIEN. I am happy to yield.

Mr. NATCHER. Mr. Chairman, first, before discussing the gentleman's amendment, I would like to say to the gentleman it is a distinct honor and privilege for the gentleman from Massachusetts (Mr. CONTE) and I to serve with you on this subcommittee.

Mr. Chairman, this matter was dealt with in the first continuing resolution (Public Law 97-276) signed on October 2, 1982.

As the gentleman knows, section 136 of the continuing resolution reached a compromise which allows the courts to determine the validity of these old claims based on existing authorizing and appropriation laws.

The following conference report language describes this compromise. On page 24, House Report 97-914, we find in part, Mr. Chairman, the following:

This language agreed to is not intended to prejudice the outcome of this court case either on behalf of the government or for the States. The position of the Congress on this issue has already been amply expressed through its action on the fiscal year 1980, 81 and 82 appropriations bills and related continuing resolutions. The amendment is, however, intended to prohibit payment of any of these claims during fiscal year 1983. If the courts determine that payments must be made, the language agreed to provides a procedure for orderly payment of claims over a 3 year period beginning in fiscal year 1984.

This agreement supersedes the committee's action on H.R. 7205 and makes it unnecessary to include section 208 in the bill.

The majority, therefore, has no objection to this amendment, none whatsoever.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN. I am happy to yield.

Mr. CONTE. I want to join in what the gentleman from Kentucky (Mr. NATCHER) has said, and also those fine complimentary remarks about my good friend from Illinois (Mr. O'BRIEN). We have no objection to the amendment.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN. I am happy to yield.

Mr. GREEN. I thank the gentleman for yielding.

Mr. Chairman, I have been working with the gentleman from Illinois (Mr. O'BRIEN) on this amendment to repay the States for old claims and of course would urge all of my colleagues to support it.

As you may know, with passage of Public Law 96-272, the States were given a 2 year filing limit on claims for reimbursement for various programs under the Social Security Act. However, Public Law 96-272 permitted reimbursement for any claims which were then outstanding and were submitted prior to January 1, 1981. This deadline was subsequently pushed up to May 31, 1981.

The Department subsequently refused to honor the back claims which had been filed in a timely fashion, asserting that the prevailing appropriations bill prevented it from using funds for this purpose. A group of States who had—and still have—outstanding claims filed suit and won. The Connecticut against Schweiker decision declared the United States liable for this cost and held that the claims should be processed and paid.

The continuing resolution under which we are presently operating allows for this payment to be made in an orderly fashion, and essentially puts this matter back in the hands of the court, where it belongs. So this is not a new issue. This language has already been approved by both the House and Senate in their approvals of the conference report on the current continuing resolution. I urge my colleagues to approve this language once again.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinios (Mr. O'BRIEN).

The amendment was agreed to.

Mr. FAZIO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to engage the chairman in a colloquy on some matters relating to State education funding.

Mr. Chairman, it is my understanding that the amounts provided for grants to local school districts under chapter 1 of the Education Consolidation and Improvement Act, known to most of us as title I, include the supplementary funds provided under Public Law 97-257. Is that correct?

Mr. NATCHER. Will the gentleman yield to me at this time?

Mr. FAZIO. I yield to the gentleman.

Mr. NATCHER. The gentleman is correct.

Mr. FAZIO. The amount provided in this bill for State administrative expenses, however, has not been adjusted for the original fiscal year 1982 level. The duties and responsibilities of States to supervise the program have been expanded by the Congress during the last 18 months.

In order to provide the authorized level of 1 percent of grant funds for State administration this account would have to be increased from $30,575,000 to $31,986,931. Is that correct?

Mr. NATCHER. Mr. Chairman, if the gentleman will yield further at this point I would like to say to the gentleman that that is correct.

Mr. FAZIO. I appreciate that response. I note that this limitation on State administrative expenses is contained in the committee's report but not in the bill itself. Would it then be both possible and appropriate for the Secretary of Education to bring this level up by transferring the necessary $1,411,931 from the Evaluation and Studies Account under ECIA chapter 1 to the State administration account?

Mr. NATCHER. If the gentleman would yield further, I would like to say to the gentleman that it would be possible for the Secretary of Education to request approval from the House and Senate Committees on Appropriations to make a transfer such as the gentleman proposes.

Mr. FAZIO. I appreciate the chairman's statement and appreciate his kindness and courtesy in letting me engage in this colloquy with him.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. Walker: on page 60, after line 7, add the following new section:

SEC. 512. No funds appropriated under this Act shall be used to limit legitimate job opportunities for any individual.

Mr. NATCHER. Mr. Chairman, would the gentleman from Pennsylvania yield to me?

Mr. WALKER. I am glad to yield.

Mr. NATCHER. Mr. Chairman, we have had an opportunity on this side to examine the gentleman's amendment. He has been kind enough to present it to us and he presented it also on the other side. We have no objection to the amendment, Mr. Chairman.

Mr. WALKER. I thank the gentleman from Kentucky very much.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Massachusetts.

Mr. CONTE. I have no objection to the amendment. But I would like to have a colloquy with the gentleman.

Mr. WALKER. I will be glad to have a colloquy with the gentleman.

Mr. CONTE. By the gentleman's amendment you are not affecting the Davis-Bacon Act or minimum wage or any other labor law?

Mr. WALKER. It certainly would have no effect of repealing those particular laws. There might be some effect on them, only insofar as what they would be doing would be limiting job opportunities.

I do not think there was ever any intent on the part of the Congress that those should be a job-limitation kind of approach and so if in fact those as well as many other programs in the Government ended up being a job limitation kind of thing then, yes, there could be some minimal impact on them.

But my intent is to simply make certain that regulations and laws of the Federal Government do not end up limiting job opportunities for anyone. I do not think that was the intent of any of the language that Congress adopted in the programs that the gentleman mentions.

Mr. CONTE. As I say, I have no objection at the present time, but we are going to look at this. It came all of a sudden and we will take a close look at it.

If it does limit such things as the right to organize or other types of labor laws, then I do not know whether I could support it in conference or not. But for now let us let it go.

Mr. WALKER. I thank the gentleman and yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. WALKER).

The amendment was agreed to.

Mr. GEPHARDT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to engage in a colloquy with the chairman of the committee.

I would ask the gentleman from Kentucky (Mr. NATCHER) this question: Is it the chairman's and the gentleman from Massachusetts, Mr. CONTE's, understanding that the money appropriated for title VII, part B, could be used in a transitional funding mechanism for those original independent living organizations whose funding was terminated in fiscal 1982, provided that these organizations are able to demonstrate their ability to become self sufficient as well as show support from the communities in which they are centered?

Mr. NATCHER. Mr. Chairman, would the gentleman from Missouri yield to me at this time?

Mr. GEPHARDT. I yield to the gentleman.

Mr. NATCHER. Mr. Chairman, first I would like to say to the committee that it is a pleasure for me to rise at this time to answer the gentleman's question. He has been kind enough to talk with us about this matter. He is one of the able Members of the House.

Mr. Chairman, in answer to the gentleman's question, I agree with the gentleman that the amount in the bill for this program could be used for continuing support of the existing centers, provided they meet the conditions the gentleman has just indicated.

The gentleman is correct.

Mr. GEPHARDT. I thank the gentleman and especially thank the chairman and the ranking member for their understanding and cooperation on this very important issue.

As they well know, we have established over the country a few centers that have made great strides in helping the handicapped be self sufficient and live on their own and not take even greater public funds by being institutionalized.

I deeply appreciate the understanding of both of them.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. GEPHARDT. I am happy to yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman. I commend the gentleman for his interest in this program. It is a good program that provides the services that allow severely handicapped individuals to live independently in community or family settings.

I know the problem the gentleman has run into with respect to continuing the project in his State. I myself was following this situation, with respect to a program in my own State. Programs at the end of their 3-year grant had to enter a competition to obtain renewed funding. The award announcements were not made until the very last days of the 1982 fiscal year. The result was that the four centers that were not renewed had almost no chance to seek alternative funding, before their grants had expired.

I certainly would have no objection to these centers being funded under the appropriation for independent living in this bill. However, I would like to say that the situation is ripe for review. Next year, I understand a significantly larger number of projects

will be up for renewal, and I would not want to set a precedent that would be difficult to follow through on. It is my hope that the authorizing committees will take a close look at what alternatives are open to the centers as their original 3-year grants expire in terms of finding a more permanent funding source.

Mr. GEPHARDT. I thank the gentleman for his excellent comments. I thank both the gentlemen from Kentucky and Massachusetts for their great help in resolving this matter and yield back the balance of my time.

Mr. RATCHFORD. Mr. Chairman, I rise to strike the requisite number of words.

Mr. Chairman, I rise to inquire of the distinguished chairman of the subcommittee about a matter of concern to all of us. That matter is the regulations for the nursing homes in America in which medicare funding is involved.

Mr. Chairman, my question is, and I know what a strong defender you have been for quality of care in America's nursing homes: Is there contained in this legislation the prohibition against the proposed regulations through which the administration sought to cut down the number of inspections of America's nursing homes?

Mr. NATCHER. Mr. Chairman, will the gentleman from Connecticut yield to me at this time?

Mr. RATCHFORD. I yield to the gentleman.

Mr. NATCHER. First I would like to say to the gentleman from Connecticut that it is a distinct honor for me to serve with him on the Appropriations Committee. The provision to which the gentleman refers is contained in section 146 of the continuing resolution, Public Law 97-276.

That is in the continuing resolution and it is now the law. We know of the gentleman's interest in this matter. We want to commend him ever since he has been a member of our committee and long before that time for the interest that he has shown.

Mr. RATCHFORD. I thank the chairman.

To the Members I say I hope this prohibition in the permanent law will continue because what was recommended by the administration several months ago would have cut down the number of inspections of America's nursing homes. It would have provided not more, but less, protection for the frail elderly of America; and was a recommendation from Health and Human Services resisted by this subcommittee, by the Appropriations Committee, by the Committee on Aging.

I commend the chairman for his concern and the committee's concern for the frail elderly of America, and yield back the balance of my time.

AMENDMENT OFFERED BY MR. CRAIG

Mr. CRAIG. Mr. Chairman, I offer an amendment.

The portions of the bill to which the amendment relates are as follows:

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses for the Occupational Safety and Health Administration, $202,256,000, including not to exceed $47,625,000, which shall be the maximum amount available for grants to States under section 23(g) of the Occupational Safety and Health Act, which grants shall be no less than fifty percent of the costs of State occupational safety and health programs required to be incurred under plans approved by the Secretary under section 18 of the Occupational Safety and Health Act of 1970: *Provided,* That none of the funds appropriated under this paragraph shall be obligated or expended to enforce or prescribe as a condition for initial, continuing, or final approval of State plans under section 18 of the Occupational Safety and Health Act of 1970, State administrative or enforcement staffing levels which are greater than levels which are determined by the Secretary to be equivalent to Federal staffing levels: *Provided further,* That none of the funds appropriated under this paragraph shall be obligated or expended for the assessment of civil penalties issued for first instance violations of any standard, rule, or regulation promulgated under the Occupational Safety and Health act of 1970 (other than serious, willful, or repeated violations under section 17 of the Act) resulting from the inspection of any establishment or workplace subject to the Act, unless such establishment or workplace is cited, on the basis of such inspection, for ten or more violations: *Provided further,* That none of the funds appropriated under this paragraph shall be obligated or expended to prescribe, issue, administer, or enforce any standard, rule, regulation, or order under the Occupational Safety and Health Act of 1970 which is applicable to any person who is engaged in a farming operation which does not maintain a temporary labor camp and employs ten or fewer employees: *Provided further,* That none of the funds appropriated under this paragraph shall be obligated or expended to prescribe, issue, administer, or enforce any standard, rule, regulation, order or administrative action under the Occupational Safety and Health Act of 1970 affecting any work activity by reason of recreational hunting, shooting, or fishing: *Provided further,* That no funds appropriated under this paragraph shall be obligated or expended to administer or enforce any standard, rule, regulation, or order under the Occupational Safety and Health Act of 1970 with respect to any employer of ten or fewer employees who is included within a category having an occupational injury lost work day case rate, at the most precise Standard Industrial Classification Code for which such data are published, less than the national average rate as such rates are most recently published by the Secretary, acting through the Bureau of Labor Statistics, in accordance with section 24 of that Act (29 U.S.C. 673), except—

(1) to provide, as authorized by such Act, consultation, technical assistance, educational and training services, and to conduct surveys and studies;

(2) to conduct an inspection or investigation in response to an employee complaint, to issue a citation for violations found during such inspection, and to assess a penalty for violations which are not corrected within a reasonable abatement period and for any willful violations found;

(3) to take any action authorized by such Act with respect to imminent dangers;

(4) to take any action authorized by such Act with respect to health hazards;

(5) to take any action authorized by such Act with respect to a report of an employment accident which is fatal to one or more employees or which results in hospitalization of five or more employees, and take any action pursuant to such investigation authorized by such Act;

(6) to take any action authorized by such Act with respect to complaints of discrimination against employees for exercising rights under such Act: *Provided further,* That the foregoing proviso shall not apply to any person who is engaged in a farming operation which does not maintain a temporary labor camp and employs ten or fewer employees: *Provided further,* That none of the funds appropriated under this paragraph shall be obligated or expended for the proposal or assessment of any civil penalties for the violation or alleged violation by an employer of ten or fewer employees of any standard, rule, regulation, or order promulgated under the Occupational Safety and Health Act of 1970 (other than serious, willful or repeated violations and violations which pose imminent danger under section 13 of the Act) if, prior to the inspection which gives rise to the alleged violation, the employer cited has (1) voluntarily requested consultation under a program operated pursuant to section 7(c)(1) or section 18 of the Occupational Safety and Health Act of 1970 or from a private consultative source approved by the Administration and (2) had the consultant examine the condition cited and (3) made or is in the process of making a reasonable good faith effort to eliminate the hazard created by the condition cited as such, which was identified by the aforementioned consultant, unless changing circumstances or workplace conditions render inapplicable the advice obtained from such consultants: *Provided further,* That none of the funds appropriated under this paragraph may be obligated or expended for any State plan monitoring visit by the Secretary of Labor under section 18 of the Occupational Safety and Health Act of 1970, of any factory, plant, establishment, construction site, or other area, workplace or environment where such a workplace or environment has been inspected by an employee of a State acting pursuant to section 18 of such Act within the six months preceding such inspection: *Provided further,* That this limitation does not prohibit the Secretary of Labor from conducting such monitoring visit at the time and place of an inspection by an employee of a State acting pursuant to section 18 of such Act, or in order to investigate a complaint about State program administration including a failure to respond to a worker complaint regarding a violation of such Act, or in order to investigate a discrimination complaint under section 11(c) of such Act, or as part of a special study monitoring program, or to investigate a fatality or catastrophe: *Provided further,* That none of the funds appropriated under this paragraph may be obligated or expended for the inspection, investigation, or enforcement of any activity occurring on the Outer Continental Shelf which exceeds the authority granted to the Occupational Safety and Health Administration by any

provision of the Outer Continental Shelf Lands Act, or the Outer Continental Shelf Lands Act Amendments of 1978: *Provided further*, That none of the funds appropriated under this paragraph shall be used to fund contracts for standards development.

The Clerk read as follows:

Amendment offered by Mr. CRAIG: Page 7, on line 23, strike out "$202,256,000" and insert in lieu thereof "$206,256,000".

Page 12, beginning on line 20, strike out the semicolon and all that follows through line 23, and insert in lieu thereof a period.

Mr. CRAIG. Mr. Chairman, H.R. 7205, as reported by the Appropriations Committee contains a $4 million funding reduction for OSHA and restrictive language prohibiting the expenditure of funds on any contract for OSHA standards development activity. My amendment would restore the funding level and remove the restrictive language.

OSHA uses contract funds for a number of activities associated with the technical and economic analysis of workplace standards. For example, contractors fill a need for short-term projects of a specialized nature that OSHA's own staff cannot address. Contract funds are often used to hire firms with knowledge of particular industries and hazards—a body of expertise that OSHA would need years to develop. Once developed, this expertise would no longer be needed when a specific study is completed. The Agency's current staff cannot assume these functions. Their attention is directed to determining the scientific basis of standards, analyzing the data collected by the contractors, recommending courses of action and writing the regulations. To develop safety and health standards, OSHA must gain access to a wide array of highly technical data—information that is not often available in existing sources. OSHA is also required by its enabling legislation, the Regulatory Flexibility Act, the National Environmental Policy Act, Executive Order 12291, and various Supreme Court decisions to consider the technical, economic, and environmental impacts of its standards as well as their effects upon small business employers.

The Agency often contracts with other Federal agencies, universities and private individuals to perform field evaluations and testing. Interagency agreements with the National Bureau of Standards; for example, East Chicago Highway Ramp Collapse; the National Institute for Occupational Safety and Health (NIOSH); the Department of Agriculture; and the National Academy of Sciences; for example, grain elevator explosions, have all been supported by contract funds in the past. Precluding the use of such resources would constrict the data base used by the agency and virtually prevent OSHA from setting new standards or from reviewing existing standards when required under the "sunset" provisions of the Regulatory Flexibility Act. The quality of the few standards that OSHA could produce would be adversely affected.

The prohibition on contract fund expenditures for standards development and the reduction of funds available to support data collection and impact analysis will reduce OSHA's fiscal year 1983 output of safety standards from a projected level of 12 safety proposals and 4 final safety standards to only 2 proposals and 1 final standard. Health standards output would be reduced from five proposals and eight final rules to only one proposal and two final standards. This is a significant decline in OSHA standards-setting activity at a time when the agency has finally developed a regulatory management system to rationalize its standards-setting process.

I urge my colleagues to support this amendment.

□ 1130

Mr. CONTE. Mr. Chairman, I rise in support of this amendment.

I have here a letter from Thorne G. Auchter, Assistant Secretary for Occupational Safety and Health, U.S. Department of Labor, who says the House Appropriations Committee has reduced the amount requested for OSHA by $4 million from the President's request. The committee added very restrictive language, and he says:

OSHA uses contract funds for a number of activities associated with the technical and economic analysis of workplace standards. Contract funds may be used, for example, to support risk assessment studies and to study the feasibility and cost effectiveness of proposed worker protection measures. OSHA is also required by its enabling legislation, the Regulatory Flexibility Act, the National Environmental Policy Act, Executive Order 12291, and various Supreme Court decisions to consider the technical, economic, and environmental impacts of its standards as well as their effects upon small business employers.

I believe this is a good amendment and it is needed.

Mr. Chairman, the full text of Mr. Auchter's letter is as follows:

U.S. DEPARTMENT OF LABOR,
ASSISTANT SECRETARY FOR
OCCUPATIONAL SAFETY AND HEALTH,
Washington, D.C., November 23, 1982.

Hon. SILVIO O. CONTE,
Ranking Minority, Subcommittee on Labor, Health and Human Services, Education and Related Agencies, Committee on Appropriations, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN CONTE: I am writing to call your attention to a provision in the Fiscal 1983 Appropriations Bill for the Departments of Labor, Health and Human Services, Education and Related Agencies (H.R. 7205) that was reported out by the House Appropriations Committee on September 29, 1982. The Bill contains a funding reduction and restrictive language that would seriously impede the Occupational Safety and Health Administration's (OSHA) ability to protect the American workforce.

The House Appropriations Committee has reduced the amount requested for OSHA from $206,256,000 to $202,256,000, a decrease of $4,000,000 from the President's requested FY 1983 funding level. The Committee also added langage that would prohibit the expenditure of funds on any contract for OSHA standards development activity. This is a harmful action for O3HA and its attempt to reduce on-the-job hazards.

OSHA uses contract funds for a number of activities associated with the technical and economic analysis of workplace standards. Contract funds may be used, for example, to support risk assessment studies and to study the feasibility and cost effectiveness of proposed worker protection measures. OSHA is also required by its enabling legislation, the Regulatory Flexibility Act, the National Environmental Policy Act, Executive Order 12291, and various Supreme Court decisions to consider the technical, economic, and environmental impacts of its standards as well as their effects upon small business employes. Contractors fill a need for short-term projects of a specialized nature that OSHA's own staff cannot address. Contract funds are often used to hire firms with knowledge of particular industries and hazards—a body of expertise that OSHA would need years to develop. Once developed, this expertise would no longer be needed when a specific study was completed. The agency's current staff in its Directorates of Health Standards and Safety Standards cannot assume these functions. Their attention is directed to determining the scientific basis of standards, analyzing the data collected by the contractors, recommending courses of action and writing the regulations.

To develop safety and health standards the agency must gain access to a wide array of highly technical data—information that is not often available in existing sources. OSHA often contracts with other Federal agencies, universities and private individuals to perform field evaluations and testing. Interagency agreements with the National Bureau of Standards (e.g., East Chicago Highway Ramp Collapse), the National Institute for Occupational Safety and Health, the Department of Agriculture, and the National Academy of Sciences (e.g., Grain Elevator Explosions), have all been supported by contract funds in the past. Precluding the use of such resources would construct the data base used by the agency and virtually preclude OSHA from setting new standards or from reviewing existing standards when required under the "sunset" provisions of the Regulatory Flexibility Act. The quality of the few standards that OSHA could produce would be adversely affected.

The prohibition on contract fund expenditures for standards development and the reduction of funds available to support data collection and impact analysis will reduce OSHA's FY 1983 output of safety standards from a projected level of twelve safety proposals and four final safety standards to only two proposals and one final standard. Health standards output would be reduced from five proposals and eight final rules to only one proposal and two final standards. This is a significant decline in OSHA standards-setting activity at a time when the agency has finally developed a Regulatory Management System to rationalize its standards-setting process.

I appreciate your attention in this important matter, and I hope you will reconsider

your proposed language affecting OSHA programs and budget.

Sincerely,

THORNE G. AUCHTER,
Assistant Secretary.

Mr. NATCHER. Mr. Chairman, at this time we ask for a vote on the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Idaho (Mr. CRAIG).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ROYBAL

Mr. ROYBAL. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

CENTERS FOR DISEASE CONTROL

PREVENTIVE HEALTH SERVICES

To carry out titles III, XI, and XIX of the Public Health Service Act, the Federal Mine Safety and Health Act of 1977, and the Occupational Safety and Health Act of 1970; including insurance of official motor vehicles in foreign countries; and purchase, hire, maintenance, and operation of aircraft, $318,439,000, of which $2,050,000 shall remain available until expended and shall be for construction and equipment of facilities of or used by the Centers for Disease Control: *Provided*, That training of employees of private agencies shall be made subject to reimbursement or advances to this appropriation for the full cost of such training.

The Clerk read as follows:

Amendment offered by Mr. ROYBAL: Page 17, line 19, strike out "$318,439,000" and insert in lieu thereof "$321,039,000".

Mr. ROYBAL. Mr. Chairman, this amendment provides an additional $2,600,000 to the Center for Disease Control to respond in a timely way to a recent outbreak of highly fatal infections and cancers resulting from an unexplained acquired immune deficiency—known as AIDS.

This amendment is designed to insure that we maintain CDC's current response to the AIDS problem without CDC having to divert staff and technical resources from other essential disease control and prevention activities. Last fical year, for example, CDC had to divert up to 100 employees at various times to respond to the AIDS problem. Staff resources included laboratory scientists, epidemiologists, statisticians and public health advisors from other program areas. Usually this diverting of resources and funds is not a problem except when the public health emergency continues to persist and, in fact, increase dramatically. AIDS is that kind of problem. Approximately $2,200,000 of the proposed increase would be used to avoid this situation. The remainder of the funds—$400,000—would be available for expanded work in the areas of surveillance, epidemiologic studies and laboratory investigations. All of this work would be done in close collaboration with affected States and localities through cooperative agreements and contracts.

Since the appearance of AIDS in June 1981, CDC has received increasing reports of victims stricken with acquire immune deficiency syndrome.

As of November 26, 1982, CDC has received reports of 775 cases of Kaposi's sarcoma and other life-threatening infections including pneumocystis carinii pneumonia, resulting from acquired immune deficiency. In the last 30 days alone, over 100 cases of AIDS were reported to CDC. Death has occurred in over 40 percent of all reported cases with the actual mortality rate over time expected to exceed 80 percent. The increasing number of cases—over 100 in the past month—indicates an epidemic, resulting in prolonged, debilitating and fatal illnesses and high medical costs. Estimates suggest that hospital costs just for the reported cases will exceed $45,000,000.

It should be recognized that these numbers do not tell the whole story. Some research investigators believe the numbers are significantly higher—in the thousands. CDC agrees that there is probably underreporting due to insufficient diagnostic and laboratory data regarding other suspect cases, and less than complete surveillance in the field. In addition, CDC reporting does not include occurrence of less severe illnesses that share clinical and immunologic traits associated with AIDS.

The fact is we do not know enough about this outbreak. We do not know its causes or mode of transmission. We have not developed any effective treatment regimens or preventive strategies. It is believed that an infectious agent is involved which can be transmitted among various populations, causing immune deficiency and leading to cancer and other fatal opportunistic diseases.

While three-fourths of those reported to be stricken by AIDS are identified as homosexual or bisexual, let me point out that hemophiliacs, including a 10-year-old patient (6); Haitians (45); and intravenous drug abusers (108) are also affected. Thirty States have now reported cases of AIDS, with the concentration of the problem in New York (51 percent) and California (21 percent). New York City, San Francisco, Los Angeles, and Miami are currently the most affected cities.

CDC is also working in cooperation with the National Institutes of Health to look at the longer term research issues involved with AIDS, especially with regard to cancer, infectious disease and blood-borne disease. In addition, the Food and Drug Administration is working with CDC and NIH on the possible transmission of AIDS-caused diseases through blood products. There is concern that not only hemophiliacs are AIDS-susceptible but also individuals with Cooley's anemia and sickle cell anemia.

My amendment represents a reasonable and timely investment against this epidemic.

Mr. NATCHER. Mr. Chairman, will the gentleman yield to me at this point?

Mr. ROYBAL. I yield to the gentleman from Kentucky.

Mr. NATCHER. Mr. Chairman, the gentleman offering this amendment is a member of our subcommittee, he is a member of the full committee, and he is a man who works hard on all of these matters.

Mr. Chairman, the gentleman has been kind enough to present a copy of his amendment to us on this side. I know of the interest of the distinguished gentleman from New York (Mr. GREEN) on the other side, a member of the committee. If it meets with the approval of the gentleman from Massachusetts (Mr. CONTE), we have no objection on this side.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, we have no objection to this amendment, and we ask for its passage.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from New York.

Mr. GREEN. I thank the gentleman for yielding.

Mr. Chairman, I am supporting the amendment offered by the gentleman from California (Mr. ROYBAL) seeking to increase funding in the Center for Disease Control for work on the acquired immunological deficiency syndrome.

Recent reports indicate that we have 775 cases of this disease in our Nation, with the number of cases doubling every 6 months. The median age of our victims is 35 years, with 70 percent of them occurring in individuals who are under the age of 40. Although at present death has occurred in roughly 40 percent of the cases, it is quite likely that the mortality rate for this disease will, over time, exceed 80 percent. The disease initially affected homosexuals, but more recently has spread to intravenous drug users, diabetics, and hemophiliacs.

Areas in which incidence of this disease is particularly high are New York, Los Angeles, San Francisco, Houston, Chicago, and Atlanta. Thirty States in all have reported incidence of this disease to the Center for Disease Control. Reports have also indicated that the disease has now been found in children. The tragedy of this misunderstood and relatively new disease is the young age of its victims, the ineffectiveness of available treatments, and the debilitating, expensive nature of the illness.

The New York City Department of Health began receiving reports of the rare tumors and opportunistic infections which are now characteristic of this disease. In simplistic terms, some unknown factor is causing a deficiency in the immune systems of previously healthy persons. The steadily increasing number of cases has been referred to as an epidemic, but because of the uniqueness and the newness of the disease, CDC has been pulling funds out of accounts for work on other diseases to fund its efforts in this area. I believe quite strongly that we should monitor the incidence of this illness and seek to learn more about it, how to treat it and control it. This amendment would give the Center for Disease Control the wherewithal to do so.

Mr. WEISS. Mr. Chairman, I rise in support of the amendment offered by the gentleman from California which raises appropriations for the Center for Disease Control (CDC) by $2.6 million.

This funding is desperately needed to allow the Center for Disease Control to maintain and expand efforts to monitor and research the recent outbreak of acquired immune deficiency syndrome (AIDS). AIDS is a recently identified affliction which causes a breakdown in the body's immune system. Once affected, an individual loses the ability to fight rare tumors and opportunistic infections. In particular, AIDS victims fall prey to such serious and often fatal illnesses as Kaposi's sarcoma cancer and pneumocystis pneumonia. The cause of AIDS is currently unknown.

CDC data indicates that the outbreak of AIDS has reached epidemic proportions. There have been over 700 cases reported, and the numbers are increasing daily. Currently, 50 percent of all reported cases are in New York State.

This epidemic is of grave concern because of its unique characteristics. Forty percent of those afflicted die. No cases of complete recovery have been reported. The disease was first found among homosexual men and has now spread to hemophiliacs, diabetics, Haitians, and the population at large. Tragically, about 70 percent of AIDS victims are under the age of 40.

Thus far, the Center for Disease Control has undertaken an intensive effort to track this epidemic, at the expense of other needed activities. Additional funding is needed in the 1983 appropriation to allow a continuation and expansion of CDC's surveillance activities, laboratory investigations, and collaborative efforts with State and local health departments. The New York City Department of Health has developed an extensive system to research, monitor, and educate the public about the AIDS epidemic. Continued Federal assistance through CDC is critical to our city's ability to meet this devastating public health challenge.

It is my deep hope that this amendment will be adopted and that additional funds for CDC and NIH research on AIDS will be allocated in the future. We cannot afford to turn our backs on this life or death crisis.●

● Mr. PHILLIP BURTON. Mr. Chairman, the issue of providing adequate Federal funding for research into the causes of Kaposi's sarcoma and related immune-deficiency diseases is one which this Congress must address.

The appropriation which we are voting on today must be the beginning of a massive national effort to confront a major health problem.

Like legionnaire's disease and like toxic shock syndrome, the acquired immune deficiency diseases are a public health issue which is the responsibility of the Federal Government.

The medical struggle to understand, and ultimately to defeat, the acquired immune deficiency syndrome (AIDS) is likely not to benefit those who might contract the disease, but also to increase greatly our understanding of the nature of the immune system and of cancer itself.

The issue of adequate, long-term funding for AIDS research, then, is not simply a matter of fulfilling our public health responsibilities to the gay community, which has so far borne the brunt of this epidemic, or to the major metropolitan areas, where this epidemic is now centered—although these responsibilities alone more than justify the funding which we request. What is at stake here also is an opportunity to gain medical knowledge which could greatly enhance our ability to strike a blow at cancer—probably the major health problem of modern times.

This would be of enormous value not only to those who suffer during this epidemic, but to all the people of this country.

I urge my colleagues to join in supporting this appropriation and all future measures needed to respond adequately to the health crisis which we now face.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. ROYBAL).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. FOGLIETTA

Mr. FOGLIETTA. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

HUMAN DEVELOPMENT SERVICES

For carrying out, except as otherwise provided, the Older Americans Act of 1965, the Child Abuse Prevention and Treatment Act, the Runaway Youth Act, title VIII of the Community Services Act, the Developmental Disabilities Assistance and Bill of Rights Act of 1981, and the Head Start Act of 1981, $1,737,211,000, of which $41,453,000 shall be for grants under part C of the Developmental Disabilities Assistance and Bill of Rights Act, and $7,680,000 shall be for section 113 of such Act.

The Clerk read as follows:

Amendment offered by Mr. FOGLIETTA: Page 30, line 20, strike out "$1,737,211,000" and insert in lieu thereof $1,762,211,000".

Mr. FOGLIETTA. Mr. Chairman, I would like to express at the outset my appreciation and admiration to the chairman of the subcommittee, Mr. NATCHER, and to the ranking minority member, Mr. CONTE, for their fine work on this bill. I think that they have a very fine bill, and I know that it is their hard work that has brought to the floor a bill that this whole House should be able to support. I appreciate having the opportunity to offer this amendment.

Mr. Chairman, my amendment is for our Nation's senior citizens. It is for the hundreds of thousands of them around America who are unable to afford to eat, who rely on the senior nutrition programs funded in this bill for their food. The committee has shown its sensitivity for our older Americans by insuring that no meals would be cut from the program this year. Funding for this program is actually higher this year than last. Unfortunately, the increases provided for in this bill will only keep as many meals on the table, and in the home, as were served last year. And that is not enough to even begin to meet the demand. As things stand now, we are faced with the continuing problem of turning away staggering numbers of our elderly, because the nutrition centers and meal delivery centers do not have the funds to buy the food to feed them.

In my home State of Pennsylvania last year, our nutrition centers had to turn away an estimated 18,000 senior citizens who came to them for food; 18,000 people, who were in a financial situation that prevented them from being able to afford to meet their expenses and have food, were turned away without food.

Mr. Chairman, I am unable to accept the argument that we cannot afford to meet the needs of these people; that we cannot afford to feed our senior citizens, that we cannot help them avoid knowing hunger. In a country who's Government spends $1 million a day simply to store and finance the food that we buy through price supports, I cannot believe that we are unable to afford the $25 million that it would take to fund these programs at the authorized levels.

This amendment does not do anything more than fulfill the wishes of this body. It was this House that authorized spending the money that I am seeking here. We voted to spend some $356 million on nutrition for the elderly. This $25 million addition does

nothing more than that. This will allow us to meet, not exceed, the wishes of the House.

Mr. Chairman, we talk constantly in this body of getting the most for our taxpayers' dollar. I can think of few cases that get more for the money than this one. If we pass this amendment, we realize an extraordinary economy of scale. By agreeing to spend an additional 20 percent for senior nutrition, my home State of Pennsylvania will be able to serve approximately 25 percent more meals. We get 25 percent more meals, feed 25 percent more senior citizens, for a 20-percent increase. Mr. Chairman, it will cost more in 2 months—60 days—to store price-supported surplus food than this amendment will cost for the next year. With its share of this addition, Pennsylvania will be able to serve roughly 2½ million more meals, feed approximately 33,000 more senior citizens. We have 2.3 million senior citizens in Pennsylvania. We served 130,368 people last year. We turned away 18,000 more, and we estimate that as many as 100,000 more senior citizens, in Pennsylvania alone, may need this program.

Mr. Chairman, even if we pass this amendment, we will have only begun to meet the needs of our senior citizens for food. Right now congregate meal funds are being forced to compete for funds with home delivery meals in some States. The state of the economy has made it increasingly difficult for those seniors who are able to work to find jobs. The price of heat is again going through the ceiling, and the old cliche about senior citizens having to choose between heating and eating is no longer a cliche, but a fact.

Mr. Chairman, the cost of this amendment is relatively small. Its worth, all over the Nation, is very great. We have a chance to fulfill the wishes of the House, as expressed by the authorization levels set for senior citizen nutrition. We have a chance to make a dent in the number of senior citizens who have needed our help in the past, but been unable to get it because the funds were not available.

I urge the House to adopt this amendment, and yield back the balance of my time.

Mr. NATCHER. Mr. Chairman, will the gentleman yield?

Mr. FOGLIETTA. I yield to the gentleman from Kentucky.

Mr. NATCHER. Mr. Chairman, I would like to say to the distinguished gentleman from Pennsylvania (Mr. FOGLIETTA) that we know of his interest in this matter. The gentleman has discussed this matter with the members of the subcommittee. He has been kind enough, Mr. Chairman, to give us copies of his amendment. I would like to say on this side that if it meets the approval of the distinguished gentleman from Massachusetts, we have no objection to the gentleman's amendment.

Mr. FOGLIETTA. I thank the chairman of the subcommittee.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. FOGLIETTA. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, I want to take this opportunity to congratulate the gentleman in the well for his foresight and leadership in bringing this amendment to our attention. The chairman, ED ROYBAL, and I have been long time supporters of this program and believe in this program. It is one of the finest programs that we have. We get more value out of this program than just about any other program in the bill. I want to commend the gentleman.

Mr. Chairman, we accept the amendment.

Mr. FOGLIETTA. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. FOGLIETTA).

The amendment was agreed to.

Mr. FISH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, for the past several months, I have been involved in a funding problem for the secondary school adjacent to the U.S. Military Academy at West Point. This situation exists as a direct result of the reductions in the level of funding for the impact aid program as authorized under the Reconciliation Act of 1981. I understand that the Appropriations Committee has provided the full amount authorized, and I appreciate their efforts to address this vital issue. I have decided not to offer any amendments to increase the overall funding level, as this would also require changes in the authorization which are not appropriate in this legislation. However, I take this opportunity to bring up the issue before the House Appropriations Committee.

The U.S. Military Academy and the town of Highlands and the village of Highland Falls have enjoyed a close and mutually beneficial relationship for many years. The town is aware of its dependence on West Point to sustain many of its businesses and services. The Academy knows that continued good relations depend on the Federal Government meeting its commitment to the town and village.

Highland Falls is known as "Hometown, U.S.A." after it opened its arms to the American hostages returning from Iran. The cooperation between the town, the village, and West Point has enabled them to resolve their differences amicably over the years.

This is not the first time that a problem relating to education of the children of West Point families has developed. After World War I, an elementary school was built at West Point due to the inability of the local board of education to tax Federal property and raise enough money to pay for military dependents. As West Point grew in the 1940's, and the number of high school students increased, again the local community was faced with the problem of providing an education for individuals whose families did not pay taxes. Recognizing their obligation to both the Academy and the town, in 1948 and 1949, the Department of Defense provided tuition payments for high school students from West Point. In 1950, a more or less long-term solution was established in the enactment of Public Law 81-874, the Impact Aid Act.

Although many school districts in the country face some of the same problems of the Highlands Falls-Fort Montgomery School District, there is a unique situation here that requires a special solution. Over 93 percent of the taxable land in the school district now belongs to West Point. The Highland Falls School District is the poorest in my new congressional district, and the true property value—the test of financial support from the community—is less than half of the average for New York State. Family income per student is 25 percent less than the State average.

The situation in Highland Falls is unlike that in Annapolis or Boulder. The population is far less, there is no tax base to support industry, and there is no tourism in the town or village. Historically, the town and village have depended on West Point to a greater extent than any other area of the country. West Point controls so much land in the area that the community's entire watershed is on Army property. Nowhere else does a military establishment have such a strong hold on the life of a community.

Since the expansion of West Point property in the 1940's, a serious problem has existed in the education of students of families at the Military Academy. For the past 30 years, impact aid has provided sufficient funds to educate secondary school students from West Point. But following the enactment of the Reconciliation Act last year, the inevitable consequence of the reduction in Federal aid has occurred.

Even though the Federal Government owns over 90 percent of the land, it is reducing its payment in lieu of taxes by 50 percent this fiscal year and by 10 percent in fiscal year 1983. Further, student aid under section 3 of the Impact Aid Act has been reduced by 40 percent in 1982 and another 20 percent in 1983. This has resulted in a shortfall of over $200,000 for the Highland Falls-Fort Montgomery School District.

The effect of these reductions has been so great that in August of this year, the local school board voted unanimously to bar secondary students from West Point from entering the local high school if impact aid equal to the current tuition for each student was not forthcoming for the current school year. This action was to have taken effect on October 5, 1982. The board further voted to charge tuition to West Point students to make up the difference between the shortfall in impact aid and current tuition needs. Now, a complete shutdown of the school system is being seriously considered.

This problem must be resolved. Staff at the high school has been reduced by 20 percent. The quality of education for both the local residents and the West Point children will suffer significantly if the school is closed. Over 100 tuition-paying students from the adjoining Garrison School District across the river from West Point are faced with increased costs to subsidize West Point students, and the school board has threatened to withdraw the Garrison students if the contribution from the Federal Government is not increased immediately.

The Department of Education has refused to provide the $200,000 needed to keep the school open. The view has been expressed that the Department of Defense should consider building its own high school, just as it was forced to build its own elementary school more than 60 years ago. Such a facility would be a complete folly, as the cost would far exceed the modest reimbursement necessary to keep the local high school open. I cannot believe that experts in education would suggest the establishment of a high school at West Point would be a healthy environment for Army students. The Federal Government has an obligation to pay for the land it took to expand West Point and a commitment to its military to give them the best possible living conditions. Cutting off access to the local community would not enhance the quality of life at West Point.

Impact aid is at its lowest level in 10 years in the Highland Falls-Fort Montgomery School District. Payments received for land taken by the Academy are below 1975 levels. The Academy is presently increasing its holdings by another 28 acres, further eroding any potential chances to increase the local tax base. Relations between West Point and the local community will seriously deteriorate if the situation is not improved soon.

I have been working with the Department of Education and the Department of Defense on this matter. The future growth of our Nation's Armed Forces depends on giving military personnel adequate training, housing, and education—both for themselves and their families. West Point is the Nation's oldest military academy. It was an integral part of the defense of colonial forces in the Upper Hudson River during the Revolutionary War. Nearby, for nearly 2 years, was the seat of our Government, and there the war came to an end. West Point has supplied uncounted heroes and leaders to this country.

In his speech to the graduating class at West Point in 1981, President Reagan recognized the importance of a self-reliant, confident military. The President noted that the quality of military life should exist above a bare subsistence level. The President has sought and received increases in pay for the Volunteer Army. He has constantly reiterated his commitment to building up our Armed Forces.

It is difficult to see how one can avoid the conclusion that the unintended effect of the reductions in impact aid has been to erode the self-image and respect of the families at West Point. Being faced with possible tuition charges or the barring of their children at the local high school due to the Federal Government's failure to meet its responsibilities is not the way to insure a continuing commitment to a military life by Army personnel stationed at West Point.

Mr. Chairman, I am not asking for additional funds for the impact aid program or for this Congress to go beyond the budget ceilings established earlier this year. I am requesting that the Appropriations Committee, in conjunction with the Departments of Education and Defense, take a close look at what money might be available as a line item in their budgets to avoid the drastic consequences of the closing of the high school in Highland Falls. Clearly, we can better afford to provide the $200,000 necessary to keep the school open than we can risk the effect on the local community and West Point families by further reducing aid, constructing a high school at West Point, or letting this problem go unresolved.

Mrs. SCHNEIDER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of H.R. 7205, the Labor-HHS-Education Appropriation Subcommittee's recommendation for fiscal year 1983. I commend the committee for offering a balanced and equitable approach to funding the Departments of Labor, Health and Human Services, Education, and related agencies.

In my mind, there is no doubt about the need to reduce the swollen deficit and place tighter reins on Federal spending. In reaching these objectives, however, we must act judiciously and with prudence so as to target programs that truly are excessive or inefficient.

While I respect attempts to scrutinize human service agencies for their cost efficiency, I do not support the efforts underway which allow the brunt of the reductions to be borne by programs that serve our critical human needs. Successful and effective human service programs should not be subject to walk an annual tightrope but rather should be recognized for their value and rewarded for their contribution to society as a whole.

In order to strengthen the social service block grant component of H.R. 7205, I intend to support an amendment offered by my colleague, Representative FOGLIETTA, that will increase the appropriation for vital programs such as elderly congregate and home-delivered meals to a level equal to the original authorization. Effective programs for the elderly most certainly deserve adequate Federal support.

We have all heard through letters or town meetings from constituents who feel that "Congress can't be trusted" or that "Congress is sneaky." This view, although unfortunate, will prevail until we put a stop to the practice of looking the other way when it comes time for our favorite boondoggles to be funded. Your constituents, as well as mine, may be in favor of a strong national defense, but you can bet that they shake their heads in disgust when billions of dollars are doled out for a controversial MX missile or B-1 bomber and yet funds become scarce for notable successes such as ACTION, senior employment and independent living centers for the handicapped.

Again, we must have scrutiny, but only if it is carried out in a fair and equitable manner. Reports that come to our attention such as last year's GAO study that pointed to where taxpayers could have saved $20 million had the Defense Department sent nonpriority messages by mail rather than teletype, lend credence to the argument that savings can be made if we actively look for them.

I am pleased by the committee's foresight in looking ahead to next year's budget. They have made savings when necessary and have availed necessary moneys for preventive health care programs, Head Start, student aid programs, and other education programs that are a sure investment in the Nation's future.

□ 1145

Mr. NATCHER. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. SHARP) having assumed the chair, Mr. FUQUA, Chairman of the Committee of the Whole House on the State of the

Union, reported that that Committee, having had under consideration the bill (H.R. 7205) making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1983, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. CONTE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 330, nays 70, not voting 33, as follows:

[Roll No. 402]

□ 1200

The Clerk announced the following pair:

On this vote:

Mr. Breaux for, with Mr. McDonald against.

Mr. ROBERT W. DANIEL, JR., and Mr. MOORHEAD changed their votes from "yea" to "nay."

Mr. GIBBONS changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION TO INSERT TABLE RELATING TO H.R. 7205, DEPARTMENT OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION AND RELATED AGENCIES APPROPRIATION ACT, 1983

Mr. NATCHER. Mr. Speaker, I ask unanimous consent to insert in the RECORD at this point a detailed table showing the amounts in H.R. 7205, just passed, for each of the programs funded in the bill, together with appropriate comparisons.

The SPEAKER pro tempore (Mr. MCCURDY). Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The table is as follows:

H.R. 7205—FISCAL YEAR 1983 APPROPRIATIONS FOR THE DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION AND RELATED AGENCIES

	Fiscal year 1982 (comparable)	Fiscal year 1983 budget	Fiscal year 1983 House bill	House bill compared with—	
				Fiscal year 1983 budget	Fiscal year 1982

[1] Fiscal year 1983 est. proposed for later transmittal.
[2] Budget proposes legislaton to merge these activities into the primary care block grant,
[3] 15 percent set aside for programs of national significance, hemophilia and genetic diseases.
[4] The budget proposed legislation to transfer the Women, Infants and Children program from the Department of Agriculture to the MCH block grant and included an addl. $650 million for this activity. This request has been considered under the fiscal year 1983 Ag. Appn. bill.

[5] $82.6 M for this activity and related admin. costs requested in the President's budget under a new "health block grant" account not approved by the committee.
[6] See Public Law 97–276.
[7] $433 M for this activity and related admin. costs originally requested under a new "health block grant" account not approved by the committee.
[8] See Public Law 97–276.
[9] See Public Law 97–276.
[10] Fund for State and local admin. proposed for transf. to new Combined Welfare Admin. Block Grant in fiscal year 1983 in President's budget not approved by the committee.
[11] Includes medicare and medicaid funds not directly appropriated, but made available for PSRO.
[12] Exlcudes $45 million made available in fiscal year 1983 by Public Law 97–248.
[13] Funds for State and local admin. requested in Combined Welfare Admin. Block grant in fiscal year 1983.
[14] Authority for this proposed to be repealed by the President, but retained by the Congress.
[15] Currently an entitlement for fiscal year 1983 of $2,450,000,000.
[16] See Public Law 97–276.
[17] Single consolidated req. of 380.1 M in budget req.

CLARIFICATION OF NIH CYSTIC FIBROSIS PROGRAM IN H.R. 7205

(Mr. SIMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SIMON. Mr. Speaker, if I could have the attention of my colleague, the gentleman from Kentucky (Mr. NATCHER), my colleague from Kentucky moved so rapidly that we did not get a chance to have a colloquy in here.

I have been concerned that cystic fibrosis research might be cut back, according to rumors, and the Center might be closed.

The National Institutes for Health is our major funding source for basic biomedical research, and for the past few years Congress has sought to maintain this crucial scientific resource despite budgetary pressures. However, as the cost of research has risen, even the increasing funds which have been appropriated can only support a diminishing number of worthwhile projects. I recognize the difficulty of supporting the wide range of important proposals and the problem of allocating funds among proposals. However, in looking for possible cost savings, we must be extremely cautious in order to insure the continuation of long-term activities which have proven themselves by producing significant results. One such effort, which ought to be continued, is research on cystic fibrosis.

Cystic fibrosis is a devastating disease which impairs the exocrine glands, interfering with the proper functioning of the lungs, pancreas, and other organs. It is an inherited disease which is the No. 1 genetic killer of children and young adults in the United States.

Over the years, the National Institutes of Health has supported two types of activities related to cystic fibrosis. Their extramural program has provided funds to biomedical researchers at major universities and medical centers. NIH's second major activity has been the operation of a clinical training and research center in Bethesda, the Cystic Fibrosis Center. The Center has trained many of the top research scientists working on cystic fibrosis today, as well as serving as a focal point for cystic fibrosis research within NIH and around the country. I have learned of this important work through a friend of my family, Rachel Mann, who is an 18-year-old victim of cystic fibrosis.

The long-time Director of the Cystic Fibrosis Center, Dr. Paul di Sant'-Agnese, is retiring, and NIH has proposed that the Center be closed.

I am concerned about the closing of the Center for several reasons. First, we would be losing a valuable research and training resource in the fight against cystic fibrosis. Second, the loss of the Center may mean less coordination among the various cystic fibrosis efforts at NIH and nationally. Finally, closing the Center sends exactly the wrong signal to the medical community about the priority of research on cystic fibrosis.

Because of these concerns, I have introduced an amendment to the Health Research Extension Act requiring that the Center be maintained. I also met recently with Dr. Lester Salans, the Director of the National Institute of Arthritis, Diabetes, Digestive, and Kidney Diseases, which houses the Cystic Fibrosis Center. Dr. Salans assured me that cystic fibrosis research would receive an increased emphasis within NIH. He also told me that, in the near future, NIH would designate an individual to coordinate their cystic fibrosis research.

I am less than fully convinced that these commitments by Dr. Salans will make up for the loss of the Cystic Fibrosis Center if it should be abandoned. Is it the intent of the Appropriations Committee that the NIH support for research in cystic fibrosis move ahead, and that the work of the Cystic Fibrosis Center be maintained?

Mr. NATCHER. Mr. Speaker, will the gentleman yield to me at this point?

Mr. SIMON. I would be pleased to yield to my distinguished colleague.

Mr. NATCHER. Mr. Speaker, I would like to say to the gentleman from Illinois that we have had an opportunity on this side to examine the gentleman's statement and it is the intent of the committee that the NIH continue to support research in cystic fibrosis.

The committee report states explicitly, and I quote:

Cystic fibrosis remains this nation's most prevalent fatal genetic disease. Despite decades of research, half of those born with cystic fibrosis cannot expect to live past the age of 20. Therefore, the Committee urges NIH to maintain and strengthen its cystic fibrosis research programs.

The gentleman is correct. I have just read the language contained in our report and we want to commend the gentleman.

Mr. SIMON. May I ask my colleague further, is it also the intent of the committee that the Cystic Fibrosis Center be maintained at NIH?

Mr. NATCHER. I would say to the gentleman that that statement is correct.

Mr. SIMON. I thank my colleague and I appreciate his assistance.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. SIMON. I am pleased to yield to my colleague, the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I commend my colleague, the gentleman from illinois, for his statement on the importance of further research and continued momentum in the efforts to make inroads in one of the most intractable diseases affecting children and young adults.

I am proud to say that I have long been a supporter of research in this area and am impressed with the progress that is being made in understanding this disease, which is the first vital step in finding a cure.

My good friend, the gentleman from Ohio (Mr. STOKES) and I sponsored language in this year's report stating that the committee looks forward to the establishment of a long-awaited Cystic Fibrosis Research Center included in the budget request for the National Institute of Arthritis, Diabetes, Digestive and Kidney Diseases.

□ 1215

While that will be a center for extramural research to be located in Ohio, it will make important contributions to this field. In addition, you may be sure that the committee and myself, in particular, will remain vigilant to assure the gentleman from Illinois that NIH continue its intramural research program as well.

I would be happy to work with the gentleman in connection with the hearings on the fiscal year 1984 budget request and to ask questions on the gentleman's behalf on this subject, and I commend my good friend from Illinois for his interest in this area.

Mr. SIMON. I commend my colleague from Massachusetts. This is the No. 1 generic killer of young people in this country. I appreciate the gentleman's leadership.

CLARIFICATION OF PAYMENTS IN LIEU OF TAXES TO STATES FOR INDIAN SCHOOLS

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MARLENEE. Mr. Speaker, will the gentleman yield to me?

Mr. CONTE. I yield to the gentleman from Montana.

Mr. MARLENEE. Mr. Speaker, I would like to engage in a colloquy with the ranking member and chairman of the subcommittee.

Mr. Speaker, in the language of the continuing appropriations for HHS, it states that the payments in lieu of taxes to the States for Indian schools would be based on the actual payments received in 1981. Because of the method Montana used in computing their payments since 1964, several heavily impacted districts have been underpaid by about one-third.

Was it the intention of the ranking member and the chairman of the subcommittee that future payments would be based on low entitlement computations in effect in Montana in 1981, the base year on which all subsequent entitlements have been made, or would Montana have an opportunity to correct these computations and receive the rightful amount that they are entitled to?

Mr. CONTE. If there was a miscalculation, Mr. Speaker, then I am sure that the subcommittee would not want Montana to receive a shortfall and would want to rectify that error.

Mr. NATCHER. Mr. Speaker, will the gentleman yield to me?

Mr. CONTE. I would be happy to yield to the gentleman from Kentucky, the chairman of the subcommittee.

Mr. NATCHER. I thank the gentleman for yielding.

Mr. Speaker, I would concur with the statement made by the gentleman from Massachusetts (Mr. CONTE).

Mr. MARLENEE. Mr. Speaker, will the gentleman yield further to me?

Mr. CONTE. I yield to the gentleman from Montana.

Mr. MARLENEE. I thank the gentleman for yielding.

Mr. Speaker, I thank the gentleman for their colloquy and for their consideration.

SUNDRY MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Saunders, one of his secretaries.

APPOINTMENT OF CONFEREES ON H.R. 5447, FUTURES TRADING ACT OF 1982

Mr. JONES of Tennessee. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 5447) to extend the Commodity Exchange Act, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee? The Chair hears none, and, without objection, appoints the following conferees: Messrs. DE LA GARZA, JONES of Tennessee, BEDELL, GLICKMAN, DASCHLE, DORGAN of North Dakota, HARKIN, ENGLISH, PANETTA, WAMPLER, JEFFORDS, COLEMAN, ROBERTS of Kansas, SKEEN, GUNDERSON, and EVANS of Iowa; and

For consideration of title I and section 237 of H.R. 5447 as passed by the House and section 3 of the Senate amendment: Messrs. DINGELL, WIRTH, and BROYHILL.

There was no objection.

PERSONAL EXPLANATION

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, although I cast my vote for the Treasury-Postal Service appropriations bill yesterday, I ask unanimous consent that some reservations that I made be entered into the permanent RECORD immediately prior to the final vote on that legislation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. WEISS. Mr. Speaker, although I am casting my vote for it, I would like to note that the Treasury-Postal appropriations bill that is before us today contains a familiar and unwarranted provision which restricts access to abortion for women covered by Federal employees' health insurance plans.

I strongly believe that this provision has no place in this or any other piece of legislation. It constitutes a fundamental violation of the right of Federal employees to use their earned compensation as they see fit. In addition, it compromises the right of labor organizations to offer comprehensive health plans to their members, the right of all individuals to complete medical care, and the right of a physician and patient to determine appropriate medical treatment.

Certainly, all of us would agree that health insurance benefits are earned by Federal employees and are tantamount to salaried compensation. Not only do employees earn the Federal Government's contribution to their health insurance, but they also directly contribute a hefty portion of the costs of these plans. Consequently, they should be guaranteed the freedom to personally choose a health plan that best accommodates their individual needs. Withdrawal of this guarantee sets a dangerous precedent that may well encourage further attempts to tamper with earned benefits and wages, and with other employees' rights.

This language also interferes with the right of Federal employees' labor organizations to offer comprehensive health plans to their members. It undermines these employees' right to a fair collective bargaining process and is simply an outright denial their contractual rights.

As is the case with other antiabortion provisions, this language jeopardizes the physical and mental health of thousands of women in this country. Legislation which prohibits all abortions except those necessary to save the life of the woman ignores the complexity of decisions that are made between doctor and patient for all kinds of medical care. To fully protect the welfare of these women, abortion must be included in the arena of medical options.

It is time that this Congress act in concert with the American public's overwhelming support of a woman's right to reproductive freedom. We cannot continue to allow the will of a vocal and well-funded minority to regulate the intimate aspects of all of our lives and to dictate moral and religious beliefs to the American public.

PROVIDING FOR CONSIDERATION OF H.R. 6995, FEDERAL TRADE COMMISSION AUTHORIZATION ACT OF 1982

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 587 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 587

Resolved, That upon the adoption of this resolution it shall be in order, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) and clause 2(l)(6) of rule XI to the contrary notwithstanding, to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6995) to amend the Federal Trade Commission Act to extend the authorization of appropriations contained in

such Act, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce, and one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Rules, the bill shall be considered as having been read for amendment under the five-minute rule. No amendment to the bill shall be in order except the following amendments, which shall not be subject to amendment except as herein specified, and which shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole: (1) the amendments recommended by the Committee on Rules now printed in the bill, said amendments shall be considered en bloc and shall be debatable for not to exceed one hour, equally divided and controlled by the chairman and ranking minority member of the Committee on Rules; (2) the amendment printed in the Congressional Record of September 15, 1982, by, and if offered by, Representative Luken of Ohio or Representative Lee of New York, and said amendment shall be debatable for not to exceed one hour, equally divided and controlled by the proponent of the amendment and a Member opposed thereto, and said amendment shall be subject to a substitute printed in the Congressional Record of September 15, 1982, by Representative Broyhill of North Carolina, and if offered by Representative Broyhill or Representative Dingell of Michigan, said substitute shall be debatable for not to exceed one hour, equally divided and controlled by Representative Broyhill or Representative Dingell and a Member opposed thereto, and all points of order against said substitute for failure to comply with the provisions of clause 7, rule XVI are hereby waived; (3) the amendment printed in the Congressional Record of September 15, 1982, by, and if offered by Representative Broyhill of North Carolina, and said amendment shall be debatable for not to exceed thirty minutes, equally divided and controlled by Representative Broyhill and a Member opposed thereto; (4) the amendment printed in the Congressional Record of September 15, 1982, by, and if offered by, Representative Dannemeyer of California, and said amendment shall be debatable for not to exceed thirty minutes, equally divided and controlled by Representative Dannemeyer and a Member opposed thereto. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Ohio (Mr. LATTA) and pending that, I yield myself such time as I may consume.

Mr. Speaker, the resolution provides for the consideratins of the bill (H.R. 6995). It is a rather complex rule but I am aware of no opposition to the procedure recommended by the Committee on Rules.

The bill is the authorization for the Federal Trade Commission.

Mr. Speaker, the rule provides 1 hour of general debate—divided in the customary manner—to each of the committees responsible for the bill: the Committee on Rules and the Committee on Energy and Commerce.

The rule makes in order four amendments. The Rules Committee amendments propose to strike the legislative veto provisions.

The amendment by the gentleman from California (Mr. DANNEMEYER) would reduce the level of authorizations in the bill.

The rule also provides for an amendment by the gentleman from Ohio (Mr. LUKEN) relating to an exemption for professions and an amendment to that amendment by the gentleman from North Carolina (Mr. BROYHILL), in the nature of a compromise.

Mr. Speaker, I would like to commend the gentleman from New Jersey (Mr. FLORIO) for his leadership on this matter and for the fairness with which he has attempted to reconcile the concerns over reauthorization of the Federal Trade Commission.

On the whole, his bill and the rule requested by the Committee on Energy and Commerce for handling the matter on the floor represent a reasonable approach toward resolving a difficult political matter.

Mr. Speaker, I am aware of no opposition to this procedure and reserve the balance of my time.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I agree with the gentleman's statements just made that there is not any opposition to the rule, but there certainly is some opposition to some of the amendments that will be proposed, and there is some opposition to the bill itself. It is a very important piece of legislation.

I would hope that the Members of the House would pay very close attention to the debate on this bill, especially when the amendmens are offered.

This rule makes in order four amendments and one substitute and I would like to mention them briefly so the Members will know how the debate is structured on these important issues regarding the Federal Trade Commission authorization bill.

The first is a series of Rules Committee amendments to be considered as one amendment. This amendment strikes the legislative veto section from the Energy and Commerce Committee bill.

The second amendment will be offered by Mr. LUKEN or Mr. LEE. The amendment places a moratorium on FTC regulation of the so-called learned professions.

Next, a substitute for the Luken-Lee amendment will be offered by Mr. BROYHILL or Mr. DINGELL. This substitute would permit the FTC to regulate the learned professions with certain restrictions. The amendment prohibits the FTC from acting where State laws deal with training, education, or experience requirements for licensing. It allows the FTC to act when the FTC can prove that a State law mandates or permits a business or commercial practice which is anticompetitive. Finally, it limits the FTC's antitrust authority where the State requires the practice and actively enforces that requirement. This substitute will be debated for 1 hour.

The third amendment is a technical amendment to be offered by Mr. BROYHILL to assure that the new definition of "unfairness" in the bill will not apply automatically to State "mini-FTC" laws that follow Federal standards of consumer protection. This amendment will be debated for 30 minutes.

The fourth amendment will be offered by Mr. DANNEMEYER. This amendment reduces the appropriations authorization for the FTC to the levels requested by the administration. Adoption of this amendment will reduce the FTC authorization by about $40 million over a 3-year period. This amendment will be debated for 30 minutes.

These are the four amendments and one substitute the rule makes in order and there is also one motion to recommit.

Mr. Speaker, this is an unusual rule but it does permit a number of important and controversial issues relating to the Federal Trade Commission to be debated fully and voted on by the Members.

Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. Mr. Speaker, I appreciate the gentleman from Massachusetts yielding this time to me. I take this time for purposes of clarifying the procedure with respect to the legislative veto motion.

It is my understanding that the bill itself contains provisions providing for a legislative veto on rules issued by the Federal Trade Commission. That is in the bill as reported by the committee. And it is further my understanding that a motion to strike those provisions is now made in order by this rule.

My question is this: First of all, are any other amendments to the legislative veto provisions made in order? Can amendments be offered to those provisions?

Second, how will the time be allocated with respect to the debate on the

motion to strike the provisions as provided by the rule?

Mr. MOAKLEY. Mr. Speaker, will the gentleman yield to me?

Mr. LEVITAS. I yield to the gentleman from Massachusetts.

Mr. MOAKLEY. I thank the gentleman for yielding.

Mr. Speaker, in response to the gentleman from Georgia (Mr. LEVITAS), I would say it is a straight up-and-down vote. Each of the gentlemen, Mr. BOLLING and Mr. QUILLEN, have a half hour on the matter.

Mr. LEVITAS. I thank the gentleman from Massachusetts. I appreciate the answer.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

□ 1230

PROVIDING FOR CONSIDERATION OF H.R. 6329, DEPARTMENT OF ENERGY NATIONAL SECURITY AND MILITARY APPLICATIONS OF NUCLEAR AUTHORIZATION ACT OF 1983

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 567 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 567

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6329) to authorize appropriations for the Department of Energy for national security programs for fiscal year 1983, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, the bill shall be read for amendment under the five-minute rule by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from South Carolina (Mr. DERRICK) is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Ohio (Mr. LATTA), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 567 provides for the consideration of the bill, H.R. 6329, to authorize appropriations for the Department of Energy for national security programs for fiscal year 1983, and for other purposes.

The rule provides 1 hour of general debate to be equally divided and controlled by the chairman and the ranking minority member of the Committee on Armed Services. This is a straight open rule, allowing any germane amendment to be offered under the 5-minute rule. There are no waivers of points of order. The bill shall be read by titles instead of by sections. One motion to recommit is in order.

Mr. Speaker, H.R. 6329 authorizes $5.74 billion in fiscal year 1983 for DOE national security programs. The committee's recommendation is $8.3 million less than was requested by the President for operating expenses, construction projects, and capital equipment. Included in this recommendation is $109 million for uranium enrichment services for Navy nuclear fuel.

Mr. Speaker, this legislation authorizes funding for DOE programs that are vital for a strong national defense. The bill authorizes funds for such national security matters as research, development, and production in support of the armed services, the production of strategic and critical materials, and the military applications of nuclear energy. I urge my colleagues to adopt House Resolution 567 so that the House may proceed to consider this very important legislation.

Mr. LATTA. Mr. Speaker, the statements just made by the gentleman from South Carolina are absolutely correct, and I have no objection to any of them. I might say that the bill itself was strongly supported by both the majority and minority of the Armed Services Committee in testimony before the Rules Committee. As the gentleman from South Carolina has pointed out, it is an open rule. These are important security programs authorized by the bill.

Title I of H.R. 6329 deals with various national security programs, such as: Naval reactors development, weapons activities, verification and control technology, materials production, defense nuclear waste management, nuclear materials security and safeguards development, and security investigations. Title II outlines general provisions. The following chart summarizes the major provisions of this bill:

[Amounts in millions of dollars]

Item	Fiscal year 1983 request	Committee recommendation	Change from request
Operating expenses	4,524,040	4,524,040	0
Plant construction expenses	871,695	863,395	−8,300
Capital equipment	356,546	356,546	0
Total DOE defense activities	5,752,281	5,743,981	−8,300

I would urge expeditious adoption of the resolution so that we can proceed with the consideration of the legislation.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. DERRICK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to recommit was laid on the table.

LEGISLATION INTRODUCED REQUIRING $1 IN WAGES FOR EVERY $1 IN CORPORATE TAX RELIEF

(Mr. BENNETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BENNETT. Mr. Speaker, I just now have introduced a bill to provide that the provisions of the tax bill for corporations in 1981, as far as the future is concerned, shall be contingent upon them paying our $1 in wages for new jobs for every other $1 they accept and receive in tax relief. In other words they would get the whole tax relief first. At least one-half would have to be spent on new jobs. The reason I feel that is a logical thing to do is because that was the President's program to begin with. He wanted to have a tax bill which would encourage the production of jobs.

My bill will mandate production of jobs, which of course will be used by the corporations which would otherwise be spending all that tax money buying other corporations and doing other things which are not the objective of the general thrust of the President.

We are all deeply concerned with our national economy. The current recession has brought the unemployment rate to its highest level since Pearl Harbor. Over 10 million Americans are unemployed and over 5 million are working short hours due to the recession. It is estimated that 1.5 million workers have grown discouraged and have stopped looking for work altogether. One in every five workers, over 21 million Americans experienced some period of unemployment in 1981. The number is expected to top 30 million in fiscal 1982. Clearly, it is time we addressed this problem with more than legislative Band-Aids, and with an approach to funding which does not add to the horrendous deficits we now face.

The 1981 tax bill had a disastrous impact on our economy. The administration said it would reduce personal and corporate taxes to spur investment. What it did was to drastically reduce Government revenues and de-

crease capital investment. Estimates are that some $750 billion in tax revenues will be lost to the Government over the next 5 years. The business tax breaks provided in this act were supposed to turn the economy of this country around and provide more employment. In fact, just the opposite has occurred and unemployment has risen dramatically.

The 1981 tax cut gave corporations a great deal of aid. It allowed them to sell each other tax breaks, thus allowing General Electric, for example, a tax refund of almost $100 million. It allowed 33 corporations with U.S. earnings of over $100 million to pay no income taxes at all in 1981. And, it reduced the proporation of 1982 Federal revenues attributable to the corporate income tax to 18 percent, an all-time low. By comparison, in 1950, corporate income taxes were 40 percent of all Federal taxes.

Businesses under the 1981 Tax Act were to be encouraged into expansion by the liberal depreciation provisions provided for in the act—and the accelerated cost recovery system came into being. It was estimated at that time that businesses would be saved in excess of $142 billion over the next 5 years in Federal income tax expenditures. This amount was to be channeled into capital expenditures that, in turn, would help provide jobs. It did not work as planned.

Within a year of passage of this act, Congress changed the leasing provisions of the act and thus reduced the ACRS tax savings to business by $50 billion, However, this still left $92 billion in tax savings for businesses from the 1981 provisions.

I have just introduced a bill entitled the Employment Recovery Act that would require any business taking advantage of these tax savings to spend 50 cents on the employment of new workers for every dollar of tax savings. If all businesses originally estimated to take advantage of the accelerated cost recovery system do so, my legislation would guarantee that $46 billion would be invested in new employment over the next 5 years. If an average annual wage of $15,000 is assumed, over 3 million new jobs would be created by my bill.

I think it is clear that the President's economic recovery program for businesses has failed. Capital expenditure has not revived as expected, and new employment opportunities have not arisen as expected. My bill would change the President's program to guarantee that new jobs would be created by the tax breaks given to businesses by the overly generous Tax Act of 1981.

PLAN FOR DECREASING FILL RATE OF STRATEGIC PETROLEUM RESERVE—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, without objection, referred to the Committee on Energy and Commerce:

(For message, see proceedings of the Senate of today, Wednesday, December 1, 1982.)

STRATEGIC PETROLEUM RESERVE DRAWDOWN PLAN, AMENDMENT NO. 4 AND DRAWDOWN AND DISTRIBUTION REPORT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Energy and Commerce:

(For message, see proceedings of the Senate of today, Wednesday, December 1, 1982.)

DEPARTMENT OF ENERGY NATIONAL SECURITY AND MILITARY APPLICATIONS OF NUCLEAR ENERGY AUTHORIZATION ACT OF 1983

Mr. STRATTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6329) to authorize appropriations for the Department of Energy for national security programs for fiscal year 1983, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. STRATTON).

The notion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 6329, with Mr. BROWN of California in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from New York (Mr. STRATTON) will be recognized for 30 minutes, and the gentlewoman from Maryland (Mrs. HOLT) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, H.R. 6329 is the annual appropriation authorization bill for the defense programs of the Department of Energy. While the total authorizations contained in the bill are less than 3 percent of the total amount requested for defense in fiscal year 1983, and represent a much smaller percentage of the gross national product, this bill is of tremendous importance to our national defense and security.

Without the annual appropriations authorized by bills such as H.R. 6329, the strategic and tactical nuclear deterrent forces of the United States would soon disappear; important research work would be discontinued; the naval nuclear propulsion program would deteriorate and the radioactive wastes resulting from previous defense efforts could not continue to be effectively managed.

Since the advent of the cold war over 30 years ago, the nuclear arsenal of the United States has been the positive force that has prevented the domination of Western Europe, Japan, and other areas of vital interest to the United States by the Soviet Union and its Warsaw Pact allies. This deterrent is being adversely affected by the aggressiveness of an unparalleled Soviet military buildup. The Soviet Union continues, as it has for more than a decade, assembling ever larger nuclear and conventional military strength on land, in air and space, and on and under the sea. These forces are rapidly being reequipped with modern nuclear armed cruise and ballistic missiles.

The extent of these Soviet forces is many times greater than that necessary for Soviet defense. Let me point out that during the so-called periods of détente and the many years of U.S. restraint—the years we let our forces decay—the Soviets have continued their relentless buildup.

As former Secretary of Defense, Harold Brown said, "We build, they build. We show restraint, they build."

The Congress in the exercise of its constitutional responsibilities to provide for the common defense and to provide for and maintain the Armed Forces, plays a major role in maintaining the U.S. nuclear arsenal. The President's annually approved requirements for new, improved, and upgraded nuclear weapons requires that sufficient funding must be provided for research, development and testing; for the maintenance of weapons now in the inventory; for the production of strategic weapons materials; for the fabrication of new weapons; for the safe containment of wastes; and for the retirement of weapons and the reclamation of valuable materials. All of these activities, not just some of them, must be supported for the United States to maintain a credible, reliable and viable nuclear deterrent

force, one which is so recognized by potential adversaries. It is the Congress which must provide this support on an annual basis.

Another important factor must be understood. The increasingly stringent requirement for rigorous safety standards, security, and the control of weapons information. Additionally, nuclear weapons defense programs are not, per se, exempt from compliance with the rules and standards issued by the EPA, OSHA, and other regulatory agencies. Therefore, the Congress must either provide sufficient funding for compliance with those regulations or provide exemption, in part or in whole, from regulatory requirements.

Let me pursue this question of exemption a bit further. With ever greater frequency, Federal, State, and local governments are attempting to enforce increasingly restrictive environmental and transportation standards. While this Nation may survive without nuclear power, without nuclear medicine, and without luminous dial watches, I truly believe that in today's reality it may not survive without a modern nuclear deterrent force. Courts have interpreted laws such as the Clean Air Act in such a way that Federal defense nuclear facilities would be forced to shut down to comply, or the Congress could be required to appropriate billions, literally to keep a single, hypothetical radionuclide from crossing a nuclear weapons plant boundary. This is Hobson's choice we can live without.

H.R. 6329 represents only an annual increment of a national commitment to rebuild and modernize the defense of the United States. This rebuilding and modernization effort, supported by President Carter, and by President Reagan, follows more than a decade of U.S. restraint. As you know, Mr. Chairman, instead of building and deploying tactical and strategic nuclear weapons systems during the period of restraint, the United States placed heavy reliance upon arms control efforts.

During years of negotiation brought forth several agreements that were advertised as arms control measures, but which did absolutely nothing to control arms. The limited test ban treaty and the threshold test ban treaty were scrupulously observed by the United States and have, in some ways, impacted negatively on our weapons systems developments.

Former Secretary of Defense, Harold Brown, not exactly categorized as a hawk, told the Armed Services Committee on January 29, 1980, almost 3 years ago, and I quote from his testimony:

> In strategic nuclear forces, the Soviets have come from a position of substantial numerical inferiority 15 years ago to one of parity today—a potential for strategic advantage if we fail to respond with adequate programs of our own . . . Of greatest concern, they have deployed highly accurate MIRVed ICBMs with the potential for threatening the survivability of our ICBM silos.

Remember that this was 3 years ago. More than 2 years before that statement, I released a statement during the Christmas recess of 1977 to the same effect.

During his January 1980 testimony, Secretary Brown continued, and I quote:

> In addition to this buildup in their central strategic systems, the Soviets have modernized both their intermediate range and their tactical nuclear forces. The MIRVed and mobile SS-20 ballistic missile and the BACKFIRE bomber are the most disturbing components of this ambitious program.
>
> At the same time, Soviet ground and tactical air forces in Eastern Europe are excessively large and much too offensively oriented to serve primarily as a counterweight to NATO capabilities, let alone as occupation troops.

All of these gains were made while an arms control measure, SALT I, was in force and SALT was being negotiated. Would SALT II provide the necessary impact to cause a reduction in Soviet SS-18 forces, or the SS-17, SS-19, or SS-20 forces while our MX force exists only in the minds of our defense planners?

Since Secretary Brown's departure things have gotten worse.

Does the United States expect to achieve real arms reductions agreements with the Soviet Union? If so, we must enter the negotiation of such agreements under conditions that indicate a national will to achieve and maintain parity at whatever level is agreed to, and to insist on truly effective verification methods that are keyed to such agreements.

Arms control initiatives must be approached within the context of overall national security. Any negotiations are likely to be difficult and protracted. Interruption of our weapons modernization efforts, as some propose, pending the outcome of arms control negotiations would only worsen an unstable nuclear balance and remove incentives for Soviet agreement, let alone concessions.

Mr. Chairman, this fiscal year 1983 authorization bill for the Department of Energy's atomic energy defense program, along with the fiscal year 1983 Defense Authorization Act (Public Law 97-252) will continue the slow and tedious defense recovery effort recommended by Presidents Carter and Reagan.

At this point, I want to commend the ranking minority member of the Subcommittee on Procurement and Military Nuclear Systems for her efforts on H.R. 6329. The bill reported from the subcommittee was voted 13 to 0; true bipartisan support. It cleared the full Armed Services Committee by a vote of 41 to 2.

The committee recommends a total authorization of $5,743.9 million, $8.3 million below the budget request of $5,752.2 million.

Section 101 of the bill would authorize $4.524 billion, the amount requested. The plant and capital equipment request (section 102) was reduced by $8.3 million to $1.22 billion. The reduction was in the plant construction category.

The authorizations are in seven major categories. They are: Naval reactors development; weapons activities; verification and control technology; materials production; defense nuclear waste; nuclear materials security and safeguards development; and security investigations.

The committee recommended no change from the request for four of the categories—naval reactors development, verification and control technology, materials security and safeguards, and security investigations. I will now very briefly discuss the committee's recommended changes.

WEAPONS ACTIVITIES

Weapons activities consist primarily of R&D, testing, production and surveillance, and inertial confinement fusion. The committee recommended the $2.822 billion requested for authorization but proposed that $18 million be allocated from R&D, testing and production surveillance and added to inertial confinement fusion, bringing this program up to $140 million—last year's level of funding.

The Congress has invested more than $1.3 billion in the inertial confinement fusion program over the past 4 years. Three major national laboratory systems are now nearing completion. Until these systems are completed and experiments conducted, there will be no way to measure the contributions that this program can make to the nuclear weapons program or to our future energy supply. Only $122 million was requested for operating expenses for inertial confinement fusion program for fiscal year 1983. This amount is well below what is needed to maintain a reasonable level of effort. The committee recommends that the $18 million be added to the request to permit an orderly, but nevertheless slowed, continuation of the R&D programs on glass and gas lasers and particle beam fusion systems. The committee knows of no reason why these important ongoing programs should not be funded to completion so that full scale experiments can be started. The very minor reductions proposed for the R&D, testing and production surveillance subprograms will have no noticeable effect on projected activities.

With regard to plant construction funding for the weapons program, an overall reduction of $21.3 million was recommended. I would like to mention

two of the proposed reductions. Some $16 million was requested for a new production facility for a future warhead for the low altitude defense (LoAD) system. Since funding for the LoAD missile was deleted in the Fiscal Year 1983 Defense Authorization Act, the committee believes there is no need for a production facility at this time. The second item concerns the proposed development of a nuclear warhead for the Navy's SM-2 missile. The committee agreed that for certain combat conditions a nuclear warhead would be most effective but that the request was premature. An authorization of $1 million was recommended for the examination of several options possible for an SM-2 warhead.

The other recommended changes would add two new projects, add funds for five projects authorized in fiscal year 1982 but not budgeted in fiscal year 1983, and would reduce funding for two projects, in addition to SM-2. No changes were recommended to the capital equipment request.

MATERIALS PRODUCTION

The committee recommended the authorization of the requested $957.2 million for materials production. The committee also recommended that a total of $40 million be reallocated from reactor operations, materials processing and supporting services and be added to special isotope separation or SIS. SIS uses lasers to literally purify plutonium which was produced in the past in the weapons program but which is not suitable for weapons use. The SIS process could save billions of dollars if the process works as predicted.

The other item of special interest in the materials production program is the authorization of $109 million for enriched uranium necessary for the naval nuclear propulsion program. In the past, DOE supplied the material and the Navy reimbursed DOE after the fuel was used and then reprocessed. This year for the first time the OMB wanted those funds to be supplied by the defense authorization bill in the Navy's O&M account. The committee could find no justification for this action and recommended the funding be included with the DOE budget as in the past.

DEFENSE NUCLEAR WASTE MANAGEMENT

The committee recommended the authorization of the requested $288.9 million for waste management, with the proviso that a new category, byproducts beneficial uses, be authorized with $10 million in funding. Of that sum, $7 million is to be derived from amounts requested for the interim waste management program and $3 million from long-term waste management technology program. The byproducts beneficial uses program initially will use cesium from the reprocessing waste stream to irradiate sewage sludge and certain foodstuffs to kill bacteria, in one case, and fruit flies in another. Platinum-family metals are also obtainable from the waste processing stream for such use as catalytic converters in automobiles. Besides the economic value of the extracted materials, the waste processing stream is artificially aged by 750–1,000 years and can be more easily handled in interim storage or final disposition.

Mr. Chairman, there are nine general provisions contained in title II of the bill. These are administrative, or housekeeping, provisions requested by the administration to cover: First, reprograming; second, limits on general plant projects; third, limits on construction projects; fourth, fund transfer authority; fifth, authority for construction design; sixth, authority for emergency construction design; seventh, funds available for all national security programs of DOE; eighth, adjustments for pay increases; and ninth, availability of funds.

That completes my general explanation of the bill, Mr. Chairman. In closing, I believe that the bill, as reported by the committee, is an improvement over the request, since the committee's actions reflect the developments that have occurred during many months since the budget was developed. The several committee initiatives will continue important research work, refurbish or replace deteriorating facilities, and move several research programs into a demonstration phase.

□ 1245

Mrs. HOLT. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to commend my subcommittee chairman, Mr. STRATTON, for his leadership in the development of H.R. 6329, and I associate myself with his remarks. As Chairman STRATTON stated, this is a bipartisan bill; it is of much greater importance than the amount of authorizations it carries might indicate.

I also want to commend the members of the Subcommittee on Procurement and Military Nuclear Systems for their faithful attendance and many contributions during the work-up of H.R. 6329. I believe that the bill represents a considerable improvement over the request.

Mr. Chairman, while I commend the Reagan administration for the general thrust of the budget request for DOE defense programs, I agree that there were a few discrepancies. This is particularly true with respect to the inertial confinement fusion research program. I have recently been to all three of the nuclear weapons research laboratories—at Sandia and Los Alamos in New Mexico, and at Livermore, Calif. The inertial fusion research at these laboratories is most impressive, and I believe that it would be the shame of modern times to fail to fund these research efforts adequately. I support the reallocation of $18 million above the request for this program. This addition will do little more than allow the ICF program to say even with inflation. But it will shorten the time until we can hope to see truly useful experiments underway at the laboratories.

As Chairman STRATTON has pointed out, it is this bill that provides the "teeth" for the "tail" contained in the DOD authorization bill. Without the authorization carried by this bill, the MX, Cruise missile, Trident, and other strategic and tactical weapons requested by both Presidents Reagan and Carter would be useless.

Another committee initiative, Mr. Chairman, would encourage the Department of Energy to look into the development of ways to beneficially use radioactive materials that are now classified as wastes. I am sure that we all remember the days when useful products such as sawdust, metal filings, and even used oil, were thrown away as waste products. This is no longer the case.

Useful products are contained in so-called radioactive wastes that can contribute to the economy and welfare. Sewage sludge can be rendered harmless. Fruits and vegetables, meats and other products, can be preserved against insects and bacteria. This bill will make a beginning on these programs while providing the potential of hundreds of millions in savings on the treatment and disposal of defense nuclear wastes.

This year the committee also recommends an increased authorization for the special isotopes separation program to advance the experimental programs at Los Alamos and Lawrence Livermore National Laboratories. Both programs are promising. While the specifics of the special isotopes separation program are classified, I will state that the committee believes that these programs have the potential to save billions of dollars over the years.

In my opinion, Mr. Chairman, H.R. 6329 was carefully drafted to provide appropriate authorization and administrative authority to the Department of Energy to utilize most effectively the $5.7 billion recommended for authorization.

I join the chairman in his recommendation for the passage of this bill without amendment.

Mr. Chairman, I have no requests for time, and I yield back the balance of my time.

Mr. STRATTON. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the Clerk will now read the bill by titles.

The Clerk read as follows:

H.R. 6329

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Department of Energy National Security and Military Applications of Nuclear Energy Authorization Act of 1983".

TITLE I—NATIONAL SECURITY PROGRAMS

OPERATING EXPENSES

SEC. 101. Funds are authorized to be appropriated to the Department of Energy for fiscal year 1983 for operating expenses incurred in carrying out national security programs (including scientific research and development in support of the Armed Forces, strategic and critical materials necessary for the common defense, and military applications of nuclear energy and related management and support activities) as follows:

(1) For naval reactors development program, $331,760,000 including $9,660,000 for program management.

(2) For weapons activities, $2,822,091,000 to be allocated as follows:

(A) For research and development, $644,600,000.

(B) For weapons testing, $420,400,000.

(C) For the defense inertial confinement fusion program $140,000,000, of which—

(i) $75,100,000 shall be used for glass laser experiments;

(ii) $41,800,000 shall be used for gas laser experiments;

(iii) $20,000,000 shall be used for pulsed power experiments; and

(iv) $3,100,000 shall be used for supporting research and experiments, except that none of such funds may be used for the research, development, or demonstration of the use of heavy ion devices as drivers for defense inertial confinement fusion experiments and defense inertial confinement fusion systems.

(D) For production and surveillance, $1,565,800,000.

(E) For weapons program management, $51,291,000.

(3) For verification and control technology, $52,400,000 including $1,800,000 for program management.

(4) For defense nuclear materials production, $957,200,000, to be allocated as follows:

(A) For uranium enriching, $109,000,000.

(B) For production reactor operations, $345,460,000.

(C) For processing of defense nuclear materials, $210,600,000.

(D) For special isotope separation research, $63,000,000.

(E) For supporting services, $227,000,000.

(F) For program management, $2,100,000.

(5) For defense nuclear waste, $288,929,000, to be allocated as follows:

(A) For interim waste management, $190,313,000.

(B) For long term waste management technology, $53,861,000.

(C) For terminal waste storage, $14,000,000.

(D) For byproducts beneficial uses, $10,000,000.

(E) For decontamination and decommissioning, $12,655,000.

(F) For transportation research and development, $6,100,000.

(G) For program management, $2,000,000.

(6) For nuclear materials security and safeguards technology development program (defense programs), $43,160,000, including $5,850,000 for program management.

(7) For security investigations, $28,500,000.

PLANT AND CAPITAL EQUIPMENT

SEC. 102. Funds are authorized to be appropriated to the Department of Energy for fiscal year 1983 for plant and capital equipment (including planning, construction, acquisition, and modification of facilities, land acquisition related thereto, and acquisition and fabrication of capital equipment not related to construction) necessary for national security programs as follows:

(1) For naval reactors development:

Project 83-N-101, general plant projects, various locations, $1,500,000.

Project 83-N-102, additions to the radioactive materials laboratory, Knolls Atomic Power Laboratory, Schenectady, New York, $1,500,000.

Project 82-N-111, Materials Facility, Savannah River, South Carolina, $40,000,000, for a total project authorization of $55,000,000.

Project 83-D-101, general plant projects, various locations, $15,800,000.

Project 83-D-122, Los Alamos Airport improvement, Los Alamos National Laboratory, New Mexico, $3,100,000.

Project 83-D-123, general plant projects, various locations, $16,300,000.

Project 83-D-124, standard missile-2 (SM-2) warhead production facilities, various locations, $1,000,000.

Project 83-D-199, buffer land acquisition, various locations, $3,000,000.

Project 82-D-106, weapons assembly facilities, Pantex Plant, Amarillo, Texas, $16,500,000 for a total project authorization of $40,000,000.

Project 82-D-107, utilities and equipment restoration, replacement, and upgrade, phase III, various locations, $151,800,000, for a total project authorization of $239,300,000.

Project 82-D-108, nuclear weapons stockpile improvement, various locations, $15,000,000, for a total project authorization of $30,000,000.

Project 82-D-109, 155-millimeter artillery-fired atomic projectile (AFAP) production facilities, various locations, $30,000,000, for a total project authorization of $65,000,000.

Project 82-D-110, exhaust plenum modifications, Rocky Flats Plant, Colorado, $500,000.

Project 82-D-111, interactive graphics system, various locations, $12,000,000, for a total project authorization of $21,000,000.

Project 82-D-144, simulation technology laboratory, Sandia National Laboratories, New Mexico (AE only), $10,000,000.

Project 82-D-146, weapons production and production support facilities, various locations, $35,000,000, for a total project authorization of $43,000,000.

Project 82-D-150, weapons material research and development facility, Lawrence Livermore National Laboratory, California, $10,000,000.

Project 82-D-152, new detonator facility, Los Alamos National Laboratory, New Mexico, $9,100,000.

Project 82-D-153, tritium facility, Los Alamos National Laboratory, New Mexico, $2,600,000.

Project 81-D-115, MX warhead production facilities, various locations, $55,000,000, for a total project authorization of $95,000,000.

Project 81-D-133, earthquake damage restoration, Lawrence Livermore National Laboratory, Livermore, California, $1,500,000, for a total project authorization of $5,500,000.

Project 81-D-134, earthquake damage restoration, Sandia National Laboratories, Livermore, California, $1,700,000, for a total project authorization of $3,700,000.

Project 79-7-c, proton storage ring, Los Alamos National Laboratory, Los Alamos, New Mexico $2,800,000, for a total project authorization of $21,800,000.

Project 78-17-d, steam plant improvements, Y-12 Plant, Oak Ridge, Tennessee, $1,500,000, for a total project authorization of $27,000,000. (3) For materials production:

Project 83-D-135, general plant projects, various locations, $26,000,000.

Project 83-D-136, plant engineering and design, various locations, $2,000,000.

Project 83-D-138, PUREX canyon and dissolver filter systems improvements, Richland, Washington, $4,250,000.

Project 83-D-142, fuel dissolver off-gas transfer and treatment system, Idaho Fuels Processing Facility, Idaho National Engineering Laboratory, Idaho, $7,600,000.

Project 83-D-146, water pollution control, Feed Materials Production Facility, Fernald, Ohio, $2,500,000.

Project 83-D-147, pollution discharge elimination, Savannah River, South Carolina, $1,000,000.

Project 83-D-148, nonradioactive hazardous waste management, Savannah River, South Carolina, $1,000,000.

Project 83-D-180, facility storage modifications, various locations, $16,300,000.

Project 82-D-124, restoration of production capabilities, phases II and III, various locations, $48,500,000 for a total project authorization of $174,500,000.

Project 82-D-126, reactor safety and reliability, various locations, $18,700,000, for a total project authorization of $61,600,000.

Project 82-D-136, fuel processing facilities upgrade, Idaho Fuels Processing Facility, Idaho National Engineering Laboratory, Idaho, $6,000,000, for a total project authorization of $46,000,000.

Project 82-D-201, special plutonium recovery facilities, F-chemical separations area, Savannah River, South Carolina, $62,000,000, for a total project authorization of $64,000,000.

Project 81-D-142, steam transfer header, Savannah River, South Carolina, $10,400,000, for a total project authorization of $18,400,000.

Project 81-D-143, L-reactor upgrade, Savannah River, South Carolina, $19,000,000, for a total project authorization of $134,000,000.

(4) For defense nuclear waste:

Project 83-D-156, general plant projects, interim waste operations, various locations, $19,145,000.

Project 83-D-157, additional radioactive waste storage facilities, Richland, Washington, $19,000,000.

Project 83-D-159, general plant projects, long-term waste management technology, Savannah River, South Carolina, $500,000.

Project 82-BU-1, byproducts beneficial uses demonstration plants, various locations, $20,000,000.

Project 81-T-104, radioactive waste facilities improvements, Oak Ridge National Laboratory, Tennessee, $1,000,000, for a total project authorization of $21,000,000.

Project 81-T-105, defense waste processing facility, Savannah River, South Carolina, $30,000,000, for a total project authorization of $60,000,000.

Project 77-13-f, waste isolation pilot plant, Delaware Basin, Southeast, New Mexico, $110,800,000, for a total project authorization of $268,400,000.

(5) For nuclear materials security and safeguards development:

Project 83-D-175, general plant project, New Brunswick Laboratory, $500,000.

(6) For capital equipment not related to construction—

(A) for naval reactors development, $11,000,000;

(B) for weapons activities, $201,000,000;

(C) for verification and control technology, $1,500,000;

(D) for materials production, $107,700,000;

(E) for defense nuclear waste, $31,646,000; and

(F) for nuclear materials security and safeguards development, $3,700,000.

Mr. STRATTON (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the first committee amendment.

Mr. STRATTON. Mr. Chairman, I ask unanimous consent that the committee amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The committee amendments are as follows:

Committee amendments: Page 4, line 5, strike out "227,000,000" and insert in lieu thereof "$277,040,000".

Page 7, line 2, strike out "500,000." and insert in lieu thereof "$500,000", for a total project authorization of "$12,500,000.".

Page 7, line 10 strike out "(AE only)".

The CHAIRMAN. The question is on the committee amendments.

The committee amendments were agreed to.

The CHAIRMAN. Are there any other amendments to title I?

If not, the Clerk will report the next title.

The Clerk read as follows:

TITLE II—GENERAL PROVISIONS

REPROGRAMING

SEC. 201. (a) Except as otherwise provided in this Act—

(1) no amount appropriated pursuant to this Act may be used for any program in excess of 105 per centum of the amount authorized for that program by this Act or $10,000,000 more than the amount authorized for that program by this Act, whichever is the lesser, and

(2) no amount appropriated pursuant to this Act may be used for any program which has not been presented to, or requested of, the Congress,

unless a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after receipt by the appropriate committees of Congress of notice from the Secretary of Energy (hereinafter in this title referred to as the "Secretary") containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action, or unless each such committee before the expiration of such period has transmitted to the Secretary written notice to the effect that such committee has no objection to the proposed action.

(b) In no event may the total amount of funds obligated pursuant to this Act exceed the total amount authorized to be appropriated by this Act.

LIMITS ON GENERAL PLANT PROJECTS

SEC. 202. (a) The Secretary may carry out any construction project under the general plant projects provisions authorized by this Act if the total estimated costs of the construction project does not exceed $1,000,000.

(b) If at any time during the construction of any general plant project authorized by this Act, the estimated cost of the project is revised because of unforeseen costs variations and the revised cost of the project exceeds $1,000,000, the Secretary shall immediately furnish a complete report to the appropriate committees of Congress explaining the reasons for the cost variation.

(c) In no event may the total amount of funds obligated to carry out all general plant projects authorized by this Act exceed the total amount authorized to be appropriated for such projects by this Act.

LIMITS ON CONSTRUCTION PROJECTS

SEC. 203. (a) Whenever the current estimated cost of a construction project which is authorized by section 102 of this Act, or which is in support of national security programs of the Department of Energy and was authorized by any previous Act, exceeds by more than 25 per centum the higher of (1) the amount authorized for the project, or (2) the amount of the total estimated cost for the project as shown in the most recent budget justification data submitted to Congress, construction may not be started or additional obligations incurred in connection with the project above the total estimated cost, as the case may be, unless a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three days to a day certain) has passed after receipt by the appropriate committees of the Congress of written notice from the Secretary containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of the action, or unless each committee before the expiration of such period has notified the Secretary it has no objection to the proposed action.

(b) Subsection (a) shall not apply to any construction project which has a current estimated cost of less than $5,000,000.

FUND TRANSFER AUTHORITY

SEC. 204. To the extent specified in appropriation Acts, funds appropriated pursuant to this Act may be transferred to other agencies of the Government for the performance of the work for which the funds were appropriated, and funds so transferred may be merged with the appropriations of the agency to which the funds are transferred.

AUTHORITY FOR CONSTRUCTION DESIGN

SEC. 205. (a)(1) Within the amounts authorized by this Act for plant engineering and design, the Secretary may carry out advance planning and construction designs (including architectural and engineering services) in connection with any proposed construction project if the total estimated cost for such planning and design does not exceed $2,000,000.

(2) In any case in which the total estimated cost for such planning and design exceeds $300,000, the Secretary shall notify the appropriate committees of Congress in writing of the details of such project at least thirty days before any funds are obligated for design services for such project.

(b) In any case in which the total estimated cost for advance planning and construction design in connection with any construction project exceeds $2,000,000, funds for such design must be specifically authorized by law.

AUTHORITY FOR EMERGENCY CONSTRUCTION DESIGN

SEC. 206. In addition to the advance planning and construction design authorized by section 102, the Secretary may perform planning and design utilizing available funds for any Department of Energy defense activity construction project whenever the Secretary determines that the design must proceed expeditiously in order to meet the needs of national defense or to protect property or human life.

FUNDS AVAILABLE FOR ALL NATIONAL SECURITY PROGRAMS OF THE DEPARTMENT OF ENERGY

SEC. 207. Subject to the provisions of appropriation Acts, amounts appropriated pursuant to this Act for management and support activities and for general plant projects are available for use, when necessary, in connection with all national security programs of the Department of Energy.

ADJUSTMENT FOR PAY INCREASES

SEC. 208. Appropriations authorized by this Act for salary, pay, retirement, or other benefits for Federal employees may be increased by such amounts as may be necessary for increases in such benefits authorized by law.

AVAILABILITY OF FUNDS

SEC. 209. When so specified in an appropriation Act, amounts appropriated for "Operating expenses" or for "Plant and capital equipment" may remain available until expended.

Mr. STRATTON (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. Are there any amendments to title II?

If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. PEYSER) having assumed the chair, Mr. BROWN of California, Chairman of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6329), to authorize appropriations for the Department of Energy for national security programs for fiscal year 1983, and for other purposes, pursuant to House Resolution 567, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 6329

Mr. STRATTON. Mr. Speaker, I ask unanimous consent that the Clerk may be authorized to make corrections in punctuation, section numbers and cross-references in the engrossment of the bill (H.R. 6329) to authorize appropriations for the Department of Energy for national security programs for fiscal year 1983, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

GENERAL LEAVE

Mr. STRATTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

FEDERAL TRADE COMMISSION AUTHORIZATION ACT OF 1982

Mr. FLORIO. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6995), to amend the Federal Trade Commmission Act to extend the authorization of appropriations contained in such act, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey, Mr. FLORIO.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 6995, with Mr. BROWN of California in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from New Jersey (Mr. FLORIO) will be recognized for 30 minutes, the gentleman from North Carolina (Mr. BROYHILL) will be recognized for 30 minutes, the gentleman from Massachusetts (Mr. MOAKLEY) will be recognized for 30 minutes, and the gentleman from Tennessee (Mr. QUILLEN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. FLORIO).

Mr. FLORIO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, H.R. 6995 would reauthorize the Federal Trade Commission for 3 years.

In recent years, the FTC has been a controversial agency. This bill is designed to reduce controversy and establish a consensus in support of the Commission so it can devote full time to the job of protecting consumers and free markets.

To establish a consensus in support of the FTC, our committee carefully sifted all the views of a wide range of business and consumer groups.

As Members of the House undoubtedly recall, in 1980 we enacted the FTC Improvements Act, which refined the procedures and protections contained in the FTC Act. This year, because of the number of controversial proposals regarding the FTC, Chairman DINGELL and myself, and the distinguished ranking minority members of the full committee and my subcommittee, Mr. BROYHILL and Mr. LENT, worked all summer to achieve a bipartisan consensus.

Our formula for a consensus in support of the FTC was simply this—to embody in law both fairness for business and fairness for consumers, both fair Government procedures and protection for free and fair markets.

For example, we found that a consensus has emerged among major business groups and the Commission itself on the kinds of conduct that should be subject to the FTC's unfairness jurisdiction. By codifying this understanding in the law, we will enhance the predictability of Commission enforcement.

Likewise, we have included provisions that would enhance the protections afforded private parties subject to investigations or accused of knowing violations of prior FTC orders. And we have insured that Commission rulemaking will not be directed at isolated or insignificant conduct. Finally, we have made permanent the legislative veto enacted in 1980 but due to expire this month.

Let me emphasize, however, that in perfecting the procedures of the FTC, we rejected suggestions that we should create an array of special exemptions for various groups. Fairness and predictability are one thing. Crippling the ability of the FTC to protect the free market and consumers is something else, and something entirely unacceptable.

This bill strikes a judicious balance between enhancing the rights of all parties while not impairing the crucial role of the Commission. This represents a consensus position that the House and the entire Congress can and should readily adopt.

With fair procedures and fair laws, no one has a right to stand above the law.

In a 1969 study of the FTC, the American Bar Association said there is "a general conviction that marketing frauds against consumers are widespread in this country." The ABA noted that "the public is increasingly unwilling to tolerate exploitation."

Our committee was offered no evidence that the need for vigorous protection of competition and of consumer rights has diminished. On the contrary, our hearing record is filled with indications from consumers, business, labor, and State attorneys general, of the need for continued vigorous FTC enforcement.

When we are plagued with high rates of inflation, this is no time to weaken the check of competition on prices.

When we are facing increasingly fierce competition abroad and an influx of quality foreign made products at home, this is no time to weaken the creative ability of free enterprise to innovate and improve quality.

When the public is hard-pressed with the worst economic times in memory, this is no time to weaken protections against fraud and deception. On the contrary, we should reassure the American consumer that the FTC will continue to help the consumer make every dollar count.

For all of these reasons, H.R. 6995 is not just an ordinary reauthorization bill. It is vital to reestablishing a consensus in support of the Federal Trade Commission and to the principles of free and fair markets for which we need protection, now, more than ever.

There is much talk these days about the need to relieve the public of burdensome taxation. The high price of goods or services fixed by a monopoly or a conspiracy is simply a tax imposed by private organizations. The extra money consumers pay when they are hoodwinked into buying products that are not as advertised is likewise a tax imposed by private organizations. These are taxes that should be cut to zero. To do that, we need a vigorous but judicious Federal Trade Commission.

This moderate compromise legislation insures the attainment of that goal.

□ 1300

Mr. BROYHILL. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, I rise in support of H.R. 6995.

This bill does many things. One, of course, it reauthorizes the Federal Trade Commission for 3 years.

It also makes several important changes to the Federal Trade Commission Act.

The activities of the Federal Trade Commission over the last several years have become rather controversial as that Commission had become more active in several areas. Two Congresses ago we passed a number of amendments that addressed some of the allegations, some of the concerns that have been expressed with respect to what the Commission was doing or in some cases what they may not be doing.

Some of the additions that were made at that time included, for example, the addition of a legislative review and veto of Commission rules and regulations, trade rules that they are authorized to write. I think that this is a very important amendment and should be retained.

Unfortunately, in that bill of a couple of Congresses ago the authority for the Congress to review rules and to veto them if they do not agree with them was sunsetted. If we do not pass this reauthorization that authority will expire.

We do extend that authority for the congressional review and veto of Federal Trade Commission rules in this bill and make it a part of permanent law.

I feel that this bill does reflect a bipartisan consensus among a number of members of the Energy and Commerce Committee including the gentleman from Michigan, Chairman DINGELL, the gentleman from New Jersey, Chairman FLORIO, the gentleman from New York, Mr. LENT, the ranking minority member of the subcommittee, and myself and others.

It was reported by the Energy and Commerce Committee by a voice vote.

One of the important provisions in this bill is a definition for the first time of what is an unfair act or practice. This term has been left undefined since the Commission's consumer protection authority was created over a generation ago.

So for the first time this provision will clarify the Commission's authority with respect to issuing cease and desist orders or even in the area of the rulemaking as it clarifies their authority and lends some certainty to those who are subject to the Federal Trade Commission's jurisdiction.

The bill also, as I pointed out, makes permanent the legislative veto that was contained in the FTC Improvements Act of 1980. This provision expired on September 30.

The rule, by the way, provides for an amendment that would provide for complete deletion of this legislative veto provision. I am opposed to that amendment.

I believe that a clear majority of the House is also opposed.

It is critical, in my judgment, that the legislative veto be retained in order to insure that the Commission rules are consistent with congressional intent and consistent with the law.

Another important part of this bill, section 6, extends the limitation, the restrictions on the Commission's authority over agricultural cooperatives. That restriction was contained in section 20 of the Federal Trade Commission Improvements Act of 1980. That provision also was sunsetted and is due to expire unless we act on this bill today.

The agricultural cooperatives limitation recognizes the right of farmers to join together in cooperative marketing arrangements and this right was created under the Capper-Volstead Act to authorize them to form cooperatives without regard to the antitrust restrictions and prosecution by the Federal Trade Commission.

I feel that this restriction to keep the FTC out of these arrangements, to keep them from questioning these arrangements should be a part of the permanent law.

The bill as reported also makes a number of changes in the FTC's rulemaking procedures. Section 4 of the bill requires the Commission to find that a particular act or practice is a prevalent act or practice prior to starting up or initiating a rulemaking proceeding.

This requirement has been put into the bill so as to insure that only those practices that are widespread in an industry will be subject to rulemaking by the Commission.

It is my intention to offer two amendments to this bill. The first would be a substitute that would be offered to an amendment that is going to be offered by the gentleman from Ohio (Mr. LUKEN). The amendment to be offered by the gentleman from Ohio (Mr. LUKEN) I object to. I think it goes too far.

His amendment would completely and fully exempt all professionals including physicians from any jurisdiction of the Federal Trade Commission.

My substitute does preserve what we might say is the traditional place for regulation of professionals by the States.

The gentleman from Ohio (Mr. LUKEN) will argue that that is the proper place for regulation if regulation should take place of professionals. I agree with that. My substitute preserves the traditional place of regulation for professionals, preserves that it be done at the State level and would only enable the FTC to look at any professional conduct which is clearly proven to be anticompetitive.

The second amendment that I would offer so far as I know is not controversial and will be accepted. It is an amendment clarifying the definition of "unfair" which is contained in section 2.

I have already discussed that.

My amendment would merely clarify our intent that this provision will have no effect whatsoever on the individual State mini FTC acts or any State case law.

We want to assure that what we are doing here is not affecting whatever laws or acts have been enacted in the past by the individual States.

Mr. Chairman, I yield back the balance of my 10 minutes and have no other requests for time at this time.

□ 1315

Mr. FLORIO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, as I have indicated in my remarks, the chairman of the full Energy and Commerce Committee, the gentleman from Michigan (Mr. DINGELL), has been a very active participant in the discussion process which has resulted in this bill, and he has shared with me some of his thoughts on this matter. He has asked me to make his thoughts known at this point, and I would do so:

Mr. Chairman, today the House, as we have indicated, is considering the bill, H.R. 6995. Our national policy unequivocably favors free and open competition. The public directly benefits from competition, receiving the highest quality of goods and services at the lowest possible cost. Unfortunately, from time to time, individuals, businesses, and professional trade associations have taken actions which have restrained competition in the marketplace, and consumers have suffered in turn from the results of greater concentration, restricted choice and higher costs. The FTC has played a vital role in challenging practices which restrain competition and create unfair or deceptive acts and practices.

There is a clear need for continued vigorous enforcement efforts by the FTC. In times of economic uncertainty and high inflation, we have seen increased anticompetitive behavior and corner cutting, sometimes resulting in consumer fraud. With the world and national economies in their current depressed condition, we need to rely on the strength and resources of the FTC and the free and fair market.

Therefore, we have authorized appropriation levels for the Commission commensurate with the nature of the critical role we expect it to play.

H.R. 6995 makes a number of substantive amendments to the Federal Trade Commission Act, codifying certain current practices of the Commission and providing greater predictability for those subject to the statute. These clarifying amendments, spelled out in detail in the committee's report, are widely supported and represent a

reasonable and responsible bipartisan compromise on these issues.

As you know, this agency's reauthorization has been surrounded by controversy. Many individuals and groups have urged blanket exemptions from FTC scrutiny of their business activities and repeal of broad areas of FTC authority. The committee has not supported these proposals. We believe that there is still a consensus supporting vigorous antitrust enforcement and consumer protection.

Perhaps the most controversial issue has been the issue of FTC antitrust and consumer protection authority over certain professions. On May 11, 1982, the Senate Commerce Committee voted to include a restriction on FTC jurisdiction in the Commission's reauthorization bill. Our bill does not remove FTC's jurisdiction over the professions. Rather, it provides for a more thought-out approach to this problem.

Mr. Chairman, I reserve the balance of my time.

Mr. BROYHILL. Mr. Chairman, I yield such time as he may consume to the gentleman from New York (Mr. LENT), the ranking minority member of the subcommittee, who has exercised great leadership and statesmanship in the development of this legislation.

Mr. LENT. Mr. Chairman, I rise in support of H.R. 6995. As a cosponsor of this reauthorizing legislation for the Federal Trade Commission, I recognize the importance of many of its provisions, and I want to commend particularly the chairman of the subcommittee, the gentleman from New Jersey (Mr. FLORIO), with whom I worked very closely in the crafting of this legislation, for his leadership.

H.R. 6995 makes several amendments to the Federal Trade Commission Act. A definition of "unfair acts and practices" is incorporated into the Commission's consumer protection authority. It is our belief that this definition will delineate the statutory authority of the Commission.

This bill also amends procedures used in Commission investigations. Section 5 permits the FTC to use civil investigative demand (CID) procedures under its antitrust authority. CID's are currently used by the FTC in consumer protection investigations and have been successfully used by the Department of Justice pursuant to its antitrust authority.

Another critical provision of the bill clarifies the FTC's authority to seek penalties against persons who violate Commission orders entered against other parties. This procedural change will enable such persons to question the FTC's legal basis for the cease and desist order, assuring them due process of law.

In light of the fact that the legislative veto provision currently in law expired yesterday, I support a permanent extension of legislative veto for Commission rules. The legislative veto is an essential tool for effective oversight of the Federal Trade Commission. For this reason, I will oppose the recommendation of the Rules Committee to delete this provision.

Mr. Chairman, it is my intention to oppose the amendment to be offered by our colleagues, Congressmen LUKEN and LEE, to exempt professionals from FTC jurisdiction. After thoughtful reflection, I have decided to support Congressman BROYHILL's compromise substitute, in lieu of a full exemption. The Luken-Lee amendment raises several serious concerns which the Broyhill substitute does not. In fact, the substitute strikes a sensible balance between preserving the role of the States in regulating professionals and maintaining FTC authority over illegal anticompetitive conduct.

I urge my colleagues to join me in supporting H.R. 6995 and the Broyhill substitute.

Mr. BROYHILL. Mr. Chairman, I have no further requests for time.

Mr. MOAKLEY. Mr. Chairman, the Rules Committee has an adequate allocation of time under the rule to handle its amendments, so I yield back the time provided for general debate.

Mr. FLORIO. Mr. Chairman, I yield back the balance of my time.

Mr. BROYHILL. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. Under clause 2, rule XXIII, as adopted by the House of Representatives on January 5, 1981, the Chair, in his discretion, may entertain a point of order that a quorum is not present.

The Chair will entertain the point of no quorum and announces that pursuant to the provisions of clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1330

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The gentleman from Ohio (Mr. LATTA) is recognized for 30 minutes.

Mr. LATTA. Mr. Chairman, I yield myself such time as I may consume.

Let me assure the Chairman I will not use half an hour.

The FTC authorization bill before us today contained a legislative veto provision covering the FTC when it was referred to the Rules Committee. The Rules Committee adopted an amendment to knock out that legislative veto provision.

The gentleman from Tennessee (Mr. QUILLEN), the ranking member of our committee, is very much opposed to the position of the Rules Committee and is for the legislative veto. I just want to make that statement. And he certainly will be opposing it.

Mr. Chairman, I have no requests for time, and I yield back the balance of my time.

The CHAIRMAN. Does the gentleman from North Carolina wish to use additional time, or does he yield back the balance of his time?

Mr. BROYHILL. Mr. Chairman, I am about to do that.

Mr. Chairman, I would like to yield myself 2 minutes in order to talk at this time.

Mr. Chairman, it is my understanding that at a later time an amendment would be offered to delete the provision in this bill that would make permanent the so-called legislative veto and veto procedure.

I just wanted to point out to Members that the Rules Committee under their jurisdiction will be offering this amendment because it does affect the House rules. When the Rules Committee considered this bill they struck that particular part of the Energy and Commerce bill.

However, I wanted to bring that to the attention of the Members, to be on the lookout for that amendment.

This is an issue that had been brought up several times over the last few years, that is the authority of Congress to review agency rules, to have some opportunity to not only review them but to reject them if they feel that they do not either comply with the law or with the intent of Congress.

It is our strong view that we in the Congress have in effect delegated our lawmaking powers to others who are unelected bureaucrats, and when they write rules, they have the force and effect of law. Thus, we should have some responsibility to be not only looking over their shoulder, but to review and to have some say over their final work product.

● Mr. BEDELL. Mr. Chairman, I will take just a few minutes to explain my views regarding the Federal Trade Commission's jurisdiction over the learned professions. A number of my constituents have expressed an interest in this issue and it has received much attention in the news media, so I want to state my opinion for the record.

It is argued by some that regulation of the professions is traditionally a matter left to the States. In particular, it is noted that the States administer relevant tests and license these profes-

sionals. Also, the individual States have established various public and private review processes to oversee professional standards and conduct.

I am sympathetic to those who suggest that the Federal Trade Commission should not be permitted to usurp the role of the States when it comes to establishing and monitoring the professional's ability to perform in a specified trade.

Congressmen GARY LEE and TOM LUKEN have proposed amending the Federal Trade Commission's basic charter to preclude the FTC from regulating the learned professions, and this sounds like the same issue I have just discussed, but it is not.

The Lee-Luken proposal would go beyond the issue of regulating matters of professional training, education, or practice. It would, in fact, bar the FTC from regulating anything having to do with the professions, including business practices such as ratesetting and advertising.

While I join in questioning the wisdom of the FTC being involved in reviewing professional standards, I do not think we should place a blanket prohibition on the FTC's reviewing business practices for their potential anticompetitive effects.

On several occasions, the Supreme Court has been asked to rule on the propriety of the FTC reviewing restrictions on advertising or fee setting which involved one or another of the learned professions. The Court has held that the FTC's actions against these anticompetitive business practices were within that agency's proper jurisdiction.

It appears that the States' law enforcement officers agree. This past July, the National Association of Attorneys General went on record as being opposed to removing the professions from antitrust and consumer protection scrutiny by the Federal Trade Commission.

Mr. Chairman. I believe that Mr. BROYHILL and other senior members of the Energy and Commerce Committee have fashioned a very reasonable substitute for the Lee-Luken legislation. The Broyhill proposal would prohibit the FTC from acting where State laws address training, education or similar requirements for licensure of professionals. Further, it limits the FTC's antitrust authority where the State government actively enforces requirements leading to the alleged anticompetitive behavior.

What the Broyhill substitute does not do, and where it differs from the other proposal, is that it does not preclude the FTC from applying the antitrust laws to the business dealings of professionals. This difference is important to the protection of the interests of American consumers and taxpayers.

Mr. Chairman, I will therefore vote for the Broyhill substitute. In my opinion, it strikes a very sound balance between the various interests that are in conflict over this issue.●

● Mr. CORRADA. Mr. Chairman, I rise in support of H.R. 6995, a bill to amend the Federal Trade Commission Act, to provide for its authorization, appropriation, and for other purposes.

This bill makes very important changes to the Federal Trade Commission Act, improving the Commission's effectiveness to carry out its objectives. It codifies certain current practices of the Commission, makes changes in the FTC procedures improving safeguards available to the parties subject to the Commission's jurisdiction, corrects technical problems in the process of congressional review of Commission Trade Regulation Rules, and authorizes the necessary appropriations in order to continue the Commission's work on a sound basis.

The continuity of the Federal Trade Commission work within an adequate and effective framework is of great importance to Puerto Rico as well as to the Nation. The Commission performs a vital role in preserving our free enterprise system by fostering true competition while protecting the consumers.

This bill reflects a consensus support for the Commission. It will enable it to carry out its purposes in an effective manner. After careful drafting, a compromise was reached which takes into consideration the conflicting views and honest disagreements expressed by different groups with interest in the activities of the FTC.

Certainty and fair procedures are essential for an adequate consumer protection. Business should also acknowledge that the confidence of the consumers in the fairness of the marketplace is indispensable to a round economic environment, particularly at a time when there is increased competition from many quality products manufactured abroad. The need for fair government regulations and for free and fair markets calls for the FTC to perform its vital role in our free enterprise system at its best.

By reauthorizing the FTC and maintaining it financially sound, this bill will assist in reducing inflation by maintaining a competitive marketplace free of unfair and deceptive practices. Dollar for dollar, money spent by the FTC is probably the most productive money spent when it is measured in terms of its effectiveness in fighting inflation.

I urge all my colleagues to join me in favor of H.R. 6995.●

● Mr. MATSUI. Mr. Chairman, I rise in opposition to both amendments which may be considered to modify the Federal Trade Commission's current authority with respect to the regulation of the provision of professional services. My opposition is founded on the belief that one measure may be overinclusive in terms of denying the FTC legitimate authority over the professions while the other may be underinclusive in assuring that the FTC possesses adequate regulatory authority to protect the health and welfare of our citizens.

The proper exercise of Federal regulatory power in the area of professional services is exceedingly complex given the unique nature of the States' police authority in this area. Under our constitutional scheme, the States are delegated the primary role in guarding the public's health and welfare as it relates to the delivery of professional services. This is evidenced by the numerous practice acts which each State has adopted to govern the delivery of professional services within each of its jurisdictions. Federal intervention in this arena therefore must be of a delicate nature so as to respect the balance between State and Federal authority.

Indeed, the provision of adequate and fair professional services historically has been the province of the States. The significant integration between State practice laws and all other forms of State statutory control provide a mutifaceted legislative blueprint that governs on a broad spectrum the activities of professionals. Often these regulatory schemes are not divisible.

I firmly believe that it is the proper function of the Federal Government to prescribe standards where State regulatory agencies have been silent or failed to exercise their powers in a reasonable manner. Such determinations, however, cannot be made by arbitrary legislative measures, but rather only on a case-by-case basis. Therefore, rather than pursue the limitations inherent in both the Luken-Lee and the Broyhill-Dingell-Florio proposals, it would be more appropriate for the FTC to make specific proposals as to the regulation of professional services and then allow affected parties the opportunity and right to demonstrate the adequacy and competency of State regulation in the specific area. This process would provide for the tailoring of Federal intervention to those specific circumstances where the public's health and welfare has been endangered by State neglect. Furthermore, it preserves the essence of our federalist system of government.●

Mr. BROYHILL. Mr. Chairman, at this time I have no other requests for time, and I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the bill is considered as having been read for amendment under the 5-minute rule. No amendments are in order except: First, the amendments en bloc recommended by the Committee on Rules now printed in the bill; second, the amendment printed in the

CONGRESSIONAL RECORD of September 15, 1982, by, and if offered by, Representative LUKEN or Representative LEE which shall be subject to a substitute printed in the CONGRESSIONAL RECORD of September 15, 1982, by Representative BROYHILL and if offered by Representative BROYHILL or Representative DINGELL; third, the amendment printed in the CONGRESSIONAL RECORD of September 15, 1982, by, and if offered by Representative BROYHILL; and fourth, the amendment printed in the CONGRESSIONAL RECORD of September 15, 1982, by and if offered by, Representative DANNEMEYER.

The text of the bill, H.R. 6995 is as follows:

H.R. 6995

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Federal Trade Commission Authorization Act of 1982".

UNFAIR ACTS OR PRACTICES

SEC. 2. Section 5(a)(1) of the Federal Trade Commission Act (15 U.S.C. 45(a)(1)) is amended by adding at the end thereof the following new sentences: "An act or practice in or affecting commerce shall be considered to be an unfair act or practice if—

"(A) such act or practice causes or is likely to cause substantial injury to consumers; and

"(B) such substantial injury (i) is not reasonably avoidable by consumers; and (ii) is not outweighed by countervailing benefits to consumers or to competition which result from such act or practice.

Any determination under the preceding sentence regarding whether an act or practice is an unfair act or practice shall take into account, in addition to other relevant factors, whether such act or practice violates any public policy as established by Federal or State statutes, common law, practices in business or industry, or otherwise.".

REVIEW OF CERTAIN CEASE AND DESIST ORDERS

SEC. 3. Section 5(m)(2) of the Federal Trade Commission Act (15 U.S.C. 45(m)(2)) is amended by adding at the end thereof the following new sentence: "The court in such action against such defendant also shall review, if requested by any party to the action, the determination of law made by the Commission in the proceeding under subsection (b) that the act or practice of the respondent which was the subject of such proceeding constituted a violation of subsection (a).".

PREVALENCE OF UNFAIR OR DECEPTIVE ACTS OR PRACTICES OR FALSE ADVERTISEMENTS

SEC. 4. Section 18(a) of the Federal Trade Commission Act (15 U.S.C. 57a(a)) is amended by adding as the end thereof the following new paragraph:

"(3) The Commission may issue a notice of proposed rulemaking with respect to any unfair or deceptive act or practice or any false advertisement (as defined in section 15(a)(1)) only if—

"(A) the Commission has issued two or more cease and desist orders regarding such unfair or deceptive act or practice, or such false advertisement; or

"(B) any other information available to the Commission provides the Commission with reason to believe that a pattern of such unfair or deceptive acts or practices, or such labor advertisements, exists.".

CIVIL INVESTIGATIVE DEMANDS

SEC. 5. (a) Section 20(a) of the Federal Trade Commission Act (15 U.S.C. 57b-1(a)) is amended—

(1) in paragraph (2) thereof, by striking out "unfair or deceptive acts or practices in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "act of practice or method of competition declared unlawful by this Act or any other Federal law administered by the Commission";

(2) in paragraph (3) thereof, by striking out "unfair or deceptive acts or practices in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "any act or practice or method of competition declared unlawful by this Act or any other Federal law administrered by the Commission"; and

(3) in paragraph (7) thereof, by striking out "unfair or deceptive act or practice in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "act or practice or method of competition declared unlawful by this Act or any other Federal law administered by the Commission".

(b) Section 20(b) of the Federal Trade Commission Act (15 U.S.C. 57b-1(b)) is amended by striking out "unfair or deceptive acts or practices in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "any act or practice or method of competition declared unlawful by this Act or any other Federal law administered by the Commission".

(b) Section 20(c)(1) of the Federal Trade Commission Act (15 U.S.C. 57b-1(c)) is amended by striking out "unfair or deceptive acts or practices in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "any act or practice or method of competition declared unlawful by this Act or any other Federal law administered by the Commission".

RESTRICTION OF COMMISSION AUTHORITY RELATING TO AGRICULTURAL COOPERATIVES

SEC. 6. The Federal Trade Commission Act (15 U.S.C. 41 et seq.) is amended by redesignating section 24 and section 25 as section 26 and section 27, respectively, and by inserting after section 23 the following new section:

"SEC. 24. (a) The Commission shall not have any authority to conduct any study, investigation, or prosecution of any agricultural cooperative for any conduct which, because of the provisions of the Act entitled 'An Act to authorize association of producers of agricultural products', approved February 18, 1922 (7 U.S.C. 291 et seq.), commonly known as the Capper-Volstead Act, is not a violation of any of the antitrust Acts or this Act.

"(b) The Commission shall not have any authority to conduct any study or investigation of any agricultural marketing orders.".

CONGRESSIONAL REVIEW OF RULES

SEC. 7. The Federal Trade Commission Act, as amended in section 6, is further amended by inserting after section 24 the following new section:

"SEC. 25. (a)(1) The Commission, after promulgating a final rule, shall submit such final rule to the Congress for review in accordance with this section. Such final rule shall be delivered to each house of the Congress on the same date and to each House of the Congress while it is in session. Such final rule shall be referred to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Energy and Commerce of the House, respectively.

"(2) Any such final rule shall become effective in accordance with its terms unless—

"(A) before the end of the period of 35 calendar days of continuous session after the date such final rule is submitted to the Congress, a concurrent resolution disapproving such final rule is introduced in either House; and

"(B) before the end of the period of 90 calendar days of continuous session after the date such final rule is submitted to the Congress, the Congress adopts a concurrent resolution disapproving such final rule.

"(b)(1) The provisions of this subsection are enacted by the Congress—

"(A) as an exercise of the rulemaking power of the Senate and the House, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of concurrent resolutions which are subject to this section, and such provisions supersede other rules only to the extent that they are inconsistent with such other rules; and

"(B) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(2)(A) Any concurrent resolution disapproving a final rule of the Commission shall, upon introduction, be referred immediately by the presiding officer of the House in which such concurrent resolution is introduced to the Committee on Commerce, Science, and Transportation of the Senate or to the Committee on Energy and Commerce of the House, as the case may be.

"(B) If a committee to which a concurrent resolution is referred under subparagraph (A) does not report such concurrent resolution before the end of the period of 75 calendar days of continuous session of the Congress after such referral, it shall be in order to move to discharge such committee from further consideration of such concurrent resolution.

"(C)(i) A motion to discharge in the Senate may be made only by a Member favoring the concurrent resolution, shall be privileged (except that it may not be made after the committee has reported a concurrent resolution with respect to the same final rule of the Commission), and debate on such motion shall be limited to not more than 1 hour, to be divided equally between those favoring and those opposing the motion. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to. If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other concurrent resolution with respect to the same final rule of the Commission.

"(ii) A motion to discharge in the House may be made by presentation in writing to the Clerk. The motion may be called up only if the motion has been signed by one-fifth of the Members of the House. The motion is highly privileged (except that it may not be made after the committee has

reported a concurrent resolution of disapproval with respect to the same rule). Debate on such motion shall be limited to not more than 1 hour, the time to be divided equally between those favoring and those opposing the motion. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(3)(A) If one House receives from the other House a concurrent resolution disapproving a final rule of the Commission, then the procedure established in this paragraph shall apply.

"(B) If, at the time of such receipt, a committee of the receiving House has reported, or has been discharged from further consideration of, a concurrent resolution disapproving such final rule, then the concurrent resolution received from the other House shall not be referred to any committee. On any vote on final passage of the concurrent resolution of the receiving House, a motion shall be in order to substitute the concurrent resolution received from the other House for the concurrent resolution of the receiving House.

"(C)(i) If, at the time of such receipt, no committee of the receiving House has reported, or has been discharged from further consideration of, a concurrent resolution disapproving such final rule, then the concurrent resolution received from the other House shall be referred to the Committee on Commerce, Science, and Transportation of the Senate or to the Committee on Energy and Commerce of the House, as the case may be.

"(ii) If a committee to which a concurrent resolution is referred under clause (i) does not report such concurrent resolution before the end of the period of 35 calendar days of continuous session of the Congress after such referral, it shall be in order to move to discharge such committee from further consideration of such concurrent resolution. The provisions of paragraph (2)(C), as such provisions apply to the respective Houses, shall apply to any such motion to discharge.

"(4)(A) When a committee has reported, or has been discharged from further consideration of, a concurrent resolution disapproving a final rule of the Commission, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the concurrent resolution. The motion shall be privileged in the Senate and highly privileged in the House, and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

"(B) Debate on the concurrent resolution shall be limited to not more than 10 hours, which shall be divided equally between those favoring and those opposing the concurrent resolution. A motion further to limit debate shall not be debatable. An amendment to, or motion to recommit, the concurrent resolution shall not be in order, and it shall not be in order to move to reconsider the vote by which the concurrent resolution was agreed to or disagreed to.

"(5) Appeals from the decision of the Chair relating to the application of the rules of the Senate or the House, as the case may be, to the procedure relating to a concurrent resolution disapproving a final rule of the Commission shall be decided without debate.

"(6) Notwithstanding any other provision of this subsection, if a House has approved a concurrent resolution disapproving a final rule of the Commission, then it shall not be in order to consider in such House any other concurrent resolution introduced in such House with respect to the same final rule.

"(c)(1) If a final rule of the Commission is disapproved by the Congress under subsection (a)(2)(B), then the Commission may promulgate a final rule which relates to the same acts or practices as the final rule disapproved by the Congress in accordance with this subsection. Such final rule—

"(A) shall be based upon—

"(i) the rulemaking record of the final rule disapproved by the Congress; or

"(ii) such rulemaking record and the record established in supplemental rulemaking proceedings conducted by the Commission in accordance with section 553 of title 5, United States Code, in any case in which the Commission determines that it is necessary to supplement the existing rulemaking record; and

"(B) may contain such changes as the Commission considers necessary or appropriate.

"(2) The Commission, after promulgating a final rule under this subsection, shall submit the final rule to the Congress in accordance with subsection (a)(1).

"(d) Congressional inaction on, or rejection of, a concurrent resolution disapproving a final rule of the Commission under this section shall not be construed as an expression of approval of such final rule, and shall not be construed to create any presumption of validity with respect to such final rule.

"(e)(1) Any interested party may institute such actions in the appropriate district court of the United States, including actions for declaratory judgment, as may be appropriate to construe the constitutionality of any provision of this section. The district court immediately shall certify all questions of the constitutionality of this section to the United States court of appeals for the circuit involved, which shall hear the matter sitting en banc.

"(2) Notwithstanding any other provision of law, any decision on a matter certified under paragraph (1) shall be reviewable by appeal directly to the Supreme Court of the United States. Such appeal shall be brought not later than 20 days after the decision of the court of appeals.

"(3) It shall be the duty of the court of appeals and of the Supreme Court of the United States to advance on the docket and to expedite to the greatest possible extent the disposition of any matter certified under paragraph (1).

"(f)(1) For purposes of this section—

"(A) continuity of session is broken only by an adjournment sine die at the end of the second regular session of a Congress; and

"(B) days on which either House is not in session because of an adjournment of more than 5 days to a day certain are excluded in the computation of the periods specified in subsection (a)(2) and subsection (b).

"(2) If—

"(A) an adjournment sine die of the Congress which breaks the continuity of session (as specified in paragraph (1)(A)) occurs after the Commission has submitted a final rule under subsection (a)(1), but before any action necessary to disapprove the final rule is completed under subsection (a)(2)(B); and

"(B) such adjournment occurs (i) before the end of the period specified in subsection (a)(2)(B), in a case in which a concurrent resolution disapproving such final rule has been introduced in either House before the end of the period specified in subsection (a)(2)(A); or (ii) before the end of the period specified in subsection (a)(2)(A), in a case in which no such concurrent resolution has been introduced before such adjournment;

then the Commission shall resubmit such final rule at the beginning of the first regular session of the next Congress. The periods specified in subsection (a)(2) shall begin on the date of such resubmission.

"(g) For purposes of this section:

"(1) The term 'concurrent resolution' means a concurrent resolution of the two Houses of the Congress the matter after the resolving clause of which is as follows: 'That the Congress disapproves the final rule promulgated by the Federal Trade Commission dealing with the matter of , which final rule was submitted to the Congress on .'. (The blank spaces shall be filled appropriately.)

"(2) The term 'rule' means any rule promulgated by the Commission pursuant to this Act, other than any rule promulgated under section 18(a)(1)(A).".

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. Section 26 of the Federal Trade Commission Act, as so redesignated in section 6, is amended by striking out "and" the last place it appears therein, and by inserting before the period at the end thereof the following: "; not to exceed $66,080,000 for the fiscal year ending September 30, 1983; not to exceed $70,705,000 for the fiscal year ending September 30, 1984; and not to exceed $75,654,000 for the fiscal year ending September 30, 1985".

INTERVENTION BY COMMISSION IN CERTAIN PROCEEDINGS

SEC. 9. (a) The Federal Trade Commission shall not have any authority to use any funds which are authorized to be appropriated to carry out the Federal Trade Commission Act (15 U.S.C. 41 et seq.) for fiscal year 1983, 1984, or 1985, for the purpose of submitting statements to, appearing before, or intervening in the proceedings of, any Federal or State agency unless the Commission advises the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives, at least 60 days before any such proposed action, or, if such advance notice is not practicable, as far in advance of such proposed action as is practicable.

(b) The notice required in subsection (a) shall include the name of the agency involved, the date upon which the Federal Trade Commission will first appear, intervene, or submit comments, a concise statement regarding the nature and purpose of the proposed action of the Commission, and, in any case in which advance notice of 60 days is not practicable, a concise statement of the reasons such notice is not practicable.

EFFECTIVE DATES; APPLICABILITY OF AMENDMENTS

SEC. 10. (a)(1) Except as otherwise provided in this Act, the provisions of this Act, and the amendments made by this Act, shall take effect on the date of the enactment of this Act.

(2) Section 24 of the Federal Trade Commission Act, as added by section 6, shall take effect on October 1, 1982.

(b)(1) The amendment made in section 2 shall apply only to—

(A) cease and desist orders issued by the Federal Trade Commission under section 5 of the Federal Trade Commission Act (15

U.S.C. 45) on or after the date of the enactment of this Act; and

(B) rules for which advance notices of proposed rulemaking are published in the Federal Register by the Commission under section 18(b)(2)(A) of such Act (15 U.S.C. 57a(b)(2)(A)) on or after such date of enactment.

(2) Such amendment shall not be construed to affect in any manner any cease and desist order issued on or after such date of enactment, if such order is issued in accordance with a remand, from a court of appeals of the United States or the Supreme Court of the United States, of any cease and desist order issued by the Commission before such date of enactment.

(c)(1) The amendment made in section 4 shall apply only to rules of the Federal Trade Commission for which advance notices of proposed rulemaking are published in the Federal Register by the Commission under section 18(b)(2(A) of the Federal Trade Commission Act (15 U.S.C. 57a(b)(2)(A)) on or after the date of the enactment of this Act.

(2) In the case of any rule of the Commission which has not become final before such date of enactment, but for which such advance notice has been published before such date of enactment, the Commission shall include with its submission of such rule to the Congress a statement describing the extent of the prevalence of occurrences of the unfair or deceptive act or practice, or the false advertisement, which is the subject of such rule.

(d)(1) The provisions of section 21 of the Federal Trade Commission Improvements Act of 1980 (15 U.S.C. 57a—1) shall apply to any final rule submitted to the Congress by the Federal Trade Commission before January 1, 1983, notwithstanding the provisions of section 21(i) of such Act (15 U.S.C. 57a—1(i)).

(2)(A) Any final rule submitted to the Congress on or after January 1, 1983, shall be subject to the provisions of section 25 of the Federal Trade Commission Act, as added by the amendment made in section 7.

(B) In any case in which—

(i) the Commission submitted a final rule to the Congress under section 21 of the Federal Trade Commission Improvements Act of 1980 (15 U.S.C 57a—1) before January 1, 1983;

(ii) such final rule was disapproved by the Congress under section 21 of such Act (15 U.S.C. 57a—1); and

(iii) the Commission did not submit a final rule relating to the same acts or practices, under section 21(c) of such Act (15 U.S.C. 57a—1(c)), before January 1, 1983;

the Commission may submit a final rule relating to the same acts or practices in accordance with section 25(c) of the Federal Trade Commission Act, as added by the amendment made in section 7.

(C) In any case in which the Commission would have been required to resubmit a final rule under section 21(g)(2) of the Federal Trade Commission Improvements Act of 1980 (15 U.S.C. 57a—1(g)(2)), but for the expiration of such provision in accordance with section 21(i) of such Act (15 U.S.C. 57a—1(i)), as modified by the provisions of paragraph (1), the Commission shall be required to resubmit such final rule in accordance with section 25(f)(2) of the Federal Trade Commission Act, as added by the amendment made in section 7.

The CHAIRMAN. The Chair would entertain first the amendments en bloc recommended by the Committee on Rules not printed in the bill, unless someone requests unanimous consent to proceed otherwise.

Mr. FLORIO. Mr. Chairman, I ask unanimous consent that the gentleman from California (Mr. DANNEMEYER) be authorized at this point to offer the so-called Luken-Lee amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. DANNEMEYER) to offer an amendment.

□ 1345

Mr. FLORIO. Mr. Chairman, I misspoke myself in making my unanimous-consent request. My unanimous-consent request was that the gentleman from North Carolina (Mr. BROYHILL) be authorized to go forward at this point with his technical amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from North Carolina (Mr. BROYHILL).

AMENDMENT OFFERED BY MR. BROYHILL

Mr. BROYHILL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROYHILL: Page 2, after line 14, insert the following new subsection:

(c) The amendment made in subection (a) shall not have any force or effect, and shall not be taken into account, in connection with the enforcement of any State law which prevents persons, partnerships, or corporations subject to the jurisdiction of the State from engaging in unfair acts or practices.

The CHAIRMAN. Pursuant to House Resolution 587, the gentleman from North Carolina (Mr. BROYHILL) will be recognized for 15 minutes, and a Member opposed to said amendment will be recognized for 15 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL. Mr. Chairman, this is a technical amendment. It has been fully discussed with both sides.

I want to point out again that H.R. 6995 for the first time incorporates an actual definition of what is an unfair act or practice. Up until this time the commission has had general jurisdiction over "unfair acts or practices" and there has not been a definition of that particular term.

What my amendment does is to clarify the intention of the cosponsors as to the effect of this amendment on the individual State mini FTC acts and also with respect to case law that has been developed in the individual States.

This amendment merely clarifies our intent that this is in no way intended to impinge upon these particular mini FTC acts that have been enacted by the States or by State case law.

The amendment that we have in the bill that is before us, the new definition of an unfair act or practice, is:

If such an act or practice causes or is likely to cause substantial injury to consumers and such substantial injury is not reasonably avoidable by consumers and is not outweighed by contravailing benefits to consumers or to competition which results from such act or practice.

It goes on to say that any determination under the preceding sentence regarding whether an act or practice is an unfair act or practice shall take into account in addition to other relevant factors whether such act or practice violates public policy established by Federal or State statute, common law practices in business, industry or otherwise.

But this amendment applies the definition of unfairness only to those actions by the Federal Trade Commission.

We had some expression of concern by some of the States attorneys general that our action could in effect be amending State mini FTC acts. We want to assure with this technical amendment that I am offering that the definition of unfairness is applying only to action by the Federal Trade Commission. In other words, it will not apply to State mini FTC acts or any State court decisions that have been rendered with respect to those acts. We feel that that should be left up to the individual States as to what they might determine is to be done in these cases.

I might point out that the amendment has been discussed with the State attorneys general and that they do support this revision to our unfairness definition and support the technical amendment.

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. BROYHILL. I am glad to yield to the gentleman from New Jersey.

Mr. FLORIO. Mr. Chairman, I thank the gentleman for yielding.

I support Mr. BROYHILL's effort to insure that the provision in H.R. 6995 regarding the Commission's unfairness authority is not read as intended to apply to State laws regarding unfairness.

Section 2 of H.R. 6995 adds a new provision to the FTC Act concerning the authority of the Commission to remedy unfair acts or practices.

In recent years there has been controversy over the appropriate scope of FTC jurisdiction under the broad term, "unfairness." In 1980 the Commission issued a policy statement summarizing past cases and setting forth the principles that would guide its exercise of authority under the unfair-

ness power. A consensus has now developed among business groups and the Commission on the soundness of the principles in the 1980 statement. Accordingly, H.R. 6995 would codify these principles, thereby enhancing certainty and predictability for business.

This improvement is among those in the bill that I have said should establish a consensus supporting the FTC. With this assurance of predictability and fair procedures, the FTC should be encouraged to vigorously carry out its role as the consumer's watchdog. In establishing this balance, we did not intend to affect developments in State law, and I support Mr. BROYHILL's effort to make this clear.

While I was originally apprehensive regarding the need for and utility of codifying the FTC's policy regarding unfairness, I have been persuaded by examination of the 1980 policy statement that the codification will retain the desired flexibility for the Commission. Accordingly, under section 2 of H.R. 6995, consumer injury need not necessarily be subject to quantification, or be limited to monetary harm. For example, unwarranted health and safety risks may support a finding of unfairness. Additionally, the Commission need not necessarily conduct a quantitiative cost-benefit analysis, but should only have to carefully consider and assess, to the extent reasonably possible, the costs of prohibiting particular practices. Another illustration of flexibility under the 1980 statement and therefore embodied in our bill is the fact that public policy considerations may, under some circumstances constitute an independent basis for a Commission finding of unfairness.

With respect to the question of State law, it should be noted that State laws do not require a finding of the elements set out in the standard of H.R. 6995, particularly substantial consumer injury. In addition, by virtue of State statutes and cases, including those developed by reference to Commission case law, most State laws provide that a finding of unethical or unscrupulous conduct is sufficient in itself to support a finding of unfairness. We did not intend to effect State laws modeled on the FTC Act. Because the broad scope of unfair practices as set forth in many State statutes and in State case law does not require the findings set out in H.R. 6995, and the purpose for the enactment of section 2 is not applicable to these State laws, section 2 will have no effect on State law standards of unfairness. To the extent that prior unfairness cases, for example, establish a finding of unfairness can be based upon unethical or unscrupulous conduct alone, this codification will leave unchanged this standard of unfairness for purposes of State law and apply only to the Commission the standards of unfairness articulated in the Commission's 1980 policy statement.

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. BROYHILL. Yes; I am glad to yield.

Mr. LUJAN. I assume the amendment the gentleman is talking about at this point is that final amendment that is shown on the sheet which says:

Mr. Broyhill will offer an amendment providing clarification that the bill's provisions are not intended to affect or diminish any state law prohibiting business from engaging in unfair competition.

Is that the amendment the gentleman is talking about now?

Mr. BROYHILL. Yes.

Mr. LUJAN. Which one is it as listed?

Mr. BROYHILL. The amendment that I am offering is to clarify that the definition of unfair acts or practices that we include in the bill shall not be taken into account in connection with the enforcement of State laws which prevent persons, partnerships or corporations subject to the jurisdiction of a State from engaging in unfair acts or practices.

I would call the attention of the gentleman to the change in the definition of this term which is included in section 2. The concern was expressed by certain attorneys general that the amendment that we are offering could have some effect, we are not sure that it would, but it could have some effect on whatever State, for example, if the State of New Mexico has a mini FTC bill or the State of New Mexico has developed certain case law with respect to this overall type of law, we are wanting to make sure here that we are amending the Federal law and in no way are touching State laws or case law that has been developed in the State.

Mr. LUJAN. I thank the gentleman for his information. If the gentleman would yield further, this is totally unrelated to the issue of the long arm of the FTC injecting itself into the business of the professionals? It is totally unrelated to that?

Mr. BROYHILL. No; this is not that amendment.

Mr. LUJAN. I understand that. It is totally unrelated?

Mr. BROYHILL. It is unrelated. That amendment will be brought up shortly.

Mr. LUJAN. If the gentleman will yield further, I notice that we had a little time lag here, because apparently there is some misunderstanding about whether that amendment exempting the professionals from the FTC would be issued.

Can the gentleman tell me if someone is prepared to offer that amendment at this point?

Mr. BROYHILL. Yes. I must say, of course, for the record, that we did not know this bill was coming up today. We had originally thought the bill was coming up next week. That is the reason why a number of Members were not here promptly ready not only to engage in debate, but to offer their amendments. It is my understanding that the various parties who have interests in this bill are on hand and that those amendments will be offered in due course.

Mr. LUJAN. I thank the gentleman for that explanation because I was concerned that we were going to be moving along with this bill and that whole question might not ever be raised.

Frankly, I was looking for a little time so that people would get here in order to offer the proper amendments.

● Mr. WAXMAN. Mr. Chairman, no one is arguing that the FTC should be involved in health care decisions. While the story about barbers is funny, it is off the point when it comes to the FTC's role of enforcing the antitrust laws with respect to the professions. This debate is about competition—the use of alternative means to provide services. Such competition is even more important when you are dealing with professions that have an enormous impact upon the use of services, as physicians do. Then it becomes even more important to insure that we do not allow appropriate competition among providers to be stifled.

Mr. Chairman, I do not think that any profession should be permitted to block from the marketplace alternative programs for delivering services at a lower cost. Yet, in the health field, that is exactly what we have seen. Physician groups have attempted to exclude HMO doctors from hospitals and prevent HMO doctors from obtaining malpractice insurance. Coercion has been used to boycott insurance cost-containment programs developed by insurers, industry, and labor to hold down health costs. These are the kinds of restraint of trade which the Luken-Lee amendment would prevent the FTC from continuing to address. It is for this reason that I oppose it and support the Broyhill amendment.●

The CHAIRMAN. Under the rule, a Member opposed to the Broyhill amendment is entitled to be recognized for 15 minutes.

The Chair inquires if any Member desires to exercise that option?

If not, the question is on the amendment offered by the gentleman from North Carolina (Mr. BROYHILL).

The amendment was agreed to.

The CHAIRMAN. Under the rule, the amendments en bloc recommended by the Committee on Rules now printed in the bill are now in order.

The CHAIRMAN. The Clerk will report the Rules Committee amendments.

The Clerk read as follows:

Rules Committee amendments: Page 6, strike out line 4 and all that follows through page 15, line 3 (and redesignate the subsequent sections accordingly).

Page 5, beginning on line 13, strike out "and section 25 as section 26 and section 27, respectively" and insert in lieu thereof "as section 25".

Page 15, line 5, strike out "Section 26" and insert in lieu thereof "Section 25".

Page 18, strike out line 1 and all that follows through page 19, line 11.

Mr. MOAKLEY (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The CHAIRMAN. Pursuant to House Resolution 587, the gentleman from Massachusetts (Mr. MOAKLEY) will be recognized for 30 minutes, and the gentleman from Tennessee (Mr. QUILLEN) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Massachusetts (Mr. MOAKLEY).

Mr. MOAKLEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the issue presented to the House by the report of the Committee on Rules raises issues of fundamental institutional importance.

Mr. Chairman, at the outset I would like to commend the gentleman from New Jersey (Mr. FLORIO) for his leadership on this matter and for the fairness with which he has attempted to reconcile the concerns over reauthorization of the Federal Trade Commission.

On the whole, his bill and the rule requested by the Committee on Energy and Commerce for handling the matter on the floor represent a reasonable approach toward resolving a difficult political matter.

My allocation of time is made, as manager for the Committee on Rules, to handle a committee amendment which strikes a principal component of that compromise. The amendment would strike section 7 of the bill—the extension of the "legislative veto."

As an accommodation to the hard work of the Committee on Energy and Commerce, the committee has structured a floor situation which will enable the House to resolve this matter in any way it may wish.

But the committee is charged with responsibility, under the joint referral, to report to the House recommendations on the subject of legislative veto.

In H.R. 6995, the committee concludes that it is faced with an inescapable constitutional issue. It reaches that conclusion with full respect for the integrity and sincerity of members it is aware have reached a different conclusion.

Although the committee has serious practical concerns with the legislative veto contained in section 7 of the bill, it proposes that the section be stricken in its entirety on the basis that the legislative veto, as embodied in this bill, and indeed in most other contexts, is inconsistent with the most important and fundamental principles of our constitutional system of government.

The committee reaches its determination as an independent conclusion. But it is strongly persuaded by the overwhelming body of constitutional law.

The U.S. Supreme Court has yet to rule on the subject, although a decision is expected in the Court's next term. But, decisions arrived at separately by the U.S. courts of appeals, in two of the Nation's 11 circuits, have found the device unconstitutional.[1] In no circuit, at the appeals level, has a decision ever been reached finding the device constitutional. Since the first use of the device in 1932, Attorneys General for each President, since Franklin Delano Roosevelt, have argued unequivocally against the constitutionality of the legislative veto.

CONSTITUTIONALITY OF THE LEGISLATIVE VETO

Mr. Chairman, the committee's review of the constitutional issues has been thorough and cautious. An attempt has been made to thoroughly review all the issues that have been brought to the committee's attention through a painstaking hearing record developed over a 6-year period.

SEPARATION OF POWERS

The constitutional failings of the legislative veto lie at the center of the most fundamental concern that was before the Constitutional Convention. The authors made a clear decision to erect a system based on the English parliamentary practice, but starkly different in some very important ways.

The most significant difference concerns the doctrine of separation of powers which the Supreme Court has stated to be "at the heart of our Constitution." [2]

The separation is constitutionally defined but, in actual execution, the lines may not always be absolutely clear.

However, the committee is persuaded that the legislative veto is an unconstitutional incursion into executive functions, in that it brings Congress into direct involvement with the "execution" of the laws and usurps the traditional role of the judiciary in passing upon the validity of administrative regulations.

INTRUSION ON JUDICIAL POWER

On its face, the veto provision of the act vests in the two Houses of Congress an extra-legislative power to perform the function reserved by the Constitution to the courts of determining whether a particular executive act is within the limits of authority established by the existing statute. Thus to the extent that an exercise of the veto mechanism is meant to prevent the effectiveness of agency action that is perceived to exceed its statutory authority, it unconstitutionally intrudes upon the exercise of judicial power by the courts.

APPOINTMENT OF OFFICERS

It has been clearly settled that Congress may not appoint any officer to carry out an executive function.[3] Nor may Congress itself seek to exercise any such function.[4]

The legislative veto, in certain contexts, is in doubtful comportment with these principles. As it applies to an independent regulatory commission, in particular, the legislative veto raises significant policy questions of constitutional character. The establishment of such a commission involves a delegation of functions to the agency, subject to certain special limitations. The agency is vested with functions of a mingled executive, legislative, and judicial character. But the functions of no branch of Government are impaired.

Although Congress may not directly supervise the regular functions of the agency, the agency is required to act within the framework of the law Congress has written, in whatever degree of specificity it may have chosen. The Congress can amend that law and may exercise any other proper powers as exist within oversight and appropriations functions.

Although the officers do not serve at the daily pleasure of the President, he makes all appointments as terms expire. And the courts retain the authority to review agency actions as a matter of law.

It is a fragile constitutional scheme, but the courts have recognized the vital importance of this system and both the appropriateness of limitations on Presidential removal power [5] and delegation of quasi-legislative authority [6] conclusively have survived judicial challenge.

The committee is concerned that the intrusion of expanded supervisory powers over the intimate details of regulation, by what is already the stronger of the two branches in relation to independent agencies, leaves

the appropriateness of this balance open to serious doubt.

In this regard, it is important to note that the courts have upheld a wide variety of such statutes, all of which stretch the constitutional fabric. But the Supreme Court was forced to hold unconstitutional the only effort Congress has made to write such a scheme at variance with the standard structure of this delicate balance, in a decision not unsympathetic to the reasons behind that effort.[7]

PRESENTATION CLAUSE

Although the framers of the Constitution recognized the importance of the doctrine of separation of powers, the record of consideration makes clear their understanding that it could be nothing more than a doctrine unless each branch was provided with adequate tools to protect itself.

As Woodrow Wilson observed, no branch could maintain its independence without "the guaranty of the Constitution that its own domain should be absolutely safe from invasion * * *."[8]

Of these guarantees, the system of checks and balances, the most important is the Presidential veto. Without it, congressional supremacy, would be unavoidable, Madison argued.[9]

That the framers anticipated the devices by which a legislative body might expand, into functions reserved from it, is underscored by the presentation clause which requires that, not only bills but also "every order, resolution, or vote to which the concurrence of the Senate and House of Representatives may be necessary" must be presented to the President for veto, subject to congressional override, or for approval. The debate of the convention underscores the intent of the framers to require Congress to follow this process for all actions having the effect of lawmaking.[10]

The committee would concede that the framers could no more have envisioned the present legislative veto than the Federal Register. But the committee believes that the general thrust of the legislative veto is exactly what the framers intended to preclude in clause 3 of section 7 of article I.

EFFECTIVE LAWMAKING

The most persuasive argument in favor of the constitutionality of the legislative veto has related to the assertion that the veto is not actually lawmaking. The general thrust of this argument is that the legislative veto is a form of legislative activity which does not require the concurrence of both Houses since the effect of such language is not to make law but rather to preserve the status quo.

The history of the exercise of the specific veto contained in H.R. 6995 appears to rebut this fundamental assertion by the proponents of the legislative veto.

Recognition of the prevalance of warranty problems with respect to the sale of used cars prompted the Congress in 1974 to include as part of the Magnuson-Moss Warranty Act (Public Law 93-637) a provision (section 109(b)) directing the Federal Trade Commission to "initiate * * * a rulemaking proceeding dealing with warranties and warranty practices in connection with the sale of used motor vehicles; and, to the extent necessary to supplement the protections offered the consumer" by prescribing "rules dealing with such warranty practices."

During the 6 years of development of the rule, in compliance with a statutory requirement, four authorization bills for the Federal Trade Commission were reported and acted on in each House, and two bills were enacted. Congress had ample opportunity to repeal or amend section 109(b) of Magnuson-Moss (15 U.S.C. 2309(b)) which statutorily requires the used car rule. This provision continues to be carried in law and, to the extent it is not effective as the result of the exercise of the legislative veto, that veto is lawmaking in a form that attempts to bypass the constitutionally mandated process of law.

NECESSARY AND PROPER

Other advocates of the legislative veto have relied strongly on the provisions of clause 18 of section 8 of article I which authorize Congress "to make all laws which shall be necessary and proper for carrying into execution the foregoing powers." They have asserted that Congress and the Executive enjoy broad discretion under the "necessary and proper" clause to reach appropriate political accommodations.

This argument has merit. I would note the prior comments which discuss the organic schemes that have produced most independent regulatory agencies. In the delegation of legislative functions and the restrictions on Presidential supervisory powers, these plans strain constitutional limits.

But the constitutionality of these plans has been consistently upheld in the course of repeated challenge throughout this century. Presumably, the courts are prepared to permit some accommodations, which do not overly strain the constitutional fabric, when faced with compelling cause. The important and useful nature of this particular accommodation is noted in the report of the 1949 Hoover Commission:

The independent regulatory commission is a useful and desirable agency where constant adaptation to changing conditions and delegation of wide discretion in administration are essential to effective regulation.

The independent commission provides a means for insulating regulation from partisan influence or favoritism, for obtaining deliberation, expertness and continuity of attention, and for combining adaptability of regulation with consistency of policy so far as practical.[11]

But in this, or any accommodation that strains the fundamental doctrine of separation of powers, the courts must hold Congress to a substantial showing under the "necessary and proper" clause.

The committee would note that it is conceivable that some legislative vetoes may meet this test.[12]

But, in general, the legislative veto does not meet such a standard and the committee perceives the standard as particularly lacking in the case of H.R. 6995.

During the 6 years that the used car rule was in development and the law requiring it remained on the books, unamended, the Congress amended the Federal Trade Act to totally remove all FTC authority over the savings and loan industry and substantially remove its authority over the business of insurance. Amendments were also enacted which overturned ongoing rulemakings, and restricted subsequent activities, in regards to cereal manufacturers, the funeral industry, and children's advertising.

Mr. Chairman, the Federal Trade Commission has been driven, both to and from, virtually every activity of the past decade by shifting congressional directives. No clearer case of congressional direction and supervision, within the proper process of law, exists than the FTC. And, on that basis, the application of a legislative veto to the FTC fails to meet the requisite standard.

SEVERABILITY

The committee is aware that severability provides a method by which the courts can avoid a constitutional determination on a legislative veto which is enacted as a fundamental part of a legislative delegation.

The argument in such a case would be that the legislative history of the delegation was such that it was compellingly clear that the delegation to the agency, and the applicability of congressional review procedures to it, were so inextricably linked that the delegation could not have been enacted without its inclusion.

The committee would assert that its own record, in the handling of title X of the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93-344), and that of the

Committee on Foreign Affairs, in the handling of the War Powers Resolution (Public Law 93-148), are compelling examples of such histories of essentiality.

As to the Federal Trade Commission, the adoption of a legislative veto, in the context of a routine 1980 authorization, for an agency established in 1914, does not make such a case.

LEGITIMACY OF THE LEGISLATIVE VETO

Mr. Chairman, if a case could be made for the constitutionality of the legislative veto, it would still fall to the committee to examine the appropriateness of such a proposal. The committee has considered this matter at some length; indeed the issue has constituted the principal work of one of its subcommittees.

In this regard it is important to examine the intent of the separation of powers doctrine. Some of the framers, as discussed previously, were particularly concerned by the tendency of legislative bodies to assume the total functions of Government and sought to prevent such a tendency but erecting a system of checks and balances.[13]

But the committee views as equally compelling the arguments of Thomas Jefferson that enforcement of the separation of powers doctrine, through the Presidential veto, was of equal importance to the viability of the legislative branch and that the separation of legislative and executive function would free Congress from the details involved in the execution of law.[14]

My experience, during the years I have served in Congress, Mr. Chairman, tend to confirm Jefferson's thesis. It has been my consistent experience that Congress has contributed best to the process of rational government when it concentrated on the development of broad policy. And it has been my experience, equally, that attempts by Congress to overly involve itself in detailed implementation of laws actually has tended to weaken the effectiveness of Congress.

□ 1400

Mr. QUILLEN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this amendment should be defeated.

Prior law contained a legislative veto provision for the FTC. Unless we act to continue the legislative veto provision in this authorization bill, we will lose it. That is plain and simple.

The FTC authorization bill before us today contained a legislative veto provision covering the FTC when it was referred to the Rules Committee. The Rules Committee adopted an amendment to knock out that legislative veto provision and that is where we are now. I think we should keep it.

Congress has given rulemaking authority to the FTC. FTC rules have the effect of law. The penalties for violating an FTC rule are just as real as the penalties for violating a law. Congress has a responsibility to oversee the actions of the FTC. Congress has too often abdicated its responsibility for oversight of Federal agencies. One result has been a dramatic increase in costly and often nonsensical rules and regulations affecting many businesses and individuals. This increase in bureaucratic regulation has caused a feeling of harassment and intrusion for every citizen and enterprise.

The FTC legislative veto is a necessary step to correct these problems. The fight is not over rulemaking authority itself, but the abuses of that authority which have taken place and will take place so long as the rulemakers are not held accountable for their actions.

The House has indicated its support of the legislative veto over the FTC in a number of different ways. As recently as August 13, the House showed support for legislative veto over FTC regulations. At that time, the House recommitted a rule making in order an appropriations bill which included funds for the FTC primarily because the bill did not contain an extension of the expiring legislative veto authority. On May 26 of this year, the FTC legislative veto mechanism was used in the House to disapprove regulations for used car dealers. The House disapproved the FTC proposed rule by a vote of 286 to 133. Had there been no legislative veto, the overwhelming majority of Congress would have been ignored.

Members have indicated support for the general concept of legislative veto by cosponsoring legislation on the subject introduced by the gentleman from Georgia (Mr. LEVITAS). At the beginning of this week, 254 Members of the House were cosponsors of this legislation, and possibly the number has increased.

If we do not reaffirm the legislative veto provisions, the FTC will no longer be subject to the necessary restraint.

In the past, the House has been unwilling to provide a mechanism to do away with the veto.

I hope that today we defeat this amendment and continue the veto mechanism so that the bureaucrats can be tamed, so to speak, and that congressional control will prevail.

Mr. Speaker, I reserve the balance of my time.

Mr. MOAKLEY. Mr. Chairman, I yield 5 minutes to the gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. Mr. Chairman, I would like to express my appreciation to the gentleman from Massachusetts for yielding this time to me, especially since I rise in strong opposition to the amendment proposed by the Rules Committee to strike the legislative veto provisions of the pending bill.

The legislative veto is simply a mechanism through which the elected Representatives of the people of America have the final say-so about those rules and regulations that affect their lives and livelihood.

It is a simple proposition of who makes the laws in this country, the elected officials of the Congress or the unelected bureaucrats. It is a question of accountability to the American people for the rules that affect their lives. That is what the legislative veto is all about.

As Members of Congress viewing this subject, we must remember that administrative rules and regulations are, in effect, laws. They have the same force and effect as laws. If a person violates an act of Congress which is criminal in nature, he is arrested by a Federal official, brought before a Federal court for trial and, if convicted, sentenced by a Federal judge to serve time in prison or to pay a fine. The exact same is true if a citizen violates an administrative rule, written by a bureaucrat who is elected by no one and is responsible only to the agency head. The ultimate test of what something is, is not its name, but its effect. Administrative rules and regulations are laws. We must not forget that fact. The question becomes then: Are we going to continue to let unelected bureaucrats continue to pass laws without effective congressional control?

Our Founding Fathers would be shocked to see us struggling so with laws passed by the executive branch and independent agencies. The principle for which they fought was control over executive and bureaucratic power by the people through their elected representatives. It was no accident that I chose H.R. 1776 as the number under which I introduced my bill to give Congress this veto authority over all agency rules and regulations. H.R. 1776 now has over 250 cosponsors. One of the many grievances enumerated against King George in the Declaration of Independence was, "He has erected a multitude of new Offices, and sent hither swarms of Officers to harass our people, and eat out their substance."

One has only to glance at the daily Federal Register to realize that the executive and independent agencies have evolved into fourth branch of government with hosts of regulations which carry the force of law without legislative consideration. While it may be true that Congress has previously given—or abandoned—to the bureaucracy the power to enact these administrative laws, that does not justify an

[13] "The Federalist" No. 47 (J. Madison), (J. Cooke ed. 1961), p. 324-6.

[14] 4 Jefferson, "The Writings of Thomas Jefferson" (P. Ford ed. 1894), p. 424-25.

unmitigated continuation of this practice.

There is clearly a need to have administrative rules to fill in the gaps between the broad principles embodied in acts of Congress, but this does not mean that Congress should leave it to civil servants or appointed officials to pass thousands upon thousands of far-reaching rules that can put citizens in jeopardy of losing liberty or property without having anyone elected by the people or answerable to them involved in the process.

Remedying legislation can, of course, be introduced, but we know too well that this is a cumbersome and time-consuming process which is not adequate to repeal or change administrative rules. Also, why should the full mechanism of enacting laws be required to reject mere agency rules?

The question of constitutionality is a matter of significant debate. As the gentleman from Massachusetts has pointed out, there are now cases pending which will ultimately be decided by the Supreme Court, hopefully during this term.

It is clear to me, however, that a legislative veto which deals with rules and regulations that are issued only as a result of the delegation by the Congress of its full legislative power clearly can be subject to a legislative veto.

Article I, section 1, of the Constitution provides that all legislative power shall be vested in the Congress. If the Congress chooses to delegate some of that power to an agency of Government for the purpose of making a rule which is, in effect, legislation, then certainly that can be conditioned on the power of the Congress to exercise a rejection or a veto of those rules which may be proposed by an agency.

On the question of separation of powers, there is once again no way that any agency of the Government, an independent agency or an agency of the executive branch of Government can issue a rule unless it is delegated that legislative power by the Congress.

I would like to include at this point in the RECORD an excerpt from a brief filed by Eugene Gressman, the special counsel to the House of Representatives in the Chadha case now pending before the Supreme Court. In brief, Mr. Gressman expounds the fact that there is no violation of the separation of powers doctrine in the case of legislative vetoes.

1. NO CONSTITUTIONAL FUNCTIONS OF THE EXECUTIVE OR THE JUDICIARY ARE IMPLICATED BY SECTION 244(C)(2) OF THE IMMIGRATION ACT

To declare an Act of Congress unconstitutional on any ground is "the gravest and most delicate duty that this Court is called upon to perform." *Blodgett* v. *Holden*, 275 U.S. 142, 148 (1927) (Holmes, J.) And to declare an Act invalid because Congress has therein dealt with a matter "committed by the Constitution to another branch of government," or has therein exceeded "whatever authority has been committed" to Congress, "is itself a delicate exercise in constitutional interpretation." *Baker* v. *Carr*, 369 U.S. 186, 211 (1962; *Powell* v. *McCormack*, 395 U.S. 486, 521 (1969); *United States* v. *Nixon*, 418 U.S. 683, 704 (1974).

But the constitutional adjudication sought in this case is extraordinarily grave and delicate, fraught with dangers to the efficient operation of our modern federal government. It is also unique. The essence of the ruling below, the essence of the claim being pressed by the Executive Branch before this Court, is not that Section 244(c)(2) encroaches upon some specific power vested in the Executive or Judiciary. Rather, in the words of the Ninth Circuit, Section 244(c)(2) is invalid as trenching upon "a power necessarily but implicitly conferred elsewhere by the nature of an institutional government; power such as the executive authority faithfully to execute the laws, U.S. Const., art. II, § 3, and the judicial power to determine cases or controversies, *id.*, art. III, § 2." J.S. App.A, 26a. Section 244(c)(2), in other words, "violates the rule of separation of powers by usurping a necessary power of another branch." *Id.*

This case is unique in the sense that never before has an Act of Congress been invalidated as encroaching on nothing more specific than what the Ninth Circuit calls those powers "necessarily but implicitly conferred elsewhere [than in Article I] by the nature of an institutional government." In the court's own words, there is "no circuit of Supreme Court authority we have found [that] holds that the Legislature has impermissibly invaded the prerogative of the Executive or the Judiciary absent a clause in the Constitution which confers the powers upon another branch with great specificity." J.S. App. A, 25a.[9] That is certainly true as respects invasions of Executive prerogatives. In the few instances where Congress has been found to have invaded such prerogatives, the prerogatives themselves have been constitutionally vested in the Executive with specificity and exclusivity. See *Buckley* v. *Valeo*, 424 U.S. 1, 118 (1976) (encroachment on Executive's specific appointment power, Art. II, § 2, cl. 2); *Myers* v. *United States*, 272 U.S. 52, 164 (1926) (encroachment on Executive's removal power stemming from specific appointment power, Art II, § 2, cl. 2). See also *Springer* v. *Philippine Islands*, 277 U.S. 189, 200-201 (1928).

But what is the nature of the powers that must be kept separate in the eyes of the Ninth Circuit, the powers that are implicitly conferred elsewhere than on Congress "by the nature of an institutional government"? The court finds but two such implicit conferrals: (1) the Executive authority or obligation in Article II, Section 3, to "take Care that the Laws be faithfully executed"; and (2) the vesting in the Supreme Court and in inferior courts of the Article III judicial power over cases and controversies. And to determine if Congress has unconstitutionally encroached upon these implicit conferrals, the Ninth Circuit suggests that we look to the statutory provision at stake, i.e., Section 244(c)(2), to divine if that provision constitutes—

". . . an assumption by one branch [i.e., Congress] of powers that are central or essential to the operation of a coordinate branch [i.e., the Executive obligation to take care that the laws be faithfully executed, and the Judiciary's power to decide cases and controversies], provided also that the assumption disrupts the coordinate branch in the performance of its [aforesaid] duties and is unnecessary to implement a legitimate policy of the Government." See *Nixon* v. *Administrator of Gen. Servs.*, 433 U.S. 425, 433 (1977). [J.S. App. A, 37a.]

This reformulation of the general separation of powers doctrine reads suspiciously like the discredited notion that the separation doctrine means total separation of each of the three great functions of government. The Constitution provides separately for each of the three Branches, and describes each Branch as vested with the respective functions of legislating, executing and judging.[10] But the Constitution does not say that the three great functions shall at all times be kept separate and independent of each other, or that the three functions can never be blended or mixed or delegated as among the three Branches. The notion of total separation of the powers "central or essential" to the operation of the three great departments is an illogical and impractical formulation of the separation doctrine, not a constitutional command.[11]

Time and again this Court has observed "from the provisions of the Constitution itself, and from the Federalist Papers, that the Constitution by no means contemplates total separation of each of these three essential branches of Government." *Buckley* v. *Valeo*, 424 U.S. 1, 121 (1976); and see *United States* v. *Nixon*, 418 U.S. at 707; *Nixon* v. *Administrator of General Services*, 433 U.S. 425, 442-443 (1977). As Madison noted in the Federalist Papers, even the "oracle" of the separation doctrine, Baron de Montesquieu, in writing that the legislative, executive and judicial powers should not be united "in the same person, or body of persons," did not mean "that these departments ought to have no *partial agency* in, or no *control* over the acts of each other."[12] In the more subtle language of Justice Jackson's concurrence in *Youngstown Sheet & Tube Co.* v. *Sawyer*, 343 U.S. 579, 635 (1952),

"While the Constitution diffuses power the better to secure liberty, it also contemplates that practice will integrate the dispersed powers into a workable government. It enjoins upon its branches separateness but interdependence, autonomy but reciprocity."

To which should be added the *Buckley* thought, 424 U.S. at 121, that the Framers "viewed the principle of separation as a vital check against tyranny" but "likewise saw that a hermetic sealing off of the three branches of Government from one another would preclude the establishment of a Nation capable of governing itself effectively."

Thus the modern concept of separation is pragmatic and flexible, reflecting "the contemporary realities of our political system." *Nixon* v. *Administrator of General Services*, *supra*, 441. It is a concept that expresses a "general attitude rather than [an] inexorable table of organization."[13] And it is a concept that recognizes not only that the great functions of government cannot be kept separate but that there is great merit in blending and mixing them in accordance with "common sense and the inherent necessities of the governmental co-ordination." *Hampton & Co.* v. *United States*, 276 U.S. 394, 406 (1928). In a realistic sense, the concept has

Footnotes at end of article.

developed into one of "blending rather than separating the three kinds of powers." [14] See also *Atkins* v. *United States*, 556 F.2d 1028, 1066-1067 (Ct. Cls. 1977), *cert. denied*, 434 U.S. 1009 (1978).

At the core of this "blended" form of government is the legislating body, the Congress of the United States. It is the body that legislates the laws that the Executive must execute faithfully and that the Judiciary must interpret and enforce. And it is the body authorized by the Constitution to blend and mix, in statutory forms, the various powers of government, and to delegate some of its own legislative functions to Executive officers and agencies. This "blending" authority emanates primarily from the Necessary and Proper Clause, Article I, Section 8, Clause 18. Under that affirmative grant of power, Congress is empowered to enact all laws "which shall be necessary and proper for carrying into Execution the foregoing [Article I] Powers, and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof."[15]

Viewed against this background of "blended" powers, one who would invalidate an Act of Congress as an encroachment upon powers implicitly conferred elsewhere "by the nature of an institutional government" faces a formidable task. It is one thing to argue that Congress has impermissibly sought to execute a function specifically vested in another Branch by the Constitution. But as Justice Holmes said in his dissent in *Myers* v. *United States*, 272 U.S. at 177, "arguments drawn from the executive power of the President, and from his duty . . . to take care that the laws be faithfully executed, . . . seem to me spider's webs inadequate to control the dominant facts." The gossamer nature of this strand of the separation argument is even more apparent when one reflects on Justice Holmes' additional remark: "The duty of the President to see that the laws be executed is a duty that does not go beyond the laws or require him to achieve more than Congress sees fit to leave within his power." *Id.*

The difficulty here is that the alleged encroachments by Congress involve executive and judicial functions not of constitutional dimensions. The Article II executive functions repecting legislation, including the Section 3 "take Care" function, are merely duties to executive "the laws consistent with the provisions therefor made by Congress." *Myers* v. *United States*, 272 U.S. at 247 (Brandeis, J., dissenting). Indeed, *Youngstown Sheet & Tube Co.* v. *Sawyer*, 343 U.S. 579 (1952), makes it conclusive that these "executive" provisions of Article II primarily empower the President simply to carry out the laws enacted by Congress.[16]

If, as has happened with respect to Section 244(c)(2), Congress has withheld from the Executive some part of the function of executing the whole of a statute, the Executive has no more constitutional authorization to perform what has been withheld than to "execute a law by disobeying it."[17] To conclude otherwise is to create an imperial Executive, possessing absolute and uncontrollable power to execute congressional laws as seen fit. So, too, the Article III judicial function with respect to statutes can rise no higher than the jurisdictional parameters permitted by Congress.[18] See *Tutun* v. *United States*, 270 U.S. 568 (1926); *Ludecke* v. *Watkins*, 335 U.S. 160, 171-172 (1948).

The functions here said to have been invaded by the Congress, in enacting Section 244(c)(2), are thus functions that lie within the power of Congress to grant or withhold in its sole discretion. That fact serves to distinguish this situation from that in *Nixon* v. *Administrator of General Services*, *supra*. There the alleged separation encroachment was "upon the Presidential prerogative to control internal operations of the Presidential office and therefore offends the autonomy of the Executive Branch." 433 U.S. at 439-440. Whatever else may be said about that prerogative, it is not conceptually rooted in congressional legislation; the "internal operations of the Presidential office" would appear to partake primarily of the constitutionally assigned functions of the Executive. See also *United States* v. *Nixon*, 418 U.S. at 706, dealing with "the independence of the Executive Branch within its own sphere."

For that reason, the "proper inquiry" formulated in that case and purportedly pursued by the Ninth Circuit in the instant case, J.S. App. A, 37a, may not be the proper inquiry when dealing with the Executive duty to enforce the laws as Congress enacted them. All that the *Nixon* case held was that, when the "internal operation of the Presidential office" are at stake, the proper inquiry "focuses on the extent to which it [the Act of Congress] prevents the Executive Branch from accomplishing its constitutionally assigned functions." 433 U.S. at 433.[19] But where, as in the instant case, the Executive or Judicial Branch's functions are congressionally rather than constitutionally assigned, a shift in the focus of the inquiry would appear appropriate.

The House suggests that the proper inquiry in the legislative-executive context should begin with Justice Powell's question in his opinion in the *Nixon* v. *Administrator* case, 433 U.S. at 498: "whether, putting to one side other limiting provisions of the Constitution, Congress has acted beyond the scope of its enumerated powers." And as two perceptive commentators have added, the next step in the inquiry should be a balancing of "the need for accountability of congressionally delegated powers with the requirement that the effective exercise of these powers not be unduly hampered." [20] Such focusing on the constitutional source of the enactment in question is fully consistent with the view that the separation of powers concept is not meant to "divide the branches into watertight compartments," *Springer* v. *Philippine Islands*, 277 U.S. at 211 (Holmes, J., dissenting), but rather to permit that degree of intergovernmental cooperation considered "necessary and proper" if the Nation is to have the capacity "of governing itself effectively," *Buckley* v. *Valeo*, 424 U.S. at 121

FOOTNOTES

[9] *United States* v. *Klein*, 13 Wall. (80 U.S.) 128 (1871), affords an early instance of invalidating an Act of Congress because it encroached upon the Article III judicial power. But the Court there found that the Act also impinged upon the Executive's exclusive pardon power, as specified in Article II, Section 2.

Article III, of course, contains no specific grants of judicial power. It merely vests the judicial power of the United States over specific categories of cases and controversies in this Court and in inferior courts established from time to time by Congress.

[10] Chief Justice Marshall first voiced the maxim that "the legislature makes, the executive executes, and the judiciary construes the law." *Wayman* v. *Southard*, 10 Wheat. (23 U.S.) 1, 46 (1825). Chief Justice Taft, among others, referred to this maxim in *Hampton & Co.* v. *United States*, 276 U.S. 394, 406 (1928). But Marshall was quick to add, after stating the maxim, that "the maker of the law [i.e., Congress] may commit something to the discretion of the other departments, and the precise boundary of this power is a subject of delicate and difficult inquiry, into which a Court will not enter unnecessarily."

[11] "The maxim that 'the legislature makes, the executive executes, and the judiciary construes the law' was thought to be a simple, descriptive formula of the separation doctrine. Unfortunately, it is not. Rather, a logical analysis makes it clear that, *strictly speaking*, the powers of and within one and the same state cannot be 'separate' or 'independent' from one another, for neither of them can be confined to 'making' or 'construing' or 'executing' the law." Parker, *The Historic Basis of Administrative Law: Separation of Powers and Judicial Supremacy*, 12 Rutgers L.Rev. 449, 464 (1958).

[12] *The Federalist No. 47*, p. 325 (J. Cooke ed. 1961) (emphasis in original).

[13] L. Jaffe, *Judicial Control of Administrative Action* 29 (1965).

[14] The "blending" phrase is that of Professor Kenneth Culp Davis. 1 K. Davis, *Administrative Law Treatise* 72 (2d ed. 1978). He also writes in elaboration:

"Except for the clear facts that the main legislative power is in Congress, the main executive power in the President, and the main judicial power in the courts, an outstanding characteristic of the American government is the non-separation of the three kinds of power.

"The Constitution itself points the way by explicitly providing for blending. It provides that the President shall participate in the legislative process by approving or vetoing bills and in the judicial process by exercising the power of pardon, that the House shall act executively in impeaching officers, that the Senate shall act judicially in trying impeachments, and that the Senate shall participate in an executive function in advising on and consenting to appointments to public office." *Id.*, 72-73.

[15] See, generally, Van Alstyne, *The Role of Congress in Determining Incidental Powers of the President and the Federal Courts: A Comment on the Horizontal Effect of "The Sweeping Clause,"* 36 Ohio State L. J. 788 (1975).

[16] "The power (again actually expressed as a duty) to take care that the laws be faithfully executed is entirely dependent on the laws." Black, *The Working Balance of the American Political Departments*, 1 Hast. Con. L. Q. 13, 14 (1974).

□ 1410

Clearly the Congress is the source of the power and can conduct that delegation of the legislative act called rulemaking in any way it sees fit. And, in the case of the Federal Trade Commission, the argument is totally specious that there is any invasion of the powers of the executive branch. One cannot argue that a veto over a rule issued by the Federal Trade Commission is an invasion of the power of the executive branch because the Federal Trade Commission is not part of the executive branch of the Government. The Federal Trade Commission is an

independent agency, a creature, if you will, of the Congress. There is no way that one can even make an argument of invasion of the powers of the executive in the case of the Federal Trade Commission or any of the other independent agencies because they are not part of the executive to begin with.

President Reagan apparently agrees with this as evidenced by an article he wrote before becoming President. I would like to submit for the RECORD, the following article written by Ronald Reagan which appeared in the Jewish Press magazine on August 10, 1979:

NAILING THE REGULATOR

The Federal Trade Commission, one of Washington's most aggressive regulatory agencies (some have dubbed it the "national nanny"), may get its ears pinned back by the Senate in the next few days.

It hasn't attracted much press attention, but an amendment to the budget authorization bill for the FTC would give Congress a "legislative veto" over rulings by the regulators.

Specifically, the amendment, sponsored by Senator Harrison Schmitt, R-N.M., would give Congress the authority to intervene in FTC rulings within 60 days after they are announced. If it didn't act within that time, the ruling (on, say, such things as children's television advertising—subject now being debated by the FTC) would stand.

The idea isn't a new one. It began in 1932 when Herbert Hoover was president, in the Legislative Appropriation Act that year, Congress gave Hoover the green light to reorganize the executive branch of the federal government, but with the specifics subject to disapproval by either house.

In the 47 years since, Congress has passed 159 acts containing 214 separate, specific provisions giving itself "legislative veto" review power. More than half of these have been enacted since 1970, so the popularity of the idea is growing.

"Frustration" and the "anti-Big Government" mood of the nation are often given by both advocates and opponents of the legislative veto as major reasons for its popularity. "There is an increasing frustration over the lack of control of these agencies. Everybody has a regulatory horror story to tell," Sen. Schmitt says.

Bureaucrats and their allies among the Ralph Nader network and other self-styled "public interest" groups are in a tizzy over the possibility that the Senate may pass the measure tightening control over the FTC. Having gotten used to having a hand in deciding what's best for us all, they are—well—uncomfortable about losing their clout.

Ironically, opponents of the legislative veto complain that it would "politicize" the regulatory process. One bureaucrat recently said, "The total dynamic of rule-making will suffer. . . . Our process will become a political one as we attempt to build a political record to bring before the Hill."

Funny, but that sounds as if he means the regulations will have to be more sensitive to the mood of the people, just as members of Congress are. Since bureaucrats aren't elected, holding them more accountable than they have been sounds like a pretty good idea in this constitutional republic of ours.

Even if the Senate should defeat the Schmitt amendment (and predictions are that the vote will be close, either way), the legislative veto seems to be an idea which is gathering the momentum of a snowball rolling downhill.

An FTC official has conceded that his agency has written off the House, where Rep. Elliott H. Levitas, D-Ga., has made the subject his "Number 1 priority." He says, "It has finally dawned on most people that government has gone beyond their control. These agency people are actually making laws and they're not accountable to anyone."

Rep. Levitas' ire stems from a 1974 incident when an arrogant FTC bureaucrat informed some Levitas constituents that he wasn't interested in their views, he had already made up his mind.

Throughout our Nation's history the legislative and executive branches of our Government have worked for a constitutionally designed balance of power between the branches. This balance has been accommodated through the ability of our system to adopt constitutionally sound procedures which maintain an appropriate balance of power while at the same time responding to current day demands on Government.

One such procedure which has been enacted and exercised responsibly over the past several decades is the legislative veto. Through this mechanism the Congress, the lawmaking body of our Government, has been able to delegate authority to the executive branch of Government while at the same time retaining its ultimate responsibility for making the laws of this country.

In an excellent article which appeared in the Washington Post on February 21, 1982, the political scientist Louis Fisher addressed the issue of the legislative veto.

Not only does Fisher maintain that the legislative veto is constitutional but he also praises it as good policy which has been wisely and prudently used. Without it, Fisher notes, the power of the executive branch would likely be restricted rather than enhanced. And without it, Congress would have to resort to other mechanisms of control which would be much more burdensome and much more cumbersome than the legislative veto procedures which have been proven to work effectively and efficiently.

In his article, Fisher spells out what it would mean for our Government if the Supreme Court strikes down this procedure. The ability of Congress to oversee executive branch actions and thus the willingness of Congress to delegate power to the executive branch would be dealt a severe blow.

As Fisher notes,

For many issues facing government today, the legislative veto is practical, appropriate and constitutional. Striking it down is not a step to be taken lightly.

At this point I would like to submit for the RECORD the excellent article by Louis Fisher:

[From the Washington Post, Feb. 21, 1982]

CONGRESS CAN'T LOSE ON ITS VETO POWER

(By Louis Fisher)

We are witnessing an ironic turn in the historic struggle between the executive branch and Congress: a court decision which seemingly promises much greater power for the executive but which, if upheld, would likely lead to the opposite effect.

The Jan. 29 ruling, by a three-judge panel of the U.S. Court of Appeals here, gave a rude jolt to the "legislative veto," a device Congress has relied on for at least a half century to control executive actions.

Specifically, the panel struck down a one-house veto used to disapprove a gas-pricing regulation by the Federal Energy Regulatory Commission (FERC). But its language was so broad as to question the constitutionality of legislative vetoes in hundreds of other laws governing arms sales, immigration, war powers, impoundment, endless agency regulations and much else.

The D.C. panel recognized that its finding—that all legislative acts constitutionally require "presentation to the president and passage by both houses of Congress"—"may have far-reaching effects on the operation of the national government." But it may have misunderstood those effects.

Many assume the ruling portends a gain for the executive branch, a victory for orderly government, a blow to congressional interference. Think again. If the Supreme Court upholds the overly broad opinion, the net result will more likely be less power for executive officials, a more convoluted legislative process, and continued congressional involvement in administrative decisions.

Bizarre consequences? Not if you understand why the legislative veto was orginally adopted. Presidents accepted (indeed, often invited) legislative vetoes because they provided a way to get more power. The bargain was clearly understood by both branches. The president essentially told Congress: "Give me more authority than you normally would, and I'll give you a chance to veto my initiatives." If presidents disliked the legislative veto, Congress would withhold authority.

Courts are familiar with this quid pro quo. In 1977 the Fourth Circuit dismissed a suit by a federal employee who protested that the Senate acted unconstitutionally when it disapproved a pay raise recommended by the president. But the legislative history convinced the court that Congress delegated the salary authority only on the condition that it could by a one-house veto, disapprove presidential recommendations. The authority and the condition were inseparable.

The FERC case was different. Here the court decided that the grant of rulemaking authority was not tied explicitly to the one-house veto. But that is the exception, not the rule.

The record shows, for example, that the president could not tell Congress: "Thanks very much for the authority to reorganize the executive branch, but I have no intention of recognizing your right to veto my plans." Executive reorganization power and the legislative veto could not be severed.

Other examples abound. Under the Impoundment Control Act of 1974, the president may defer spending unless one house of Congress disapproves. The president is not at liberty to take the authority and ignore the condition. If the legislative veto is unconstitutional, the president will forfeit the statutory authority to defer spending.

He might claim other authorities (statutory or implied powers under the Constitution), but this would merely trigger the kind of fractious litigation we had in the early 1970s under President Nixon.

The Federal Trade Commission Act of 1980 raises a similar issue. Congress, angered by some FTC regulations, enacted legislation requiring future rules to run the gauntlet of the legislative veto. If the D.C. panel's opinion is upheld, the FTC may lose its authority under the statute to issue regulations.

Uncertainties in this area, as in others, would probably force more issues into the courts, with the preponderance of evidence often on the side of the Congress. In the laws covering arms sales, foreign trade, the sale of nuclear fuel, federal salaries, immigration, impoundment and presidential papers, for some notable examples, the delegated power and the legislative veto seem inseparable.

Congress, of course, could rewrite many of its broad delegations of power, and the executive branch also could well lose some procedural benefits. Where there is a legislative veto, presidential proposals are put on a fast-track system. Other privileges include special procedures to bypass committees, limit debate and prohibit floor amendments. Without the legislative veto, Congress would eliminate these advantages or require the President to gain approval of both houses in a bill or joint resolution. Either approach would undercut the President.

The legislative veto is criticized as a backdoor way of accomplishing what should be done directly through the regular legislative process. But if Congress is denied the legislative veto, no one should underestimate its ingenuity in inventing other devices that will be more cumbersome for the president and just as satisfactory to Congress.

President Eisenhower discovered this unpleasant fact in the 1950s when he objected to "committee vetoes" compelling agencies to obtain advance clearance from congressional panels. Attorney General Herbert Brownell called this an unconstitutional infringement on executive responsibility.

Undaunted, Congress created another procedure that yielded the same control. A bill was drafted to prohibit appropriations for certain real estate transactions unless the Public Works committees first approved the contracts. Eisenhower signed the bill after Brownell concluded that this procedure—based on the authorization appropriation process—was within Congress' power. The form had changed; the committee veto remained.

If the one-house veto over impoundment deferrals is invalid, Congress will have no trouble devising more burdensome procedures for the president. A harbinger of what might be in the works appears in the Transportation Appropriation Act for fiscal 1982, passed last December. Whenever the president proposes to defer appropriations for various rail programs, the funds must be released unless Congress within 45 days completes action on a bill approving all or part of the proposed deferral.

There is no constitutional problem here, since Congress will act through the regular legislative process. Yet in this case, in effect, the president not only ends up with a one-house veto but a more onerous version. Under the Impoundment Control Act, one house must take the initiative to disapprove a deferral. Under the transportation statute one house can succeed through inaction.

There are other anomalies. Opponents of the legislative veto warn about the workload imposed on Congress by having to review administrative actions. But the workload is likely to be far heavier if Congress has to act positively through the regular process. The temptation will be strong for Congress to grant powers for shorter periods, forcing the president to return to Congress for extensions. Of course either house, by inaction, could deny him the authority.

Other mechanisms are also available to protect congressional prerogatives. Under the Trade Act of 1958, the president could implement certain actions for import relief only by obtaining from Congress a concurrent resolution passed by a two-thirds majority in both houses. Courts would likely find this type of concurrent resolution constitutional, since it contains a built-in override of a presidential veto. This would come as little consolation to a president forced to locate an extraordinary majority in each house before acting.

The D.C. court, in its FERC ruling, warned that the legislative veto enables Congress "to expand its role from one of oversight, with an eye to legislative revision, to one of shared administration." This increase in congressional power, according to the court, violates the separation-of-powers doctrine.

But with or without the legislative veto, Congress will remain knee-deep in administrative decisions, and it is inconceivable that any court or any president can prevent this. Call it supervision. intervention, interference or plain meddling. Congress will find a way.

If an agency adopts a regulation that offends Congress, legislators can attach language to an appropriation bill preventing the use of funds to implement the regulation. There is no constitutional question about Congress' right to do this, although riders to appropriations bills are far from ideal ways to make law. They are added without the hearings, careful consideration and substantive knowledge that more likely accompany a legislative veto.

Congress also exercises an extraordinary array of nonstatutory controls. The clearest examples are the understandings between Congress and the agencies for "reprogramming": the shifting of funds from one program to another within the same appropriation account. Major reprogrammings must be approved by the committees (or subcommittees) with jurisdiction over the program.

This is simply one more quid pro quo between the branches. In return for the flexibility of lump-sum appropriations, agencies agree to abide by reprogramming guidelines and committee clearance. No one wants to return to line-item funding. Since this type of control is informal and nonstatutory, it is difficult to conceive of a legal issue that might reach the courts. But the involvement of Congress in "shared administration" is just as real and binding.

Judicial warnings about shared administration seem unrealistic in view of the extensive overlay of statutory and nonstatutory controls. Certainly it is extravagant and hyperbolic for the D.C. Circuit to suggest that legislative vetoes put us on the road to congressional tyranny. If the courts are serious about "untangling" the rights and powers of the three branches, they have their work cut out.

Shall they prohibit the President from making substantive legislation through executive orders and proclamations? Will courts resurrect the 1935 rule requiring Congress to delegate legislative power with clear standards? This would be a revolution in itself. Should we consider placing all independent commissions under the executive departments, thereby tidying up the system of three branches? This has been tried more than once, without success, and for good reason. Can we no longer tolerate adjudication and "quasi-legislation" by the agencies? Should we eliminate "legislative courts" (established under Congress' Article I powers)? For that matter, is it time to ask the courts to pull back from their own involvement in legislation and administration?

It is too glib for courts to tell Congress that if it disagrees with what the president and the agencies are doing, it should act through the regular legislative process. The regular process is subject to a president's veto, creating the need for a two-thirds majority in each house to override the president. Without the legislative veto, Congress is placed in the dilemma of delegating authority by a majority to recapture control. That is why both branches agreed on the legislative veto for reorganization authority.

The legislative veto in the War Powers Resolution of 1973 was meant to extricate Congress from the situation it found itself in under President Nixon: able to attract a majority vote in each house to deny funding for the Vietnam war, but unable to secure a two-thirds vote when Nixon vetoed these restrictions. Critics of the legislative veto have not addressed this problem.

Nor is it enough to advise Congress that legislative vetoes would be unnecessary if it would only delegate with precise standards and clear policy.

Congress has no doubt used the legislative veto to sidestep difficult questions of national policy, it can be a convenient and irresponsible substitute for making legislative decisions. But the veto allows Congress to review specific proposals under circumstances that no one could foresee when the authority was first delegated.

For many issues facing government today, the legislative veto is practical, appropriate and constitutional. Striking it down is not a step to be taken lightly.

Other scholars have eloquently expressed their view that the legislative veto is constitutional and that it is practical. I would like to have placed in the RECORD at this point an article which appeared in the George Washington Law Review by Bernard Schwartz of New York University School of Law, expressing such a view.

[From the George Washington Law Review, March 1978]

THE LEGISLATIVE VETO AND THE CONSTITUTION—A REEXAMINATION [1]

(By Bernard Schwartz, Edwin D. Webb, Professor of Law, New York University School of Law)

"Who is there who has not felt a sudden startled pang at reliving an old experience or feeling an old emotion? *I have done this before. . . .*"[2] Observers of the legal scene all too often have the same feeling of *déjà vu*. A quarter century ago, a provocative article appeared on the constitutionality of congressional control of administrative action by the "legislative veto," [3] a congressional annulment of executive or administrative action by resolution of one or both Houses.[4] The author, Robert W. Ginnane, argued that the legislative veto violates the

Footnotes at end of article.

veto clause of the Constitution [5] by permitting Congress to enact what is in effect veto-proof legislation.[6]

The Ginnane article led to a flurry of articles on legislative review of administrative action.[7] Most writers disagreed with the Ginnane thesis of unconstitutionality.[8] More importantly, Congress has continued to act on the assumption that the legislative veto is constitutional. Congressional use of the legislative veto has increased dramatically. Under President Franklin D. Roosevelt, Congress passed 15 acts containing legislative veto provisions; under Truman, the number was 18. In the quarter century since the Ginnane article, the figures increased to 31 under Eisenhower; 22 under Kennedy; 36 under Johnson; and 115 under Nixon and Ford.[9]

If these statistics do not demonstrate that "Congress fell in love with the device," [10] they do indicate unequivocal congressional rejection of the argument that the legislative veto is unconstitutional. Indeed, the recent congressional trend is towards expanding the legislative veto from a sporadically used device in specific statutes to a general instrument of congressional oversight. A bill introduced in the Ninety-fourth Congress provided for congressional review of all rules and regulations and for disapproval by resolution.[11] Upon favorable action by the House Committee on the Judiciary,[12] the House voted 265 to 135 for the bill.[13] However, the bill failed to pass by two votes because it was brought to a vote under an expedited procedure requiring approval by two-thirds of the voting members.[14]

One would have thought that the consistent congressional practice of over four decades and the lack of authoritative contrary decisions would have settled the constitutional question. But it has not proved that simple. The issue of the constitutionality of the legislative veto has recently been revived—not only in Congress and the law reviews, but also in the courts.[15] It is therefore pertinent to analyze once again the background of the legislative veto and its place in implementation of the power of congressional oversight, the experience with the legislative veto in both Congress and the states, and legal authority on the constitutional question, particularly on the issue of alleged violation of the veto clause.

The importance of the issue overrides the natural reluctance to undertake the seemingly futile task of attempting to lay a ghost that refuses to remain in repose. According to Judge Henry Friendly, "[t]here seems to be a kind of spontaneous generation about the federal constitution; the more questions about it are answered, the more there are to be answered." [16] That may well be true. But does it mean that we must continue to ask and answer constitutional questions which we assumed had already been definitively answered?

OVERSIGHT AND ADMINISTRATION

The increasing use of the legislative veto is a direct reflection of the growing interest in more adequate legislative oversight. Legislative control over the executive has, apart from such indirect legislative pressure as control over appropriations, power over appointments, and exercise of investigative authority, been generally absent from American administrative law. This lack of effective direct legislative supervision constitutes an important lacuna in the system.

The consistent growth of administrative authority is an outstanding feature of contemporary government. The degree of regulatory activity required by modern public opinion can be carried on as a practical matter only by specialized administrative agencies. For officers of such agencies to administer extensive regulatory and social service schemes effectively, they must be vested with significant discretionary authority. The delegation of powers to the executive in a particular field does not, however, relieve the legislative of responsibility. "The Congress does not really get rid of a subject by delegating powers to the Executive."[17] Indeed, the consistent transfer of authority to the executive only increases Congress' difficulties from the point of view of the effectiveness of representative government.

The legislature is, of course, subject to direct control through the electoral process. There is no comparable control when law is made by administrative agencies. Although the famous characterization of federal agencies by the President's Committee on Administrative Management as "a headless 'fourth branch' of the Government, a haphazard deposit of irresponsible agencies and uncoordinated powers"[18] is exaggerated; too many agencies are not responsible for the details of their operations to the executive or legislative branches or to the electorate.

Delegation of lawmaking power is a categorical imperative of modern government. Nevertheless, the people's representatives must retain the primary legislative function, even if they delegate to agencies secondary power to legislate. In a representative system, it is the job of those representatives to make the hard choices necessary to establish meaningful policies. When Congress delegates wholesale powers and confines them only by a vague standard, it abdicates the traditional legislative function of making these choices. If policy decisions are thereby removed from the political process, they are also removed from popular control. To allow the people's representatives to pass the buck on policy choices to administrative experts is a vote for paternalism over democracy.[19]

If the trend toward bureaucratic domination is to be resisted, the legislature must not surrender control as it has delegated power. "Hence, if the Congress is to effectively discharge its full duty," asserted a member of the House of Representatives in 1945, "it must at the very least supervise each grant of power which it makes with great care, and must assume the function not only of passing legislation, but of seeing that that legislation is carried out in accordance with congressional intent.

"In the absence of the exercise of this second function, Congress will be only half effective at best, for no law is better than its administration."[20]

Admittedly, the vast range of modern administrative authority and the innumerable instances in which it is exercised usually make continuing control by a nonexpert legislative body as large as Congress more a matter of form than of substance. Most observers of the federal legislative process would still agree with Woodrow Wilson that "it is quite evident that the means which Congress has of controlling the departments and exercising the searching oversight at which it aims are limited and defective."[21] Nevertheless, it is erroneous to think that, even in administrative law, the legislative role should be confined to the power to enact laws. "The political philosopher of these days of self-government," to quote Woodrow Wilson again, "has . . . something more than a doubt with which to gainsay the usefulness of a sovereign representative body which confines itself to legislation to the exclusion of all other functions. . . . Quite as important as legislation is vigilant oversight of administration; and even more important than legislation is the instruction and guidance in political affairs which the people might receive from a body which kept all national concerns suffused in a broad daylight of discussion. There is no similar legislature in existence which is so shut up to the one business of lawmaking as is our Congress."[22]

Important though the enactment of laws may be, a Congress or Parliament is hardly worthy of its title if it merely grinds out legislation as a sausage maker grinds out sausages.

REORGANIZATION AND THE LEGISLATIVE VETO

Congressional use of the legislative veto begins with the executive reorganization provisions of the Legislative Appropriation Act of 1932.[23] A recent article tracing the history of the device contains the heading: "Blame It All on Hoover?" [24] That is hardly fair. Although the 1932 statute was passed at the request of President Hoover, who sought authority to reorganize executive departments and agencies, it was Congress which inserted the legislative veto provision as a check on the broad powers granted.[25] The statute provided that Congress could disapprove any presidential reorganization plan by resolution of either House.[26]

Since 1932, Congress normally has been willing to delegate reorganization power to the President only on condition that the law contain a legislative veto provision. The Reorganization Acts of 1939, 1945, 1949, and 1977 [27] all provided that presidential reorganization plans were not to become effective for a stated period during which they could be disapproved by Congress—under the Acts of 1939 and 1945 by concurrent resolution of the two Houses [28] and under the Acts of 1949 and 1977, by a resolution passed by a majority of either House.[29]

Congress renewed the presidential reorganization power conferred by the Act of 1949 on eight occasions, most recently in 1971.[30] The authority finally expired on April 1, 1973,[31] when in the heat of the controversy over Watergate and the imperial presidency, Congress refused to renew the reorganization power of President Nixon. The advent of the Carter administration, strongly committed to administrative reform and executive reorganization, changed congressional attitudes toward presidential reorganization power. The Reorganization Act of 1977 [32] gives the new President reorganization authority, subject to disapproval by resolution of either House.[33]

Although the Senate passed the 1977 statute without questioning the legislative veto provision, the Chairman of the House Committee on Government Operations argued that the veto provision was unconstitutional.[34] The Committee, although approving the bill, stated that "the one-house legislative veto provisions of this bill raise serious constitutional questions." [35] Nevertheless, passage of the 1977 statute with the legislative veto provisions, as well as enactment of prior Reorganization Acts containing comparable provisions, indicates congressional rejection of arguments that the legislative veto is unconstitutional.

The rejection is particularly significant in the case of the Reorganization Acts because of the breadth of the powers they delegate. The Acts have enabled Presidents to restructure the Government by abolishing all or a part of an agency's functions.[36] Acting under the 1949 Reorganization Act, Presi-

dent Truman placed the U.S. Maritime Commission within the Department of Commerce and separated its administrative functions from its quasi-judicial regulatory functions.[37] Acting under the 1953 Act, President Eisenhower created a new executive department, the Department of Health, Education, and Welfare.[38]

In the case of reorganization laws, the legislative veto "was insurance to Congress that its always jealously guarded control over the structure of the executive organization would still reside where Congress believed it belonged—in its own hands." [39] The legislative veto provisions of the Reorganization Acts have enabled Congress to exercise much greater control over delegated power than under laws where it confers authority subject only to the indirect controls normally at the disposition of American legislatures. Congress has nullified a significant number of reorganization orders. Twenty of the 93 plans submitted under the 1949 Act and its extensions were disapproved.[40] The most publicized case was the Senate's disapproval in 1950 of President Truman's attempt to abrogate by reorganization the section of the Taft-Hartley Act [41] which provides for separation of functions between the National Labor Relations Board (NLRB) and its independent Office of General Counsel.[42]

The number of reorganization plans disapproved indicates the effectiveness of the legislative veto technique in the Reorganization Acts. Although the legislature has not necessarily been more correct than the President on the merits of individual reorganization proposals, the veto has provided a method by which Congress could exercise continuing control over executive exercises of delegated powers.

The effectiveness of congressional control under the Reorganization Acts is directly related to the importance of the powers delegated. The orders subject to congressional disapproval were issued by the chief executive; they affected the organization of the administration, otherwise prescribed by law; and they could, as in the case of the proposed reorganization of the NLRB, directly alter important statutory provisions and congressional policies. The legislative interest was sufficiently aroused to ensure adequate scrutiny of such significant orders.[43]

OTHER LEGISLATIVE VETO STATUTES

Although employment of the legislative veto began in the reorganization field, Congress soon used it in other areas. According to a 1976 report of the House Committee on the Judiciary, legislative veto provisions "have been included in federal legislation at least 183 times in 126 different acts of Congress in the last 43 years." [44]

It is virtually impossible for an individual without the research resources of the Library of Congress to develop a complete list of the federal statutes which contain legislative veto provisions. The following discussion of federal statutes outside the reorganization field is therefore illustrative rather than exhaustive. Statutes which permit disapproval of the stated executive or administrative action by concurrent resolution of both Houses include:

Department of Defense Appropriation Authorization Act of 1975 (export of goods, technology, or techniques) [45]

Atomic Energy Act Amendments, 1975 (foreign distribution of nuclear materials) [46]

Foreign Military Sales Act Amendments, 1974 (spending of foreign military assistance funds) [47]

Trade Act of 1974 (presidential power to waive freedom of emigration requirements for any country) [48]

Motor Vehicle and Schoolbus Safety Amendments of 1974 (motor vehicle safety standards) [49]

Education Amendments of 1974 (rules and regulations under Act) [50]

War Powers Resolution, 1973 (use of armed forces to engage in hostilities abroad without declaration of war) [51]

Defense Production Act amendments, 1970 (cost accounting standards) [52]

Atomic Energy Act Amendments, 1958 (agreements for atomic energy cooperation with other nations) [53]

Statutes which permit the stated executive or administrative action to be disapproved by resolution of either House include:

Energy Policy and Conservation Act (presidential energy action) [54]

Amtrak Improvement Act of 1975 (national rail proposal) [55]

Military Construction Authorization Act (military construction under Act) [56]

Department of Defense Appropriations Authorization Act (defense contracts under Act) [57]

Presidential Recordings and Materials Preservation Act, 1974 (regulations promulgated under Act) [58]

Federal Election Campaign Act Amendments of 1974 (Federal Election Commission regulations) [59]

Employee Retirement Income Security Act of 1974 (regulations promulgated by Secretary of Labor under Act) [60]

Congressional Budget and Impoundment Control Act of 1974 (presidential proposals to defer expenditures) [61]

Emergency Petroleum Allocation Act of 1973 (amendments to oil allocation regulation) [62]

Regional Rail Reorganization Act of 1973 (rail reorganization plan) [63]

Act of October 19, 1973 (plans distributing funds to Indians in satisfaction of judgments) [64]

Pennsylvania Avenue Development Corporation Act of 1972 (development plan for Washington, D.C. avenue) [65]

Federal Pay Comparability Act of 1970 (federal pay increases) [66]

Arms Control and Disarmament Act (transfer of activities and facilities to Disarmament Administration).[67]

The list reflects the widespread congressional use of the legislative veto. It covers virtually the whole range of executive and administrative actions from presidential employment of the armed forces abroad or impoundment of funds to promulgation of agency regulations or improvement of Pennsylvania Avenue between the White House and the Capitol. Of particular significance is the growing use of the legislative veto technique by recent Congresses. Almost all statutes listed were enacted during the past five years.

These statutes indicate how inaccurate it is to regard the legislative veto as an occasional congressional device, employed primarily in the reorganization field. On the contrary, Congress has been moving toward development of the veto as a major instrument of oversight. Its effort culminated in an attempt to establish a general system of congressional review of rules and regulations.[68]

GENERAL LEGISLATIVE REVIEW OF RULES

Although use of the legislative veto in this country began with the reorganization provisions of the Legislative Appropriation Act of 1932,[69] the technique by that time was well established in English administrative law. During the nineteenth century, Parliament began to control delegated legislation, as administrative rules and regulations are called in the English terminology,[70] through provisions in enabling statutes which required, first, that rules made under them be laid before Parliament, and, second, that rules would be void if, within a stated period, an annulling resolution passed either House.[71] Parliament eventually extended this method of control to all statutes delegating rulemaking power.[72] A 1946 statute standardized the procedure, providing a period of forty days during which rules could be annulled by resolution.[73] Thus, English administrative law has included a general system of legislative review of rules and regulations for many years.

The United States Attorney General's Committee on Administrative Procedure, author of the leading official study of federal administrative law, considered and rejected the use of the English procedure in this country, asserting that "[l]egislative review of administrative regulations, in this particular, has not been effective where tried." [74] Two things should be noted in assessing the Committee's adverse conclusion. First, the Committee gives cavalier treatment to the English experience with legislative vetoes. The report contains only the bare conclusion that the English techniques have been ineffective; it offers no supporting evidence for the statement, with which most observers of the English system would disagree. Second, even if the Committee's conclusion was sound when reached, it no longer reflects the realities of the English system. In 1944, a standing committee of the House of Commons (the Select Committee on Statutory Instruments, usually called the Scrutiny Committee) was formed. The Scrutiny Committee screens all administrative rules laid before the House. The effectiveness of parliamentary review of administrative rules has increased substantially since the Scrutiny Committee's establishment.[75] Any assessment of the English technique which fails to take account of its improved effectiveness since formation of the Scrutiny Committee is hopelessly out of date and unreliable.

Nevertheless, the negative recommendation of the Attorney General's Committee has not dampened efforts to establish American counterparts to the English system of legislative review of rules. Congress has provided increasingly for review by resolution of executive and administrative action during the past quarter century.[76] In addition, a growing number of states has provided for general legislative review of administrative rules and regulations in a manner comparable to the English system.[77] There is strong sentiment in Congress to set up an analogous federal system of legislative review. H.R. 12048, the Administrative Rule Making Reform Act, was introduced in the last Congress. It provided that any agency promulgating a rule must transmit copies to the Secretary of the Senate and Clerk of the House.[78] Rules would not become effective if disapproved by a concurrent resolution of both Houses within ninety days or by a resolution of one House within sixty days which is not disapproved by the other House within thirty days thereafter.[79] Either House could also require that an agency reconsider a rule.[80]

The House Judiciary Committee approved the bill. Although the committee's report acknowledged that the complexity of

modern society made broad delegations of rulemaking power necessary, it also insisted that:

"[T]his very reality requires that Congress have a practical means to disapprove regulations or require their reconsideration in certain instances in a deliberate and reasonable manner. . . . In the judgment of the committee this supervision is the responsibility of elected representatives of the people. [The proposed bill] will provide the Congress with an effective means for supervision of rulemaking activity." [81]

The Committee expressly rejected the claim that the legislative veto was unconstitutional, stating that congressional review of rules and regulations does not invalidly infringe upon the President's veto power or administrative discretion.

"The aim is not to eliminate the executive discretion necessary to carry into effect the policies of the laws enacted by Congress, but it is intended to be a practical means to control such exercise as manifested in rule making to the degree that the agencies be required to submit regulations to the Congress for review and possible disapproval." [82]

H.R. 12048 was voted on in the House on September 21, 1976. The bill narrowly failed to receive the required two-thirds majority.[83]

STATE REVIEW OF RULES

At its annual meeting in August 1977, the National Conference of State Legislatures (NCSL)[84] adopted a number of recommendations on legislative review of administrative regulations. The principal recommendation stated:

"Because of the proliferation of agency regulations and the possibility of promulgation of regulations which violate legislative intent or exceed statutory authority, the committee strongly recommends that legislatures establish procedures for reviewing agency rules and regulations promulgated with the force of law under authority granted by the legislature. These review procedures should be as strong as the constitution of each state allows. In establishing these procedures, legislatures will be reasserting their legislative prerogatives and regaining the basic law-making authority granted to them under state constitutions." [85]

Those who analyze the legislative veto solely in terms of congressional experience [86] erroneously assume that the federal system is the only system of administrative law in this country. Each state has its own body of administrative law and state systems are not mere facsimiles of the federal one. Indeed, the famous comment of Justice Brandeis on the virtues of federalism is particularly pertinent to administrative law: "It is one of the happy incidents of the federal system that a single courageous State may, if its citizens choose, serve as a laboratory; and try novel social and economic experiments without risk to the rest of the country." [87]

Several states have served as laboratories for use of the legislative veto. The House Judiciary Committee which approved H.R. 12,048 noted:

"The principle of according the legislature a veto over administrative regulations is a part of the laws of several States, including Alaska, Connecticut, Nebraska, Kansas, Michigan, Oregon, Virginia and Wisconsin. . . . Legislators from the States of Connecticut and Michigan testified concerning the excellent experience of their respective States in following parallel procedures." [88]

Use of the legislative veto technique by state legislatures has grown substantially in recent years. In 1955, six states had specific provisions for legislative review of agency rules and regulations.[89] Currently, provisions for some form of legislative review are part of the statute book in at least twenty-eight states.[90] In nineteen states,[91] special legislative committees (usually joint bipartisan committees whose members are drawn from both Houses)[92] review administrative rules and regulations. These committees are the American counterparts to the English Scrutiny Committee.[93] In nine states,[94] the relevant statutes provide for review of rules and regulations by standing committees of the legislature. In twenty-two states, the committees vested with review jurisdiction are expressly empowered to recommend annulment of rules and regulations to the legislature. In six states, the committees are authorized to suspend rules and regulations pending further action by the legislature. In ten states,[95] the legislature itself itself may exercise the legislative veto. In nine of these states, the annulment may be accomplished by joint or concurrent resolution of both Houses; in Oklahoma, a resolution passed by either House suffices.[96]

The experience in Michigan and Wisconsin with the legislative veto is particularly significant for the present discussion. In both states, opinions of the state Attorney General suggested that legislative veto provisions were unconstitutional.[97] The Michigan legislature subsequently adopted a constitutional amendment expressly authorizing the legislature to establish a committee to review and suspend regulations.[98] A 1970 statute provides that if the committee disapproves a set of rules, the legislature is empowered to pass a concurrent resolution disapproving the rules.[99] In Wisconsin, the legislature repealed the statute providing for legislative annulment of rules and regulations after the Attorney General opinion.[100] In 1970, however, the Wisconsin legislature passed the present provision for legislative review, which provides for a joint committee to review administrative rules, with power to suspend any agency rule while action by the legislature to repeal the suspended rule is pending.[101] Although such committee vetoes (albeit temporary) raise more serious constitutional questions than vetoes by the legislature itself,[102] the Wisconsin committee veto provision demonstrates the clear legislative feeling that some legislative review is needed.[103]

THE CONSTITUTIONAL ISSUE

During the hearings on the 1977 Reorganization Act,[104] a letter from Attorney General Griffin Bell was introduced which stated that the proposed statute was constitutional. The Attorney General limited his opinion to the narrow context of the reorganization statute and did not approve "the constitutionality of the procedure of Congressional disapproval of executive action by the resolution in other statutes." [105] Indeed, the Attorney General stated that "Congressional action outside the check of the Presidential veto should be constitutionally suspect as it carries the potential for shifting the balance of power to Congress and thus permitting the legislative branch to dominate the executive." [106]

Other critics of the legislative veto, however, have not distinguished between its use in the Reorganization Acts and in other statutes.[107] They assert that all applications of the technique of annulment of executive or administrative action by congressional resolution are unconstitutional. Their principal contention is that the legislative veto violates the veto clause of the Constitution,[108] which requires that "Every Order, Resolution, or Vote to which the Concurrence of the Senate and House of Representatives may be necessary," as well as every bill passed by Congress, be presented to the President for his veto before it can become law. They argue that when Congress disapproves executive action such as a reorganization plan or an agency regulation, it exercises legislative power in which the President must participate. As the argument was recently summarized by the Attorney General, "[i]f a statute authorizing control by Congress over executive action by later resolution has the effect of evading the constitutional safeguards of concurrence of both Houses and Presidential veto, then it violates article I, section 7 of the Constitution.[109] Can Congress, by use of the legislative veto, enact what amounts to veto-proof legislation?

Pre-1976 legal authority

A 1976 report to the National Conference of State Legislatures on the constitutionality of the legislative veto states: "The [Legislative Improvement and Modernization] committee has found no case law resolving this issue." [110] This statement that no case law existed was not entirely accurate. Even though there was no contested case before 1977 which decided the merits of the constitutional issue, a 1950 New Hampshire opinion passed on the constitutionality of a state statute [111] patterned on the Federal Reorganization Acts. The statute gave the Governor power to prepare reorganization plans, which were to be submitted to the legislature and take effect within twenty-five days unless disapproved by a concurrent resolution of the state legislature. [112] In an advisory opinion, the New Hampshire Supreme Court ruled that the law violated the state constitutional requirement of participation by the Governor in the legislative process: "[T]he act provides for a reversal of the democratic processes required by the Constitution, for under it the Governor would propose the legislative action, rather than approve or disapprove action taken." [113]

Several attorney general opinions reach a similar conclusion about the veto's constitutionality. In 1932, after delegating reorganization power to President Hoover subject to veto by resolution, Congress considered another bill making tax refunds of over $20,000 subject to prior disapproval by the Joint Committee on Internal Revenue Taxation.[114] In a 1933 opinion,[115] Attorney General William D. Mitchell stated that the portion of the bill providing for committee veto of executive acts was unconstitutional. Mitchell referred disapprovingly to the congressional veto power over executive reorganization plans, asserting that "[t]he attempt to give to either House of Congress, by action which is not legislation, power to disapprove administrative acts, raises a grave question as to the validity of the entire provision in the Reorganization Act of June 30, 1932, for Executive reorganization of governmental functions." [116]

Nevertheless, a memorandum on the Reorganization Act of 1949 submitted to a Senate committee by Attorney General Tom C. Clark pointed out that Attorney General Mitchell's statement on the 1932 reorganization statute "was obiter dictum." [117] Certainly, Mitchell's animadversions did not have practical effect, either upon the operation of the 1932 law or upon subsequent delegations of reorganization

power. President Roosevelt signed the next important Reorganization Act [118] without questioning its congressional veto provisions. Moreover, later Presidents have not questioned more recent reservations of veto power over executive reorganizations.

Two state Attorney Generals have ruled that state legislative veto provisions are unconstitutional. A 1954 opinion of the Wisconsin Attorney General declared invalid a statute authorizing legislative disapproval of any agency rule by joint resolution.[119] The Attorney General stated that the statute violated the Wisconsin constitutional provision that "no law shall be enacted except by bill." [120] The Attorney General found that legislative annulment of administrative rules is tantamount to enacting a change in law, which "action constitutes the making of law." [121]

A contemporaneous opinion of the Michigan Attorney General reached a similar result.[122] The Michigan statute created a legislative committee to scrutinize administrative rules and report its findings to the legislature.[123] The legislature in turn was empowered to annul rules by concurrent resolution.[124] The Attorney General found that the statute violated the state's constitutional prohibition of performance of judicial functions by the legislature, viewing the determination whether to disapprove a regulation as a judicial function.[125]

Of the four opinions finding the legislative veto unconstitutional, Attorney General Mitchell's opinion is most frequently cited. The opinion's general pronouncements on the legislative veto, however, were in the nature of dicta, gratuitously included in an opinion on the constitutionality of a bill giving a congressional committee power to disapprove agency adjudications.[126] Moreover, the Mitchell opinion was repudiated in the 1949 memorandum by Attorney General Clark approving the legislative veto provision of the bill which became the 1949 Reorganization Act.[127]

Disavowing the conclusion of the Mitchell opinion, the Clark memorandum expressly approved statutory provisions for invalidation of reorganization plans by concurrent resolution: "[I]nsofar as it intimated the unconstitutionality of the reorganization provisions of the Act of June 30, 1932, [the Mitchell opinion] was based upon an unsound premise, namely, that the Congress in disapproving a reorganization plan is exercising a legislative function in a nonlegislative manner." [128] The 1949 memorandum strongly affirmed the constitutionality of the legislative veto provision. The key portion of the memorandum stated:

"There would appear to be no reason why the Executive may not be given express statutory authority to communicate to the Congress his intention to perform a given Executive function unless the Congress by some stated means indicates its disapproval. The Reorganization Acts of 1939 and 1945 gave recognition to this principle. The President, in asking Congress to pass the instant reorganization bill, is following the pattern established by those acts, namely by taking the position that if the Congress will delegate to him authority to reorganize the Government, he will undertake to submit all reorganization plans to the Congress and to put no such plan into effect if the Congress indicates its disapproval thereof. In this procedure there is no question involved of the Congress taking legislative action beyond its initial passage of the Reorganization Act. Nor is there any question involved of abdication by the Executive of his Executive functions to the Congress. It is merely a case where the Executive and the Congress act in cooperation for the benefit of the entire Government and the Nation." [129]

Although there is no pre-1977 contested case determining the constitutionality of the legislative veto, a favorable Colorado Supreme Court opinion counterbalances the New Hampshire court's advisory opinion disapproving a law patterned after the Federal Reorganization Act.[130] The Colorado opinion was rendered in a case involving a statute under which certain tax proceeds could be pledged as security for highway bonds, provided "that any such pledge shall first be approved by joint resolution of the Senate and House of Representatives." [131] The court rejected a claim that the provision violated the Governor's veto power under the Colorado State Constitution: [132] "No decision has been called to our attention, nor has an exhaustive search revealed any, which would support the trial court's finding and conclusion that the approval of the General Assembly with which we are here concerned must be by bill as that term is used in our constitution." [133] Absent authority supporting such a result, the court would not strike down the provision for legislative control contained in the challenged statute. The joint resolution for which the statute provided, said the court, was not "legislative" in the sense of a bill or resolution which had to be submitted to the Governor for approval.[134]

The Colorado decision is not direct authority for the validity of the legislative veto, as the statute in question contained a provision for legislative approval, rather than veto, by resolution. Nevertheless, the argument against the Colorado law and the court's answer are pertinent to the debate on the validity of the type of legislative veto provisions contained in the Reorganization Acts.

Election Act cases

Recently, the legislative veto was challenged for the first time in the federal courts.[135] *Buckley v. Valeo* [136] concerned the constitutionality of the legislative veto as a limitation on administrative rulemaking authority. The Federal Election Campaign Act, as amended in 1974,[137] established the Federal Election Commission (FEC) and gave it substantial rulemaking powers. It provided, however, that FEC regulations could be disapproved within thirty days by resolution of either House.[138] The Supreme Court referred to this legislative veto provision as "but the most recent episode in a long tug of war between the Executive and Legislative Branches of the Federal Government respecting the permissible extent of legislative involvement in rulemaking." [139] But it did not reach the merits of the challenge to the legislative veto, holding that the manner of appointment of FEC members was unconstitutional and precluded the Commission from exercising its rulemaking powers.[140]

In a separate and highly significant opinion in *Buckley*, Justice White addressed the merits of the constitutional issue.[141] His opinion is important enough to be quoted extensively:

"I am also of the view that the otherwise valid regulatory power of a properly created independent agency is not rendered constitutionally infirm, as violative of the President's veto power, by a statutory provision subjecting agency regulations to disapproval by either House of Congress. For a bill to become law it must pass both Houses and be signed by the President or be passed over his veto. Also, 'Every Order, Resolution, or Vote to which the Concurrence of the Senate and House of Representatives may be necessary . . .' is likewise subject to the veto power. Under § 438(c) the FEC's regulations are subject to disapproval; but for a regulation to become effective, neither House need approve it, pass it, or take any action at all with respect to it. The regulation becomes effective by nonaction. This no more invades the President's powers than does a regulation not required to be laid before Congress. Congressional influence over the substantive content of agency regulation may be enhanced, but I would not view the power of either House to disapprove as equivalent to legislation or to an order, resolution or vote requiring the concurrence of both Houses. . . .

". . . [I]n the light of history and modern reality, the provision for congressional disapproval of agency regulations does not appear to transgress the constitutional design, at least where the President has agreed to legislation establishing the disapproval procedure or the legislation has been passed over his veto. It would be considerably different if Congress itself purported to adopt and propound regulations by the action of both Houses. But here no action of eigher House is required for the agency rule to go into effect and the veto power of the President does not appear to be implicated." [142]

Justice White's reasoning appears sound. As he points out, it congressional action under the legislative veto technique is legislative in the sense the veto clause anticipates, the same is true of administrative action under the rulemaking power. Indeed, it is unfortunate that the term "veto" has come to be used to describe legislative review of executive or administrative action by resolution. The term has acquired a pejorative connotation, which implies infringement on presidential veto power. Yet, as Justice White indicates, the congressional power to disapprove is not at all equivalent to legislation and hence has nothing to do with the President's veto power.[143]

After the Supreme Court's decision in *Buckley* v. *Valeo*, Congress amended the Federal Election Campaign Act to correct the constitutional defect in the appointment procedure,[144] but left the Act's legislative veto provision unchanged. A subsequent suit challenging the validity of the veto provision was dismissed by the United States Court of Appeals for the District of Columbia Circuit on grounds of standing and ripeness.[145] The Supreme Court affirmed without opinion.[146] Neither tribunal reached the merits of the constitutional claim.

In the court of appeals, however, Judge MacKinnon, dissenting urged the invalidity of the legislative veto provision.[147] Judge MacKinnon stated that "the one-house veto . . . is a completely different method of accomplishing a legislative result by a congressional procedure *not* authorized by the Constitution; *i.e.*, by one house instead of by two houses and the President."[148] The one-House veto, in MacKinnon's view, "clearly violates the constitutional requirement that legislation should be passed by both houses and be signed by the President." [149]

Judge MacKinnon explicitly disagreed with Justice White's opinion in *Buckley*, asserting that White's approach "ignore[s] the actual situation created in Congress" [150] by the Election Act's veto provision. In Judge MacKinnon's view, Congress' failure to veto an FEC regulation was the legislative equivalent for each House of enacting

legislation.[151] To assume with Justice White that a regulation becomes effective without "any [legislative] action at all with respect to it" [152] is, according to Judge MacKinnon, to assume that Congress will act irresponsibly and fail to consider regulations submitted to it pursuant to a legislative veto statute.[153]

The author respectfully believes that Judge MacKinnon misunderstands the actual operation of the legislative veto. Experience in England and the states with general provisions for legislative annulment of regulations demonstrates that the full legislature will not consider every regulation laid before it. Instead, the house concerned directs attention only to regulations questioned by committees or members when resolutions to disapprove are actually filed. Thus, Justice White correctly asserts that "no action of either House is required for the agency rule to go into effect." [154]

Salary Act cases

Another line of legislative veto cases involves federal employees salaries. The Federal Salary Act of 1967 authorized the President to adjust federal employee compensation, subject to annulment by either House of Congress.[155] This legislative veto provision was challenged in two recent cases after Congress disapproved by resolution salary increases recommended by the President. In *McCorkle v. United States,*[156] the district court dismissed the constitutional challenge, stating only, "I think as the single house veto has been provided for here, it is constitutional." The United States Court of Appeals for the Fourth Circuit affirmed without reaching the constitutional issue.[157]

In *Atkins* v. *United States,*[158] 140 federal judges challenged the constitutionality of the Act's legislative veto provision. The majority of the Court of Claims held the provision constitutional.[159] The majority opinion has been characterized as "well written and reasoned" [160] by a recent critic of the legislative veto. The court's reasoning resembles Justice White's view that congressional action pursuant to the legislative veto provision is not legislative action subject to the requirements of the veto clause:

"We reach this decision by virtue of the simple fact that the single House, in voting by a majority to block the otherwise automatic effectiveness of the President's recommendations, is not doing anything for which the Constitution requires the concurrence of both Houses. The single House is certainly not making new law. Plaintiffs seem to think that the House, when it casts its "veto," is attempting to make law, which act they define as one that "repeals, modifies, or amends the law." However, even accepting that definition for the sake of argument, plaintiffs' view is erroneous, for the one-House veto does not alter the existing law in any fashion, but only preserves the legal *status quo.*" [161]

Moreover, the Court of Claims correctly recognized that the need for effective congressional oversight is relevant in determining the constitutionality of the legislative veto:

"[W]hen Congress delegates authority of the kind we have here to a member of the executive branch, the delegation does not convert the authority granted into an irrevocable executive power, because in exercising the delegated functions, the executive officer merely acts as an agent of the legislative branch of the Government . . . To plaintiffs' argument that Congress cannot meddle once it has delegated power, it may be observed that legislation is itself a form of supervision. Congress has two roles: intial formulation of policy and supervision. The only pertinent question is in what manner Congress can oversee. In this case, whether the answer is by full-fledged statute or by one-House veto, there would be neither a violation of the separation-of-powers principle nor an invalid intrusion on executive power." [162]

Though concurred in by three judges, the dissenting opinion in *Atkins* is weakly reasoned. Its quality can be judged from the following key portion of the opinion:

"If it could be assumed *arguendo* that the one-House veto is not legislative in character, then it would have to be a judicial or executive power. Clearly, it is not judicial. If it is neither legislative nor judicial, it is then executive. But neither House nor both Houses nor officials thereof can exercise executive power or functions. . . . It is clear that if the one-House veto is the exercise of executive power or function, it violates the above article of the Constitution, and violates the principle of Separation of Powers of our government." [163]

The dissent's approach is reminiscent of the familiar parlor game: "It is not animal. It is not vegetable. Therefore, it must be mineral." One wonders whether it is a proper way to deal with a difficult problem of separation of powers. When a power does not manifestly belong to one of the three branches, it should, in Justice Holmes' phrase, "fall into the indiscriminate residue of matters within legislative control." [164] This approach, which recognizes the existence of equivocal powers which need not be arbitrarily fitted into a procrustean trichotomy, permits the legislature to determine which branch shall exercise such powers. [165]

CONCLUSION

If, as Holmes' celebrated statement tells us, the life of the law has been experience rather than logic, [166] then (to paraphrase another Holmes aphorism) a page of experience is worth a volume of logic [167]—especially when the logic is as specious as that opposing the constitutionality of the legislative veto. "Clearly, the question of legislative review of Executive and administrative agency actions is a sweeping subject be treated in a gingerly fashion by the courts. Review of various legislative review mechanisms ought at an absolute minimum to be informed by experience and not depend solely on abstract analysis or speculation." [168]

The overriding need for legislative control of delegated powers and increasing attempts to meet that need, at both federal and state levels, through provisions for legislative review of executive and administrative action lend support to the validity of the legislative veto. Experience with the legislative veto under the Reorganization Acts demonstrates its substantial contribution to the effectiveness of legislative oversight.[169] The contention of critics who argue that the provision violates the veto clause [170] is unsupported by authority. Indeed, the recent decisions suggest that the weight of authority, as well as experience, validates the legislative veto.[171] The logic of the claim of unconstitutionality rests upon a perverted construction of the separation-of-powers doctrine. Such a construction is neither desirable nor justified at this late date of our administrative law, when we recognize, in the words of Justice Cardozo, that the separation of powers is not a "doctrinaire concept to be made use of with pedantic rigor." [172]

Moreover, consistent application of the view that the legislature cannot be empowered to disapprove a rule because disapproval is the exercise of a power to make laws would destroy the rulemaking powers of executive and administrative agencies themselves. Executive and administrative agencies are clearly empowered to make law through their rules. Otherwise, how can the legislature be enacting a change in the law through its disapproval power? If that is true, under the rigid separation-of-powers approach, are not delegations of such "lawmaking" powers to the agencies equally invalid? To invoke the separation of powers doctrine against the legislative veto is to return to a time when the maxim against the delegation of powers was inexorably applied.[173] There is no more reason today to invalidate delegation of the annulment power to the legislature on separation of powers grounds than to invalidate delegations of the rulemaking power to agencies on a similar basis.

"If the particular regulation by an executive official or executive-appointed agency reflects delegation of what is in substance legislative power, the question arises why the legislature may not provide instead that when exercising legislative rulemaking power, the agency is 'an agent of the Congress' and the delegation of legislative power is conditioned on at least modest concurrence of the executive-appointed initiator and of the legislative branch. The American Constitution accommodates hybrids that work." [174]

As Justice White[175] and the Court of Claims[176] have noted, legislative disapproval of an executive or administrative act is not to be equated with enacting a law. Legislative approval by failure to pass a resolution of disapproval is merely a condition specified in the enabling statute by which the agency exercise of rulemaking power is governed. It is now beyond dispute that the legislature, in delegating rulemaking authority, can specify contingencies which must occur before delegated power may be exercised.[177] This approach is applicable to the legislative veto: "The failure of Congress to pass such a concurrent resolution is the contingency upon which the reorganizations take effect. Their taking effect is not because the President orders them. That the taking effect of action legislative in character may be made dependent upon conditions or contingencies is well recognized." [178]

It would be most unfortunate if specious construction of a constitutional doctrine should "bar the use of one of the most promising methods of control of executive and administrative action. Congress is in a unique position to supervise administrative authority [179] and the legislative veto is a valuable tool in this task."

The legislature is the one organ of government both responsive to the electorate and independent of the administration. As the source of rulemaking power, it must be able to control the exercise of such power. Nor is it sufficient that improper rules and regulations can be dealt with by statute. As the court in *Atkins* noted, "Congress plainly felt the need for this veto device, instead of relying solely on the power to override presidential recommendations by a full-fledged statute." [180]

The great need in an era of expanding administrative authority is to establish effective safeguards outside the executive branch. Independent control can, in practice, be exercised only by the legislative and

judicial branches. In this country, we have adequately developed control by the courts. Techniques for direct legislative supervision, however, have been neglected. The legislative veto enables American legislatures to assume their rightful place as effective supervisors of delegated powers.

"In the world of reality the mechanism, as we have underscored, was a fair substitute for full bicameral concurrence, did not materially invade the Executive's own sphere, and took due account of the limited presidential participation. It was a permissible accommodation of competing interests, reflecting both an appropriate check by Congress upon the Executive and some check by the Executive upon the action which could be taken by one House alone." [181]

[107] One who does is J. HARRIS, *supra* note 39, at 241.

[108] U.S. CONST. art. I, § 7.

[109] H.R. Rep. No. 105, 95th Cong., 1st Sess. 10, reprinted in (1977) U.S. Code Cong. & Ad. News 491.500. It should be stressed that this article is concerned with the type of legislative veto contained in the Reorganization Acts, under which executive or administrative action can be annulled by resolution of one or both Houses. The claim that the legislative veto violates the veto clause is based essentially on the separation of powers doctrine. It assumes that all congressional action involves an exercise of legislative power, which must, as such, be subject to the President's veto. This assumption rests upon an outmoded application of constitutional doctrine. See text accompanying note 172 infra. The modern view recognizes that some blending of powers may be permissible. Accordingly, legislative disapproval of an administrative rule or other executive action is not an exercise of the power to enact a law within the meaning of the veto clause but merely a condition which the legislature may attach to delegated powers.

Two variations on the legislative veto found in the Reorganization Acts—statutory termination by resolution and the committee veto—raise different constitutional questions beyond the scope of this article. The Lend-Lease Act of 1941, which provided that powers it delegated would terminate on June 30, 1943, or upon the passage before that date of a concurrent resolution declaring the powers no longer necessary to promote the defense of the United States, is an example of termination by resolution. See Act of Mar. 11, 1941, ch. 11, §3, 55 Stat. 31. Although President Roosevelt signed the lend-lease bill into law, he expressed constitutional reservations in a memorandum to the Attorney General. "It is too clear for argument," Roosevelt asserted, "that action repealing an existing Act itself constitutes an Act of Congress and, therefore, is subject" to the requirement of presentation to the President. Jackson, A Presidential Legal Opinion, 66 Harv. L. Rev. 1353, 1358 (1953).

Roosevelt's approach is sound. To repeal a statute is to perform a legislative act, which should be subject to the veto power. The framers intended that the President's veto power be used to prevent the repeal of laws. See Ginnane, supra note 4, at 586-87. To permit Congress to accomplish the veto-proof repeal of legislation violates this intention. In the words of the one court that has considered the problem: "A concurrent resolution of the legislature is not effective to modify or repeal a statutory enactment. . . . To repeal or modify a statute requires a legislative act of equal dignity and import. Nothing less than another statute will suffice." Moran v. La Guardia, 270 N.Y. 450, 452, 1 N.E. 2d 961, 962 (1936). Compare the famous statement in the Trial of the Seven Bishops, 12 Howell's State Trials 183, 367 (1688), that the power to repeal laws "is as much a part of the legislature, as a power to make laws."

The constitutionality of the committee veto (permitting executive or administrative action to be disapproved by congressional committee) is equally suspect. The Attorney General has characterized the committee veto as a technique which "may well be the most inimical to responsible government," as it "permits mere handfuls of members to speak for a Congress which is given no opportunity to participate as a whole." 41 Op. Att'y Gen. 300, 301 (1957). A different situation exists where legislative committees screen administrative rules and regulations. Such committees raise no constitutional problems because they are vested only with advisory, not substantive, functions.

Another use of the legislative veto is also beyond the immediate scope of this article. Under the annulment-by-resolution technique, Congress may override administrative adjudications. For example, the Alien Registration Act of 1940, ch. 439, § 20(e), 54 Stat. 672, authorized the Attorney General to suspend the deportation of aliens to avoid hardship to resident dependents. Suspensions for more than six months could be set aside by concurrent resolution of the two Houses. This provision was repeated for certain suspensions in the 1952 revision of the immigration laws. Immigration and Nationality Act, ch. 5, § 244(b), 66 Stat. 216 (1952). A later Act authorized the Attorney General to change the status of up to fifty persons from temporary to permanent residence, subject to disapproval by resolution of either House. 8 U.S.C. § 1254(c) (1970). These provisions are discussed in Ginnane, supra note 4, at 582-83, and J. Harris, supra note 39, 210-11.

These provisions for congressional review of administrative adjudicatory decisions are anachronistic revivals of the period when the American Congress, like the British Parliament, exercised both legislative and judicial functions. They are inconsistent with modern theory on proper legislative role and raise serious constitutional questions not present in review of executive and administrative acts that are legislative in nature, such as reorganization plans or administrative rules and regulations.

[181] *Id.*

I am personally of the view that the Supreme Court will uphold the constitutionality of the legislative veto. I think it is a "through a looking-glass" approach to suggest that the legislative veto violates the constitutional principle of separation of powers. How can the legislative branch invade executive powers by reviewing legislative decisons simply because they are called regulations instead of laws? If anything, the thousands of rules/laws passed by the bureaucrats in the exec-

utive branch invade the legislative powers of Congress. Certainly, Congress delegates rulemaking authority to the executive branch agencies, but the separation of powers doctrine does not preclude that the delegation be absolute and cannot be conditioned by legislation enacted according to the constitutional design. In short, if Congress has the power to delegate rulemaking authority, it is axiomatic that it can delegate all that power, or it can condition or limit that delegated power by making it subject to a congressional veto. The far more serious question of whether Congress can delegate legislative powers to the executive branch under the Constitution was decided decades ago by the Supreme Court. Conditioning that delegation of power is merely a corollary to a well-established principle.

The legislative veto does not violate the presentment clause or the principle of bicameralism because it is not legislation. It is simply a maintaining of the status quo. It is the same as if a bill were introduced and it did not pass both Houses of Congress, or if an appropriation were recommended and did not get passed. It is not changing the law.

This is explained in the most recent brief filed by the House of Representatives in the Chadha case. I would like to include a portion of the brief in the RECORD at this point, in which the argument is made that the disapproval resolution in question in this case was not a legislative act.

ARGUMENT

1. THE DECISION BELOW REFLECTS A CRITICAL MISUNDERSTANDING OF THE NON-LAWMAKING CHARACTERISTICS OF H. RES. 926

The controlling factor in this case, the factor that dominates all issues, is essentially negative in nature. It involves what Congress did not do, rather than what it did do.

The essentially negative nature of the resolution is borne out by the very terms of H. Res. 926, which states that "the House of Representatives does not approve the granting of permanent residence in the United States" to the alien Jagdish Rai Chadha. J.S. App. 69a, emphasis added. Consider the legal and practical implications of the use of the word "not" in H. Res. 926:

(1) One House of Congress did not approve the granting of permanent residence in the United States to Chadha. That means that Chadha did not acquire the new status of a permanent resident alien.

(2) Because of H. Res. 926, Congress did not undertake an "act of grace," *Jay* v. *Boyd*, U.S. 345, 354 (1956). Only by such a discretionary "act of grace," concurred in by both Houses, could Chadha's deportation proceedings be cancelled and his status changed to that of a permanent resident alien. 8 U.S.C. § 1254(d).

(3) Thus Congress did not so act as to alter the legal status quo respecting the alien Chadha. This status quo at all times has been, and remains, that of a concededly deportable alien. And he is deportable not as a result of the adoption of H. Res. 926, but as a result of having overstayed his student visa in violation of Sections 101(a)(15(J) and 1251(a)(2) of the Act.

(4) It further follows that, by virtue of H. Res. 926, Congress did not enact any of what the Ninth Circuit calls "positive law that alters individuals' substantive rights," 634 F.2d at 434. Congress has done nothing to affect the positive legal rights or interests of Chadha. He asserts no legal or constitutional rights respecting his deportation order. And any entitlement he may have to a Section 244 "act of grace" from Congress, even if he is eligible on "hardship" grounds, "is manifestly not a matter of right under any circumstances." *Jay* v. *Boyd*, 351 U.S. at 354. Thus the House disapproval of Chadha's plea for an adjustment of his deportable status cannot operate to alter any of his personal rights or to effect a change in his legal status quo. Chadha remains a deportable alien. H. Res. 926 accordingly does not qualify as a "positive law" enactment.

The Ninth Circuit, like the parties below, exhibits uncertainty and confusion about the positive lawmaking features of H. Res. 926. The court does say, quite properly, that positive law is that "which alters the substantive legal rights of individuals," 634 F.2d at 435. The court then makes a controversial assumption that the power of Congress under the Necessary and Proper Clause to "make all laws" does not include the power to "alter substantive legal rights of individuals" by doing something less than enacting a plenary statute. That "something less" in this instance is said to be the alteration of individual rights by a "legislative inaction" approval of "a mere executive recommendation"—all done pursuant to the procedures specified in Section 244(c)(2).

There are numerous flaws in that assumption. This case does not involve any of Chadha's "substantive legal rights." And any possible "legislative inaction" approval of the Attorney General's recommendation that Congress give Chadha a discretionary "act of grace" is not an exercise of congressional power under the Necessary and Proper Clause to "make all laws." It is a statutorily authorized involvement by Congress in its uniquely sovereign and political power respecting alien deportation.

But the chief difficulty with the Ninth Circuit's assumption is that, on its own terms, the assumption does not apply to H. Res. 926. That resolution disapproved any possible change in Chadha's deportable status. H. Res. 926 has no positive lawmaking characteristics, even under the Ninth Circuit's definition. The court failed to distinguish between negative and affirmative legislative action under Section 244(c)(2). It therefore addressed what it thought was "an insurmountable formal constitutional problem" stemming from "legislative inaction" approval of a change in Chadha's legal status quo.

The negative legislative judgment rendered by H. Res. 926 presents no insurmountable constitutional problems. In the words of Justice White's separate opinion in *Buckley* v. *Valeo*, 424 U.S. 1, 285 (1976), the power of either House, to disapprove is not the "equivalent to legislation or to an order . . . requiring the concurrence of both Houses. The one-House disapproval device, to repeat, "does not alter the existing law in any fashion, but only preserves the legal status quo." *Atkins* v. *United States*, 556 F.2d 1028, 1963 (Ct. Cls. 1977),[1] *cert. denied* 434 U.S. 1009 (1978).

This curious inability to distinguish between two-House lawmaking and one-House non-lawmaking manifests itself in several other passages in the Ninth Circuit's opinion. Thus there is an ominous reference to "the potential for unfair or discriminatory use of lawmaking [by the disapproval mechanism] directed at named individuals." 634 F.2d at 535. Coupled with the drastic nature of the deportation sanction, says the court, "disapproval as an exercise of legislative power . . . would raise serious bill of attainder and equal protection problems." Id., n. 42.

Suffice it to say that these "problems" are both illusory and non-existent in the context of a one-House disapproval that serves to preserve the legal status quo of a named individual. Chadha, it bears repeating, is not singled out in H. Res. 926 in order to impose on him the deportation sanction. He is not singled out for any kind of discriminatory treatment, and he does not so claim. Chadha concedes he is deportable under the Act, and H. Res. 926 leaves him precisely in that status. He is singled out in the resolution simply because at least one House of Congress deems it inappropriate to grant him, as an illegal alien, "permanent residence in the United States." Congress, as the House has long maintained, has unquestioned power to deny individual aliens such permanent residence. That proposition the Ninth Circuit does not even mention.

The Ninth Circuit also seeks to convert its inability to distinguish between the lawmaking and the non-lawmaking aspects of Section 244 into "a regime under which any presidential proposal on a given subject would become part of the United States Code if no House of Congress objected within, say, sixty days." 634 F.2d at 435. But the instant case does not involve any kind of two-House non-objection being used to permit an executive proposal or act to become part of "the law." Quite the contrary. There has been no law change in and no addition to the United States Code. And to suggest that one instance of non-lawmaking under Section 244 indicates that Congress has embarked on a process of subverting the whole bicameral legislative process is to make applicable this Court's remark in *FCC* v. *Pottsville Broadcasting Co.*, 309 U.S. 134, 146 (1940):

"It is always easy to conjure up extreme and even oppressive possibilities in the exertion of authority. But courts are not charged with general guardianship against all potential mischief in the complicated tasks of government. the present case makes timely the reminder that 'legislatures are ultimate guardians of the liberties and welfare of the people in quite as great a degree as the courts'." *Missouri, K. & T. Ry. Co.* v. *May*, 194 U.S. 267, 270.

The Congress' power is not controlled by what it "might do," but what it has done and the Ninth Circuit's hypothetical posturing can no more serve as a basis for voiding exercise of power over aliens than the positing of hypotheticals about the reckless conduct by President's could serve to limit his powers. *Nixon* v. *Fitzgerald*, 102 S.Ct. 2690 (1982).

Seemingly in an effort to avoid some of the Ninth Circuit's confusion respecting the non-lawmaking nature of H. Res. 926, the Solicitor General's brief in this Court, filed

[1] "Therefore, we can say that when a decision not to change the status quo is involved, either house can speak for Congress." Barber, *The Constitution and the Delegation of Congressional Power* 111 (1975). That is equally true when one House votes down, or refuses to consider, a bill introduced by one of its own members.

on behalf of the INS, falls into even greater confusion and difficulty. The whole brief is premised on the thought that Section 244(c)(2) is unconstitutional because it authorizes a negative one-House resolution to serve as a kind of "positive law." The very first sentence of the argument portion of the brief (p. 15), makes the astounding assertion that Section 244(c)(2) "authorizes one House of Congress, acting alone, to require the Attorney General to deport an alien who otherwise would not be deported under the immigration laws." Section 244(c)(2) says no such thing. When one House disapproves a Section 244 petition for an "act of grace," the Attorney General is required to deport the petitioning alien because the alien's plea for mercy has failed and because he is otherwise deportable under the immigration laws. Certainly that is the way the Attorney General has interpreted and performed his duties under Section 244, at least prior to the *Chadha* litigation.

From the faulty premise that a one-House resolution of disapproval under Section 244(c)(2) "requires" the Attorney General to deport an individual "who otherwise would not be deported," the Solicitor General's brief then attempts a description of this kind of "positive lawmaking." Actually, the Solicitor General presents two versions, which may be most conveniently compared side by side.

The "Summary of Argument" version, P. 10	The "Argument" version, p. 15
The effect of a resolution passed by one House pursuant to that Section therefore is precisely the same as that of a duly enacted law amending the Act to exclude a particular alien from eligibility for relief.	The effect of a resolution passed by one House under that Section is to amend the Act to exclude a particular alien from the relief generally afforded to aliens who are found by the Attorney General, after a hearing, to be eligible for suspension of deportation and permanent resident alien status.

But the Solicitor General offers no clues as to which version of "the law" enacted by H. Res. 926 is the correct one. Does the claimed amendment of the Act relate to excluding Chadha "from eligibility for relief," or does it exclude Chadha "from the relief generally afforded to aliens" found eligible by the Attorney General? The truth is that either version is spurious. Both the temporary "suspension" relief available from the Attorney General and the final "act of grace" relief available from the Congress are given or withheld in large part as discretionary matters. And the fact that Chadha was considered eligible for the temporary relief afforded by the Attorney General has no bearing on whether Congress, in its legislative discretion, desires to confer permanent residence status on an illegal alien.

The attempt to convert a legislative "no" into a legislative "yes" is marked by a not-so-subtle shift in defining the focus of the legislative resolution of disapproval. The shift is from the substantive law of the subject matter of the resolution to the procedures and actions of the officer or agency below. Thus in the instant case, the search for a positive law change focuses not on Chadha's status as a deportable alien or his entitlement to become a permanent resident but on the supposed change in Chadha's eligibility for the relief "generally afforded" aliens found eligible by the Attorney General. In other words, the positive law change is said to be found in the inability of the Attorney General to give Chadha the kind of relief he generally affords other eligible aliens. That argument is without merit. The inability of the Attorney General to give Chadha relief, or his loss of eligibility, stems from the Section 244 scheme.

The *Chadha* court's faulty efforts to transmute a negative into a legislative "yes" has already been seized upon by the D.C. Circuit in *Consumer Energy Council, et al. v. Federal Energy Regulatory Commission*, 673 F.2d 425 (D.C. Cir. 1982), now pending before this Court on appeals and petitions for certiorari (Nos. 81-2208, 81-2020, 81-2151, 81-2171, 82-177 and 82-209). In that case, the House of Representatives voiced its disapproval, by a resolution, of a proposed Commission regulation respecting natural gas pricing. In holding that such one-House disapproval constituted an attempt to legislate a positive law change in violation of the Presentment Clauses, the court held that the disapproval resolution "effectively changed the law by altering the scope of FERC's discretion and preventing an otherwise valid regulation from taking effect." 673 F.2d at 465. That is a perfect illustration of the *Chadha*-like search for a positive law change. The focus of the search is the effect on the agency's discretion—which in any event is the product of the statutory scheme—and not the substantive legal effects on the rights or obligations of affected persons.

The only word so far from the Supreme Court on this issue has come in dicta by Justice White in Buckley against Valeo concerning the Federal Election Commission. The Supreme Court, as you may recall, held the original campaign reform measure unconstitutional because of the manner in which FEC Commissioners were appointed, without addressing the question of the constitutionality of congressional disapproval of FEC regulations. Justice White, however, took up the issue, and in strongly worded dicta, declared that if the Commissioners were constitutionally appointed, the veto device would be constitutional. He said:

I am also of the view that the otherwise valid regulatory power of a properly created independent agency is not rendered infirm as violative of the President's veto power, by a statutory provision subjecting agency regulations to disapproval by either House of Congress.

Justice White also said:

In light of history and modern reality, the provision for congressional disapproval of agency regulations does not appear to transgress the constitutional design, at least where the President has agreed to legislation establishing the disapproval procedure or the legislation has been passed over his veto.

In supporting the constitutionality of the legislative veto, Justice White refers to "modern reality" and uses it as a departure point from which he continues his assertion. Modern reality is what Congress deals with. While I do not mean to imply that the constitutional question is not significant and Congress should not tread cautiously, we also must deal with reality. If we simply dwell on the debating points of the constitutionality of the legislative veto, I suspect that the debate would be called a tie. We should not get caught on the horns of the constitutional dilemma and not deal with the reality of the regulatory morass in which the citizens of this country find themselves. In this instance, it is political soft-shoe to hide behind a constitutional issue that, at this point, is an open question.

Legislative veto of Government regulations deals with this reality. It is good policy because it provides for accountability. It makes Congress responsible for its actions. I frankly do not understand the argument some opponents make that legislative veto of regulations makes it easier for Congress to pass the buck. If we have the ultimate responsibility for the regulations which flow from the laws which we pass through the exercise of legislative veto, how can that be considered passing the buck?

In an article which appeared in the Los Angeles Times, on February 26, 1982, James Sundquist recognizes the legislative veto as workable policy, which is practical and appropriate in establishing the balance of power between the executive and legislative branches of our Government. As Sundquist notes, the legislative veto device has served the country well as a way to break the logjams which occur between the branches.

If the Supreme Court strikes down the legislative veto as unconstitutional, as the administration advocates, Sundquist points out that the impact on our Government will be dramatic, and the executive branch will be the one to lose out. The ability of Congress to oversee executive branch actions and thus the willingness of Congress to delegate power to the executive branch would be dealt a severe blow. To maintain its responsibility for making the laws of this country, Congress would be forced to resort to other more cumbersome and burdensome mechanisms of overseeing the executive branch. The end result would be a great logjam.

At this point, I would like to enter the article by James Sundquist in the RECORD. His analysis of the legislative veto should be considered by all who are interested in good government.

[From the Los Angeles Times, Feb. 26, 1982]

LEGISLATIVE-VETO ISSUE: WILL IT END IN A LOGJAM?

(By James L. Sundquist)

A constitutional dispute a half-century old appears finally headed for resolution by the U.S. Supreme Court, with profound implication for the practical conduct of government. At issue is a device invented in 1932 to enable Congress to delegate power to the President or to agencies of the executive branch, yet reserve the right to veto actions taken under the executive power.

Critics of the legislative veto contend that it permits Congress to meddle in the administration of laws, exerting improper influ-

ence and authority over decisions that should belong exclusively to the executive. They can make a strong case, but it overlooks a practical reality. If Congress is not permitted to veto actions taken under delegated powers, it can simpley refuse to delegate the powers in the first place. It can retain the decision-making authority, to be exercised through statute, but that will further clog the overloaded congressional calendar and result in delays and deadlocks on matters that urgently require action.

The specific case before the court arises from a ruling by the 9th Circuit Court of Appeals in San Francisco a year ago that struck down a legislative-veto provision in the statute regulating the deportation of aliens. Late last month, the Circuit Court for the District of Columbia rendered a much broader decision in a natural-gas-pricing case, appearing to outlaw the legislative veto in all forms and circumstances as a violation of the separation-of-powers doctrine of the Constitution. If the Supreme Court upholds that position, the veto provison in about 200 statutes will be invalid.

The veto came into being as a compromise in 1932, when Congress was unwilling to give President Herbert Hoover a free hand to reorganize government bureaus, yet could not do the job itself. Its solution was to authorize the President to issue reorganization orders provided that the House or the Senate could disapprove any such order within 60 days. Although Hoover signed the bill, his attorney general concluded a few months later that the arrangement was unconstitutional and a bad precedent. The Justice Department has stuck by that position ever since, sometimes (as, notably, in the Carter Administration) while the President was acquiescing in, or even advocating legislative-veto provisions as the way to break legislative logjams.

How will those logjams be broken in the future if the legislative veto is outlawed? Certainly in many cases the executive branch will not gain power but will be the loser. Reorganization of the government is a case in point. Congress will be no more willing to trust President Reagan or any future President to recast the governmental structure on his own than it was willing to trust Hoover. Every reorganization will have to be achieved through a congressional act, and few that are controversial are likely to become law.

In the War Powers Resolution of 1973, the legislative veto was the key to settling an even older and more urgent constitutional issue, over who has the power to involve the United States in war. Congress was again reluctant, and understandably so, to give the President carte blanche to use military forces anywhere in the world solely at his own discretion. Yet it recognized that sometimes the President has to act in crises, immediately and forcefully. The artfully crafted compromise that was adopted—over President Richard M. Nixon's veto—authorized the President to respond to emergencies with military force, but gave Congress the right to reverse the President's decision.

In the Impoundment Control Act of 1974 the President is prohibited from refusing to expend appropriated funds, but is allowed to defer expenditures, subject to a legislative veto. Without such a simplified procedure, every such action would have to go through the full legislative process. The result would inevitably be fewer deferrals—in other words, more spending.

Similarly with regulatory agencies. For Congress to have review veto power over rules and regulations can be pernicious, but without it the legislators can simply withhold authority—telling the Federal Trade Commission, for example, to draft its regulations as proposed bills, to be enacted into law.

The list of cases could go on. But they all add up to this: If the executive branch finally wins its case against the legislative veto, it will live to regret its victory. Tension and conflict will increase within the government, many deadlocks between the branches will prove unbreakable, and problems that demand urgent attention will go unresolved.

The Supreme Court may hold that in interpreting the constitutional language it is not permitted to take practical considerations into account, although there are many occasions when it has done so. But the constitutional separation of powers surely introduces enough difficulties into the operation of the government already, without the addition of a new rigidity that would prevent statesmen from working out on a case-by-case basis the kind of power relationships that so far—on balance—have served the country well.

Congressional veto of administrative rules and regulations is not a startling new proposal. There is ample precedent for such action in both Federal and State law.

In a brief recently filed before the Supreme Court by Michael Davidson, Senate legal counsel, on the Chadha case the history of the legislative veto is set forth. I would like to include that portion of the brief in the RECORD at this point:

THE EVOLUTION OF LEGISLATIVE REVIEW SHOWS THAT ITS FUNCTION HAS BEEN TO PRESERVE THE BALANCE OF THE ELECTED BRANCHES

The evolution of legislative review over the past five decades shows that its most important function has been to avoid or restrain broad delegations of authority to the President or agencies; it has not served to enact legislation outside the constitutional process. In delegating authority to the President or an agency, Congress faces a fundamental dilemma. Delegation of broad authority runs counter to the basic democratic tenets of our system of government. The nondelegation doctrine sums up those basic tenets: broad delegations of power must be controlled so "that the fundamental policy decisions in our society will be made not by an appointed official but by the body immediately responsible to the people." *Arizona* v. *California*, 373 U.S. 546, 626 (1963) (Harlan, J., dissenting in part). When Congress delegates broad powers over reorganization, war, budgets, energy or regulation, the electorate can no longer hold Congress responsible for the exercise of those powers, and it thereby risks unaccountable national policymaking. Accordingly, like this Court,[14] Congress looks on broad delegation with disfavor.

On the other hand, as discussed below, since the 1930's Congress has faced unprecedented national problems, necessitating delegation of broad authority. The evolution of legislative review constitutes a history of those problems, because Congress and the President turned to legislative review to deal with them. Legislative review developed initially in response to the problems of reorganizing the sprawling government structure created in response to the Depression. Such review received its most thorough constitutional consideration by Congress at that time. Subsequently, legislative review was used to respond to the problems of waging World War II, and of postwar national security. Similarly, in the 1970's Congress used legislative review to respond to broad Presidential claims of war, impoundment, and national emergency powers, and to deal with the energy crisis. Finally, Congress has experimented with legislative review to solve the problem of broad delegations of rulemaking authority.

Our analysis of the history of legislative review proceeds through each of the five main historical contexts of such review, looking at three aspects of that history. First, it examines the function of legislative review as the counterpoint to broad authority sought or claimed by the President. Second, it examines the Executive's position, to detemine whether legislative review has resulted from accommodation by the elective branches to practical problems.[15] Third, it examines consideration in Congress of constitutional issues.[16]

A. REORGANIZATION ART

When Congress enacted and the President approved the Reorganization Act of 1939, they established the chief model for legislative review provisions on the basis of extensive consideration of the delegation problem and other constitutional issues. President Hoover requested authority to reorganize the government in 1929. From the outset, President Hoover coupled his request that the "Congress be willing to delegate its authority over the problem (subject to defined principles) to the Executive" with a proposal for legislative review.[17] Congress followed President Hoover's suggestion and authorized reorganization subject to legislative review; this authority, as amended, lapsed in 1935.[18] In 1936, President Roosevelt created a Committee on Administrative Management to study the problems created by the superimposition of newly formed agencies on the pre-existing government structure. That committee concluded that there was "a headless 'fourth branch' of the Government, a haphazard deposit of irresponsible agencies and uncoordinated powers." [19]

To deal with this problem, the Administration requested revival of reorganization authority without legislative review,[20] posing an acute problem of broad delegation. Reorganization authority involved major policy decisions about what agencies should exist and which powers should be coordinated or separated. Congressional opponents attacked the proposed reorganization bill as an unconstitutional delegation of legislative authority to the President which would afford him virtually dictatorial power.[21] Concerns regarding the breadth of delegation were reflected when this Court heard challenges to the prior reorganization authority.[22]

In 1938, after extensive debate on the breadth of the delegation, the House rejected President Roosevelt's request for reorganization authority. The President then dropped his initial resistance to legislative review.[23] In 1939, Congress again debated the constitutional issues implicated by reorganization authority and legislative review. It attempted to apply this Court's decisions on delegation, and considered various constitutional arguments for approval or disapproval of reorganization authority by simple, concurrent, or joint resolution.[24] Ul-

Footnotes at end of article.

timately, Congress found in legislative review the means to make a delegation of power to the President consistent with the responsibility of the Congress for the organization of the government.

Commentators hailed the Reorganization Act's legislative review provision as offering a practical and constitutional alternative to otherwise unduly broad delegation.[25] In the following forty-two years, reorganization authority was renewed by statute numerous times.[26] During that period the provision was used extensively. Presidents submitted 115 reorganization plans to Congress of which 23 were disapproved by Congress pursuant to legislative review provisions. See Appendix A (tabulation of disapproval resolutions). Major plans which were not disapproved and became effective included those creating the Executive Office of the President in 1939, the Department of Health, Education and Welfare in 1953, and the Office of Management and Budget in 1970.[27]

B. WORLD WAR II AND THE POSTWAR PERIOD

Shortly after adoption of the Reorganization Act of 1939, Congress and the President applied the legislative review procedure devised in it to resolve the delegation problem for national security.[28] In 1941, President Roosevelt asked Congress to authorize lending or leasing of war materials to foreign governments, and to extend indefinitely the period of compulsory military service to prepare for the possibility of war.[29] Both of these steps involved the delegation of broad authority, and Members of Congress charged that the delegation sought was excessive.[30] To resolve this problem, Congress enacted both measures with legislative review provisions that allowed Congress to terminate the delegated authority by concurrent resolution.[31]

After the United States entered World War II, Congress enacted over thirty statutes conferring powers on the Executive with similar legislativ review provisions.[32] The Administration submitted draft bills containing such provisions and affirmed their constitutionality in a legal memorandum.[33] Congressional critics charged that the provisions violated the Presentation Clause.[34] Both the critics who challenged such provisions, and the administration, which defended them, agreed that their precedent was in the Reorganization Act; debate focused on the critics' attempts to distinguish these provisions from the Reorganization Act on narrow grounds.[35]

The Administration's legal memorandum justified legislative review provisions as constitutional on two principal grounds. First, it said that "[i]t has never been thought that article I, section 7, is applicable to every kind of action by the two Houses of Congress." *Statement on Constitutionality, supra* note 33, at 983. Second, it noted that the legislative review provision "is submitted to the President at the time the bill is originally passed, and he then has a chance to approve or disapprove. . . . [T]here is no constitutional requirement that the President give his approval more than once in the present situation." *Id.* at 984.

The use of legislative review before and during World War II established it as "a device that both the Congress and the Executive have repeatedly found valuable in reaching their own compromises over the form and content of delegations of authority. And that is the key point: both branches have found the legislative veto a realistic way of resolving practical issues in their relations."[36] President Roosevelt's "acquiescence in the use of concurrent resolutions during the war was continued by President Truman and his successors. . . . and has become fairly common, with only occasional presidential protest."[37]

Over the following quarter of a century after World War II, Presidents continued to accept legislative review as constitutional. After a decade of experience with legislative review, the administration of President Truman endorsed its constitutionality in 1949 with a Justice Department opinion rejecting the argument that legislative review was equivalent to enactment of new legislation.[38] The pattern set by the Truman Administration continued through the administrations of four succeeding Presidents until President Nixon vetoed the War Powers Resolution in 1973.

During the intervening years, Presidents regularly denounced provisions by which Congressional *committees* reviewed Executive activity as an unwarranted intrusion. However, respondents have not cited any instance during those administrations, and we know of none, in which any of the five Presidents formally disputed the constitutionality of legislative review provisions except for committee review provisions.[39] Rather, as the Senate Subcommittee on Separation of Powers found in 1969, "an accommodation was reached years ago on legislative vetoes exercised by the entire Congress or by one House, [while] disputes have continued to arise over the committee form of the veto." S. Rep. No. 549, 91st Cong., 1st Sess. (1969).[40]

In fact, Presidents Kennedy, Johnson, and Nixon actually proposed enactment of statutes with legislative review provisions in such diverse areas as withdrawal of wilderness areas, agricultural programs, taxation, federal grants, and international trade, as well as in reorganization.[41] When the constitutionality of such provisions was questioned, the administration of President Kennedy submitted a memorandum supporting the constitutionality of legislative review.[42] During the administration of President Johnson, the Department of Justice again affirmed the constitutionality of the legislative review provision of the Reorganization Act, as contrasted with provisions for committee review.[43]

Legislative review served two chief functions in this quarter-century period. In the area of national security, legislative review provisions balanced delegations of authority in legislation addressing the Truman Doctrine, the Korean War, the Middle East Crisis of 1957, and the Vietnam War.[44] Also, in areas of novel policy initiatives, legislative review provisions balanced delegations of authority for the space program, international agreements on nuclear energy, tariff arrangements, and adjustment of federal pay rates.[45] This last provision was challenged as unconstitutional and upheld. *Atkins* v. *United States*, 556 F.2d 1028 (Ct. Cl. 1977), *cert. denied*, 434 U.S. 1009 (1978).

C. IMPOUNDMENT, WAR, AND NATIONAL EMERGENCY POWERS

During the 1970's, the President and Congress resolved a series of major constitutional disputes over claims of the President to broad impoundment, war, and national emergency powers. Although each dispute and its resolution evolved separately, all arose from a single dilemma: the President's claim that broad powers were needed to deal with modern problems of budget control and foreign affairs, coupled with the recognition that broad powers must be checked. These confrontations tested the ability of the elective branches to adapt to modern problems within the limits of the Constitution. In seeking to reconcile broad power with accountability, the elective branches turned to legislative review, with its history of acceptance by President and Congress as a solution to similar problems.

The most serious of these constitutional disputes over the reach of the President's power concerned war powers in the wake of the conflict in Vietnam. In 1964, Congress enacted the Tonkin Gulf Resolution authorizing action in Vietnam subject to termination by concurrent resolution.[46] After the Tonkin Gulf Resolution was repealed in 1970, the President claimed inherent authority to continue hostilities, and subsequently he extended military operations to Cambodia and Laos.[47]

Responding to these developments, in the early 1970's Congress deliberated extensively on legislation to govern the exercise of war powers. Congress considered carefully the constitutional issues involved in such legislation.[48] A provision of the key House bill authorized termination by concurrent resolution of use of armed forces in hostilities; its constitutionality was challenged as violating the Presentation Clause and defended as following the precedents of the Reorganization Act and the Tonkin Gulf Resolution.[49]

Subsequently, the constitutional issues were debated on the House floor, and were addressed in memoranda submitted by the House and Senate conferees on their respective chambers' bills.[50] The Constitution provides that "The Congress shall have Power . . . to declare War," Art. I, Sec. 8, cl. 11; it also provides that "The President shall be Commander in Chief of the Army and Navy of the United States. . . ." Art. II, Sec. 2, cl. 1. During the consideration of war powers legislation, Administration spokesmen had emphasized the necessity for Presidents to be able to react immediately to international emergencies by use of armed forces without awaiting a declaration of war; they cited the history of Presidential commitments of armed forces without express legislative authority.[51] Supporters of war powers legislation sought means to implement the constitutional responsibility for the Congress to "declare War" before the nation committed itself to prolonged combat, while not precluding emergency Presidential commitments of armed forces in appropriate circumstances. They focused on two mechanisms for insuring legislative decisions after an emergency commitment: an automatic end to such a commitment after a fixed period of time absent express legislative authorization to continue, and a provision for termination by concurrent resolution.[52]

Regarding such termination, the House conferees' memorandum relied on an opionion submitted by Professor Freund, whose "conclusion [was] that, on the substantive premises of the bill, the provision respecting a concurrent resolution is a valid and appropriate measure, and does not raise constitutional issues of the kind mooted in connection with other categories of legislation."[53] The House provision thus justified was enacted by Congress as section 5(c) of the War Powers Resolution, 50 U.S.C. 1544(c), which provides:

"Notwithstanding subsection (b) of this section, at any time that United States Armed Forces are engaged in hostilities outside the territory of the United States, its possessions and territory without a declaration of war or specific statutory authoriza-

tion, such forces shall be removed by the President if the Congress so directs by concurrent resolution."

After the House and Senate adopted the conference version of the War Powers Resolution, President Nixon vetoed it. The President's veto message contended that two provisions were unconstitutional: the provision that "would automatically cut off certain authorities [to commit armed forces to hostilities] after sixty days," and the provision that "would allow the Congress to eliminate certain authorities merely by the passage of a concurrent resolution—an action which does not normally have the force of law, since it denies the President his constitutional role in approving legislation." [54] President Nixon's veto message was the first time since adoption of the Reorganization Act of 1939 that any President had formally disputed the constitutionality of a legislative review provision other than a provision for committee review. The House and Senate passed the War Powers Resolution over the President's veto, the only time a legislative review provision has ever been enacted over a Presidential challenge to its constitutionality.[55]

The following year, Congress resolved the problem posed by Presidential claims of inherent power to impound appropriations by a similar measure. In the early 1970's, President Nixon impounded appropriated funds totalling over eighteen billion dollars.[56] In response, Congress held hearings on legislation to govern impoundment,[57] and enacted such legislation as part of a general reform of the Congressional budget process. In 1973 and 1974, the Senate passed two bills, the first providing that impoundments could become effective only if both Houses approved, the second forbidding all impoundments.[58] The House adopted a provision allowing impoundments so long as either House could disapprove them.[59] Critics challenged the constitutionality of the House provision, while its supporters defended it as following the Reorganization Act.[60]

In conference, a compromise was achieved under which permanent impoundments, termed "rescissions," would require approval through enactment of legislation. In contrast, temporary impoundments, or "deferrals," would become effective unless disapproved by one House. This compromise provided the President with flexibility, while preserving the constitutional balance. The decision to permanently rescind funds was not delegated to the President, as that would allow him to undo previously enacted decisions on appropriations, a power of "suspension" of legislation denied him by the Framers.[61] Allowing the President to defer expenditures, subject to legislative review, preserved and aided the legislative process, since it provided time for a legislative decision on whether to change previous decisions on appropriations. The provisions were enacted with the President's approval.

The Impoundment Control Act's provision for legislative review has been used extensively. Presidents have submitted hundreds of proposed budget deferrals, of which sixty-five have been disapproved by resolutions of the House or Senate with no protest by the Executive. See Appendix B (tabulating disapprovals of budget deferrals). Even critics of legislative review recognize the soundness of the act's solution to the impoundment problem: President Carter, in his message on legislative vetoes, termed the budget act, like the War Powers Resolution, a "constructive safeguar[d]," and the House Rules Committee, which has opposed other kinds of legislative review provisions, deemed the War Powers Resolution and the impoundment control provisions "compelling examples [of] histories of essentiality." [62]

These statutes were followed by others resolving similar problems: the National Emergencies Act, resolving the longstanding problems with unchecked Executive emergency power;[63] the Arms Export Control Act, resolving the problem of foreign arms sales;[64] and the Nuclear Non-Proliferation Act of 1978, resolving the problem of exports of nuclear capability.[65] Under these provisions, major congressional deliberations over foreign policy have occurred, such as in consideration of President Reagan's 1981 plans to sell sophisticated aircraft to Saudi Arabia.[66]

D. ENERGY

Legislative review has served a crucial function in balancing broad delegations in legislation responding to the energy crisis of the 1970's, as shown in one of the other challenges to legislative review which is now before this Court, *United States Senate* v. *Consumer Energy Council of America, supra* note 1. The origin of this role of legislative review is explained in the legislative history of the proposed Energy Emergency Act of 1973, the progenitor of much of the energy legislation of the past nine years. In late 1973, as a result of the embargo by Arab states on shipment of oil to the United States, "the need to take emergency actions to deal with the situation [was] clearly established." H.R. Rep. No. 710, 93d Cong., 1st Sess. 24 (1973). Within a month after the embargo began, the President sought broad emergency powers from Congress to restrict public and private energy consumption, grant exemptions from environmental laws to allow more coal use, order conversion of powerplants to coal use, initiate production from naval oil reserves, and license temporarily nuclear plants without a public hearing. *Id.* at 24–25.

Congress recognized that the energy crisis raised again a problem that had recurred since "the first declared national emergency in 1933. . . . [¶] Over the course of that forty-year period, the Congress has repeatedly been presented with the problem of finding a means by which a legislative body in [a] democractic republic may extend extraordinary powers for use by the Executive during times of great crisis without imperiling our constitutional balance of liberty and authority." *Id.* at 25. Based on an investigation of the use of emergency authority since 1933,[67] Congress was reluctant to delegate unchecked emergency authority over energy use. Moreover, such a delegation would have raised the central concerns of the nondelegation doctrine, since "[t]he unrestrained power to determine the burden of shortages is the power to make a political decision of the highest order." *Arizona* v. *California, supra* page 9, 373 U.S. at 626 (Harlan, J., disenting in part).

Instead, first the Senate, and then both Houses, turned to legislative review as the solution. The Senate Committee on Interior and Insular Affairs explained the need for legislative review:

"Because of the broad scope of the additional authority granted the executive branch under this act, the committee believes that it is necessary for the Congress to review the manner in which that authority is to be exercised."

S. Rep. No. 498, 93d Cong., 1st Sess. 27 (1973). The conference committee adopted this approach, concluding "that the disapproval mechanism contained in this legislation provides the best opportunity for resolution of this problem." H.R. Rep. No. 763, 93d Cong., 2d Sess. 42 (1974) (conference report on the Energy Emergency Act). Both Houses enacted the conference version of the bill, delegating the Executive authority for mandatory energy conservation, rationing, and conversion of gas- and oil-burning facilities to coal use, subject to legislative review of Executive plans. The President did not object to the provisions for legislative review. Indeed, in December, 1973, less than two months after President Nixon vetoed the War Powers Resolution, the Administration apparently supported a proposal for delegation of broad energy powers subject to legislative review.[68] When emergency legislation emerged from conference, President Nixon vetoed it in March, 1974, based on criticism of its substantive authority, without opposing legislative review provisions.[69]

Subsequently, most of the authority proposed in the bill was enacted or reenacted in other energy legislation with legislative review provisions. Legislative review became the critical component for balancing a host of broad statutory delegations concerning energy rationing, contingency plans, strategic oil reserves, allocation of energy production materials, oil exports, and naval reserve production.[70] While President Carter opposed some legislative review provisions, he accepted others. For example, the House of Representatives passed legislation to authorize adoption of standby gasoline rationing plans subject to legislative review, with President Carter's approval: [71]

"I don't object to the House veto if it's done expeditiously. . . .[¶]I have no objection to [a provision for] the House, within 2 weeks [after submission of a rationing plan], either approving the plan that I have tried to put into being or if either House wants to veto it, they can do that."

One of the energy acts, the Natural Gas Policy Act of 1978 ("NGPA"), is challenged in a legislative review case recently docketed in this Court. See note 72 infra. Congress enacted the NGPA after eighteen months of strenuous effort to solve the enormously divisive and controversial issues raised by President Carter's energy proposals. As part of gradual natural gas price deregulation, Title II of the NGPA establishes a program for "incremental pricing" of natural gas, under which some industrial users of natural gas pay a disproportionate share of price increases for tapping new sources of gas.

Congress was willing to mandate in 1978 that such incremental price increases be paid by low-priority "boiler fuel" users of natural gas. However, it was reluctant to extend such pricing to high-priority industrial gas users, with their important role in the national economy. As a court of appeals has noted, "[t]he incremental pricing scheme Congress adopted in the NGPA was novel and experimental, and viewed with some trepidation by many members who feared it would bring in its wake massive switching to non-gas fuels, regional dislocations of industry, and a bureaucratic orgy." *Ohio Association of Community Action Agencies* v. *Federal Energy Regulatory Commission*, 654 F.2d 811, 820 (D.C. Cir. 1981).

Accordingly, Congress established a procedure for gaining experience with incremental pricing before it was fully implemented. It balanced the delegation of authority to devise incremental pricing regulations for high-priority industrial users with a provisions for legislative review, in light of the regulations' potential for drastically affect-

ing the burden of natural gas pricing.[72] Pursuant to that provision for legislative review, in 1980 the House of Representatives disapproved incremental pricing regulations. Consumer groups challenged the legislative review provision, and a panel of the court of appeals declared the statute unconstitutional, both on separation of powers grounds and on a sweeping view of the Presentation Clause. *Consumer Energy Council of America* v. *FERC*, supra note 1.

E. RULEMAKING

In recent years, Congress has experimented with use of legislative review as a check on broad delegations of rulemaking authority, as shown by the second recent challenge to legislative review which has been appealed to this Court, *Consumers Union of U.S., Inc.* v. *Federal Trade Commission, supra* note 1. Since the power to make rules is, in effect, a delegation of the power to legislate, broad delegations to agencies of such power raise the fundamental concerns underlying the nondelegation doctrine. As delegations of rulemaking authority to independent regulatory commissions, and to Executive Branch agencies, have become broader, they have been criticized for "threaten[ing] the legitimacy of agency action," [73] leading to " a strong and persisting challenge to the basic legitimacy of the administrative process itself." [74]

This Court has expressed serious concern with broad rulemaking delegations. *See Industrial Union Department, AFL-CIO* v. *American Petroleum Institute, supra* note 14. However, there are circumstances when it is impractical or undesirable for Congress to enact narrowly drafted solutions which anticipate all aspects of a national problem.[75] Rulemaking by independent regulatory commissions presents Congress with a special aspect of this problem, because the independent regulatory commissions are not democratically accountable through Presidential responsibility.[76]

In 1975, Congress expressly delegated to the Federal Trade Commission (FTC) broad authority to make rules to prevent businesses from engaging in "unfair or deceptive acts or practices in commerce." [77] After several years' experience with FTC rulemaking, Members of Congress found that under the FTC's "very broad authorities to prohibit conduct which is 'unfair or deceptive' the FTC can regulate virtually every aspect of America's commercial life. . . . The FTC's rules are not merely narrow interpretations of a tightly drawn statute; instead, they are broad policy pronouncements which Congress has an obligation to study and review." (124 Cong. Rec. 5012 (1978) (statement by Representative Broyhill). Legislative review was proposed to constrain that broad delegation.)

Congress gave extensive consideration to the constitutionality of legislative review for FTC rulemaking, examining, most importantly, the Attorney General's 1977 opinion reaffirming the constitutionality of the legislative review provision in the Reorganization Act.[78] After three years of hearings and debate, in 1980 Congress enacted a legislative review provision in its reauthorization of the FTC.[79] In 1982 Congress adopted a concurrent resolution disapproving FTC rules concerning the used car industry. The constitutionality of the legislative review provision was challenged and in October, 1982, the court of appeals declared it unconstitutional in a brief per curiam opinion, based on the court's previous invalidation of the natural gas incremental pricing provision. *Consumers Union of U.S., Inc.* v. *FTC, supra* note 1.

Legislative review for independent agency rulemaking has been before this court once before. In 1976, the legislative review provision for rulemaking by an independent commission, the Federal Election commission, was challenged. *Buckley* v. *Valeo*, 424 U.S. 1 (1976). While the majority opinion did not reach that consititutional challenge, *id.*, 424 U.S. at 140 n.176, Justice White's concurring opinion concluded that legislative review was constitutional, because Congress was not making rules, but only disapproving them.[80] "[I]n the light of history and modern reality, the provision for congressional disapproval of agency regulations does not appear to transgress the constitutional design, at least where the President has agreed to legislation establishing the disapproval procedure. . . ." *Id.* at 285-86 (White, J., concurring in part and dissenting in part). Since then, this court has reviewed Federal Election Commission rules which had been previously reviewed by Congress, and has found the prior legislative review to be an aid in construing the statute. *Federal Election Commission* v. *Democratic Senatorial Campaign Committee*, 454 U.S. 27, 34 (1981).

Besides applying legislative review to rulemaking by independent agencies, Congress has also experimented with legislative review for certain executive agencies. The constitutional dispute over such provisions began with one for education regulations. During the 1960's, Congress enacted a number of narrow grant programs to be administered by the Commissioner of Education. In 1969, President Nixon sought discretion to consolidate fragmented grant programs, while checking the discretion thereby delegated through legislative review:

"The legislation I propose would be patterned in part after procedures used successfully for the past 20 years to reorganize Executive Branch functions. It would give the President power to initiate consolidation of closely related Federal assistance programs, and to place consolidated programs under the jurisdiction of a single agency. However, it would give either House of Congress the right to veto a proposed consolidation within 60 days, and it would establish stringent safeguards against possible abuse."[81]

Congress found subsequently that fragmented and narrow education grant programs "inevitably lead to Executive-Legislative confrontations" because they inappropriately limit the Commissioner of Education's authority; "a Commissioner unwilling to tolerate the delay inherent in proposing new legislation is tempted to 'bend' existing program requirements and to combine different program authorities to secure the base of funding necessary to implement his ideas." S. Rep. No. 763, 93d Cong., 2d Sess. 69 (1974). To solve this problem, in 1974 Congress "eliminate[d] the [grant] categories that now limit[ed] the Commission[er]'s discretion. In their place it substitute[d] a broad authority with minimal strings attached." *Id.*

However, as President Nixon's suggestion of legislative review had reflected, ending the narrow grant categories conferred great discretion. Congress recognized that prior discretion had led to "steady escalation of agency quasi-legislative power, and the corresponding attrition in the ability of the Congress to make the law. For at least four decades now, the agencies of the Executive Branch have increasingly used their rulemaking authority to 'correct' what they feel are the errors and ambiguities of the law." H.R. Rep. No. 805, 93d Cong., 2d Sess. 73 (1974). Accordingly, the statute which consolidated the grants subjected rulemaking by the Commissioner of Education to legislative review.[82]

President Ford signed the bill into law on August 21, 1974, "[a]s the first major legislation to become law during my Administration. . . ." [83] He praised Congress for consolidating narrow categorical grant programs, id., but protested that the review provision constituted an attempt by Congress "to administer Federal programs" which was "questionable on practical as well as constitutional grounds." Id. at 37. Together with President Nixon's veto of the War Powers Resolution, President Ford's protest inaugurated the period of the last nine years during which the Executive Branch has formally disputed most, but not all provisions for legislative review.

Recent Congresses have considered proposals to make legislative review provisions applicable to rulemaking by all federal agencies.[84] In the 95th and 96th Congresses, regulatory reform bills received extensive consideration, but neither House voted on such bills. In the current 97th Congress, a generic legislative review bill passed the Senate, but it has not been voted on in the House. During this period, Congress has given extensive consideration to the constitutional arguments regarding such review. At this time, it has reached no resolution of the legislative issues regarding such review, and its consideration is still evolving.

[28] "The world turmoil that led to World War II occasioned the need to transfer greater authority to the president in the areas of foreign affairs and national security. The legislative veto was included in statutes conferring additional authority to constrain presidential initiative." B.H. Craig, The Legislative Veto: Its Implications for Administration and the Democratic Process 58 (unpublished University of Connecticut Ph.D. dissertation 1982).

[29] An Act to Promote the Defense of the United States, ch. 11, 55 Stat. 32 (1941); Service Extension Act of 1941, ch. 362, 55 Stat. 626. An earlier statute, the Neutrality Act of 1939, ch. 2, 54 Stat. 4, had authorized either the President, or Congress by concurrent resolution to embargo exports to belligerents.

[30] The Lend-Lease Act was criticized on the ground that the President wanted "and we yield power in his own discretion, on his own terms, and as he may see fit, to conduct undeclared war anywhere in the world." 87 Cong. Rec. 1269 (1941) (Sen. Clark). The authority to extend the military service period was criticized on the ground that "there is no language limiting the maximum time of service. It is then a question—and I think a serious one—as to whether the President, while his authority exists, may not extend the period of service absolutely indefinitely. . . ." 87 Cong. Rec. 6504 (1941) Sen. White).

[31] Section 3(c) of an Act to Promote the Defense of the United States, 55 Stat. 32 (1941); Section 2 of the Service Extension Act of 1941, 55 Stat. 626.

In 1953, Justice Jackson published a memorandum signed by President Roosevelt which stated the President's belief that the termination provision of the Lend-Lease act was unconstitutional. At the time President Roosevelt wrote the memorandum, Justice Jackson was serving as Attorney General and the President committed the private memorandum to his care without communicating his views to the Congress. Justice Jackson wrote:

"But was it unconstitutional? That was a different question, which we discussed over and over. The question on which my doubts were not fully satisfied never bothered the President in the least. It seemed to me to depend on whether the provision was to be considered as a reservation or limitation by which the granted power would expire or terminate on the contingency of a concurrent resolution or was to be regarded as authorizing a repeal by concurrent resolution." (Jackson, *A Presidential Legal Opinion*, 66 Harv. L. Rev. 1353, 1355 (1953).)

[32] *See* Watson, *Congress Steps Out: A Look at Congressional Control of the Executive*, 63 Calif. L. Rev. 983, 1089-90 (1975) (listing statutes). A contemporary political scientist explained the crucial role of legislative review provisions in the debates of this period:

"Termination by concurrent resolution is more likely to be provided in measures whose passage on a preliminary survey, appears doubtful. Without this provision, the Service Extension Act of 1941 would probably not have received even the 203 to 202 vote by which it passed the House." (White, *Executive Responsibility to Congress Via Concurrent Resolution*, 36 Am. Poli. Sci. Rev. 895, 898 (1942) (footnotes omitted).)

[33] White, *supra* note 32, 36 Am. Poli. Sci. Rev. at 895 n. 2 (submission of draft bills); General Counsel to the Office of Price Administration, *Statement on Constitutionality of Concurrent Resolution Provision of Proposed Price Control Bill* (H.R. 5479) *("Statement on Constitutionality")*, *reprinted in Price-Control Bill: Hearings Before the House Comm. on Banking and Currency on H.R. 5479*, 77th Cong., 1st Sess. 983 (1941) *("Price Control Hearings"). See Allen* v. *Grand Central Aircraft Co.*, 347 U.S. 535, 542 n.7 (1954) (quoting provisions of wartime price control act).

[34] *See Price Control Hearings, supra* note 33, at 399, 634 (Presentation Clause quoted by Rep. Patman); 88 Cong. Rec. 781, 784 (1942) (Sen. Murdock) (same).

[35] *Compare* 87 Cong. Rec. 735 (1941) (Rep. Dirksen) (citing Reorganization Act in support of proposal to include legislative review provision in Lend-Lease Act) *with Price Control Hearings, supra* note 33, at 400, 635 (Rep. Wolcott) (distinguishing legislative review functioning under the Reorganization Act as "condition precedent" from wartime legislative review functioning as "condition subsequent") *and* 87 Cong. Rec. 1596 (1941) (Sen. Murdock) (same). The Administration rejected this attempt to distinguish the Reorganization Act. *See Statement on Constitutionality, supra* note 33, at 985.

[36] J. L. Sundquist, *The Decline and Resurgence of Congress* 356 (1981).

[37] Watson, *supra* note 32, 63 Calif. L. Rev. at 1016.

[38] Department of Justice, *Memorandum Re Constitutionality of Provisions in Proposed Reorganization Bills Now Pending in Congress* (S. 526 and H.R. 2361, 81st Cong., 1st Sess.), *reprinted in Reorganization Act of 1949*, S. Rep. No. 232, 81st Cong., 1st Sess. 19-20 (1949). This memorandum disapproved part of the Attorney General's 1933 opinion which had termed legislative review unconstitutional, see note 18 *supra*, as "obiter dictum" which had been "based upon an unsound premise." *Id.* at 19.

[39] The INS Brief, at 57 n.37, asserts that there is a history of presidential opposition to legislative review. It cites Watson, *supra* note 32, 63 Calif. L. Rev. at 988 n.9, who lists sixteen Presidential statements by Presidents from Truman through Nixon, and the INS Jurisdictional Statement in this case, at J.S. 22 n.19, which cites a single statement by each President from Truman through Nixon, each of which is among the sixteen cited by Watson.

Every one of these Presidential statements, until the veto by President Nixon of the War Powers Resolution, concerned bills authorizing *committee* review. President Truman: 97 Cong. Rec. 5374-75 (1951) (review by Armed Services committees); 98 Cong. Rec. 9752 (1952) (Post Office and Civil Service, and Public Works, committees). President Eisenhower: 100 Cong. Rec. 7135 (1954) (Armed Services committees); 101 Cong. Rec. 10459-60 (1955) (Appropriations committees); 102 Cong. Rec. 12959 (1956) (Armed Services committees); Pub. Papers 648-50 (1956) (Interior committees); H.R. Doc. No. 255 Pt. I, 86th Cong., 2d Sess. at M18 (1960) (Armed Services committees). President Kennedy: Pub. Papers 6 (1963) (Appropriations committees). President Johnson: Pub. Papers 861-62 (1964) (Interior committees); Pub. Papers 1249-51 (1964) (Agriculture committees); 1 Weekly Comp. Pres. Doc. 132 (1965) (Armed Services committees); 1 Weekly Comp. Pres. Doc. 432-33 (1965) (Public Works committees); 111 Cong. Rec. 12639-40 (1965) (Public Works committees). President Nixon: 8 Weekly Comp. Pres. Doc. 938 (1972) (Public Works committees); 8 Weekly Comp. Pres. Doc. 1076 (1972) (Public Works committees); 9 Weekly Comp. Pres. Doc. 1285-87 (1973) (War Powers Resolution).

Many of these disputes concerned a particular issue that was successfully resolved in 1972. A number of statutes provided that "no appropriation may be made" for a particular kind of public work until it had been authorized by the proper committees. Various Presidents disputed whether such provisions were part of the internal Congressional process for authorizing appropriations, or were interference with the Executive. In 1972, President Nixon concluded that they were constitutional, ending the dispute. "The Congress regards this 'no appropriation may be made' provision, I understand, as internal Congressional rule-making not affecting the executive branch, and this Administration has acquiesced in that construction." 8 Weekly Comp. Pres. Doc. 938 (1972).

[40] Even Watson, whose article challenges the constitutionality of legislative review, concedes that "[i]n marked contrast to executive acquiescence to the use of resolutions, Presidents since Roosevelt have vigorously opposed use of the committee veto." Watson, *supra* note 32, 63 Calif. L. Rev. at 1017.

Act of 1962, Pub. L. No. 87-794, Section 351, 76 Stat. 872, 899, 17 U.S.C. 1981 (tariff recommended by Tariff Commission may be imposed by concurrent resolution of approval); Postal Revenue and Federal Salary Act of 1967, Pub. L. No. 90-206, Section 255(i)(1), 81 Stat. 613, 644.

[46] The resolution provided that its authority "shall expire when the President shall determine that the peace and security of the area is reasonably assured . . . except that it may be terminated earlier by concurrent resolution of the Congress." Section 3 of H.R.J. Res. 1145, 88th Cong., 2d Sess., Pub. L. No. 88-408, 78 Stat. 384, 385 (1964).

[47] See House Comm. on Foreign Affairs, 97th Cong., 1st Sess., *The War Powers Resolution* 26-30, 70-71, 106-10 (Comm. Print 1982) (*"War Powers Resolution"*) (describing Presidential justifications for, and Congressional reactions to, 1970 Cambodia and 1971 Laos incursions, and 1973 Cambodia bombings).

[48] For descriptions of the House and Senate hearings on war powers, see *War Powers Resolution, supra* note 47, at 55-61 (1970 House hearings), 72-77 (1971 Senate hearings), 93-95 (1971 House hearings), 119-21 (1973 House hearings), and 133-34 (1973 Senate hearings). For description of the legislative debate on war powers legislation *see id.* at 43-166.

[49] *War Powers Resolution, supra* note 47, at 123.

[50] *War Powers Resolution, supra* note 47, at 144-45. The House conferees' memorandum had been published during the House debates on passage of the House bill. See 119 Cong. Rec. 21223-25 (1973).

[51] *War Powers Resolution, supra* note 47, at 58, 74, 84-85, 113, 119-20; *see also id.* at 29-30, 38 (Administration positions on war powers stated prior to Congressional consideration of war powers legislation).

[52] The House bill, H.R.J. Res. 542, 93d Cong., 1st Sess., relied on a limit of 120 days after which continued commitment of armed forces would require Congressional approval. It also provided for termination of commitment of armed forces at any time by concurrent resolution. The Senate bill, S. 440, 93d Cong., 1st Sess., imposed a limit of thirty days for commitment of armed forces without Congressional approval, but permitted the President unspecified additional time to remove such forces safely from hostilities. It did not provide for termination by concurrent resolution, but specified in some detail the circumstances when the President could commit armed forces. *War Powers Resolution, supra* note 47, at 142.

As a compromise, the War Powers Resolution provided a statement of the "constitutional powers of the President as Commander-in-Chief to introduce United States Armed Forces into hostilities, or into situations where imminent involvement in hostilities is clearly indicated by the circumstances," section 2(c), 50 U.S.C. 1541(c). However, subsequent sections of the resolution, in which provisions for limiting and terminating commitment of armed forces were set forth, were not made dependent on the authority for the initial commitment. H.R. Rep. No. 547, 93d Cong., 1st Sess. 1-2 (1973). Automatic termination of hostilities in the absence of congressional authorization was to occur after sixty days, with an additional thirty days if the President found "unavoidable military necessity respecting the safety" of the armed forces. Section 5(b), 50 U.S.C. 1544(b). The compromise was completed by a provision for termination by concurrent resolution. Section 5(c), 50 U.S.C. 1544(c).

[53] 119 Cong. Rec. 21224-25 (1973) (reprinting letter of June 12, 1973, from Paul A. Freund to Rep. Pierre S. du Pont).

[54] 9 Weekly Comp. Pres. Doc. 1285-87 (1973).

[55] President Carter later took a different view of the War Powers Resolution, endorsing it as a "constructive safeguar[d]." *President's Message to the Congress on Legislative Vetoes,* Pub. Papers 1146, 1149 (1978).

[56] *See* 119 Cong. Rec. 8295-96 (1973).

[57] *Joint Hearings on Impoundment of Appropriated Funds by the President Before the Ad Hoc Subcomm. on Impoundment of Funds of the Senate Comm. on Government Operations and the Subcomm. on Separation of Powers of the Senate Comm. on the Judiciary,* 93d Cong., 1st Sess. (1973); *Hearings on Executive Impoundment of Appropriated Funds Before the Subcomm. on Separation of Powers of the Senate Comm. on the Judiciary,* 92d Cong., 1st Sess. (1971).

[58] S. 373, 93d Cong., 1st Sess., adopted by the Senate, 119 Cong. Rec. 15255 (1973), allowed the President to impound appropriations for sixty days, at which point the impoundment would cease unless Congress adopted a concurrent resolution of approval. The Senate adopted H.R. 7130, 93d Cong., 2d Sess., after substituting, in place of the House language, the language of S. 1541, 93d Cong., 2d Sess., which prohibited impoundments. 120 Cong. Rec. 7938 (1974).

[59] H.R. 7130, 93d Cong., 1st Sess., adopted by the House, 119 Cong. Rec. 39740 (1973).

[60] *Compare* H.R. Rep. No. 658, 93d Cong., 1st Sess. 42 (1973) (finding "sufficient precedent" in the Reorganization Act) with *id.* at 87 (minority views) (deeming a one-House disapproval resolution to "be of doubtful legal effect"). As the floor manager of the House bill, Representative Bolling, explained, "The formula [of Presidential proposal of impoundments subject to disapproval by either House] has been used for a quarter of a century to enable the President to propose, and Congress to review, plans to reorganize Federal agencies." 119 Cong. Rec. 25546 (1973).

[61] A proposal in the Constitutional Convention "that the national executive have a power to suspend any legislative act for the term of ——" was rejected, after Elbridge Gerry observed "that the power of suspending might do all the mischief dreaded from the negative of useful laws, without answering the salutary purpose of checking unjust or unwise ones." 5 J. Elliott, *supra* note 9, at 154-55. *See Department of Justice Authorization and Oversight, 1981: Hearings Before the Senate Comm. on the Judiciary,* 96th Cong., 2d Sess. 885-94 (1981) (discussing case law and historical underpinnings for lack of Presidential authority to suspend legislation).

[62] *President's Message to the Congress on Legislative Vetoes,* Pub. Papers 1146, 1149 (1978); H.R. Rep. No. 809, 97th Cong., 1st Sess., pt. 2, at 18 (1982).

[63] Pub. L. No. 94-412, 90 Stat. 1255 (1976). Section 202, 50 U.S.C. 1622, provides for termination of national emergencies by concurrent resolution. *See* Note, *The National Emergency Dilemma: Balancing the Executive's Crisis Powers with the Need for Accountability,* 52 S. Cal. L. Rev. 1453 (1979); A. Schlesinger, *The Imperial Presidency* 306-10 (1974); note 67 *infra* (Senate hearings and reports).

International emergencies can also be terminated by concurrent resolution. Act of December 8, 1977, Pub. L. No. 95-223, Section 207(b), 91 Stat. 1625, 1628, 50 U.S.C. 1706(b) (Supp. IV 1980) (concurrent resolution under National Emergencies Act can specify termination of Presidential authority in international emergencies). This Court has recently examined the background of an international emergency in which the President used the authority delegated by this statute. *Dames & Moore, Inc.* v. *Regan,* 453 U.S. 654 (1981).

[64] Pub. L. No. 94-329, 90 Stat. 729 (1976). Section 211, 22 U.S.C. 2776(b), provides for disapprovals of sales of major defense equipment by concurrent resolution. *See* Morrison, *The Arms Export Control Act: An Evaluation of the Role of Congress in Policing Arms Sales,* 14 Stan. J. Int'l Studies 105 (1979).

[65] Pub. L. No. 95-242, Sections 303, 304(a), 306, 307, and 401, 92 Stat. 120, 130, 134, 137, 139, 144-45, 42 U.S.C. 2160(f), 2155(b), 2157(b), 2158, and 2153(d) (Supp. IV 1980), provide for disapproval of various international nuclear arrangements by concurrent resolution.

[66] *See* H.R. Rep. No. 268, 97th Cong., 1st Sess. (1981); S. Rep. No. 249, 97th Cong., 1st Sess. (1981); 127 Cong. Rec. H7236-7308 (Oct. 14, 1981); *id.* at S12237-12452 (Oct. 28, 1981).

No. 94-163, Sections 159, 201, 401(a), and 455, 89 Stat. 871, 886, 890, 941, and 950 (1975), 42 U.S.C. 6239 and 6261, 15 U.S.C. 757 and 760a (strategic oil reserves, rationing and contingency plans, oil price controls and product allocation); Federal Nonnuclear Energy Research and Development Act of 1974, Pub. L. No. 93-577, Section 12, 88 Stat. 1878, 1892-93, 42 U.S.C. 5911 (allocation of energy production materials); Act of November 16, 1973, Pub. L. No. 93-153, Section 10, 87 Stat. 576, 582, 30 U.S.C. 185(u) (oil exports).

[71] *President's News Conference of July 25, 1979,* 15 Weekly Comp. Pres. Doc. 1303, 1311 (1979). The statute referred to was enacted as the Emergency Energy Conservation Act of 1979, Pub. L. No. 96-102, Section 103, 93 Stat. 749, 753, 42 U.S.C. 6421(c) (Supp. IV 1980).

[72] Natural Gas Policy Act of 1978, Pub. L. No. 95-621, Section 202(c), 92 Stat. 3350, 3372, 15 U.S.C. 3342(c) (Supp. IV 1980). The statutory scheme is further described in *Petition of United States Senate for a Writ of Certiorari, United States Senate v. Consumer Energy Council of America, et al., petition for certiorari filed,* 51 U.S.L.W. 3099 (U.S. August 2, 1982) (No. 82-177). *See also* note 1 *supra.*

[73] Stewart, *The Reformation of American Administrative Law,* 88 Harv. L. Rev. 1669, 1676 (1975). For other discussions of the contemporary delegation problem, *see* Cutler & Johnson, *Regulation and the Political Process,* 84 Yale L.J. 1395 (1975); McGowan, *Congress, Court, and Control of Delegated Power,* 77 Colum. L. Rev. 1119 (1977); Wright, *Beyond Discretionary Justice,* 81 Yale L.J. 575 (1972).

[74] J. O. Freedman, *Crisis and Legitimacy: The Administrative Process and American Government* 10 (1978).

[75] Narrowly specific delegations would be neither feasible nor desirable in many cases. . . . [¶] In many government endeavors it may be impossible in the nature of the subject matter to specify with particularity the course to be followed. . . . [¶] In addition, there appear to be serious institutional constraints on Congress' ability to specify regulatory policy in meaningful detail. (Stewart, *supra* note 73, 88 Harv. L. Rev. at 1695 (footnotes omitted).)

[76] The President does not control independent agency rulemaking because independent agencies are not part of the Executive Branch and their commissioners are not subject to executive removal. *Humphrey's Executor* v. *United States,* 295 U.S. 602 (1935). Accordingly, Executive review of rulemaking has exempted independent agency rulemaking from control. Section 1(d) of Executive Order 12291, 46 Fed. Reg. 13193 (1981) (rulemaking review by the Office of Management and Budget excludes independent agencies), *citing* 44 U.S.C. 3052(10).

[77] In 1973, a court of appeals ruled that the FTC's authority under its 1914 charter allowed it to make substantive rules. *National Petroleum Refiners Assn.* v. *FTC,* 482 F.2d 672 (D.C. Cir. 1973), *cert. denied,* 415 U.S. 951 (1974). In 1975, Congress expressly delegated such authority in the Federal Trade Commission Improvement Act. Pub. L. No. 93-367, Section 202(a), 88 Stat. 2183, 2193 (1975), 15 U.S.C. 57a (Supp. IV 1980) (as amended).

[78] The Attorney General concluded that "[T]he statement in Article I, § 7, of the procedural steps to be followed in the enactment of legislation does not exclude other forms of action by Congress. . . . [¶] The procedures prescribed in Article I, § 7, for congressional action are not exclusive." 43 Op. Att'y Gen., Op. No. 10, at 2-3 (1977). The Deputy Assistant Attorney General for the Office of Legal Counsel was questioned about the Attorney General's opinion during hearings on the FTC provision, and agreed that the opinion "was antedated by statements made by the heads of my office, starting at least as far back as now Justice Rehnquist, and I think going back a number of years beyond that to then Attorney General Clark in 1949." *Oversight of the Federal Trade Commission: Hearings Before the Subcomm. for Consumers of the Senate Comm. on Commerce, Science and Transportation,* 96th Cong., 1st Sess. 236 (1979).

[79] Federal Trade Commission Improvements Act of 1980, Pub. L. No. 96-252, Section 21(a), 94 Stat. 374, 393, 15 U.S.C. 57a-1 (Supp. IV 1980).

[80] "Disapproval nullifies the suggested regulation and prevents the occurrence of any change in the law. The regulation is void. . . . It would be considerably different if Congress itself purported to adopt and propound regulations by the action of both Houses." 424 U.S. at 285 n.30 and 286 (White, J., concurring in part and dissenting in part).

[81] *President's Message to the Congress Proposing Legislation for Improving Administration of Grant-in-Aid Programs*, 5 Weekly Comp. Pres. Doc. 635 (1969).

[82] Title IV of the Education Amendments of 1974, Pub. L. No. 93-380, 88 Stat. 484, 535, consolidated a series of grant programs. Section 509 of the act, now codified at 20 U.S.C. 1232(d)(1) provided that rules for the general education program could be disapproved by concurrent resolution. As in the case of Federal Election Commission regulations, see page 35 *supra*, this Court has reviewed education regulations which have been previously reviewed by Congress under this provision, and has found the prior legislative review to be an aid in construing the statute. *See North Haven Bd. of Education* v. *Bell*, 102 S.Ct. 1912, 1923-24 (1982).

[83] Pub. Papers 35, 37 (1974).

[84] H.R. 12048, 94th Cong., 2d Sess., was voted on under a motion for suspension of the rules, which requires a two-thirds vote to pass. It was rejected on a vote of 265-135, two votes short of the necessary two-thirds. *See* H.R. Rep. No. 1014, 94th Cong., 2d Sess. (1976); 122 Cong. Rec. 31668 (1976).

Mr. Chairman, it seems to me that the people of this country are tired and fed up with having rules imposed upon them by people they do not know and who are not accountable to them. They want the elected Congress to have the power, to be accountable to them for the rules that are issued by these agencies of Government, both in the executive branch and the independent agencies.

The public has a larger voice in the rulemaking process with the legislative veto. Access to Congressmen and Senators is far easier than access to anonymous, faceless bureaucrats. Most Federal administrators are hard-working, dedicated, and talented people who conscientiously do their jobs and serve the public faithfully and well. Some few, however, are zealots who in some elitist way think they—not the people or the elected Congress—run the country. The purpose of congressional veto is to deal with this problem and to see that the public is given an input, through their elected representatives, in the promulgation of administrative rules and regulations. That is why so many organizations and individual citizens support this idea—because it gives them a say-so in the rules that run their lives. It provides a remedy to the citizens of this country for us, as their elected representatives, to say when the bureaucracy has gone too far, perverted the intent of Congress and promulgated arbitrary and oppressive rules.

For these reasons, Mr. Chairman, I urge Members to defeat the amendments offered by the Rules Committee to strike the legislative veto.

Mr. QUILLEN. Mr. Chairman, I yield 4 minutes to the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL. Mr. Chairman, I urge the rejection of this amendment. As I pointed out in earlier debate, the Committee on Energy and Commerce had voted—I do not recall any opposition, by voice vote—to approve this bill which includes as a part of permanent law the legislative review procedure of FTC rules and regulations. The Rules Committee, under its jurisdiction over, of course, the House rules, had voted by a majority to delete that section.

We are urging a no vote. We feel that it is very important, particularly in this case where the FTC has very broad rulemaking powers, to write rules and regulations which affect entire industries, and that the Congress, which has delegated that lawmaking power to them, should have some responsibility of reviewing that end-work product.

This is the best way that we know of to force the Congress to take a look at the rules that are written by that agency, and if necessary by a vote, and of course after debate, after due consideration, to either affirm or to reject that action of that agency.

Now, I point out again that what we are talking about is substantive rules that have the force and effect of law. The Commission in effect, has been given lawmaking powers, which we in the Congress authorized. It seems to me that this is a proper way for us to retain our oversight over the activities of this particular agency, and the legislative review veto process is an excellent way to do that.

So, I would urge a no vote on this. As I pointed out, if we do not do this, this authority is going to expire. In the FTC Improvement Act of 1980, an amendment was included which provided for the legislative review; however, this veto process was sunsetted, and that authority for the Congress to exercise that authority will expire unless we vote down this amendment, pass the bill, go to conference with the other body, and come up with a conference report that will be acceptable to a majority of both Houses.

● Mr. SCHEUER. Mr. Chairman, I rise in strong support of the amendment offered by our distinguished colleague from Massachusetts (Mr. MOAKLEY).

For the past several years, the legislative veto and the fate of the Federal Trade Commission have been inextricably intertwined. At several points, the agency's funding was literally held hostage until a veto was provided over FTC regulations. Now we are asked to make this provision a permanent part of the Federal Trade Commission Act.

In the last Congress, I served as chairman of the Consumer Protection Subcommittee which had jurisdiction over the FTC. I would like to share with you my observations on the efficacy of the legislative veto with respect to the FTC.

In the spring of 1980, the FTC had not had an authorization bill for 3 years because the House and Senate could not agree on legislative review provisions.

Indeed the House defeated two FTC conference reports in 1978 because they did not include an acceptable legislative veto provision. It was clearly the will of the House that FTC rules be subject to congressional review. Accordingly, as chairman of the House conferees on the FTC authorization bill, I agreed reluctantly to the inclusion of a two-House legislative veto with expediated procedures.

Although I had grave misgivings, I hoped that the veto would provide the procedural framework for a reasoned and fair review of the FTC trade regulations.

As our colleague from Georgia (Mr. LEVITAS)—a major leader in the thrust toward a legislative veto—told us:

> The reforms included in the authorization bill are not designed to restrict proper conduct. They are intended to make the FTC more compatible to Congress and the public and enhance its credibility.

The legislative veto has failed to meet its much heralded objectives.

Indeed, our worst fears were realized in the only matter taken up under the veto mechanism. That matter involved the veto of the pitifully modest used car rule. The original strong consumer protection measure had been diluted after years of used car industry lobbying. The final proposal merely required that the dealer provide the consumer with an accurate statement of warranty coverage, if any, and whether there were any known defects.

However, the industry lobbyists determined that not even these limited facts should be required to be given to used car buyers, and through the procedures designed to prevent "bureaucratic excesses" lobbied to have the used car regulation vetoed. The sorry spectacle of Congress rushing to defend the used car dealer from the onerous standard of being truthful with consumers on whether there was a warranty on the car, and what kind, and whether the car had any known defects needs no further elaboration.

Mr. Chairman, we are seriously deluding ourselves if we believe that the legislative veto provides a reasoned, fair examination of the issues. As the used car matter amply demonstrates, it does not. Our limited experience with the legislative veto clearly does not provide a basis for making this temporary provision a permanent part of the FTC Act.

Indeed, if anything, our experience fully supports the amendment of the gentleman from Massachusetts to strike this provision. I urge my colleagues to join me in voting for this amendment.●

● Mr. LOTT. Mr Chairman, I rise in opposition to the amendment to strike the legislative veto provision from H.R. 6995. This is a provision that was

put in the 1980 FTC Amendments, and the legislative history makes it quite clear that was the price for keeping the FTC in business. It is hard to believe that the proponents of this amendment want to jeopardize the very existence of the Commission, yet that is what they are doing by threatening to strip the Congress of this vital oversight tool.

Mr. Chairman, according to the Rules Committee report on this amendment, the main objection to the legislative veto is that it is unconstitutional. Yet that contradicts a report of a Rules Subcommittee in the last Congress which found the legislative veto to be constitutional. Indeed, at the time the Rules Committee voted to make this amendment an order, it made no finding on the question of constitutionality. The constitutional finding did not emerge until the day after our vote when the report was circulated for the first time.

Mr. Chairman, I do not want to get into a lengthy discussion of the constitutional question during this debate. It has been debated for decades now, with distinguished constitutional scholars and lower courts coming down on both sides of the question. The Supreme Court has yet to rule on this question, despite numerous opportunities to do so. In the meantime, we have enacted nearly 300 legislative veto provisions into law. The constitutional question is not going to be settled by us here today one way or another. That is ultimately a matter the Supreme Court will have to decide under our system of government.

Let me briefly address the main objection to the legislative veto that it violates the so-called presentation clause of the Constitution that says that every vote and resolution requiring the concurrence of the two Houses must be presented to the President for his signature or veto. The constitutional history behind that clause, as Madison makes clear, shows that it was intended to apply to those actions of Congress having the effect of law. But, as our Rules Subcommittee pointed out in the last Congress, congressional disapproval of a proposed regulation does not alter existing law or make new law; it simply preserves the status quo. It therefore cannot be considered as lawmaking in the traditional sense of the term. The Court of Claims in the Atkins case upheld the constitutionality of the legislative veto using that same argument. Indeed, it is the agency promulgating regulations, not the Congress, which is seeking to further amend the law through regulations, that is amending the law. Rulemaking is a delegation of our lawmaking authority. It is therefore only reasonable that the Congress would want to retain some control over this delegation of lawmaking authority to the agencies through this congressional review and disapproval mechanism.

Mr. Chairman, the other arguments being marshaled against the legislative veto are specious at best. It is said that the existence of the veto will be a burden on agencies. And yet, a GAO report on the veto as it applies to the FTC indicates that it has had no measurable impact on that agencies proceedings.

It is further argued that the legislative veto will throw the Congress into chaos. But the existence of nearly 300 veto provisions already in the law has obviously not had that effect. This Congress has considered only 10 such disapproval resolutions, 6 of which where budget deferral disapproval resolutions, and only 2 of which related to regulations.

But the legislative veto, despite its selective and sparing use, remains a very important oversight tool. It forces our committees to keep a close eye on the rulemaking activities of the agencies to insure they are complying with congressional intent. We should be doing that anyway as part of our oversight responsibilities. The veto device simply helps insure that that discipline is there.

To deny ourselves the legislative veto at this point in our efforts to curb costly, excessive, and ill-conceived regulations would be a backward step for this institution and a retreat on our pledge to the American people to bring some regulatory relief and accountability back its our governmental system. The opponents of the legislative veto would have us believe that the Congress is somehow the enemy, that we cannot be trusted with this check over the bureaucracy. That premise turns the Constitution on its head. We have been entrusted to make all the laws—not the unelected bureaucrats. We must retain the ultimate control over those lawmaking powers we have delegated to agencies through rulemaking authority by retaining the legislative veto device.

Mr. QUILLEN. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. MOAKLEY. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. The question is on the Rules Committee amendments.

The amendments were rejected.

The CHAIRMAN. Under the rule, the next amendment in order is the amendment printed in the CONGRESSIONAL RECORD of September 15, 1982, if offered by Mr. LUKEN or Mr. LEE.

AMENDMENT OFFERED BY MR. LUKEN

Mr. LUKEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LUKEN:

Page 15, after line 24, insert the following new section (and redesignate the following section accordingly):

MORATORIUM ON COMMISSION REGULATION OF PROFESSIONALS

SEC. 10. (a)(1) The Federal Trade Commission shall not investigate, issue any order concerning, prescribe any rule or regulation with respect to, or take any other action against any State regulated profession until the Congress takes the actions specified in paragraph (2).

(2) The prohibition established in paragraph (1) shall apply until the Congress enacts legislation which expressly provides that—

(A) the Commission has jurisdictional authority with respect to professions; and

(B) the authority of the Commission preempts the authority of States to regulate professions.

(b) Any decision, finding, or other administrative action made or taken by the Commission which—

(1) occurs during the period beginning on May 28, 1981, and ending on the date of the enactment of this Act; and

(2) is based in whole or in part on any activity specified in subsection (a)(1);

shall, upon such date of enactment, be vacated and have no force or effect.

(c) Nothing in this section shall be construed as placing a moratorium upon, or otherwise affecting, the enforcement of any cause of action by the Attorney General of the United States arising under the Sherman Act (15 U.S.C. 1 et seq.) or the Clayton Act (15 U.S.C. 12 et seq.).

(d) For purposes of this section:

(1) The term "Commission" means the Federal Trade Commission.

(2) The term "professions" means organizations, associations, or other categories of professionals.

(3) The term "professional" means any individual engaged in the performance of work—

(A) requiring advanced knowledge in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction and study in an institution of higher learning (as distinguished from knowledge acquired by a general academic education, from an apprenticeship, or from training in the performance of routine mental, manual, mechanical, or physical activities);

(B) requiring the consistent exercise of discretion and judgment in its performance;

(C) which is predominantly intellectual and varied in character (as distinguished from routine mental, manual, mechanical, or physical work); and

(D) which is of such character that the output produced or the result accomplished by such work cannot be standardized in relation to a given period of time.

(4) The term "State regulated profession" means any profession which is subject to any licensure, certification, or regulation by a State.

Mr. LUKEN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The CHAIRMAN. Pursuant to the rule, the gentleman from Ohio (Mr. LUKEN) will be recognized for 30 minutes, and a Member opposed to the

amendment will be recognized for 30 minutes.

The Chair recognizes the gentleman from Ohio (Mr. LUKEN).

Mr. LUKEN. Mr. Chairman, I yield myself so much time as I may consume.

Mr. Chairman, and Members of the House, this is an extremely important amendment involving the learned professions, which have been defined in the amendment as already adequately and strictly controlled at the State level. If we do not pass this amendment, we will continue the encroachment of the Federal Trade Commission in usurping the powers of State licensing boards in these areas where the State licensing boards are doing an adequate job. The amendment covers only the learned professions that it describes.

The moratorium would have no impact on FTC final orders that are already in effect. It is a moratorium only. It puts a hold on new actions by the FTC.

It is important to remember that the Congress has never granted the FTC specific authority over the State-regulated professions. Congress has never granted such authority over these professions. There has been continual litigation over these issues as the FTC has reached out and attempted to bring the professions under their control, as the FTC has attempted to act as the State licensing boards. Despite the lack of statutory support, the FTC continues to assert authority over these professions. The amendment would halt this activity by the FTC in order to give Congress a chance to resolve the jurisdictional dispute.

□ 1420

This moratorium would last only so long as it takes the Congress to decide what authority, if any, the FTC should have in this area. The Supreme Court has been unable to resolve this jurisdictional question, so it is appropriate that Congress decide the issue ultimately.

While the moratorium is in effect, State-regulated professionals will continue to be subject to the Federal antitrust laws. These statutes are actively enforced by the Justice Department, the States, and private parties. We will discuss later some of the actions by private parties which have actually been bringing about, the results for which the FTC is claiming credit. For example, the prohibition on advertising. If I read the editorials, the newspapers articles, and the claims of our opponents, I would think that the FTC itself lifted the ban on advertising, but actually, it was Bates against Arizona, in 1975. The Supreme Court, acting in a private case, removed that ban based on the first amendment. This case was not won through any grant of authority by this Congress but was based on first amendment rights granting professionals the right to advertise.

No matter how Congress decides the FTC issue, the Federal antitrust laws will continue to apply to professionals. Any allegations of boycotts or price fixing can be handled under these laws.

Third, the amendment applies only to a limited number of professions which I have described. There has been a long history of self-regulation in the public interest by State governments and bar associations, for example. FTC actions against professionals have undermined the traditional State authority, have brought into question that State authority, and have discouraged the professionals from many self-regulatory activities.

Congress created the FTC in 1914 as an agency of limited jurisdiction. From time to time Congress has excluded certain businesses from FTC's purview. These include banks, savings and loans, insurance, and common carriers. A similar exclusion is now being considered for agricultural cooperatives. These actions clearly demonstrate that Congress never intended the FTC to have the broad, unlimited jurisdiction which it has been assuming and which the opponents of this amendment want it to assume. There is ample precedent for Congress to consider the appropriateness of FTC authority over State-regulated professions.

Support for this amendment does not mean any Member has to decide the issue of FTC jurisdiction. The moratorium only provides all sides an opportunity to present their views and give the Congress the time to decide the issue in a reasoned, deliberate manner. Support means only that the Members recognize the importance of this issue and the need for Congress to resolve it in an orderly fashion after hearing all the evidence.

Mr. Chairman, under an agreement with the gentleman from North Carolina (Mr. BROYHILL) and another party to this agreement, I would like to defer to the gentleman from North Carolina (Mr. BROYHILL) to offer his amendment at this time. Perhaps I should defer to the subcommittee chairman first.

Mr. BROYHILL. Yes, Mr. Chairman, the subcommittee chairman, I think, should go first.

Mr. LUKEN. Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman from Ohio (Mr. LUKEN) has consumed 5 minutes.

PARLIAMENTARY INQUIRY

Mr. BROYHILL. Mr. Chairman, I have a parliamentary inquiry with respect to the procedure followed here.

It is my understanding that the gentleman from New Jersey (Mr. FLORIO) will control the time in opposition to the Luken amendment; is that correct?

The CHAIRMAN. If the gentleman is opposed to the amendment.

Mr. FLORIO. I am, Mr. Chairman.

The CHAIRMAN. The gentleman from New Jersey (Mr. FLORIO) will therefore be recognized to control the time in opposition to the amendment offered by the gentleman from Ohio.

Mr. BROYHILL. And thus he will be recognized for that time, and at the proper time I may then be recognized to offer my amendment and would then control the time in support of my amendment?

The CHAIRMAN. The gentleman may offer his amendment at this time or after further debate has transpired on the pending amendment.

Mr. BROYHILL. Mr. Chairman, I would defer to the chairman of the subcommittee to take a few minutes of his time at this time.

The CHAIRMAN. The gentleman from New Jersey (Mr. FLORIO) is recognized.

Mr. FLORIO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in opposition to this amendment, notwithstanding my great respect for the gentleman from Ohio (Mr. LUKEN).

I strongly oppose the Luken-Lee professions exemption from FTC jurisdiction.

The Luken amendment would exempt doctors, dentists, lawyers, and scores of other professionals from FTC jurisdiction.

It is difficult to imagine a more objectionable piece of commercial legislation than an attempt to exempt professionals from the FTC.

The Luken amendment would force both businesses and consumers to pay higher prices for all sorts of professional services.

The Luken amendment would fan the flames of health care cost inflation at a time when Americans already spend $287 billion annually, or nearly 10 percent of the GNP on health care.

The Luken amendment would be a burden on the Federal budget, driving up further the cost of medicare and medicaid.

Most ironically, the Luken amendment would not be in the longrun interests of the professions themselves, which would be tarred in the public eye as seeking a special status above the law.

The arguments advanced by the proponents of the exemption amendment are without merit.

The proponents say that protection of competition and of consumers raise issues of quality of service which are best left to the States. This is a false issue. The House should be aware that the vast majority of FTC enforcement activity has nothing whatever to do with the prerogatives of the States. It

is focused on private law breaking, including price fixing, boycotts, and coercion.

What about the limited area where State laws are involved? The States do not agree an exemption is desirable. In a resolution adopted by the chief law enforcement officers of the States, the National Association of Attorneys General opposed any reduction in FTC jurisdiction over the professions.

The proponents of an exemption also contend that the professions are different from other businesses because they deal with quality issues that the FTC cannot evaluate. But the FTC has not pursued such matters. It has dealt with garden variety commercial practices like price fixing and boycotts which no one should be permitted to engage in and which do not raise genuine quality issues.

For example, the FTC has challenged physicians attempting to boycott health maintenance organizations; it has attacked efforts to fix fees through boycotts of Blue Cross; it has helped bring down the price of eye glasses and saved consumers millions by challenging restraints on advertising of eye wear; and it has challenged deceptive advertising by health providers.

It is unthinkable that the public should be left unprotected against such practices. It is offensive that some professional organizations should be fighting to shelter themselves from scrutiny for such conduct. And yet it is this kind of enforcement that has unleashed a display of raw lobbying such as we have not seen in this town for a long time.

Today's professional services simply bulk too large and the stakes in terms of equitable access are simply too high, to permit removal of the means of maintaining public accountability.

We simply cannot enact a statute that makes the question of whether a person is subject to the principles of free and fair markets depend on whether he has gone to graduate school. We work from the premise in this country, that before the law, the attorney is equal to the plumber, the doctor equal to the mechanic.

On grounds of economy, on grounds of fairness, and in the interests of the professions themselves, I urge the House to reject the Luken amendment.

Mr. LUKEN. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Chairman, I support the Luken amendment to H.R. 6995, the FTC reauthorization bill. The FTC and professional groups have been feuding for years now; with the FTC trying to impose restrictions on professional practices, and the professionals rejecting the authority of the FTC to do so. I understand some State medical societies now are involved solely in FTC-related litigation, which is not only tying up financial resources of the local organizations, but also is tying up the courts. Furthermore, legislative remedy has been sought to in more than one session of Congress, resulting in debates among Members such as that occurring today.

My colleague, the distinguished gentleman from Ohio, has proposed to simply place a moratorium on FTC activities with respect to State-regulated professions and professional groups, until Congress can concisely define the extent of FTC jurisdiction in this regard. The Luken bill, H.R. 3722, is still tied up in committee, and I welcome this opportunity to use H.R. 6995 as a vehicle for securing House action on this vital issue. In supporting this amendment, we are not proposing to exempt doctors from FTC jurisdiction and thus create a privileged class above the law, but rather to halt the expansion of FTC powers with respect to State-regulated professionals, until Congress can determine the extent of the FTC's jurisdiction to do so.

Opponents of this amendment argue that removal of the FTC will result in a vacuum of power to regulate these professionals, but I must argue the contrary. The State and local professional societies serve a viable role in monitoring professional practices, providing for peer review, and in the establishment of standards of quality and performance—and the enforcement of those standards. If the Luken amendment is not passed, the overriding issue will more than likely be whether or not FTC regulations have been violated, rather than one of whether or not the patient was well-served. The State boards and local societies have oversight in these cases, and the patient will be the ultimate loser if questionable medical care escapes the criticism and corrective action of their peers.

Another amendment has been offered to H.R. 6995, which proposes to grant FTC the authority to regulate antitrust violations by of professionals. The assumption here seems to be that one can separate quality-of-care from professional ethics. Well, I don't believe that you can. This is just one more attempt to usurp the power already held by the States to regulate and oversee professional practices. I do not think the doctors want to remove themselves from the Government antitrust laws. This task has been handled admirably by the State through its oversight apparatus, and through State and local courts. FTC actions over the years have usurped the jurisdiction of existent offices, and in many cases have superseded State laws which were carefully crafted by State legislatures and State executives.

Mr. Chairman, I wish to include in my remarks a guest viewpoint editorial submitted to my local newspaper by Dr. Ruth Bain, president of the Texas Medical Society. Dr. Bain presents a good case why we should allow the State and local governments to handle this question. The Congress has enough trouble trying to handle pressing problems of a national nature without getting into jurisdictional disputes with our States.

The Chairman of the subcommittee argues that quality care will be weakened, that costs will rise, and competition erased if the Federal Government does not extend its authority over the medical profession. Mr. Chairman, just the opposite is the case. We are doing well now in various States—and we do not need to meddle in local medical jurisdictions. I hope we vote for the Luken amendment.

Dr. Bain's editorial is included as follows:

FTC IS TRYING TO CURE A HEALTHY PATIENT

(By Dr. Ruth M. Bain, M.D.)

When Congress enacts legislation to renew the authority of the Federal Trade Commission, as it is expected to do this month, it will decide on an issue that could have profound consequences on the practice of medicine in Texas and the nation.

Pending in Congress is legislation that would rein in the FTC's desire to regulate professions that already are licensed and regulated by states. These include doctors, lawyers and dentists. The experiences of medical associations throughout the country provide a compelling argument to limit FTC jurisdiction over the professions.

TMA's prime function since its founding in 1883 has been to raise the standards of medical care and to provide access to care for everyone—a goal of the American Medical Association and other state and local societies as well.

Among the most important steps is the establishment of standards of quality and performance and peer review and enforcement of those standards. This function may soon be almost wiped out by the FTC. In many cases, the final issue is not whether the patient was served; it is whether FTC regulatory action might have been violated during the peer review process. The loser in effect is the patient. Individuals who might be guilty of providing questionable medical care escape the criticism and corrective action of their peers.

We feel there must be a way that a professional society can work with its members—including disciplining them to maintain and upgrade the quality of care and cost effectiveness of treatments. Overzealous FTC regulation inhibits us from performing these tasks.

The TMA and other medical associations are not seeking to avoid application of government antitrust laws to the professions. We believe this task has been handled admirably by the state through its state attorney general oversight and its courts and by the federal Justice Department and federal courts.

The remarkable aspect of the FTC's intrusion into the professions over the past seven years is that it has usurped the jurisdiction of those bodies and in many cases superseded state laws that had been carefully crafted by elected state legislatures and executives.

Organizations that disagree with policies or procedures can address these complaints in court. Appeals of FTC action, on the other hand, must be taken to the agency's own hearing officers. While some federal agencies, such as the Food and Drug Administration and the Securities and Exchange Commission, have special expertise to carry to their regulatory function, the FTC has no special insights into the professions and exhibits a lack of understanding in this area.

Taxes physicians must be licensed by the State Board of Medical Examiners. Antitrust laws are enforced in the professions by state and federal law. This has been a healthy system for patients and doctors. The FTC should not try to provide a cure where there is no disease.

□ 1430

Mr. FLORIO. Mr. Chairman, I am pleased to yield 5 minutes to the gentleman from New York (Mr. LENT).

The gentleman from New York has been particularly helpful in fashioning this legislative response.

Mr. LENT. Mr. Chairman, I rise in opposition to the Luken-Lee amendment.

Although I was a cosponsor of H.R. 3722, which is the basis for the Luken-Lee amendment just offered, I intend to support the Broyhill substitute.

Like so many of my colleagues, I was initially persuaded by the proponents of the Luken-Lee amendment, that a moratorium should be placed on FTC activity in this area. As the ranking member of the Commerce, Transportation and Tourism Subcommittee, and listening to the testimony at the committee hearings and after some thoughtful deliberation, I have come to the conclusion that a total moratorium such as provided in this amendment offered by the gentleman from Ohio, would shield professionals from FTC authority for conduct which is otherwise illegal. Price fixing, boycotts, and deceptive advertising by professionals would go unchecked for an unlimited period of time by the FTC under their amendment.

Do not misunderstand me. I support and seek to preserve the traditional role of the States in regulating professionals. I do not believe that the FTC should second guess quality of care determinations made by the States. Questions of licensing, professional education requirements and the scope of duties to be performed by specific professional groups, all would remain under State jurisdiction. There are, however, instances where the FTC has properly pursued anticompetitive behavior. For example, the FTC has in the past examined:

Boycotts of health maintenance organizations (HMO's), which endeavor to contain costs, by physician groups;

Ethical restrictions on advertising used to prevent senior citizens from learning such important information as which doctors in a community will treat medicaid patients and accept medicare payments; and

Advertising restrictions which inevitably drove a physician house call service out of business.

Conduct such as this should not be exempt from the authority of the FTC. A careful balance must be struck which subjects business and commercial practices of professionals to FTC scrutiny, yet preserves State judgments on quality of care. I believe the Broyhill substitute does so.

I should like to point out to my colleagues that not all professional organizations seek this exemption from the law. Several health professional groups are opposed to the Luken-Lee amendment. They include: American Nurses Association; American Chiropractic Association; American Society for Medical Technology; American Psychological Association; American Academy of Physician Assistants; American Dental Hygienists' Association; and National Association of Optometrists and Opticians.

I join these groups in opposition to the Luken-Lee exemption and in strong support of the Broyhill substitute.

Mr. LUKEN. Mr. Chairman, I yield 3 minutes to the gentleman from Tennessee (Mr. QUILLEN).

Mr. QUILLEN. Mr. Chairman, I rise in support of the Luken amendment because I think it is on the right track. It should be adopted.

In the 20 years I have been in the Congress I have supported States rights and State regulation. I believe that they do an excellent job.

□ 1440

I think when you come down to the wire and realize the bureaucracy within the agency involved, that you will not bring these professions under the FTC umbrella. We should let the regulation continue from a State level, which has done an excellent job, particularly in Tennessee, and in the various States of this Nation.

Mr. Chairman, I urge a favorable vote on the Luken amendment.

Mr. LUKEN. Mr. Chairman, I yield 5 minutes to the gentleman from Georgia (Mr. BARNARD).

Mr. BARNARD. Mr. Chairman, we have experienced in Georgia some very interesting activities, as requested by the Federal Trade Commission. As part of an investigation into the medical association of Georgia that they have asked us to develop for them information which has taken more than 1,000 man hours and $2 million in expense, a search of records going back some 20 years. This is the type of harassment that we do not need in the State of Georgia, nor is it needed in the other States—Wisconsin, Minnesota and others that I have in mind.

I am in strong support of the Luken-Lee amendment, exempting FTC from the regulation of professions presently adequately regulated by State agencies.

The professions are not seeking to exempt themselves from Federal and State antitrust laws. The Department of Justice and State enforcement authorities clearly have this jurisdiction.

Also, there is unnecessary, burdensome, and costly regulatory overlap between the States and the FTC.

Complying with these FTC harassing requests are diverting the professions from the various good, positive initiatives that are in the best interest of their communities.

Yes, the physicians are affected, the dentists are affected, the lawyers, and even the veterinarians and other State-regulated professions. Education of the public and of their profession as well as self regulation are very much a part of these professional societies' functions and duties as good citizens.

Mr. Chairman, I hope that the Members will take careful note that this is the time to bring this regulation back into perspective, and I sincerely hope that they will do that by supporting the Luken-Lee amendment.

Mr. LUKEN. Mr. Chairman, I yield 1 minute to the gentleman from Indiana (Mr. HILLIS).

Mr. HILLIS. I thank my colleague for yielding.

Mr. Chairman, I rise in support of the amendment being offered by Congressman LUKEN. As a cosponsor of his bill H.R. 3722 from which his amendment is derived, I congratulate him for his fine work in bringing this matter before us.

The amendment places a moratorium on any activity by the Federal Trade Commission against the State regulated professions, such as law, medicine, dentistry, optometry, and veterinary medicine. This moratorium is in effect until Congress: First, grants to the FTC specific authority over these professions; and second, allows the FTC to preempt State laws regulating the professions.

The amendment would suspend FTC investigative, administrative, and rulemaking activity relative to certain State-regulated professions until specific authority is granted by Congress. It would not exempt any profession from anything since it is only a clarification of existing law relative to FTC jurisdiction and does not affect other antitrust violation enforcement.

Enactment of the Luken amendment would eliminate the dual regulation and conflicting Federal policy problems being generated by FTC's actions. It would also protect the existing jurisdiction of the States to establish and enforce the standards of practice for the professionals whom they license.

The bottom line to this issue is whether the Congress or the FTC is going to decide if professional organi-

zations should be under the regulatory purview of the FTC. To me the answer is clearly that the Congress should make that decision. We are the elected officials whose responsibility it is to make these types of policy decisions.

Another issue involved in this debate is which level of government, Federal, or State, is best equipped to adequately protect consumers from possible abuses by these professional organizations. Again, I think the answer is rather clear. States have for years been regulating the health and legal professions and have done an excellent job. That is not to say that there is no room for improvement, there probably is. However, there certainly is no evidence which indicates that the FTC could do a better job.

In fact, there is some evidence which illustrates that the FTC's recent activities have resulted in a lowering in the quality of medical care available. The American Medical Association argues that FTC activities already have directly damaged quality of care by limiting physicians' and medical societies' ability to enforce professional standards, engage in peer review, and comment on poor performance records in the practice of medicine.

In closing Mr. Chairman, I urge the Members of the House to support the Luken amendment and oppose the Broyhill amendment. If we fail to adopt the Luken amendment we can be assured of continued efforts by the FTC to broaden their purview without the approval of the Congress.

Mr. LUKEN. Mr. Chairman, I reserve the balance of my time.

Mr. FLORIO. Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. SCHEUER), a very valuable Member of the full committee.

Mr. SCHEUER. Mr. Chairman, one of the most striking aspects of the proposal to gut the FTC's jurisdiction over professionals is the fact that no one supports it outside of the groups which would directly benefit from their release from the law. I have rarely seen a proposal which has inspired so much condemnation from so many different sources.

The Wall Street Journal and the New York Times join in opposing the amendment. David Stockman and Ralph Nader are joined in opposition. All the assistant attorneys general of Justice's Antitrust Division serving under Lyndon Johnson, Richard Nixon, Gerald Ford, and Jimmy Carter join in opposition. Paul Samuelson and Milton Friedman join in opposition. The State attorneys general—who might be expected to be the most concerned about this purported invasion into States rights—all join in opposition. All four Federal Trade Commissioners agree:

Exempting professions from FTC scrutiny is a bad idea.

I note this is one of the few times when the doctors are not urging us to get a second opinion. The reason for that is simple: No one else agrees with their diagnosis.

The simple fact is that FTC scrutiny over the commercial practices of professionals is good medicine. It is exactly the prescription we need to fight the ills of rampaging health care costs, which are consuming more and more of our incomes, particularly for the elderly citizens of our country.

And this is emphatically not regulation: It is competition, pure and simple. There just is no principled reason for letting doctors or lawyers or veterinarians run their businesses contrary to the rules that apply to any other businesses. Look at the kind of "business behavior" which the FTC has properly challenged in the past and which would be permitted under the Luken-Lee amendment: boycotts, price fixing, and restraints on truthful advertising. Is this the kind of conduct we want to condone?

Why in the world would we want to do this? Already, other special interests groups are lining up for their exemptions from the antitrust statutes. More, undoubtedly, are waiting in the wings. This proposal is a dangerous and foolish precedent that cuts into the very heart of free and fair competition. The recognition of that basic fact is the reason why so many groups and persons, of so many different political persuasions, so strenuously oppose this blatant special interest proposal.

I urge my colleagues to vote against exempting professions from FTC scrutiny.

□ 1450

AMENDMENT OFFERED BY MR. BROYHILL AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. LUKEN

Mr. BROYHILL. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. BROYHILL as a substitute for the amendment offered by Mr. LUKEN: Page 2, after line 23, insert the following new section (and redesignate the following sections accordingly):

STATE ACTION

SEC. 4. Section 5 of the Federal Trade Commission Act (15 U.S.C. 45) is amended by adding at the end thereof the following new subsection:

"(n) The Commission shall not have any authority to find a method of competition to be an unfair method of competition under subsection (a)(1) if, in any action under the Sherman Act, such method of competition would be held to constitute State action.".

Page 5, line 7, strike out "section 26 and section 27" and insert in lieu thereof "section 27 and section 28".

Page 5, after line 19, insert the following new section (and redesignate the following sections accordingly):

COMMISSION JURISDICTION REGARDING PROFESSIONALS

SEC. 8. (a) The Federal Trade Commission Act, as amended in section 7, is further amended by inserting after section 24 the following new section:

"SEC. 25. (a) Except as provided in subsection (b), the commission shall not use its authority under section 5 or section 18 to prohibit unfair acts or practices engaged in by professionals in a particular State if such use of authority would result in the invalidation, in whole or in part, of any State law of such State which establishes—

"(1) training, education, or experience requirements for the licensure of professionals; or

"(2) permissible tasks or duties which may be performed by professionals.

"(b) In any case in which the use of authority under section 5 or section 18 by the Commission to prohibit unfair acts or practices engaged in by professionals in a particular State may result in the invalidation of any State law of such State specified in subsection (a), the Commission may use such authority regardless of whether such use of authority would result in such invalidation if the Commission—

"(1) finds that such State law (A) authorizes or prescribes any commercial or business act or practice; and (B) adversely affects or is likely to adversely affect competition; and

"(2) in determining whether such act or practice is an unfair act or practice under section 5(a)(1), takes into account (in weighing countervailing benefits to consumers or to competition under section 5(a)(1)(B)(ii)) benefits to the public health, safety, and welfare which result from any State law under which such act or practice is authorized or prescribed.

"(c) For purposes of this section:

"(1) The term 'professional' means any person who—

"(A) in the performance of his occupation, is subject to licensure or certification under State law; and

"(B) as a prerequisite for such licensure or certification under State law, has (i) received a degree from an accredited institution of higher learning; or (ii) successfully completed a course of specialized training at an accredited education or training facility for health professions personnel operated as an integral part of a hospital.

"(2) The term 'State law' means a statute of a State, and a rule or regulation duly promulgated by a State agency.".

(b) Section 5(b) of the Federal Trade Commission Act (15 U.S.C. 45(b)) is amended—

(1) by inserting after the third sentence thereof the following new sentences: "In any case which may result in an invalidation of State law under section 25, the State attorney general of any State shall be allowed to intervene and appear in such proceeding if the State attorney general certifies that any State law (as defined in section 25(c)(2)) of the State involved would be subject to such invalidation. For purposes of the preceding sentence, the term 'State attorney general' means the chief legal officer of a State, and includes the Corporation Counsel of the District of Columbia."; and

(2) by inserting after the fifth sentence thereof the following new sentence: "In the case of an order which would result in any invalidation of State law under section 25, such order shall be accompanied by a written statement of the findings made by the

Commission under section 25(b)(1) and of the manner in which the Commission has complied with the requirement established in section 25(b)(2).".

(c)(1) Section 18(b)(1)(D) of the Federal Trade Commission Act (15 U.S.C. 57a(b)(1)(D)) is amended by inserting "(i)" after "with", and by inserting before the period at the end thereof the following: "; and (ii) in the case of a final rule which would result in an invalidation of State law under section 25, a written statement of the findings made by the Commission under section 25(b)(1) and of the manner in which the Commission has complied with the requirement established in section 25(b)(2)".

(2) Section 18(c) of the Federal Trade Commission Act (15 U.S.C. 57a(c)) is amended by adding at the end thereof the following new paragraph:

"(6)(A) In the case of a proposed rulemaking which may result in an invalidation of State law under section 25, the State attorney general of any State shall be considered to be an interested person for purposes of this subsection and subsection (b)(1)(B) if the State attorney general certifies that any State law (as defined in section 25(c)(2)) of the State involved would be subject to such invalidation.

"(B) For purposes of this paragraph, the term 'State attorney general' means the chief legal officer of a State, and includes the Corporation Counsel of the District of Columbia.".

(3) Section 18(e)(1)(B) of the Federal Trade Commission Act (15 U.S.C. 57a(e)(1)(B)) is amended by inserting "the statement required by subsection (b)(1)(D)(ii)," after "purpose,".

Page 5, line 22, strike out "section 6" and insert in lieu thereof "section 7 and section 8".

Page 5, beginning on line 22, strike out "section 24" and insert in lieu thereof "section 25".

Page 5, line 24, strike out "Sec. 25." and insert in lieu thereof "Sec. 26.".

Page 14, line 21, strike out "Section 26" and insert in lieu thereof "Section 27".

Page 14, line 22, strike out "section 6" and insert in lieu thereof "section 7".

Page 16, line 7, strike out "section 6" and insert in lieu thereof "section 7".

Page 16, line 8, strike out "amendment" and insert in lieu thereof "amendments", and insert ", section 4, and section 8" after "section 2".

Page 16, line 13, strike out "and".

Page 16, after line 13, insert the following new

Mr. BROYHILL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. BROYHILL. Mr. Chairman, let me just take a few minutes at the outset to respond to some of the allegations that have been made, not only with respect to the Luken amendment, but also to explain the terms of my amendment as to what it does.

The gentleman from Ohio has made the allegation and has actually stated that his amendment is a moratorium on FTC regulations. This is no moratorium amendment that the gentleman from Ohio (Mr. LUKEN) has offered. The gentleman from Ohio has offered an amendment that would permanently exempt all State licensed professions from FTC law enforcement.

Now, despite the use of the word "moratorium" in the bills by the introducer of this bill and this amendment, the exemption would be just as permanent as any other legislation that is adopted by the Congress.

I want to point out to the Members, and I hope that they are listening back in their offices or wherever they may be, to clarify the number and the types of professions who would be exempted from FTC jurisdiction should this amendment pass.

It may include lawyers, dentists, physicians, engineers, accountants, architects, nurses, chiropractors, pharmacists, actuaries, optometrists, veterinarians, podiatrists, clinical psychologists, surveyors, beauticians, and I could go on and on.

Any profession which is licensed at the State level could conceivably be exempted from the FTC consumer protection laws.

I do not think that is what we want to do.

The amendment that I am offering would also limit the Commission authority. The allegation has been made somehow that the compromise that I am offering would somehow expand FTC authority over jurisdiction. This is not true. It does just the opposite.

It does limit the Federal Trade Commission authority over the professions. I recognize that the States have a very important role in regulating professionals. They currently regulate the educational licensing and quality of care rendered by various professions within their borders. I think that that State regulation is necessary to protect the health, safety and welfare of their citizens. And I do not believe that the Commission should be involved in those matters.

My substitute says that the FTC should not interfere with State laws or regulations that, for example, do this—that set out the qualifications that someone must meet in order to take a professional licensing exam, set standards for the professional school accreditation. It would also say the FTC could not interfere with the determination of the content of licensing examination.

My amendment would also say that the FTC could not interfere with State laws or regulations that have the effect of reviewing incompetent or unethical professionals under peer review programs, or to decide that only certain types of professionals may perform certain procedures.

And also my amendment includes a limitation on FTC's antitrust authority, which again defers to the State role.

Specifically, my amendment, and that is found in the early part of my amendment, which was just read by the Clerk, incorporates what is known as the State action doctrine into the FTC Act. That would insure that States can establish policy within their borders which the FTC could not challenge under its antitrust authority.

This restriction in the law would provide antitrust immunity for professionals from FTC action if the State were to enact for example laws declaring that only certain professionals can perform particular procedures, laws that seek to control costs by regulating professional pricing practices, or laws that protect consumers from incompetent or unethical professionals.

Now, apparently the controversial part of my amendment that is objected to by the gentleman from Ohio and those who are supporting his amendment is the fact that my amendment does preserve FTC authority to challenge a State law that prescribes a business or commercial practice for professionals, and which is anticompetitive.

I will hasten to point out that the Commission, under the terms of my substitute, must meet the burden of proof for both elements before it could proceed either on a case-by-case action or in any rulemaking.

In other words, my amendment would preserve the FTC authority to challenge deceptive acts or practices where it is proved that a business or commercial act or practices have been carried on, and I think that we should preserve that narrow amount of the FTC authority.

There are certain examples of professional conduct that the FTC has challenged. The gentleman from New Jersey has already enumerated some of these. There was a Texas case, for example, where local doctors threatened to boycott a town's hospital emergency room if the hospital recruited a new physician to the town, on terms that the physicians did not like. And there was another case in Florida where the local medical association acted to prohibit truthful advertising by doctors and in effect they were trying to block the physicians from truthfully advertising whether or not they accepted medicare assignments as payment in full, advertising whether they accepted credit cards, or advertising whether the Spanish language was spoken in their office as a second language, or advertising whether or not senior citizens could get a discount. And these are business or commercial practices, they have nothing to do with the quality of care.

But it is that kind of restraint that stifles competition, drives up health care costs. And it is especially injurious to the elderly, to the poor and to the working people.

For that reason, I strongly urge the adoption of my substitute, and rejection of the amendment of the gentleman from Ohio (Mr. LUKEN.)

Mr. LUKEN. Mr. Chairman, will the gentleman yield?

Mr. BROYHILL. I yield to the gentleman from Ohio.

Mr. LUKEN. I thank the gentleman for yielding.

I think the gentleman has outlined an interesting set of standards and criteria. But the key thing that I believe the gentleman has not covered is that State laws can be invalidated under the gentleman's amendment, as in section 25(B)(a):

> The Commission may use such authority regardless of whether such use of authority would result in invalidation if the Commission finds that such State law authorizes or prescribes any commercial or business act or practice and adversely affects or is likely to adversely affect competition.

□ 1500

I suggest to the gentleman that under this big hole here in the protections that he is trying to establish, the FTC can and has—well, it can assert jurisdiction simply by saying that the practice of the medical profession or the Bar Association or the Veterinarians Association or any association is anticompetitive. That is all the FTC has to do is say that in their opinion, it is anticompetitive or involves any commercial or business act or practice.

Now, I submit to the gentleman that there is not any magic division there. There is no line between commercial acts and business, as the gentleman and the editorials and all these others are trying to establish. When the Bar Association or the Medical Association or the Dental Association sets up standards and says who can practice and who cannot, that is regulating a business. That is regulating competition by definition.

Mr. BROYHILL. I will reclaim my time, Mr. Chairman. Perhaps the gentleman may want to take some of his time to go ahead; but the fact is that the arguments that the gentleman has been using for these many weeks is that the FTC should not be involved because in some strange way it might be involved in determining quality of health care.

Well, we are not discussing that. We are talking about business or commercial practices. For example, there have been cases, as the gentleman knows, where certain professionals have gotten laws passed that say, for example, eyeglasses cannot be dispensed in a commercial store, such as Sears, Roebuck.

Well, I do not think this has anything to do with the quality of care of eyes. This is a device in order to insure that there will not be any competition. It is a law that has been enacted that affects business and commercial practices. It has nothing to do with quality of care.

The only action that the FTC has taken, to my knowledge, that overrides State law up until this time is the eyeglass case and the gentleman, of course, is very familiar with that case which opened up the dispensing of eyeglasses and lowered the cost of eyeglasses to consumers.

I do not think that the gentleman would want, though his amendment does not go back that far, but I do not think the gentleman would want to put anything into the law that would prevent the FTC if such a case would come up in the future, that would prevent the FTC taking action that would have that desirous effect.

Mr. LUKEN. Mr. Chairman, will the gentleman yield?

Mr. BROYHILL. I am glad to yield.

Mr. LUKEN. I am suggesting to the gentleman that his argument compounds the confusion. There simply is no such line of demarcation between what is a business practice or what is not a business practice. That is something that the gentleman has set up and the arguments have set up, which is not in the amendment. The gentleman's amendment says that if the FTC says it is anticompetitive, they are going to stick their nose into it.

Now, may I ask the gentleman this question. If a dentist recommends X-rays, should the Dental Association or the FTC have the authority to determine whether X-rays are required under certain circumstances for dental patients?

Mr. BROYHILL. Well, we provide that that can be regulated under the State by law and by State regulation.

Mr. LUKEN. But the FTC has usurped that authority already and it says it is a trade practice, because it says it is a containment measure. They are saying they are requiring X-rays in order to save money under medicaid or medicare, or whatever. They want to save the Government money. They want to save the consumers money by not requiring patients to go through unnecessary procedures; so that is the point I am making to the gentleman, that there is a trade practice that the FTC complains about, but it is certainly very clearly a matter of quality of care.

There is another dental situation that the FTC has usurped its authority on. I have seen articles that praise the FTC for this because the FTC stepped in and decided that it could decide who prescribes false teeth and that the dental associations and the dental societies and the dental licensing boards did not have the authority to decide who prescribes false teeth.

Mr. BROYHILL. Mr. Chairman, let me reclaim my time.

The gentleman from New Jersey has asked for time. I yield 5 minutes to the gentleman from New Jersey (Mr. FLORIO).

Mr. FLORIO. Mr. Chairman, I strongly oppose the Luken-Lee professions exemption amendment and support the substitute. I have worked with colleagues on the Energy and Commerce Committee (Chairman DINGELL, Mr. BROYHILL, and Mr. LENT) to develop the substitute as a careful alternative to the radical approach of the Luken amendment.

The Luken amendment is bad for consumers, bad for businesses who use professional services, bad for competing professionals, and will stoke the fires of inflation.

By contrast, we have developed a substitute that addresses concerns that have been raised about the FTC and the professions without putting the professions in a privileged status above the law.

Our substitute amendment has been carefully drafted to insure that it would be the States that would continue to have responsibility for the quality of professional services. This includes licensing requirements and specification of the tasks and duties that particular professionals could perform. But business aspects of professional conduct would remain subject to FTC enforcement.

Let us take a look at how our substitute would work when compared to the Luken exemption. Suppose professionals are involved in price fixing or false advertising, without any involvement by any State government. Under the Luken amendment, these lawbreakers would be immune from FTC action even though the States have not sanctioned the conduct. Under our substitute the conduct would not be immune.

Now let us look at a situation where the States are involved, as in determining the qualifications for taking a licensing exam. On such matters the States would have responsibility under our substitute. No one argues that in these areas of traditional State responsibility the result should be otherwise. But the Luken amendment extends this area of consensus in a drastic way to exempt professionals, and to do so far beyond such areas of traditional State concern.

If there is apprehension that currently the law is not clear regarding the proper focus of FTC enforcement regarding professionals, then let us clarify that, as our substitute would. If there is apprehension regarding the general powers and procedures of the FTC, then let us improve them as H.R. 6995 would.

But we cannot make our commitment to free markets for business and fairness for consumers turn on whether a person has a law degree or has gone to medical school.

The substitute would insure by statute that the FTC continues to focus its enforcement efforts on commercial offenses. That is where the FTC belongs, and that is where the public needs it. I urge the House to adopt the substitute.

Mr. LUKEN. Mr. Chairman, will the gentleman yield for one question?

Mr. FLORIO. Yes, certainly.

Mr. LUKEN. I would like to pose the same question to the gentleman that I did to the gentleman from North Carolina. Under the Broyhill amendment, would it be the State licensing boards or the FTC that would have the right to determine which dental patients require X-rays?

The FTC has already in a case said that this is a trade practice and it has investigated it because it said that this was a cost-containment measure.

Mr. FLORIO. If I could reclaim my time, what this whole debate is about——

Mr. LUKEN. Could the gentleman answer the question?

Mr. FLORIO. Yes. What this whole debate is about is the very point that the gentleman is making. We want to have the States with the authority to deal with quality of care and licensing considerations, but we want to have the FTC with the residual authority to go in and perhaps pierce the veil of what appears to be a quality of care mechanism that really is going toward a business practice restraining trade or injuring consumers; so the gentleman's concerns are really addressed in the substitute by the gentleman from North Carolina (Mr. BROYHILL) and the gentleman from Michigan (Mr. DINGELL).

What we are saying is that the primary concern and authority for dealing with licensing and quality care concerns is at the state level, but that the Federal Trade Commission should have the residual authority to go into matters of business practices; so the gentleman should not be concerned and should be supportive of what the gentleman from North Carolina is trying to do.

Mr. LUKEN. The gentleman has not answered the question.

Mr. BROYHILL. Mr. Chairman, will the gentleman yield further?

Mr. FLORIO. Yes, I yield.

Mr. BROYHILL. It is my understanding that the gentleman from Ohio may be putting a different interpretation on a particular case than I have. As I understand that particular case, there were certain dentists who were boycotting various insurers and withholding dental X-rays, when the insurers were asking that the X-rays be submitted to determine the benefits and also they were attempting to implement certain cost-containment measures.

Now, I do not see that that has anything to do with quality of care.

□ 1510

Mr. LUKEN. Mr. Chairman, if the gentleman from North Carolina is helping the gentleman from New Jersey to answer the question, I would pose the question again to the gentleman from North Carolina.

Mr. BROYHILL. Mr. Chairman, I just answered the question.

Mr. LUKEN. Mr. Chairman, I asked the gentleman before and I did not hear the answer. I posed the hypothetical case. He can come in and pose a different one. I dispute that those are the facts, but let us take the facts.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. FLORIO) has expired.

Mr. LUKEN. Mr. Chairman, I yield 3 minutes of my time to the gentleman from New Jersey.

Mr. Chairman, will the gentleman yield?

Mr. FLORIO. I yield to the gentleman from Ohio.

Mr. LUKEN. Mr. Chairman, if the FTC claims jurisdiction under the Broyhill amendment, if it is enacted, and the FTC says it is going to establish a rule or it is conducting an investigation into the practices of the dentists in prescribing X-rays, claiming that the dentists are going into unnecessary—as the gentleman says—pierce the veil, the FTC is going to pierce the veil and it says that this is an unlawful practice, an irregular practice, and that the dentists really are requiring X-rays which are not necessary, just like unnecessary surgery or anything like that which we have had examples of before. If the FTC says it has jurisdiction of that case, does the FTC have it under Broyhill or does it not?

Mr. BROYHILL. Mr. Chairman, will the gentleman yield to me?

Mr. FLORIO. I yield to the gentleman from North Carolina.

Mr. BROYHILL. I thank the gentleman for yielding.

Mr. Chairman, the FTC would have no jurisdiction over the decision of an individual practitioner to recommend X-rays. However, if there is some State law or some concerted effort or collusion on the part of the practitioners to prescribe this particular treatment or this particular thing, then, of course, if that tends to be a business or commercial practice, then the FTC would be involved.

Mr. LUKEN. Mr. Chairman, will the gentleman yield to me?

Mr. FLORIO. I yield to the gentleman from Ohio.

Mr. LUKEN. I thank the gentleman for yielding.

Mr. Chairman, I think the gentleman has just agreed, then, with our point. He has just stated what will happen. All the FTC has to do, if it wants to attack the North Carolina Dental Licensing Board and its practices or its rules, is to simply say that it has found or suspects a joint, concerted action in the area of price fixing and it will substitute itself as the licensing board, as the standard setter, as the quality-of-care setter.

There just is no question about it. These all involve business practices. They all involve mercenary considerations. Any kind of licensing, by its definition, is anticompetitive. It says that certain people are allowed to prescribe certain things, are allowed to go through certain procedures, and the rest of the world is not.

Under the amendment offered by the gentleman from North Carolina, the FTC is just going to move right in, invalidate State laws, do willy-nilly whatever they want.

Mr. FLORIO. Mr. Chairman, I yield back the balance of my time.

Mr. BROYHILL. Mr. Chairman, I yield myself 1 minute.

The CHAIRMAN. The gentleman from North Carolina (Mr. BROYHILL) is recognized for 1 minute.

Mr. BROYHILL. Mr. Chairman, that is not a correct interpretation of the amendment that we are offering. Our amendment includes a limitation on the FTC authority. It defers to the States' role. However, it does retain a very narrow area of authority where they show and they can challenge a State law that prescribes a business or a commercial practice, one which is anticompetitive.

Now, it seems to me that that is only fair. If we have a State law that prescribes a business or commercial practice on the part of professionals which is anticonsumer or which is anticompetitive, it seems to me that we should have an agency taking a look at those examples.

Mr. FLORIO. Mr. Chairman, will the gentleman yield for an observation?

Mr. BROYHILL. I yield to the gentleman from New Jersey.

Mr. FLORIO. I thank the gentleman for yielding.

Mr. Chairman, I just say that the gentleman's substitute in no way grants jurisdiction that is not in the existing law. The courts have confirmed that the existing law allows the FTC to oversee and to review commercial practices of the professions.

The CHAIRMAN. The time of the gentleman from North Carolina (Mr. BROYHILL) has expired.

Mr. LUKEN. Mr. Chairman, I yield 5 minutes to the gentleman from Louisiana (Mr. TAUZIN).

Mr. TAUZIN. Mr. Chairman, I also rise in opposition to the substitute offered by Mr. BROYHILL.

Since the Congress passed the Magnuson-Moss FTC amendment in 1975, we have been trying to deal with an agency that has gone out of control.

The past 7 years has seen the FTC, through creative interpretation of its authorizing statute, embarked on ex-

pensive, and often fruitless initiatives that this body never intended the FTC to get involved in. Because of the creative legislation by the FTC, this body has spent more than its share of time trying to control an agency that has been acting beyong the scope of its authority.

The substitute now being offered would codify the greatest expansion of FTC authorization since the passage of the Magnuson-Moss amendment and goes against the grain of all activity in the Congress to place restraints on the FTC. The substitute would upon the simple assertion of noncompetitiveness allow the FTC to go into the critical areas of professional qualifications and allow preemption of the laws of the States.

In their "Dear Colleague" letter, Messrs. BROYHILL and LENT expressed concern that the adoption of the Luken-Lee amendment to H.R. 6995 would place in jeopardy the continuation of the moratorium on FTC actions related to agricultural co-ops. We all recognize the excesses of the Commission in relation to the agricultural co-ops.

Mr. Speaker, it is the same kind of reckless intervention by the Federal Trade Commission into the area of the professions that the Luken-Lee amendment is designed to address. The Luken-Lee amendment clearly recognizes the authority of the States to protect the public through their licensing boards, their attorneys general, the consumer protection acts, and whatever other initiatives the States feel are necessary to deal with these professional groups.

The public will be appropriately protected by these bodies.

Other opponents of the Luken-Lee amendment have contended that the FTC must have jurisdiction over the professions to insure adequate enforcement of the antitrust laws. They allege that an antitrust enforcement gap would be created during the period of the moratorium.

These charges imply that no one else is enforcing the antitrust laws except the FTC. This is not true. Let me correct the record. Vigorous enforcement of the antitrust laws against professionals is conducted by the Justice Department, the States and by private parties—which is, after all, the most appropriate mechanism for this enforcement.

The Bureau of National Affairs Specialty Law Digest lists 71 reported antitrust cases involving the health professions just since March 1980. This does not include additional cases involving other professional groups. Of the 71 cases, 70 of them were brought by the Justice Department, the States, or by private parties. Only one involved the FTC.

During the last 8 weeks of its recently ended term the Supreme Court decided on four antitrust cases involving professionals. Three were brought by private parties and the fourth—by a State and joined by the Justice Department.

This vigorous activity would be unaffected by adoption of the Luken-Lee amendment—and the public will continue to be protected.

In view of all this activity FTC actions are unnecessary and inappropriate.

I urge that we continue to place appropriate restrictions on the Federal Trade Commission and not make the same mistakes we made in 1975 by expanding its authority.

I urge you to defeat the Broyhill substitute and support the Luken-Lee amendment.

Mr. LUKEN. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. RALPH M. HALL).

□ 1520

Mr. RALPH M. HALL. Mr. Chairman, I rise today in support of the Luken-Lee amendment to H.R. 6995, the Federal Trade Commission authorization bill. The Luken-Lee amendment will restrain the proposed expansion of FTC authority to State-regulated professions, such as engineers, lawyers, physicians, dentists, optometrists, and veterinarians.

In an effort to protect the American public from possibly collusive and anticompetitive professional practices, the FTC is attempting to force additional Federal oversight into the business activities of State-licensed professions. We, in this Congress, have spent a great deal of time and effort to reduce the regulatory role of the Federal Government in just about all phases of the economy, business and the private sector and to ease the costly, time-consuming, intrusive and unnecessary Federal regulation burden for taxpayers.

It is with particular concern to learn that this Federal agency is seeking to expand its regulatory jurisdiction to State-regulated and licensed professions. While I certainly agree that the medical, legal, and technical professions, must be carefully monitored in order to protect the consumer and insure the highest quality of professional service at fair and reasonable costs, I do not believe that an expanded Federal role is either appropriate or necessary.

The FTC, in this controversial proposal, has ignored the well developed and extensive body of Federal and State laws which regulate and govern these professions. The U.S. Department of Justice under the Sherman and Clayton Acts has the direct responsibility to enforce antitrust actions, and State laws permit the awarding of treble damages in private suits for unfair and deceptive business practices.

If the FTC is permitted to extend their regulatory domain to the legal profession in Texas, for example, it would mean that a Federal agency has the ability not only to repeal State law, but to regulate one of the equal branches of State government—the judiciary. This would be the result of our approval of the Broyhill substitute—a situation none of us would want to take place in our State.

The Governor-elect Mark White, attorney general for the State of Texas, summed up this problem in Senate testimony earlier this year:

I am distressed by this development because it indicates either a terrible mistake on the part of the Commission regarding its powers, or the most massive disruption of the traditional balance between the Federal and State governments since the principles of Federalism were included in the U.S. Constitution. And the FTC's threatened action upsets this balance and creates a constitutional problem which we suggest Congress never intended to raise. Congress therefore must act to clarify its legislative intent regarding the FTC's authority to expand its regulatory domain beyond business and private enterprise to include the public functions of the State.

The time has come, Mr. Chairman, to set down firm guidelines for this Federal agency. I urge my colleagues to vote against the Broyhill substitute which represents an expansion of FTC power and to vote for the Luken-Lee amendment and institute a moratorium on FTC actions until we in Congress can determine what role, if any, this agency should have over State-regulated professions.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. RALPH M. HALL. I yield.

Mr. KAZEN. Mr. Chairman, I thank the gentleman for yielding. I rise to associate myself with his remarks and urge support for the Luken amendment.

Mr. BROYHILL. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. WAXMAN).

Mr. WAXMAN. Mr. Chairman and my colleagues, the bipartisan leadership of the Committee on Energy and Commerce has come forward with a substitute amendment to deal with a very tricky subject. How do we deal with restraints on trade where the marketplace is not working, where competition is being discouraged, at the same time not letting a bureaucratic agency interfere in matters that are not legitimately within the concern of that agency? The Broyhill-Dingell-Lent-Florio amendment—and I associate myself with them—calls upon the Congress to adopt a legitimate and very worthwhile compromise.

Let me point out what is really at stake here. Americans spent $247 billion for health care in 1980. In 1981, that figure jumped 16 percent, to $287 billion. Every year we have been seeing an increase in health care costs

that far exceed the rate of inflation in our economy. Today, there was a report that this administration is going to recommend that we cut public health programs by maybe as much as 20 percent. Well, if we do something like that, we are not going to be able to meet public health emergencies that may come about. The Food and Drug Administration may not be able to approve drugs or protect the public safety from drugs that may be dangerous to them.

Every year we are faced with the entitlement programs of medicare and medicaid claiming a larger portion of our Federal dollar. Those who are buying insurance through their employers or some other way are finding the increase in the insurance premium going up and up and up. The reason for the increases in health care costs is that we do not have supply and demand deciding the price of health care services.

What the Luken-Lee amendment would do is to remove the little bit of protection that we have in the law now against monopolies preventing competition to hold down some of the costs. For example, if there was a price-fixing agreement where physicians agreed not to work below the usual rates, no Federal Trade Commission action would be permitted if the Luken-Lee amendment were adopted. If all the doctors got together and said, "We don't want a health maintenance program competing with us and we would use our pressure as physicians with hospital privileges," the Luken-Lee amendment would prevent the Federal Trade Commission from getting involved in that issue. If there were illegal kickbacks involving physicians in a major medical laboratory, the Luken-Lee amendment would prevent that from coming under the Commission's purview. If there are boycotts of cost-containment programs designed by insurers, industry, and labor to hold down medical costs, we would be powerless to deal with it if the Luken-Lee amendment were adopted.

The Luken-Lee amendment should be defeated and the Broyhill amendment should be adopted. The issue will be whether we adopt the Broyhill amendment or not. That is the vote before us. I urge an aye vote on the Broyhill amendment.

We cannot afford to pay these escalating health care costs. While we are trying to bring about more competition in health care, we should not go backward and bring about a situation where there will be even less competition. I know that this is an emotionally charged, highly lobbied bill, but if we do not do something to provide competition in health care, what will be the alternative? The Government will have to come in with enormous bureaucratic restraints, regulations, to keep the controls on the health care system from exploding. Is that what Members of Congress want? Is that what the American people would want? I do not believe so.

I think the only choice we have before us on this question is to adopt the Broyhill amendment. It is one that is backed by the leadership of the committee, that, by the way, is called upon every year to figure out how to hold down costs in the programs for medicare and medicaid. Do not make the job more difficult, and do not make the cost of health care more expensive for the American people.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. LUKEN. Mr. Chairman, I yield 3 additional minutes to the gentleman from California.

Mr. LUKEN. Mr. Chairman, will the gentleman yield?

Mr. WAXMAN. I will be pleased to yield.

Mr. LUKEN. As I understand the gentleman's point, which has been made in the media, I think, and many of the communications we have received, the gentleman is saying that the Broyhill amendment is a compromise. I assume what the gentleman means is that it will put some constraints on the FTC that are not already there.

Mr. WAXMAN. I believe that is the case, yes.

Mr. LUKEN. The costs are now going up, are they not, with the FTC's unbridled activity, it now has without the Broyhill restrictions?

Mr. WAXMAN. Clearly, we are not asking the FTC to deal with rising health care costs and come up with a solution, but what we are asking the FTC to do in this area as well as others is to let the marketplace work, to allow competition and prevent the restraints on trade when monopolies get together.

I know that some professions would like to get together if they could and see if they can set their prices and restrain competition. Any business group would like to restrain competition because when they do not have competition they can charge a higher price. That is not in the public interest.

Mr. LUKEN. When the medical profession says that it licenses just the licensed doctors to practice medicine, is that not anticompetitive? Do they not eliminate all competition?

Mr. WAXMAN. That is why the Broyhill amendment is such a worthwhile compromise. We do not want the Federal Trade Commission deciding who should or who should not be a physician. I do not believe that is what the Broyhill amendment does. That is an issue that should be decided by a State and by the profession, but I do not believe that is what the Broyhill amendment does.

What the gentleman's amendment would do would be to say that the Federal Trade Commission not only could not look at that which they should not be involved in, but could not look at the other practices which I believe are anticompetitive.

□ 1530

Mr. LUKEN. Mr. Chairman, will the gentleman yield further?

Mr. WAXMAN. Mr. Chairman, I have listened to much discussion. First, let me ask the gentleman how he would deal with the problem.

If there were a boycott of HMO's by physicians, would he not want somebody to say that that is not proper and that we are not going to permit it, if there is price fixing, for instance?

Mr. LUKEN. Mr. Chairman, there are two answers to that. The Attorney General has the jurisdiction.

Along with the gentleman, I agree that there are not any perfect answers. For instance, the gentleman was talking about FTC action saving health care costs, but then when I asked him to substantiate it, he said, "Well, we don't really expect the FTC to save health care costs."

Mr. WAXMAN. But I think the gentleman's proposal is a step backward. It allows more restraint of trade, less competition, and then we are going to find health care costs going up more than now is the case.

Mr. LUKEN. Mr. Chairman, will the gentleman yield further?

Mr. WAXMAN. I yield to the gentleman from Ohio.

Mr. LUKEN. Mr. Chairman, if I may answer the gentleman, somebody has to regulate it. There are overlapping jurisdictions, there is no question about it. I do not want the FTC to practice its brand of quackery in regulating these professions. I would rather have the professionals exempted, just as we do in insurance, just as we do in savings and loans, and just as we do in many instances. We have exempted these businesses, even those businesses that do have trade practices, and we have put them under State regulation. I think we should also put these professions under State regulation.

Mr. WAXMAN. Mr. Chairman, if I may reclaim my time, if we leave it up to the profession, any profession, to decide what the demand for its services is, they are not going to say that there ought to be less of a demand.

I hate to use this example, but the one that is often given is: "Do you ever ask your barber whether you need a haircut?"

Very few barbers will tell you, "No." In fact, they will not even tell me, "No."

Mr. Chairman, I do not think it ought to be up to the profession solely

to decide whether the service is needed.

Mr. LUKEN. There has got to be humor in that line somewhere.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. FLORIO. Mr. Chairman, I yield 5 minutes to the distinguished chairman of the full committee, the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Chairman, this is an issue which should be decided on the basis of cold logic and where the public interest best lies.

There have been a lot of charges made by Members on the other side, and I want to say I repudiate all those charges. I have great respect for my dear friend, the gentleman from Ohio (Mr. LUKEN), the author of the amendment, as he very well knows. I feel the same respect and affection for the gentleman from New Jersey (Mr. FLORIO), the chairman of the subcommittee, and for my good friend, the gentleman from North Carolina (Mr. BROYHILL), with whom I have a long, warm, and friendly association.

It has been cnarged that FTC is in the business of regulating the professions and that that is bad, and that we ought, therefore, to make some changes in the authorization of the FTC to deal with questions of that kind. That, I believe, is a question upon which all Members here might very well come to agreement.

It has been observed, however, that FTC is going well beyond its authority, and that the FTC should not engage itself in questions relative to the behavior of professional men and women and their associations when that behavior constitutes a violation of the antitrust laws, a restraint of trade, or some kind of monopolistic or anticompetitive behavior, restraint on advertisement, or fixing of market areas or prices. I think this House and the Congress should and does repudiate that posture.

Now, let us look at the two proposals which lie before the committee. Let us look at the proposal which is offered by my dear friend, the gentleman from North Carolina (Mr. BROYHILL), and which I, the gentleman from California (Mr. WAXMAN) and the gentleman from New Jersey (Mr. FLORIO) join in support and sponsorship. That proposal simply says that the FTC shall not engage in the regulation of professional individuals and their associations on matters relative to the day-to-day function of that profession or that association, but it preserves intact the power of the FTC to deal with anticompetitive behavior, fixing of prices, restraint of trade, monopolistic behavior, and any of the other anticompetitive actions which this country throughout its history, since the days of Teddy Roosevelt, has found to be offensive and violative of a free marketplace and not in the best interests of our economy.

The amendment offered by my good friend, the gentleman from Ohio (Mr. LUKEN), goes further. It says that the Federal Trade Commission cannot deal at all with anticompetitive practices by individuals who are licensed by the State or by their associations where the action is that of a professional person who is regulated by the State and who has some educational degree.

It goes further really. Its language does not say so, but it nevertheless would permit individuals to engage in anticompetitive practices, restraint of trade, monopolistic practices, fixing of prices, and fixing of markets without control or supervision by the Federal Trade Commission of those anticompetitive acts. It permits the associations to engage in price fixing, monopolistic practices, restraints of trade, delineation of market areas in defiance of antitrust laws, and any of a number of anticompetitive actions outside the reach of the antitrust laws administered by the Federal Trade Commission. Indeed, one trade association, the AMA, has voted to seek legislation exempting the health care field from that vestigial remnant of antitrust law which could be applied to these kinds of associations, that is to eliminate the Department of Justice's controls under the Sherman and Clayton Acts and also State antitrust laws over these kinds of behavior.

Now, if this Nation wants to see to it that the consumer and the economy gets the best possible deal and that everyone receives protection against monopolistic practices, the only sensible approach is that amendment offered by the gentleman from North Carolina (Mr. BROYHILL).

The CHAIRMAN. The time of the gentleman from Michigan (Mr. DINGELL) has expired.

Mr. FLORIO. Mr. Chairman, I yield 2 additional minutes to the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Chairman, the amendment offered by my good friend, the gentleman from Ohio (Mr. LUKEN) would permit two trade associations or a group of individuals to gather together to conspire to restrain trade, to fix prices, or to injure persons by anticompetitive actions without antitrust supervision by the Department of Justice and with the most modest and vestigial remnant of antitrust jurisdiction remaining in the Department of Justice and the States. I believe that that is bad. It hurts the consumer, it hurts the profession, it hurts the economy, and it hurts the Nation. It is not in the public interest.

Let us regulate professional behavior where it should be, in the sense of licensing and professional responsibilities through the States, as would the amendment offered by the gentleman from North Carolina (Mr. BROYHILL), but let us see to it that the Federal antitrust laws continue to apply for the protection of all of us and for the protection of the economy, to anticompetitive, monopolistic, unfair trade practices in the fashion that they should through the Federal Trade Commission, which has a long history of sensible, constrained behavior in that particular area.

Mr. Chairman, over the past decade, FTC scrutiny of professionals has led to several rulings and legal actions beneficial to consumers that have saved the public millions of dollars. Among them: A decision to bar the American Medical Association (AMA) and its state affiliates from restricting the ability of members doctors to advertise—recently upheld by the Supreme Court—issuance of consent orders prohibiting medical groups from boycotting health maintenance organizations—the Reagan administration, to curb soaring health costs, advocates greater competition through diverse health plans—complaints against three dental groups alleging agreements to obstruct the cost containment programs of medical insurers through boycotts, a suit against a State medical society for price-fixing arrangements and an investigation of State-imposed and professional association restrictions on professional business practices, such as the advertising of prices of prescription drugs and eyeglasses.

The Federal Trade Commission's "Eyeglasses I" study, for example, resulted in a trade rule regulation permitting the advertising of eyeglass prices and requiring that prescriptions be released to consumers, enabling them to shop comparatively before buying eyeglasses. Subsequent advertising by optical chains not only lowered the price of eyeglasses by $20 to $30, but brought the price of a pair of soft contact lenses down from $300 to $100, as reported in the July 27, 1981 issue of Fortune magazine.

The American Medical Association, the American Dental Association, and the American Optometric Association are trying to get out from under the FTC.

In its efforts to help the medical profession escape the FTC's scrutiny, the AMA has consistently and unequivocally stated that it is not trying to escape antitrust law enforcement, merely the FTC. It has stressed repeatedly that the Sherman and Clayton Acts, as well as State antitrust laws, would still be fully applicable to the AMA and its members.

However, 4 months ago the AMA voted to seek legislation that would amend the Sherman Antitrust Act and State antitrust laws to exempt physicians. If enacted, the proposed legislation would eliminate effective anti-

trust enforcement in the health care sector of the economy.

At the same time, the Joint Commission on Accreditation of Hospitals (JCAH), working hand in glove with the AMA, is seeking to eliminate State and Federal supervision of medicare and medicaid in America's hospitals and substitute their own privately owned commission, totally exempt from all public supervision and accountability, as the only source of accreditation for hospitals receiving Federal funds.

These two proposals could well halt current and future efforts to control spiraling health care costs through increased competition.

Consideration of Luken-Lee comes at a time when annual health care expenditures account for 10 percent of the gross national product. Exemption of the health care professions would strike hardest at consumers, who are now burdened with health care costs which will reach $247 billion in 1982. A staggering $7 billion, for example, will be spent for eye examinations, corrective lenses and frames, much of it by the elderly. Without FTC oversight, those figures might be higher.

The Luken-Lee amendment would be place a moratorium on any FTC actions involving State regulated professions until Congress determines to what extent the FTC should have authority in this area.

Luken-Lee would prohibit the FTC from prosecuting professional persons and organizations for fraudulent and deceptive advertising, price fixing, restrictive professional codes or violation of antitrust laws with boycotts. It is being touted as a deregulation effort, but is opposed by the White House. The administration supports the Broyhill-Dingell amendment which maintains FTC jurisdication over business practices of professionals while eliminating FTC intrusion into matters best reserved to the States.

The Vice President of the United States, the Director of the Executive Office of the President, Office of Management and Budget, and the Secretary of Health and Human Services have all written letters affirming the administration's support of the Broyhill-Dingell amendment.

On September 27 of this year, Vice President GEORGE BUSH wrote to the chairman and ranking majority member of this committee saying:

> Your amendment strikes a sound balance between legitimate State interests and enforcement of Federal antitrust and consumer protection laws. Moreover, your amendment, if enacted, would constitute an important step in our program of regulatory relief to assure fully competitive markets. Finally, your amendment represents sound policy and is consistent with the philosophy of this administration to treat all Americans equally under the law.

FTC Chairman, James C. Miller III says Luken-Lee is "bad law, bad economics and bad politics" that will "cause substantial injury to consumers and to our Nation's economy."

Newspapers with such diverse editorial viewpoints as the Wall Street Journal, the New York Times, Chicago Tribune and the St. Louis Post-Dispatch uniformly oppose the exemption of the professions from FTC oversight.

Most professions oppose a total exemption. A coalition of health, professional, business, consumer, and labor interests, representing 17 million individuals, 33 national organizations and their 800 affiliated organizations all oppose such an exemption, stating in their July 19, 1982 letter:

> An exemption for the professions and their organizations would poorly serve the public interest, would create a privileged class above the law and ultimately would unnecessarily increase the costs of health, legal and other professional services to all Americans.

The coalition opposed to Luken-Lee includes the American Nurses Association, American Psychological Association, American Public Health Association, the National Association of Chain Drug Stores, the UAW, the United Steelworkers of America, the American Association of Retired Persons, and the Washington Business Group on Health, a corporate group worried about the cost of employee health-care and insurance plans.

These views are supported by six former heads of the Justice Department's antitrust division—Sanford M. Litvack, John H. Shenefield, Donald I. Baker, Thomas E. Kauper, Edwin M. Zimmerman and Donald F. Turner—who jointly wrote to FTC Chairman Miller to declare:

> While the professions do have certain unique characteristics, those engaged in the sale of professional services are clearly engaged in commercial activity. We see no reason why Federal laws that protect against restraints of trade and monopolistic or deceptive practices in our free market economy should not apply to the sale of professional services.

What about States rights? The record shows that the States are not able to regulate professional trades. Most State professional boards are made up primarily of members of the respective trades and often prove to be more protectionist than regulatory. Wrote the California District Attorneys Association in a September 13, 1982, letter expressing its opposition to Luken-Lee:

> In an era of sharp budget constraints, State and local prosecutors often lack the resources to mount complex challenges to unlawful business behavior by professional groups. In many cases, an end to FTC jurisdiction over such practices would mean an end to effective law enforcement in those areas.

On July 15, 1982, the National Association of Attorneys General passed a resolution opposing the enactment of any limitations on the ability of the FTC to enforce the FTC Act with respect to professions. This opposition was reconfirmed in a September 20, 1982, letter urging Members of Congress to vote against Luken-Lee.

I, therefore, urge the support of my fellow Members in defeating Luken-Lee. The sole purpose and effect of that amendment is to grant a special exemption, for a single class of professions, from the normal rules of the free market. The consumer will ultimately pay. And Congress will bear the ultimate responsibility.

Mr. Chairman, I submit the correspondence referred to in my remarks for inclusion in the RECORD following my statement as clear evidence of the overwhelming opposition of the leaders of this county and the American people to the Luken-Lee amendment, a piece of legislation which a Chicago Tribune editiorial has labeled "this nasty little measure * * *":

THE VICE PRESIDENT,
Washington, D.C., September 27, 1982.

Hon JAMES T. BROYHILL,
U.S. House of Representatives,
Washington, D.C.

DEAR JIM: I am writing to reaffirm and reemphasize the Administration's support of your compromise "professions" amendment to the Federal Trade Commission Authorization Act, H.R. 6995.

Your amendment strikes a sound balance between legitimate state interests and enforcement of federal antitrust and consumer protection laws. Moreover, your amendment, if enacted, would constitute an important step in our program of regulatory relief to assure fully competitive markets. Finally, your amendment represents sound public policy and is consistent with the philosophy of this Administration to treat all Americans equally under the law.

Best regards.

Sincerely,

GEORGE BUSH.

EXECUTIVE OFFICE
OF THE PRESIDENT,
OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., September 21, 1982.

Hon. JAMES T. BROYHILL,
House of Representatives
Washington, D.C.

DEAR JIM: The President has asked me to respond to your letter of September 16, 1982, requesting the Administration's position on your amendment to H.R. 6995, the Federal Trade Commission Authorization Act of 1982.

Our understanding is that your amendment would substantially restrict the FTC's jurisdiction over certain state-licensed professionals, while preserving FTC authority over anticompetitive agreements among professionals. In particular, the amendment prohibits the FTC from using its authority under Sections 5 or 18 of the Federal Trade Commission Act to prohibit unfair acts or practices engaged in by professionals in a particular state, if this will result in the invalidation, in whole or in part, of any law of the state establishing training, education, or experience requirements for the licensure of professionals, or the tasks or duties which may be performed by professionals. This prohibition will not apply if the Commission finds that the law in question authorizes or

prescribes commercial or business acts or practices and adversely affects or is likely to adversely affect competition. A Commission finding in this regard will have to take into account the benefits to public health, safety, and welfare of the state law in question. In addition, the FTC will be prohibited from finding a method of competition to be unfair under its antitrust authority where the method of competition is prescribed by a state according to the State Action Doctrine.

The Administration supports this compromise amendment. We believe it strikes a reasonable balance between total elimination of FTC jurisdiction over business practices of professionals—even practices found to be deceptive or anticompetitive—and current law, which contains no restrictions on the FTC's authority regarding the professions.

Your compromise would be consistent with the Administration's policies of assuring vigorous market competition while eliminating Federal intrusion into matters best reserved to the states.

The Administration appreciates the opportunity to comment on your amendment.

Sincerely,

DAVID A. STOCKMAN,
Director.

COALITION TO SAVE THE JURISDICTION OF THE FEDERAL TRADE COMMISSION OVER THE PROFESSIONS,
JULY 19, 1982.

Hon. JAMES J. FLORIO,
Longworth House Office Building,
Washington, D.C.

DEAR CONGRESSMAN FLORIO: We are writing you on behalf of a coalition of health, professional, business, consumer and labor interests, representing 17 million individuals, 33 national organizations and their 800 affiliated organizations. We are concerned about the exemption of professionals from Federal Trade Commission oversight and we are asking you to oppose any effort to strip the FTC of its authority over professionals or their professional organizations.

The FTC's charge directs it to preserve the integrity of a free and competitive marketplace for all goods and services—including services rendered by professionals. Business practices related to these services provided by professionals or their associations should be subject to the same rules that govern the marketplace behavior of other commercial interests. Boycotts, price-fixing and conspiracies to restrain trade and competition should be condoned no more for professionals or their organizations than for those who market other goods and services. The U.S. Supreme Court has made it quite clear that members of the professions and their professional organizations are not immune from prosecution, if they violate federal antitrust statutes.

We view efforts by certain professional interests to gain an exemption from FTC's authority as simply an effort to avoid the just consequences of any unfair, anticompetitive, or monopolistic practices they may perpetrate. An exemption for the professions and their organizations would poorly serve the public interest, would create a privileged class above the law and ultimately would unnecessarily increase the costs of health, legal and other professional services to all Americans.

In conclusion, we the undersigned organizations ask you to oppose any efforts to strip the Federal Trade Commission of its authority over the professions.

Sincerely,

American Nurses' Association, American Society for Medical Technology, American Association of Pastoral Counselors, American Academy of Physican Assistants, Association for the Advancement of Psychology, American Psychological Association, American Dental Hygienists' Association, American Speech-Language-Hearing Association, American College of Nurse-Midwives, American Public Health Association, International Chiropractors Association, National Association of Optometrists and Opticians, National Association of Chain Drug Stores, American Chiropractic Association, Women's Equity Action League, American Association for Clinical Chemistry, American Medical Technologists, American Association of Bioanalysts, International Society for Clinical Laboratory Technology, American Society of Allied Health Professions, National Rehabilitation Counseling Association, National Women's Health Network, Women and Health Roundtable, American Association of Retired Persons, American Retail Federation, Congresswatch, U.S. Women's Health Coalition, National Consumers League, Consumers Union of America, Consumer Federation of America, American Association of Nurse Anesthetists, United Automobile, Aerospace, and Agricultural Implement Workers of America, United Steelworkers of America.

[From The Chicago Tribune, June 1, 1982]

DOCTORS, LAWYERS AND THE FTC

Over the opposition of Chairman Robert Packwood and four other members, the Senate Commerce Committee has voted to exempt medical, legal and other professional groups from federal fair trade and antitrust laws.

Unfortunately the full Senate is all too likely to pass the measure intact. It would bar the Federal Trade Commission from prosecuting individuals and organizations for fraudulent and deceptive advertising, price fixing and conspiracies to boycott. Some experts predict that enactment of the measure could lead to removal of the health warning on cigarette packages because the FTC would lose its jurisdiction over such health matters.

Instead, it would be left to state governments to regulate these matters, however and if ever they might choose.

This action was not taken as part of the Reagan administration's drive to reform the federal regulatory burden. Mr. Reagan's handpicked FTC chairman, James Miller, hired away from the conservative American Enterprise Institute, vigorously opposes the Senate move. "It is very bad," he said after the committee's 10 to 5 vote, "to establish a privileged class and make it exempt from enforcement that everyone else is subject to."

The argument that state agencies can better perform this regulatory role is nonsense. For one thing, state agencies tend to be weak, underfinanced and dominated by the powerful professional groups they're supposed to regulate.

What's more important, fraudulent advertising and price fixing are problems that are national in scope. That is why the federal fair trade practice and anti-trust statutes were passed in the first place. The exemption from anti-trust laws that doctors, lawyers and other professionals long claimed has been rejected by a number of courts. This trend has been especially pronounced since the government assumed responsibility for medical bills under Medicare and Medicaid, which has helped to push medical costs through the ceiling. In fairness, these professions have no more reason to be exempt from anti-trust laws than from income tax or civil rights laws.

It's easy and no doubt partly accurate to blame the committee vote on the generous campaign contributions made in 1980 by professional associations of doctors or lawyers. Coming so close to the House's veto of an FTC rule tightening the regulations on used car dealers—again after generous campaign contributions from the used car industry—it suggests that Congress can too easily be bought. In fairness to Congress, though, the House was right on the used car vote.

Nor can one always assume that a congressman's position is determined by contributions; more often it's probably the reverse. And sometimes contributions are in vain. Sen. Packwood, for example, was a beneficiary of this largess but stood up for what was right anyway.

If cash or misguidance prove sufficient to get this nasty little measure all the way through Congress, Mr. Reagan will have good reason to use his veto. His policy on this issue is right, and the FTC deserves his support.

Mr. BROYHILL. Mr. Chairman, I yield 4 minutes to the gentleman from Illinois (Mr. MADIGAN).

Mr. MADIGAN. Mr. Chairman, very briefly, I think it is necessary not at this point to discuss the merits of the Broyhill substitute so much as it is to point out that the gentleman from North Carolina (Mr. BROYHILL) is not alone on the Republican side of the aisle here in advocating his approach to this very thorny problem.

The Broyhill substitute has been supported by an overwhelming majority of the members of the Energy and Commerce Committee on the Republican side. It has also been supported by the Director of the Office and Budget, Mr. Stockman. It is supported in a letter to the gentleman from North Carolina (Mr. BROYHILL) from the Vice President of the United States, Mr. Bush, who is the Chairman of the President's Commission on Regulatory Reform.

With that background, I think it is obvious that what we are talking about now with the Broyhill substitute is something that receives widespread support from both Republican and Democratic Members of the House, from the Republican administration, from people of both conservative and liberal persuasions regardless of their political party identification, and from such conservative organs as the Wall Street Journal, which has, I understand, editorially supported the approach taken by the gentleman from North Carolina.

I think there has been a full discussion of what is contained in the Broy-

hill substitute, but I thought it was important to note that the gentleman from North Carolina is not alone among conservatives and not alone among Republicans in advocating that we take the approach suggested in his substitute for the Luken amendment.

□ 1540

Mrs. MARTIN of Illinois. Mr. Chairman, will the gentleman yield?

Mr. MADIGAN. I am happy to yield to the gentlewoman from Illinois.

Mrs. MARTIN of Illinois. I rise to associate myself with the gentleman's remarks and in support of the Broyhill amendment.

Luken-Lee took a first step to trying to take care of a real problem. The Broyhill amendment still takes care of those problems but has the protection we all want for both the consumer and those professionals, indeed, who originally sought relief through Luken-Lee.

It appears a good idea and enjoys the widespread support that the gentleman has thus far explained.

Mr. MADIGAN. I thank the gentlewoman for her comments and yield back the balance of my time.

Mr. FLORIO. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. LENT).

Mr. LENT. Mr. Chairman, I rise in support of the Broyhill substitute which I have cosponsored and to respond to some of the prior colloquy.

This substitute is a true compromise and I want to commend the chairman of the full committee, the gentleman from Michigan, Mr. DINGELL, and the gentleman from North Carolina, ranking minority member of the full committee, Mr. BROYHILL, and the gentleman from New Jersey, chairman of the subcommittee, Mr. FLORIO, for working together so well in its drafting.

Our colleague, the gentleman from Ohio, Mr. LUKEN, earlier asked the rhetorical question whether this substitute puts any protections in place for the professions against the Federal Trade Commission. I would say the answer to that question is "yes."

I agree with the gentleman from Ohio that it is essential to preserve the traditional role of the States in regulating the professionals.

This substitute prevents the commission from second-guessing legitimate State judgment in so-called quality-of-care areas such as licensing, education, and the scope of the duties which may be performed by professional groups.

I say to my good friend and colleague from Ohio, this substitute guarantees the protection of the States' interests in two ways.

First of all it insures the participation of the State attorney general in commission proceedings. Second, it requires the Federal Trade Commission for the first time to take into account the interests of the States in protecting the public health, safety, and welfare.

Under this substitute it is clear the FTC will not be regulating the quality of care rendered by professionals. The substitute carefully delineates the authority of the FTC to pursue anticompetitive professional conduct.

Certain findings must be made. A business or commercial practice must be at issue. This practice must have an anticompetitive effect.

As can be seen, a sensitive balance has been struck between the roles of the State and that of the Federal Trade Commission.

The substitute has the backing of the administration and many professional and business groups. I hope my colleagues will support the Broyhill-Dingell substitute.

● Mr. FRENZEL. Mr. Chairman, of all the agencies of Federal Government, the worst abuser of its authorities and the worst increaser of consumer costs to Americans is the FTC.

Two years ago I called it a rogue agency run amok. Since then some of the personnel have changed. Still, there has been no discernable improvement in FTC deportment. Its record is replete with bungling, inefficiency, waste, and harassment.

The FTC staff seems still to be accountable to no one. The Commissioners seem unwilling to restrain the most ignoble urges of a staff guided by whimsey.

The FTC comes on like a tiger when it attacks small and defenseless groups. But, when confronted by a strong and powerful adversary, it chickens out. It is happy wasting its money attacking silly theories like shared monopoly, but it is absolutely in ecstasy when it can harass small groups who cannot fight back.

Its demands for carloads of information, its outrageous use of subpena power, and its threats and bullying have helped raise medical costs for all the consumers of my area. Fishing expeditions are legendary, but the only fish which are caught are the poor consumers who get stuck with the costs.

In my State, peer review on a voluntary basis has been enormously successful in reducing hospital stays and overall medical costs. Naturally, the FTC thought that was in restrain of trade. No red-blooded FTC person would ever like to see costs lowered to consumers, so it tried to eliminate our peer review. The FTC has harassed one of our small HMO's which was guilty of nothing except trying to give good service at a good price.

Mr. Chairman, it is difficult for me to express my feeling for this institution in strong enough terms. But I hope that this presentation is conveying a rather clear impression that my first choice is to repeal the FTC. I believe it is beyond repair. It was probably redundant when it was first created but if we really want a workable FTC we will have to get rid of what we have got because there are no redeeming characteristics in the present model.

I realize that the worthy goal of repeal is unachievable. Therefore, I have tried to support all amendments that could conceivably restrict the power and restrict the operations of the FTC as much as possible.

To me the Luken-Lee amendment is one which prohibits FTC regulation over an area in which they should never have become involved in the first place, and one which it has loused up in its usual style. The Broyhill amendment which purports to be a compromise still gives the FTC too much authority. You cannot compromise with the FTC. You just have to get them out of there.

And even worse, the Broyhill amendment is more than a compromise. It gives the FTC the ability to override State laws. That feature legitimizes a power it has held only in its wildest dreams, but never in fact. Above all it should not have that power. The two-House veto of FTC regulations will help a great deal. The only thing better would be a one-House veto of the whole agency.

Finally, Mr. Chairman, I hope there will be an amendment to reduce the authorization for the FTC. Naturally, my first choice is to reduce it to zero. However, I will support any decrease because I see our power of the purse as our ultimate control over this dreadful beast.

We should adopt the Luken-Lee amendment, reject the Broyhill compromise, reduce the authorization, and pass the bill. That will get our spirits up for the real dismantling which I hope will occur next year.●

● Mr. RAHALL. Mr. Chairman, as we consider amendments relating to the Federal Trade Commission's activities over State-regulated professions such as those in the medical field, I find myself questioning the need and validity of granting the Commission powers which may conflict or usurp State laws.

In West Virginia, for example, the legislature enacted the Medical Practices Act of 1980. The statute's disciplinary provisions are both tough and extensive and provide every imaginable consumer protection. Under this law, the West Virginia Board of Medicine is given the sole authority for the issuance of licenses to practice medicine and surgery in addition to practicing podiatry. This board may deny an application for a license and may discipline a physician or podiatrist already licensed to practice in the State, under a broad range of criteria. Among them are, and I quote from the statute:

Attempting to obtain, obtaining, renewing or attempting to renew a license to practice medicine and surgery or podiatry by bribery, fraudulent misrepresentation or through known error of the board;

False or deceptive advertising;

Making or filing a report that the person knows to be false . . .

Making a deceptive, untrue or fraudulent representation in the practice of medicine and surgery or podiatry;

Soliciting patients, either personally or by an agent, through the use of fraud, intimidation or undue influence;

Conspiring with any other person to commit an act or committing an act that would tend to coerce, intimidate or preclude another physician or podiatrist from lawfully advertising his services; and

Professional incompetence.

Mr. Chairman, these provisions provide full protection for the consumer in addition to administering a stringent framework under which the medical profession in West Virginia practices. I simply do not see how the FTC could embellish upon this existing State program through Federal regulation. For this reason I support the gentleman from Ohio in his effort to place a moratorium, and I stress the word "moratorium," on FTC activity with respect to the professions.●

Mr. LUKEN. Mr. Chairman, how much time do I have left? I assume there is a good deal of time.

The CHAIRMAN. The gentleman from Ohio has 3 minutes remaining of the time in support of his amendment.

Mr. LUKEN. We are now on the Broyhill substitute.

The CHAIRMAN. We are on both of them, both the gentleman's amendment and the substitute.

Mr. LUKEN. I yield myself the balance of my time.

The CHAIRMAN. The gentleman is recognized for 3 minutes.

Mr. LUKEN. Mr. Chairman, contrary to the description that has been made by the last speaker or two, the Broyhill amendment is not progress. As the gentlewoman from Illinois said, the Luken-Lee amendment does address real problems.

If it were true that Broyhill, in effect, perfected that I would be the first to support it. But Broyhill is a giant step backward because it gives the FTC a new grant of Federal authority to invalidate State laws.

There simply is no magic line of division, of demarcation between trade practices and quality of care issues, so most of the comments that have been made have been beside the point. They do not address the point.

When the licensing boards of the States license they immediately step up what amounts to an anticompetitive practice. That is by definition what they do. There is not that division.

We have demonstrated, talking about the dental issues, we have demonstrated the cases that the FTC has involved itself in which are quality of care issues. Whether the dentist is going to prescribe an X-ray or not, that is a quality of care issue.

But the FTC has gotten involved in it and will get involved in it even more so with a blanket grant of authority under the Broyhill amendment.

We have been talking here about authority. The appeal has been made to authority by the leadership of the Energy and Commerce Committee and all of these people who are for the Broyhill amendment.

Let us see what some of these people have said from time to time in the past.

Mr. Miller, the FTC Chairman, what has he said? He said:

To business, the FTC is a bully and to an increasing number of consumers it is a national nanny, and to Congress it is an agency largely out of control.

Mr. Stockman, who is identified as a proponent, said on February 23, 1981:

If you eliminated the FTC the world would never know the difference.

Mr. BROYHILL said on May 16, 1976, and I think he said it more than once:

In our view the FTC does not have jurisdiction over nonprofit organizations nor should they.

This gives the FTC jurisdiction over nonprofit organizations.

Now Mr. Miller has seen the light. He says we, the FTC, have expertise in this area. Compare the expertise of the FTC with the dental licensing board or the medical licensing board or the bar association. I will take those licensing boards any time.

Mr. Stockman now supports FTC jurisdiction and Mr. BROYHILL, as he said here, he says, "I feel the FTC has a legitimate role."

The real FTC is an organization which has often been out of control and which this Congress has often in recent experience risen up and said this FTC has usurped authority.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. LUKEN. Do I have a minute or two in opposition to the Broyhill amendment?

The CHAIRMAN. The gentleman can be recognized under that allowance if he wishes.

Mr. LUKEN. If I can have 2 more minutes I will wind up.

The CHAIRMAN. The gentleman is recognized for 2 more minutes.

Mr. LUKEN. The real FTC falsely claims credit for progress made by others. The most notable example is a right of professionals, lawyers, doctors, dentists, to advertise. The right to advertise is a first amendment right which was recognized with reference to professionals in Bates against Arizona in 1975 and even since then the FTC has been taking credit for it.

That is the fact and it is a first amendment right.

Now, remember, if the Broyhill substitute is enacted the FTC will continue to claim jurisdiction; in fact it will expand its claims of jurisdiction over State licensing and standards of professionals.

They give this authority in this amendment to roam freely in any case where it claims anticompetitive behavior.

□ 1550

Did you ever hear of the FTC getting into a case where it did not claim anticompetitive behavior? Of course, every case to the FTC involves anticompetitive behavior. And who is going to judge it? We are going to have to go to court to stop it. We are going to have a plethora of cases, or the FTC is going to roam without any restrictions whatsoever.

Finally, in a recent letter from the attorney general of North Carolina, he pointed out that in the eyeglass case that many, quite a number, of Attorneys General of the United States, including the attorney general of North Carolina, opposed the FTC in this matter. And I think there are many, many people who oppose the FTC in this kind of jurisdiction.

We admit that there is overlapping jurisdiction at the present time. But we say there is ample precedent for the Congress to establish the rules and to set forth that the jurisdiction in these cases is where it belongs. It may not be perfect, because these are organizations of men and human beings, and it may not be perfect, but they can do a far better job than the FTC.

So I say that the Broyhill amendment is worse than it was before, if we get the Broyhill amendment. So remember that. Those of us who are opposed to it say to you that the Broyhill amendment is much worse than existing legislation.

Mr. BROYHILL. Mr. Chairman, I yield myself the remaining time.

The CHAIRMAN. The gentleman from North Carolina (Mr. BROYHILL) has 2 minutes remaining.

Mr. BROYHILL. Mr. Chairman, I ask for a yes vote on the substitute that I have offered for the amendment that has been offered by the gentleman from Ohio. I want to reiterate and to repeat again that the substitute that I am offering clearly, for the first time, puts into law, clarifies the right of States to license professions, to regulate the professions. We put into this amendment the so-called State action doctrine, put that into the law, and specifically say that the States have the right to establish training, education, experience requirements for the licensed professions and the permissible tasks or duties which may be performed by professions. This has what all of the professions have been asking for.

But, at the same time, having said that, we reject the arguments that

have been offered by Mr. LUKEN in which he is asking for complete exemption from the Federal Trade Act. We say that the law should retain the authority of the FTC to go after price fixing, to go after boycotts, restraint of trade, and other anticompetitive practices.

A number of my conservative friends wonder why I am in this battle. To me, this is a sound conservative position. I ask for a yes vote on the substitute.

Mr. FLORIO. Mr. Chairman, I yield myself the balance of my time.

The CHAIRMAN. The gentleman from New Jersey (Mr. FLORIO) has 7 minutes remaining.

Mr. FLORIO. Mr. Chairman, I rise in strong support of the substitute offered by the gentleman from North Carolina. I think it has got to be made clear that representations that in some way the Broyhill substitute diminishes the protection that professions have from inappropriate action by the FTC is clearly not the case.

To give but one example: The concept of State action, which limits antitrust action in matters dealing with State law is as of now a somewhat ambiguous doctrine which evolves from case law. What we are doing is to codify and write into the law that concept so that there can be no ambiguity, that the FTC will be held to the measure of the law as we are writing it with the Broyhill substitute.

Likewise, that is the concept inherent in this whole FTC bill. Those people who came forward supporting exemptions for professions and other groups came forward with a list of potential abuses that they concern themselves about, saying that potentially the FTC could do this or that or the other thing; therefore, they wanted to be exempt from the whole law.

The approach that we have taken is to say, "Let us look at the specifics. We will curb the potential for abuse, and then there is no need for a specific exemption."

When they came forward and said that the concept of unfairness is too ambiguous, we are concerned that potentially the FTC could use this ambiguous concept and go off on a hunting expedition and do things that are inappropriate. Accordingly, we have written into the law the unfairness concept so that there is no potential for abuse of that concept.

Prevalency. Some came before us and said, "Well, we are concerned that a rulemaking proceeding may be undertaken on the basis of an isolated event." We said, "That is a legitimate concern; therefore, we are going to write into the law that you cannot go and undertake a rulemaking proceeding on the existence of one isolated or a few isolated events, you have got to have reason to believe that the practice that we are going to try to address is prevalent, that there is a pattern that should be addressed by a rule."

That has been the approach that we have taken in this law and that the gentleman from North Carolina attempts to embody in this amendment, the idea of dealing with specific potentials for abuse, so that no one then can say they should be exempted from the whole thrust of the law. I think that is a wise, cost effective, moderate approach to the FTC, and I would commend the gentleman from North Carolina for going forward in a truly conservative approach, in the best sense of the word, to deal with the preservation of the free market. Therefore, I would very proudly identify with this position.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina (Mr. BROYHILL) as a substitute for the amendment offered by the gentleman from Ohio (Mr. LUKEN).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. LUKEN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 195, noes 208, not voting 30, as follows:

□ 1610

Mr. WHITEHURST, Mr. PARRIS, Mrs. SMITH of Nebraska, and Messrs. ATKINSON, AKAKA, THOMAS, MICHEL, and SMITH of Iowa changed their votes from "aye" to "no."

Messrs. CONABLE, DENARDIS, BONER of Tennessee, and ZEFERETTI changed their votes from "no" to "aye."

So the amendment offered as a substitute for the amendment was rejected.

The result of the vote was announced as above recorded.

□ 1620

PARLIAMENTARY INQUIRY

Mr. BROYHILL. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BROYHILL. I inquire whether any time would be available under the 5-minute rule to further debate the Luken amendment which is pending.

The CHAIRMAN. The Chair will state that additional time would only be available by unanimous consent.

Mr. LUKEN. Mr. Chairman, is the gentleman making a request?

Mr. BROYHILL. No, Mr. Chairman, I have no request at this time, but I wondered about the 5-minute rule.

The CHAIRMAN. The pending business before the Committee is a vote on the Luken amendment.

The question is on the amendment offered by the gentleman from Ohio (Mr. LUKEN).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. LUKEN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 245, noes 155, not voting 33, as follows:

□ 1640

Mr. GOODLING and Mr. WATKINS changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. DANNEMEYER

Mr. DANNEMEYER. Mr. Chairman, I offer an amendment that is printed in the RECORD.

The Clerk read as follows:

Amendment offered by Mr. DANNEMEYER: Page 14, line 25, strike out "$66,080,000" and insert in lieu thereof "$60,838,000".

Page 15, line 1, strike out "$70,705,000" and insert in lieu thereof "$55,100,000".

Page 15, line 2, strike out "$75,654,000" and insert in lieu thereof "$54,600,000".

The CHAIRMAN. Under the rule, the gentleman from California (Mr. DANNEMEYER) will be recognized for 15 minutes, and a Member opposed to his amendment will be recognized for 15 minutes.

The Chair recognizes the gentleman from California (Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Chairman, I yield myself 4 minutes.

Mr. Chairman, when the authorization committee considered this reauthorization bill for the FTC we, like every authorization committee, considered the level of funding. One of the processes that has fascinated this Member from California in the 4 years I have been privileged to serve in this House, when serving on an authorization committee, is the process we go through in setting levels of authorization; that is, spending for a fiscal year.

I have served on the Energy and Commerce Committee for 4 years and each time one of those levels of spending is set I listen carefully for the leg-

islative justification for what additional programs will be forthcoming that would justify additional money to be spent.

When we in the committee considered the reauthorization for this bill there was little, in fact there was no evidence as to what they intended to do with the money that we have authorized in this bill beyond what the FTC asked for. That is why this amendment is being offered.

Very simply, in this fiscal year the bill before us provides for $66 million. The amendment would lower that to $60 million. In the next fiscal year the bill provides for $70 million. The amendment would lower it to $55 million. For 1985 the bill provides for $75 million and the amendment lowers it to $54 million, a modest reduction in authorization.

I want to point out to the Members that the level of authorization which this amendment proposes, if adopted, will be consistent with what the FTC asked for. It will be consistent with the budget resolution which we adopted in this House earlier this year. It is consistent with what the other body has adopted for fiscal year 1983, 1984, and 1985. It also happens to be consistent with what the administration asked for.

I think that is a pretty good track record. We are all concerned about the deficits staring all of us in the face and this amendment gives us a chance to reduce the authorization for the FTC in the current fiscal year by $6 million, in the next fiscal year by $15 million, and in the one after that by $21 million.

Again, I say this is consistent with what the FTC itself has asked for. That is all the money they say they need and I think it is a responsible act of stewardship for us to adopt this amendment to the level that is proposed.

I yield back the balance of my time.

Mr. FLORIO. Mr. Chairman, I rise in opposition to the amendment.

The CHAIRMAN. The gentleman is recognized for 15 minutes.

Mr. FLORIO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I must oppose the Dannemeyer amendment and its effort to reduce the level of FTC authorization below the reductions already called for in our committee bill.

The Dannemeyer amendment would return the Federal Trade Commission to funding levels comparable to those which the FTC had in the 1960's when it was criticized for its inactivity and timidity. This is unacceptable. In a time of economic distress, the public needs more protection, not less, from anticompetitive behavior and fraud.

Let us look at the figures.

The Commission is currently operating at a level of $69 million. Our committee bill reduces that by $3 million for fiscal year 1983 and the Dannemeyer amendment is another $5 million below ours, at $61 million. Mr. Dannemeyer says we should adopt the $61 million figure because it is the administration budget figure. But the President's Chairman of the FTC, Mr. Miller, told our committee that he believes, and I quote: "authorized funding levels should accommodate upward flexibility (for example, by 10 percent) * * *." If 10 percent is added to the Dannemeyer figure you have the figure that is in H.R. 6995. So I do not think it can be said that the administration opposes our authorization figure for fiscal year 1983.

After 1983, our bill simply increases the ceiling to account for inflation, without raising the effective level of enforcement at the Commission. The Dannemeyer amendment, however makes further major cuts, which, if inflation is accounted for, would cripple the Federal Trade Commission.

Perhaps the most immediate effect of the Dannemeyer amendment will be the closing of the FTC's regional offices. Congressman ROSENTHAL's Government Operations oversight hearings on this issue last spring reaffirmed that the best law enforcement work the FTC does is in the field. Those offices literally pay for themselves several times over in the consumer redress and civil penalty awards they win from FTC law violators all over the country. Yet the Commission has already determined that if it has only the $60.8 million to spend in fiscal year 1983, as specified in the Dannemeyer amendment, it will be necessary to close 4 of its 10 regional offices—in Boston, Denver, Los Angeles, and Seattle—and reduce the performance of the remaining 6 offices.

A vote for this amendment is a vote against the tens of thousands of consumers and businesses who contact the regional offices every year.

The proponents of the Dannemeyer amendment say that this result is required by budget austerity. That is a false issue. The budget of the FTC is already tiny compared to other agencies. Moreover, money spent for competition enforcement returns itself many times over in bringing to bear competitive forces to check inflation. I question whether the effort to slash the FTC's budget does not reflect a different agenda—the agenda of the special interests who have sought to destroy the Commission and have not been willing to come forward in a straightforward way and attempt to carve out exemptions as has been done here today. I urge the House to reject that agenda and support the committee bill.

□ 1650

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. FLORIO. I yield to the gentleman from North Carolina.

Mr. BROYHILL. I thank the gentleman for yielding.

Mr. Chairman, it is with a great deal of reluctance that I rise in opposition to the amendment offered by the gentleman from California, the gentleman for whom I have a great deal of respect for the kind of work he has been doing in budgetary matters.

I would point out, however, that in all legislation we must reach accommodation and compromise in order to bring legislation to completion. Certainly these figures fall within that description.

I would point out that the authorization figures that we have in this bill, the $66 million figure for 1983, is considerably lower than the authorization figures that are in present law. Present law calls for an authorization of $80 million for the fiscal year which just ended on September 30, a few weeks ago.

So we have made reductions in the authorization levels that the prior Congresses have provided for.

I might also point out that our figures are within the range of the recommendations that were made by the Chairman of the FTC, Mr. Miller, and that the $66 million figure for fiscal year 1983 I think is a moderate figure.

I would also point out that these are ceilings. We are not mandating these as expenditures. The Appropriations Committee, of course, will be making that final judgment. The Commission, of course, is continuing to operate in a cost-effective way. A number of changes have already been instituted at the Commission to enhance economy, as well as efficiency.

So I would urge that we stick with the compromise figures that we have in the bill, $66 million as being a compromise between that offered by the gentleman from California (Mr. DANNEMEYER) and that which is in present law.

Mr. FLORIO. I thank the gentleman.

Mr. LENT. Mr. Chairman, will the gentleman yield?

Mr. FLORIO. I yield to the gentleman from New York.

Mr. LENT. I thank the gentleman for yielding.

Mr. Chairman, the gentleman referred earlier to the penalties collected by the Federal Trade Commission.

It is my understanding that serious concern has been expressed that excessive penalties have been sought by the FTC and levied by the courts against some individual companies under the FTC Act. It is further my understanding that when the Senate Commerce Committee considered legislation reauthorizing the FTC, their bill, S. 2499, included a provision placing a cap on the total penalties the

Commission may levy against any individual or company who violates an FTC consumer protection order or rule.

I further understand that this committee, during its consideration of the FTC reauthorization bill before us, took note of not only the excessive penalty concern addressed by the Senate committee, but also the concern that some discrepancy has existed in the past in the evaluation of penalties for printed and broadcasted advertising messages which violate FTC rules or orders, such that the advertisements broadcasted to an audience of millions through radio or television have been considered a single violation, whereas each copy of a printed advertisement has also been considered a single violation. Since each violation is subject to a fine of up to $10,000, there is potential liability of millions of dollars if each item in a bulk mailing or each copy of a magazine distributed constituted a separate violation.

But unlike the Senate committee bill, the House committee included no provision in this bill to address these issues.

Mr. FLORIO. If the gentleman will yield, the gentleman is correct that the committee bill includes no provision on this matter, leaving the decision on penalties to the courts, as provided in the current law. But the committee does not recognize the concern that has arisen, and considers it a matter warranting added guidance by the committee. The committee's report takes note of the millions of dollars of potential penalties that bulk mail and magazine publishers could face each if each copy of a print ad were subjected to a maximum penalty.

The committee's report indicates that in seeking and imposing penalties, the commission and courts should consider, among other factors, the seriousness of the violation, the extent of consumer injury, and the size of the receiving audience.

Mr. LENT. What assurance does the gentleman have that the Commission will address the issue of penalties?

Mr. FLORIO. Well, the committee report specifically requests that the Commission take the necessary steps to insure that it follows a policy on penalties consistent with the committee's guidance in this area.

Mr. LENT. I thank the gentleman for his clarification of this matter and trust that the FTC will heed the committee's request in the future.

Mr. DANNEMEYER. Mr. Chairman, I yield 2 minutes to the gentleman from Iowa (Mr. TAUKE).

Mr. TAUKE. I thank the gentleman.

Mr. Chairman, during the time that we considered this legislation in committee, we took the opportunity to review the record that had been established during subcommittee and to review the request from the Federal Trade Commission. The majority of the Federal Trade Commission did not seek the level of authorization that is included in the legislation. They sought the level of authorization that is included in the Dannemeyer amendment.

Moreover, there is nothing that was provided during the course of the hearing record which gave any justification for increasing the authorization beyond the level of that requested.

It occurs to me that the changes that we have made in the Federal Trade Commission, attempting to limit its scope, were changes that were made because we believe the Federal Trade Commission was doing more than it ought to be doing. Because the Federal Trade Commission now recognizes that and because Congress has indeed followed through in limiting the scope of the Federal Trade Commission, it seems to me it is appropriate that we also hold down the authorization level. This is especially important at a time when we have huge deficits at the Federal level.

If we are going to make the budget process work, we have to make it work at every step of the way. This is the first step, the authorization step, and I think we should make it work now by only authorizing those levels which are necessary to carry out the work of the FTC as mandated in this legislation.

So I join with my colleague, the gentleman from California, in urging the Members to adopt the Dannemeyer amendment.

Mr. DANNEMEYER. Mr. Chairman, I yield 1 minute to the gentleman from Virginia (Mr. BLILEY).

Mr. BLILEY. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman from California for this amendment. It is small; perhaps many would say it is too small even for us to consider. But the principle is involved. Here we are all concerned with budget deficits, budget deficits that are far too high, with crowding out in the interest markets, which is keeping interest rates at too high a level.

Yet appropriation bill after appropriation bill comes in, and it is over the target. Here we have a chance to do what the Commission says is all it needs, and I think we ought to do it. I commend the gentleman from California.

Mr. DANNEMEYER. Mr. Chairman, I yield 4 minutes to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. Mr. Chairman, I rise in support of this amendment.

I would like to ask Members this evening to recall back in the spring of this year, when we were all concerned about trying to write a budget that had a deficit that we were proud to take back home to our constitutents. The administration proposed for the Federal Trade Commission budget figures in fiscal year 1983 of $60 million; in 1984, $55 million; in 1985, $54.6 million. The first time around we did not adopt a budget because nobody wanted to vote for a budget that had over a $100 billion deficit. After not having a budget for 3 weeks, we were able to put together a bipartisan compromise that brought the deficit down to a level where we could get a majority vote.

In trying to put together that compromise, we reduced the level of funding for the Federal Trade Commission implicitly in our outline from $60 million down to $46 million and kept it at $46 million for 3 years. Therefore, Mr. Chairman, we are not here today trying to bring spending back into the level of the budget.

□ 1700

We are not, Mr. Chairman, here in this amendment trying to bring the authorization for FTC back in budget. The Dannemeyer amendment will still carry a higher level of funding than we adopted in the bipartisan recovery budget and is now the binding budget on this Congress.

What it does, however, while it does not bring us back into budget it says do not give the Federal Trade Commission more money than they have asked for. If we are serious about controlling spending, it seems to me perfectly reasonable at a time that we are trying to limit the power of the Federal Trade Commission, when this body has just voted to reduce its authority, when the clear mandate of the American people is to force regulatory reform, when we have gone years without authorizing the Federal Trade Commission because we disapproved of what it was doing, I think the time has come now when we are talking about a $150 to $200 billion deficit to take this little step to show that here in the fall we have not forgotten the commitment we made in the spring to try to live within our budget.

And I ask my colleagues, if we are not going to hold the line on spending on the Federal Trade Commission, then where are we going to hold the line on spending?

I think it is imperative that we adopt this amendment and clearly set a principle that we are going to try to live within the budget we adopt, that we do not set out these budgets just to sell them back home, that we set them out to live on them in Washington.

I believe the issue here is that we have people who want to force the Federal Trade Commission to do more regulating, to undertake more studies, and to undertake more intervention than the Congress wants them to undertake or that they have requested to undertake.

So I urge my colleagues to vote for this amendment, not to bring it back into budget, this will not do that, but at least do not force them to spend more than they have asked for, bring it back to the level they requested which I repeat is still substantially above the level which we adopted in the bipartisan recovery budget.

Mr. DANNEMEYER. Mr. Chairman, I yield back the balance of my time.

Mr. FLORIO. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. DANNEMEYER).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. DANNEMEYER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 241, noes 158, not voting 34, as follows:

□ 1710

The Clerk announced the following pair:

On this vote:

Mr. Breaux for, with Mr. Yates against.

Messrs. ANDREWS, DERRICK, and SHELBY changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

□ 1720

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. BROWN of California, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6995) to amend the Federal Trade Commission Act to extend the authorization of appropriations contained in such act, and for other purposes, pursuant to House Resolution 587, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

INSTRUCTING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 6995, FEDERAL TRADE COMMISSION AUTHORIZATION ACT OF 1982

Mr. FLORIO. Mr. Speaker, I ask unanimous consent that in the engrossment of the bill (H.R. 6995) to amend the Federal Trade Commission Act to extend the authorization of appropriations contained in such act, and for other purposes, the Clerk be instructed to make technical and conforming changes in section numbers, punctuation marks, and cross references.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

GENERAL LEAVE

Mr. FLORIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

PERSONAL EXPLANATION

Mr. FOUNTAIN. Mr. Speaker, on rollcall No. 402, the Labor, Health and Human Services appropriation bill, I was unavoidably detained and could not be present. I would like the RECORD to show that had I been present I would have voted "aye."

COMMUNICATION FROM LEO CHARLES INGLESBY, JR.

The SPEAKER pro tempore (Mr. MURTHA) laid before the House the following communication:

SILVER SPRING, MD.,
December 1, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Please be advised that I have been subpoenaed to testify before a grand jury in the U.S. District Court on December 2, 1982.

Respectfully,
LEO CHARLES INGLESBY, Jr.

SAMURAI ECONOMICS SLICE TIES OF GATT, FREE TRADE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. GAYDOS) is recognized for 60 minutes.

GENERAL LEAVE

Mr. GAYDOS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today, including my remarks concerning members of the Pennsylvania delegation who are concluding their service in the House of Representatives.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. GAYDOS. Mr. Speaker, as this Congress assembles for its last session, we expect to consider ways of creating jobs for Americans put out of work by the recession while day in and day out a trade war kills jobs and companies and contributes to the recession.

A recent dispatch from the Japanese front of the Atlantic and Pacific trade war illustrates how jobs are still-born. And it may have disclosed the real barrier protecting the Japanese market from American-made goods.

This barrier is starkly shown by the words of an important executive of Nippon Telegraph & Telephone, who told the Wall Street Journal that:

> The Japanese are a people that can manufacture a product of uniformity and superior quality because the Japanese are a race of completely pure blood, not a mongrelized race as in the United States.

Mr. Speaker, this is the ultimate nontariff barrier. It cannot be negotiated away. And it does not even violate the general agreement on tariffs and trade (GATT).

The man who said this is Toshio Soejima, the Deputy Director of Engineering for the Government's telephone monopoly. What he believes is important because there is every chance he has a lot to say about what NT&T uses or ignores.

The NT&T market is one U.S. manufacturers long have wanted to crack. Although it is supposed to have been made more open, not much business has been done. In fact, a major American company may have lost ground because of the opening.

The company, Motorola, worked long and hard for a chance to sell pages through NT&T. They eventually won permission. Not long after they began selling there, a brand new Japanese firm entered the market with—guess what?—pagers. They sell in the United States at about 30 percent less than in Japan and at about 50 percent of Motorola's price. They have 10 percent of the U.S. market.

In addition, NT&T is a bulwark of cartel-like government-subsidized research that they are counting on to give them a market-dominating lead in computer technology. Attaining such domination is one of their official government targets. At NT&T their custom has been to buy Japan.

In considering custom and barriers and Mr. Soejima, there are two things to keep in mind. First, Japan's intense competition for good government jobs means there is every chance that he represents their best and brightest. Second, understand that the pressure for conformity there could mean he is only reflecting the unwritting policy of his superiors. So what Mr. Soejima thinks may be of exceeding importance.

Furthermore, his may be only a more outspoken way of saying what their professional negotiators mean when they talk of cultural differences to explain away a closed market; or when they point to a weak import habit; or when they note that Japanese consumers are very demanding.

To me, what Mr. Soejima thinks looks like an extreme manifestation of economic nationalism. In his book, "MITI and the Japanese Miracle," Dr. Chalmers Johnson touched on economic nationalism and its place in Japan's economy during the 50 years it took to make the miracle.

Dr. Johnson rightly assigns MITI—the Ministry of International Trade and Industry, and its predecessor agencies, including the munitions ministry of World War II—the role of economic general staff. MITI built and pointed the Japanese juggernaut and still maintains it.

Around MITI, particularly during the growth years, they worried a lot about what they called—and I quote—"The Invasion of American Capital" and the possibility of an American-owned, or dominated, Japan. They never let it happen. They put barriers in place.

Dr. Johnson reported that, "Japanese analysts usually characterize the basic outlook of MITI officials as 'Nationalistic' * * * they like to use such expressions as joi and iteki." Mr. Speaker, joi is the expulsion of foreigners; iteki is barbarians. One former trade promotion director preferred the even more explicit term keto; keto is a particularly unpleasant foreigner, a hairy Chinese.

Dr. Johnson noted that, "they see their function in life as the protection of Japanese industries from 'foreign pressure.'"

In Japan, the bureaucrats call the shots. The head of MITI during the years they laid the foundation for today was a man revered as—and agains I quote Dr. Johnson quoting the Japanese—a "samurai among samurai, an official who uses force." He was seen as undisputed leader of the "nationalistic faction."

In fact, one postwar Prime Minister felt his economic bureaucrats were—and this is another quote from the Japanese—"dangerously national socialist." You see, industrial development in Japan took as a starting point the German miracle of the 1930's that led to the tragedy of the 1940's. The same old-boy network at MITI that tended prewar industrialization cranked up the same old economic machine after the war. They could not be purged. They worked the miracle. Their heirs still run the show.

At MITI specifically, and around Japan, they saw—and act as if they still see—a lot of sense in the postwar observation that Dr. Johnson attributes to one of the miracle workers.

They say in Japan, "It is much harder to nullify the results of an economic conquest than those of a military conquest."

In Japan, they have a different perspective on economic theory. Dr. Johnson credits them with inventing the concepts of—again, I quote the terms directly—"excessive competition" and "industrial policy." Excessive competition is discouraged and industrial policy encompasses the shielding of strategic industries.

And here, Mr. Speaker, are two key summary observations from Dr. Johnson's book. The book deals with the forging of an economic theory other than that preached by Adam Smith. It deals with what I call samurai economics.

According to Dr. Johnson, "Japan's political economy can be located precisely in the line of descent from the German historical school—sometimes labeled economic nationalism * * * or neomercantilism. This school is not exactly in the mainstream of economic thought in English-speaking countries."

He notes that, "industrial policy is a reflection of economic nationalism * * * giving priority interests to one's own nation * * * a recognition that the global economic system is never to be understood in terms of the free competitive model."

In the name of Adam Smith and other cherished illusions, Mr. Speaker, world trade as seen from Japan is never, never, never to be understood in terms of the free competitive model.

Dr. Johnson's study is thorough and informative. The time available to me now does not allow discussion of even the hundredth part of it. One of his conclusions is that Japan's economy now is fully liberalized and open to competition, that they are much nicer fellows now. I disagree. I think recent events dispute it. And I think I could find executives at Motorola and across industrial America who also would disagree.

Nevertheless, they still cherish this industrial policy and are pursuing it in high technology; and if Samurai economics does not understand free competition, we had better begin to understand Samurai economics. And we had better find some way to deal with it.

Call it modified facism, call it state capitalism, call it a plan-rational economy as Dr. Johnson does, call it what you will, Samurai economics mobilizes the resources of a nation behind barriers and when they are strong unleashes them in ways that lead to economic conquests.

Remember, Mr. Speaker, the term economic conquest is theirs, not mine; it is from their rules of the game. But if you want an example, look at the 2,400-employee plant Ford recently closed in California where imports have about 50 percent of the market. The Japanese cars among them come here with an export tax forgiveness of up to 22.5 percent. This subsidy gives a cutting edge in the market. And it offends GATT no more than Mr. Soejima.

But my reason for speaking today is not a step-by-step discussion of the miracle, or even to attempt an analysis of Japanese attitudes. It is merely to offer some background.

This background is useful in considering the trade war because every developing nation in the world wants to climb the ladder to become an industrial nation; and they are copying Japanese tactics. Why not? There is no disputing their effectiveness.

And the industrial nations that fear falling off the ladder have turned to subsidy and barrier to keep their place.

And all of them—the Europeans, Japan, Asian nations imitating Japan, other developing nations such as Brazil, the third world—focus on the U.S. market and invoke the American responsibility to take their goods.

My point is that virtually no nation of the 88 involved in the GATT ministerial meeting in Europe last week understands the global economic model in terms of free international competition—no nation except the United States.

As one Michigan-based management consultant told the Christian Science Monitor last September, "The U.S. industrial base will be so eroded that the only thing we will be exporting will be free enterprise ideology."

Pursuit of pure ideology is one of our faults. This has been characterized by Gordon Hurlburt of Westinghouse power systems as a "self-destructive virtuousness" that is determined to throw away whatever trade advantage the United States may have.

Mr. Speaker, there is no more demand for free enterprise ideology in international trade today than in Japan; Samurai economics are carrying the market.

"Everybody is trying to export more and import less," said a former U.S. trade official in explaining the difficulties leading to the GATT Conference.

I think no lessons are lost on them. They look at Japan. They look at this market. And they see the part this market played in performing the miracle. And for growth or stability, the goods come washing ashore on waves of subsidy; the same goods our people make, or used to make.

As was noted in a Pittsburgh Post Gazette analysis, reprinted from the National Journal, the GATT Conference was convened to deal with a contradiction: A system of world trade designed in hopes of promoting world economic stability seems to be doing just the opposite.

But samurai economics have turned the system into something other than what the designers had in mind. Designed to promote the free exchange of goods according to the idea of comparative advantage, it has come to be looked on as an international program of income redistribution. Some in the industrial world, some in the developing world, and much of the Third World look on it as entitlement.

Why it is even possible to read of Europeans scolding the United States for not inflating its economy so goods can move; or of others urging America to be more responsible.

As demonstrated by the automobile export subsidy and by Mr. Soejima, GATT is difficult to offend. The Post Gazette analysis looked on it as a set of agreed-to rules without effective enforcement. The existence of the rules was said to have fostered a climate of self-restraint that held together world trade. It was an honor system, a gentlemen's agreement.

But now everybody wants to export more and import less. And the victims in the United States try to enforce the gentlemen's agreement with our trade law, and things are so bad the system is almost overwhelmed.

You see, the precedent setting steel subsidy and dumping cases against the Europeans are not the only complaints that have been made. The International Trade Commission is having the busiest year ever. And the commissioners are faced with allegations of subsidy and dumping in almost every sector of the ecomony.

Meanwhile, our trade experts went to the GATT ministerial last week with the announced goal of averting a trade war.

Mr. Speaker, if the fault of generals is that they always are preparing to fight the last war, America's trade experts have a similar failing: They always are trying to prevent the outbreak of a trade war that is well underway; this is one we are losing. This is true over a long span of time, as one analyst noted, we tend to be idealists.

As for the Conference, the positions leading up to it were as confused as any battleground. The United States and the European Common Market wanted Japan opened—this is the third attempt to get Japan to open up. The United States has agricultural goods it needs to export. The Europeans are subsidizing agricultural exports.

On the agriculture question, the president of the Common Market said, "we will not accept any measures that jeopardize the essential interests of our people." I think he meant they are not going to quit subsidizing.

This is another instance of Europe doing what Europe must do. But I was surprised to hear that the president, a Dane, said it because the sentiment is very French.

But the French Trade Minister had something else to say about GATT; he said, "It is outdated before it starts because all that will be talked about is the philosophy and the trade of our grandfathers." The French wanted to talk about the neo-protectionist Americans and how we are causing them so much trouble with our economy.

France is the chief provocateur of European surliness, which does not offend GATT either.

At this point I would like to amend an observation of Napoleon, who led the French, and say, it seems to be an absolute principle of the French that every blow perceived must be returned—and sometimes they must strike first. So the French are putting up barriers that have a Japanese flair for ingenuity and innovation. For example, imports of some kinds of video consumer electronics have to clear through a town far removed from the ports; and it is the only place they can clear. France is backing the develop-

ment of its own enterprises in some of these goods.

Meanwhile back at GATT, the United States also wanted to talk about removing some barriers to trade in services and investment. Developing nations opposed it. Why? They did not want to be dominated by outsiders. It is not only the Japanese who worry about an invasion of American capital.

By the way, the developing nations wanted to keep their preferences in the U.S. market.

The leader of this faction was Brazil, according to accounts out of Geneva. So it is not unfair to look at how Brazil honors the gentlemen's agreement. Brazil recently closed its borders to imports except things it needs. It wants to export more. Its steel industry was built with U.S. assistance, including Eximbank loans, and yet Brazil was named in the recent subsidy cases. Brazil is one of the countries whose trading tactics are reducing the United States to supplier of the residual world soybean market. Brazil was encouraged and assisted as a soybean producer by Japan to break a dependence on the United States. And it was Brazil last week that ran a full-page ad that cost at least $20,000 in the Washington Post urging Congress to overturn a tariff increase of fuel ethanol.

Napoleon never led the Brazilians, but he described this situation when he said, "If you wish to study men, learn how far their patience can stretch."

The GATT meeting was not a peace conference to avert a trade war. It was an attempt to get a cease-fire in a war going full tilt. It is too early to know what will happen, if anything, as a result of the Conference. It may take years even to get their attention pursuing our traditional idealist tactics. Even commercial diplomacy requires more than a rousing ideological argument and saying please.

Meanwhile, they are calling the industrial Midwest the rustbowl in this recession; it is the successor to the dustbowl of the 1930's Depression.

The Wall Street Journal looked at the rustbowl this month and found that many industrial leaders fear a bad year in 1983 will destroy their companies. Two were quoted anonymously, probably going unidentified to avoid damaging their companies in the market. An executive for a firm that makes transportation products said, "If the the economy does not turn next year, we are not going to be here." And the chairman of a machinery company said, "The truth is, if orders does not pick up soon, we are gone." The executive surveyed for the survey almost universally cited a collapse in orders, and exports.

Respected analysts say that trade barriers and tensions are popping up because the world-wide recession has made everybody sensitive to it.

But equally respected analysts have said that the recession is due in part to trade—to predatory trade, to samurai trade that as a policy of government exports more and imports less.

I agree with the second bunch.

More and more opinion leaders are beginning to agree with the second bunch, even if the Japan lobby here calls them nasty protectionists who are too brutish and greedy to understand more sensitive and vulnerable cultures like Mr. Soejima's.

One clear-seening leader is William L. Givens, the chairman of Twain Braxton International, Inc., of Boston. Considering the international in his firm's name, and its location, you could expect Mr. Givens to have some rather traditional theories on world trade. Mr. Givens said a lot worth reading in his recent essay for Business Week. But his conclusion went right to the point.

He concluded that, "we must recognize that free trade, while a laudable concept, is hopelessly inadequate as a trade policy." The first part of the essay dealt with the goals and tactics and effects of samurai economics.

And now the 97th Congress is here in its last days to consider, among other things, a user tax. We will be asked to impose a 5-cents-a-gallon gasoline tax to finance a program of road and bridge repair and other improvements that may create 320,000 jobs.

The roads and bridges need repair. They are capital investments that will benefit the economy. And such a program would help some basic industries.

But the idea needs lots of study, Mr. Speaker.

First, we may lose more jobs to samurai economics this year than this program would create; and we can pass the bill and then go home and watch unemployment move past the 10.4-percent level at which need gave rise to the idea of having a jobs bill now.

Second, unless we adopt and enforce buy American provisions, somebody is going to swoop in with subsidized or dumped goods and run off with the 5-cents-a-gallon tax our people will be forced to pay. Why, we could face the possibility of seeing Americans taxed in the gas they use in looking for work only to finance jobs in Brazil or France. We should exercise care.

And last, the tax is in the wrong place in the wrong proportions. Family cars do not do the major portion of the damage we are going to repair, but their drivers will contribute the most. If it is a user fee, it ought to be made more commensurate with use—trucks should pay more.

Settling the trade war will do more for employment than jobs bills, but dealing with it will have to be a matter for the 98th Congress and probably the 99th.

But, if we will only reach out, the 97th has an opportunity to do something about jobs and to get a start on neutralizing samurai economics at the same time.

We have not even got their attention yet.

What we could use is a strong vote on the automobile domestic content bill or on a quota bill. They will notice.

And it will show the Soejima's of the world that even mongrels are prepared to bite as well as bark; it will declare our patience is not without limit.

□ 1750

TRIBUTE TO MEMBERS OF THE PENNSYLVANIA CONGRESSIONAL DELEGATION WHO ARE CONCLUDING THEIR SERVICE IN THE HOUSE OF REPRESENTATIVES

Mr. GAYDOS. Mr. Speaker, I would like to conclude my special order with mention of some of our colleagues who are leaving. As the stated dean of the Pennsylvania delegation, it is my very pleasant duty to make some remarks regarding some of our colleagues who are leaving this Congress and to let the record be clear regarding our colleagues and how sincerely we as a delegation are going to miss them.

HON. DON BAILEY, 21ST DISTRICT OF PENNSYLVANIA

One of our colleagues who is leaving after serving here for 4 years is my good friend DON BAILEY, who represents the 21st District of the Commonwealth of Pennsylvania. This district is located near the Pittsburgh area and near the large city of Greensburg, in Westmoreland County. DON BAILEY came here roughly 4 years ago, 37 years of age. At that time he was the most decorated Vietnam war combat veteran in the House of Representatives. When I say that, Mr. Speaker, I say it without reservation. He earned a Silver Star, two Bronze Stars with V for Valor; the Army Commendation Medal with V for Valor; Bronze Star for Meritorious Service; Army Commendation Medal and Air Medal for Combat Assaults. When putting a record together for Vietnam, you will have a lot of difficulty coming close to that record.

DON BAILEY served in this House for two terms. In his first term he served on the Armed Services Committee, and on that committee he was so attentive and so instrumental and so effective. You can tell why: Because of that glorious war record. And sometimes he would speak on the floor with tears in his heart, and we would have our own informal discussions off the floor during which his sincerity would ring true and clear. He asked no quarter and gave no quarter when it came to Vietnam and what they stood for and his support of the Vietnamese concept. That was the DON BAILEY that I got to know so well, because he served also during that first 2-year

period on the Education and Labor Committee. When he was on the Education and Labor Committee he was the most attentive member there, and he regularly attended the committee meetings. He joined in the active questioning of the witnesses, and he made this democratic form of government of ours work through the process of questions and answers and the committee system and the participation of individuals and citizens actively before the committee, where the committee then would be exposed to, yes, the common man's knowledge, and also, yes, the expert's knowledge in whatever subject matter we were dealing with.

So I can say, as chairman of the Subcommittee on Health and Safety of the Committee of Education and Labor that DON BAILEY learned well and performed brilliantly. He was effective. I can say, again without reservation, that I am going to miss him. I have a great respect for this body and I believe that there are superior individuals and others, and I always considered DON BAILEY a superior committee member and a superior Member of this illustrious body.

In his second term, the second 2 years he served on the Ways and Means Committee. That is quite an honor for a young Member. When he was elevated to that committee, I think it was because of his past performance which, in a measureable part, helped him in receiving the respect, support and elevation from his colleagues.

□ 1800

Put him on the Ways and Means Committee, with all of its ramifications, the inherent importance of that committee, the long hours that they work.

I can tell the Members about his actively participating in the Steel Caucus, which is a voluntary group of members who have some direct or indirect interest in the steel problems of this country. DON BAILEY was an active member, and ultimately a member of the executive committee. And his counsel and his persistence in helping us on the floor of the House, in special orders, in general debate, and particularly in formulating in that caucus with our witnesses and with close cooperation of the AISI and unions, and all of their diverse interest in the steel industry, it was DON BAILEY who showed his leadership, probably what he learned in Vietnam, what he developed and nurtured in Vietnam he brought here to these hallowed Halls in this outstanding body and permitted like the Constitution envisioned many, many years ago, a couple of hundred years ago, that this body would perform, asking good solid questions and participating with witnesses.

When he was on the Ways and Means Committee, DON was particularly instrumental in and interested in and helped pass and support and promulgate and helped forge into legislation many particular areas of interest, particularly some of these—I cannot mention them all—some of these are very important.

He worked always on behalf of the veterans, particularly his efforts to insure the recent memorial, opened recently here in Washington, that it would display a decent inscription with the American flag. Do you know it is hard to believe there was great controversy down at the Vietnam Memorial as to whether or not an American flag should be displayed. You wonder about it at times. And you wonder where is the rationale. It was DON that rose to the occasion and led the fight. He said there is going to be a statue down there and an American flag. I am very happy to say, and again in accordance with what he has done in the past, it did come to pass, and it did happen.

He has always been a supporter on behalf of the veterans in seeking VA cooperation on agent orange assistance, which at one time was supposedly considered a fantasy, when we were fighting the Vietnamese conflict, and agent orange was dropped to defoliate the areas, large amounts of it, everybody laughed and said it was a harmless insecticide. But scientific proof later on indicated the viciousness of the element, and the long-standing results from it and the effects from it. And DON never did let that pass.

Another little known effort for which DON was recognized by President Carter, and he has in his possession a Presidential pen from the signing ceremony for his successful efforts on the so-called energy regulations for insuring an extremely high percentage of American content in automobile fleets required to meet American environmental requirements. These provisions have meant thousands of jobs to many Americans and will preserve many jobs in the future.

Perhaps one of the most important achievements of DON's success was in preventing the implementation of a general tariff negotiating authority, which is in section 124 of the 1979 Trade Act, which the steel caucus was so forceful in promoting and he, by his actions, prevented from being used to bargain away minimum requirements needed by American industry to remain competitive in the face of unfair dumping practices from abroad. And that has come into play time and time again, which goes back and indicates his foresight and his intuition.

He was also the sponsor and author of amendments in the Ways and Means Committee to the Caribbean Basin Initiative in which he believed thoroughly and which was passed by the subcommittee and which will insure that act does not interfere with the jobs and needs of Americans, the 350,000 Americans it will affect in this country.

DON was very active in tax changes, in legislation achieving many different changes in the Economic Recovery Tax Act of 1981. These changes represented the single largest basic industry item in the original tax changes enacted 2 years ago. That was in there where he was the leader, where he made his position known and actively pursued and gathered support for that legislation.

An additional part of the recent tax changes and something which was not very well publicized in the news media involved some unemployment competition fund changes that were greatly beneficial, particularly to the needs of Pennsylvania, and all of their problems, in fact saved Pennsylvania taxpayers more than $150 million in taxes in the last 2 years alone.

With the help and direction and cooperation of the chairman, the gentleman from Illinois (Mr. ROSTENKOWSKI), chairman of the Ways and Means Committee, our colleague, DON BAILEY's amendments to the fund were and are written into the law and part of the law today.

The unemployment compensation benefits for ex-service members, recent changes by the administration, had denied benefits to ex-service members who upon reentering the job market found they had nowhere to turn after they had served their country honorably and well and dangerously. Congressman BAILEY's provision recently signed into law by the President provides unemployment compensation benefits to these ex-servicemen.

He was the cosponsor of the Higher Education Assistance Act, and was particularly instrumental in helping to enact those provisions which provided help to senior citizens.

During his service on the Armed Services Committee he was a member of a special subcommittee project on readiness which was responsible for streamlining outdated Department of Defense procedures and making recommendations on readiness which not only will save money but will greatly enhance this country's combat capabilities.

I remember DON BAILEY's service on the Ethics Committee, and all that entails, the long hours—a lot of the Members, my colleagues in this House, do not know a member is forced to put in on the Ethics Committee. And it is a very grueling task, and one that has great emotional connotations, primarily because you are judging your peers, your colleagues, and it is very difficult to do that under certain circumstances. But somebody has to do it. Self-criticism and internal stability in

the House demands it, and it is a very difficult committee to serve on, and he put his time in back there.

Back home in his own district, next to mine, he was responsible for authorizations which insured the continued employment of fossil and nuclear energy projects in the Westinghouse facility. He was instrumental in assuring the approval of the EPA for Wheeling Pittsburgh Steel, virtually made the survival of the company.

We just hope we have enough time to make sure it survives.

He was responsible for bringing a new glass tower up to Jennette. He worked closely with local officials involving problems of that airport up there.

I think I have taken maybe a little more time than I expected. But when you start talking about a colleague, and particularly about a colleague of DON BAILEY's stature, and the closeness as personal friends we enjoyed throughout the last 4 years, sometimes time does run away with you.

I tried to hit the highlights of a very brilliant career, one which would have been an extraordinarily brilliant career had DON continued on in this body. I do not know what DON is going to do but I know he is going to be active on the scene. We expect to see him active in Washington, back home. He tells me he will be practicing law. I hope he will continue. He probably will do that, because he mentions that is what he is considering.

I know one thing, that the legal profession in Alleghany County and the Pennsylvania Bar Association will have an active member and will have a member that is going to enhance the standing of the local bar association. I can tell my colleagues that being a lawyer myself DON has a good legal mind.

One thing I have to say personally about DON BAILEY and this had taken place over the last 4 years on many, many informal occasions, I have to say there is not one vicious bone in his body.

Second, that DON BAILEY never, never compromised an issue, and I never, and I repeat, never ever had a question as to his integrity, his honesty, and dedication to his work. And you can say that about some people as a matter of passing, but I am saying it with the utmost sincerity I can muster. That is the kind of man he was, a good Congressman. I know he is going to be a good citizen, a good professional in whatever he does.

Mr. Chairman, if I may, I would like to mention two other of our colleagues.

□ 1810

HONORABLE ALLEN E. ERTEL, 17TH DISTRICT OF PENNSYLVANIA

Mr. Speaker, if I may, I would like to mention two other of our colleagues. One is ALLEN ERTEL.

ALLEN ERTEL ran for Governor of Pennsylvania. He came within a whisker of winning. When ALLEN ERTEL ran for Governor, it was not the most popular position to seek in the Commonwealth of Pennsylvania because the incumbent Governor at that time was presumed to have a victory in his grasp already and to foresee a victory which would be a runaway victory; but ALLEN took on the challenge. He took on the challenge where he could have won his congressional seat very easily and could have been back here today and this next January; but he did not do it because he had a higher calling. The party called and needed an active campaigner. ALLEN ERTEL, because of the geographical location of his district and where he was born and his past activities as a lawyer and as a very effective district attorney and a good Member of this House for 6 years, all these things dictated that ALLEN ERTEL be the gubernatorial candidate in the Commonwealth of Pennsylvania. He entered it against a well-financed Governor, with a limited number of funds available. He toured the whole State. He brought integrity to the Democratic Party and hope and vision.

ALLEN ERTEL was a good candidate. As the campaign progressed, ALLEN ERTEL turned into an excellent candidate. If he had had a few more weeks and a few more dollars, I think the results might have been different.

But the ALLEN ERTEL that the chairman and I know and worked with was a man again of high integrity, not the fact that he was a former district attorney, but the fact of the ALLEN ERTEL we grew to know.

ALLEN was always forthright in his analyses. He would not attempt to try to color an item of controversy even though it was unpopular. He would not make that attempt. He was very blunt in what he said and how he said it. Maybe in some circles that might have lost him some friends, but I think in the last analysis that is the only way to be—truthful, arm's length, straight from the shoulder, that was the ALLEN ERTEL that we served with in the House.

He was very outspoken at times, very diplomatic at times and very undiplomatic at times; but one thing, ALLEN ERTEL was a man of integrity and an effective legislator. He brought all his experience with him from his past practice as a lawyer and as a district attorney and brought it here to the House.

I say as I said as far as DON BAILEY is concerned, that ALLEN ERTEL's leaving is going to leave a vacuum here in the House as far as the Pennsylvania delegation is concerned.

He moved his family down here. He was part of the Washington scene. He was a real true, accomplished, effective legislator, not a part-time legislator. He could not do business that way. He had to do it full time or not at all. That was proven by the fact that when he was elected originally the first time when he was sent from the central part of Pennsylvania up around the Harrisburg area, the first time in some 35 years that a Democrat of the same party persuasion of mine, the first time that that area sent to this House a Democrat. That is telling you something. It means something. It is important. It shows that a man in a very heavily oriented and registered Republican area can put his character on the line before the public and change all those odds and come down here for three successive terms.

When he ran for Governor, his vote was overwhelming in that area and in many other parts of the State.

So ALLEN ERTEL was an excellent legislator. We are going to miss him here in the House.

Speaking with him today, I told him, "I hope you do not make your presence scarce and that you will come back to visit us and participate some way, somehow, directly or indirectly with the processes of this House which is so important."

HONORABLE JOSEPH J. SMITH, 3RD DISTRICT OF PENNSYLVANIA

We also have with us our good friend, JOE SMITH, who is leaving after serving one term. JOE had experience up in the legislature as a State Senator and a former legislator up in Harrisburg. When he came down to Washington, he brought the bulk of that experience with him, all those years in Harrisburg, the trials and errors and tribulations and the uniqueness that he gained, which he only gained through experience and through the hard knocks of actually casting a yea or nay vote on most controversial issues.

He brought all that ability and experience down from Harrisburg, joined the Pennsylvania delegation of this House and in doing so he moved in a most credible way.

I was proud of JOE SMITH, as I was of the others. He was a team player. He served on a good committee and he was always there for the meetings. He was always there when we had a Pennsylvania delegation meeting, whether it was informal or formal. He was there when we needed him most, when we had to have the votes in a group. We needed him on the Steel Caucus issues, as we did DON BAILEY, who served on the Steel Caucus with JOE SMITH. When we needed him, he was there. He supported us financially.

He came from an area where politics is almost inherent in every man, woman and child. That is Philadelphia. Everybody is a politician one way or another in Philadelphia and that is what JOE brought here to this House—

good integrity, good practical hard-nosed political experience.

So as dean of the delegation, it is my most enjoyable duty and my personal privilege to appear here to say these few remarks about three great men, three good Americans, three effective legislators that are not going to be with us come January.

I want to say from a personal standpoint that it is always a pleasure to work with them. I know I say this on behalf of the chairman that sits here today, that it was a pleasure to work with these gentleman in all respects. They were cooperative. When we had Pennsylvania Day, these three were in the forefront in cooperation, raising money, actively participating in making Pennsylvania Day an effective day among our colleagues here and among the city residents of this great city.

I do not know what our new people are going to be like, our new elected representatives. I am sure they are men of integrity, too. I am just speaking from my own personal knowledge and as the delegation has imparted to me their feelings about these fine gentlemen.

I know there are going to be a lot of nice and truthful things said about these three colleagues of ours by other Members of our delegation.

● Mr. MURTHA. Mr. Speaker, it is unfortunate that the next Congress will not have the services of Congressman DON BAILEY.

Over the last 4 years, DON and I worked side by side on a number of key issues involving western Pennsylvania and concerns we shared. It is unforunate that through political reapportionment we had to run against one another in the primary election this year.

DON was a prime spokesman in Congress for the needs of our veterans, particularly the Vietnam veteran. He introduced innovative legislation in an effort to rebuild the industries of the Northeast. He worked with the Pennsylvania delegation on the Ways and Means Committee to promote ideas and legislation to help the State. He was always conscious of the needs facing the individual worker and the families of western Pennsylvania.

DON always stressed constituent service, and through his workshops and local offices stayed in touch with the citizens of Westmoreland County and served as their advocate in Congress.

Westmoreland County has been fortunate in recent years to be represented by men like JOHN DENT and DON BAILEY. Now that Congressman JOE GAYDOS and myself represent the county, we will have to continue to work hard to live up to the standards of these men.

I know DON will be very successful in his pursuits, and I certainly join in wishing him well.

Certainly Congress will miss Congressman JOE SMITH next year who was unfortunately the victim of reapportionment which required the State to lose legislative seats.

I had the honor of serving with JOE in two different legislative bodies. JOE began a career in the Pennsylvania State Senate while I was still in Harrisburg, and I was most pleased when he joined us in Congress.

JOE has had an admirable career in which he has been a fighter for his constituents and for the city of Philadelphia. As a member of the Armed Services Committee he has been vital to Philadelphia in working for projects affecting the Philadelphia Navy Yard and bringing other Federal funds into the area.

Possibly the element of his career that is most indicative of the kind of person JOE SMITH is, is his ability to work with all sections of the political world in Philadelphia, and to work for all his constituents. He has that ability because JOE SMITH cares about people, cares about helping people, and cares about doing things that are right for the people and area he represents.

JOE SMITH'S service in Congress has been in the highest tradition of this body, and I know he will continue to work for those principles and beliefs, and I certainly join in saying thank you and wishing him well.

In the next Congress I will miss Congressman ALLEN ERTEL as a personal friend, and we will all miss him for the skills he brought to the House of Representatives.

Over the past few years ALLEN and I have worked together on a number of highway projects to help the State of Pennsylvania because of his service on the Public Works and Transportation Committee. This year I was very pleased to join in cosponsoring his innovative legislation in helping with the unfortunate situation created at Three Mile Island. And we also joined forces this year legislatively and administratively to block the proposed increases in natural gas prices.

ALLEN will not be returning to Congress because he made an excellent run for Governor of Pennsylvania. Losing by only a very few votes, ALLEN did an excellent job of articulating the problems and solutions to the economic problems that range throughout Pennsylvania and the Northeast. A great deal of the success the Democratic Party had this November in Pennsylvania is because of the outstanding race ALLEN ERTEL ran.

ALLEN brought a dedication and insight to the legislative process that is in the highest tradition of public service in this country. The constituents he represented, the State of Pennsylvania, Congress, and the Nation benefited from having ALLEN ERTEL in Congress, and he surely deserves our praise and good wishes.●

● Mr. YATRON. Mr. Speaker, I rise today to pay tribute to three of my colleagues from Pennsylvania who will be retiring at the close of the 97th Congress, Congressman DON BAILEY, Congressman ALLEN E. ERTEL, and Congressman JOSEPH F. SMITH. It has been my privilege to work with these distinguished statesmen. They have faithfully served the people of the Commonwealth of Pennsylvania and their voices will be sorely missed by the Members of this body.

Each Member of Congress makes a contribution to the Nation in a unique and special way. Congressman BAILEY, highly decorated for his outstanding service to our country in Vietnam, came to the House of Representatives in 1979. Throughout his service he has dedicated himself to addressing the concerns of the veterans, the elderly, and indeed all the hard-working men and women of his district. He is a man who has never allowed political considerations to overshadow his concern for his constituents and has been a great inspiration to those of us who have been honored to work with him.

Congressman ERTEL, an able and effective district attorney from Lycoming County from 1968 to 1976, brought this spirit of fairness and dedication for the protection of the rights of the American people with him to the House of Representatives in 1977. I know ALLEN as a hard-working, honest and forthright lawmaker, whose service to his district and the Commonwealth of Pennsylvania is unsurpassed.

I have had the honor to get to know and work with Congressman SMITH during his tenure in the 97th Congress. He came to the U.S. House of Representatives with the invaluable experience of having served in the Pennsylvania State Senate. During his service in the House he has steadfastly maintained his devotion to our country, his constituents, and to making our Nation strong and secure. He has made a significant contribution to this body and the Pennsylvania congressional delegation.

I know my colleagues will join me in honoring these three outstanding Members of Congress. I count them as good friends and I wish them every success in their future endeavors. DON, ALLEN, and JOE have never lost faith in the American system and the great opportunities it offers to those who are willing to participate fully in making it work. They have consistently been willing to dedicate themselves to make it work, and it is because of men like them that it does.●

● Mr. RUSSO. Mr. Chairman, I rise to pay tribute to DON BAILEY, my good

friend from Pennsylvania. Over the last several years, because we have served on the Ways and Means Committee, I have had an opportunity to get to know DON, both as a friend and a colleague. There are none better.

Watching DON in action on the Ways and Means Committee has truly been a pleasure. He has always come to the committee fully prepared and eager to participate, whether this has involved directing tough, thoughtful questions to a witness or helping shepherd a complex piece of legislation through markup.

Sometimes, Mr. Speaker, we can grow isolated here in Washington, losing sight of the fact that the actions we take on a daily basis in this city have a real impact on Americans throughout our great country. That has never happened to DON BAILEY. In my conversations with him, in his activities in committee and on the floor, what has always shone through to me is that DON BAILEY really does care. He is going to be missed.

DON, I just want to thank you; both for your friendship and for your contributions during your service in the Congress. I wish you well.●

LEAD BALLOONS: MORTGAGES THAT DON'T FLY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, more Americans will lose their homes this year than in any year since the Depression, and thanks to the recent boom in "balloon mortgages" the situation is likely to get even worse in the future.

At the end of the second quarter of this year, more than 1.5 million American homeowners were at least 30 days behind in their monthly mortgage payments while another 150,000 faced foreclosure. Observers attribute today's recordbreaking statistics to the current recession as many people are either out of work, or just finding it increasingly difficult to make ends meet. Yet many experts warn that nontraditional home financing techniques will be the source of the problem tomorrow.

The term "balloon mortgage" refers to those short-term loans that require a lump-sum payment upon maturity—usually 3 to 5 years. Until then, however, the home buyer usually makes interest-only payments. In most cases, these balloon mortgages are seller-financed at interest rates which are below the going market rates. The size of the loan represents the difference between the sales price and the sum of the downpayment and the assumed first mortgage.

For example, if the sales price of the home was $100,000, the downpayment $25,000, and the value of the first mortgage was $50,000, the balloon mortgage would amount to $25,000. If the loan had a 12-percent interest rate, the buyer would make monthly payments of $250 until maturity when the entire principal of $25,000 would be due.

Most people took out these type of home loans as a stopgap measure: They could not afford a conventional long-term loan for the entire amount they wished to finance so they made up the difference with a balloon mortgage and planned to refinance their homes when the market improved and interest rates went down. They assumed that at least one of the following would happen: Interest rates would go down and money would be available for refinancing; or the property would appreciate in value and could be sold at a profit; or they would have enough additional income to qualify for a new loan.

It is the failure of those assumptions to come to pass that are at the root of the problems many foresee concerning balloon mortgages. The Federal Reserve Board's tight-money policy has led to an alarming shortage of funds. Those funds that are available are beyond the reach of most Americans; in fact, mortgage money is so expensive that almost 95 percent of the people in this country cannot qualify for home loans. Housing prices have gone stagnant, and in some areas have actually declined. In addition, more than 10 million people are out of work—a national unemployment rate of 9.8 percent. People are glad to keep their jobs, let alone get raises. These factors, in combination with the other ill effects of the worst recession in nearly half a century, have destroyed the entire housing industry, and signaled a potential disaster for those people whose short-term loans are coming due.

Experts estimate that 40 percent of all existing home sales in 1980 were facilitated at least in part by short-term, balloon-type loans. In 1981 the figure was 60 percent. In California, where the wave of creative financing began, the numbers are 37 percent in 1980 and 62.4 percent in 1981. Translated into dollars and cents, California observers estimate that this year short-term loans worth a total of $498 million will come due. But the worst is still to come. The figures for 1983-86 have been estimated at $1.8 billion, $2.2 billion, $3.2 billion, and $3.4 billion, respectively—in California alone.

Obviously all of these numbers add up to big money—and a lot of homeowners that must refinance in order to keep their homes. At this point, no one can conclusively say exactly what will happen when all of these loans come due. However, if the recession continues, money remains tight and the unemployment rate stays high, the situation is likely to explode. And record numbers of people will start losing their homes.

One thing is certain. Balloon mortgages are just one more example of what high interest rates are doing to this country for it was the unavailability of affordable mortgage money that led the American home buyer to this financing technique. And it will be high interest rates that cause people to lose their homes when the loans come due. When American citizens start losing their homes as a result of a monetary policy, it is time to abandon that policy. The administration's policies are giving an increasing amount of credence to the old adage about the cure being worse than the illness. The time for a new medicine is long overdue. I certainly hope that the administration recognizes this fact before the patient dies. For if it does not, it will be forced to face the consequences. And that will be no easy task.●

AN ECONOMIC AGENDA FOR THE BANKING COMMITTEE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 15 minutes.

● Mr. ST GERMAIN. Mr. Speaker, with the Nation's economy in shambles, economic issues—particularly those directly related to jobs—are certain to dominate the efforts of the 98th Congress.

While the adoption of formal agendas must await the organization of the committee in the new Congress, it is my intention to push hard for a full utilization of the considerable jurisdiction of the Banking, Finance, and Urban Affairs Committee on economic issues.

A high priority, in my mind, will be for the committee and its various subcommittees to fully explore their areas of jurisdiction to determine what job-producing proposals might be feasible in the new Congress. Clearly, the committee's jurisdiction in the area of housing and community development contains many possibilities in a labor-intensive sector of the economy. The committee's broad economic stabilization jurisdiction offers other areas which should be explored to help stimulate the economy, as well as the committee's jurisdiction in international and trade areas. Certainly, the Federal Reserve's monetary and interest rate policies have a heavy bearing on jobs—and the economy generally—and I hope that the committee will make a strong effort to bring those policies in line with national economic goals. I think the committee's efforts in this area must be ongoing and must go beyond the limited nature of the 6-

month reports now required of the Federal Reserve.

In the 97th Congress, we have done a good job of deregulating much of the financial industry and providing a more rational balance between the various segments of that industry. Financial institutions have been given new powers, new freedoms, and new challenges. None of these mean much, however, unless the benefits flow to the recipients of financial services—consumers, job-producing industries, and communities.

We need to watch closely to see how well this newly unshackled industry meets the credit needs of this economy and how well it performs as a partner in the economic recovery efforts. If interest rates go down—as we fervently hope—this important economic benefit must be passed on to the consumer and the economy and not left to fatten reserves and build unconscionably large profits.

During the 98th Congress, I hope the committees will place an emphasis on some key areas:

First, development of creative new proposals to maximize the job-producing potential of the committee's various jurisdictions;

Second, strong efforts to analyze the causes of unemployment and underutilization of the Nation's productive capacity and to offer long-term remedies for these economic maladies;

Third, renewed efforts to assure a proper flow of credit and financial services at reasonable cost to all sectors of the economy and assurances that the Federal Reserve understands its responsibilities to national economic goals; and

Fourth, strong oversight to assure that the agencies and departments under the committee's jurisdiction are carrying out their responsibilities and programs in the most efficient and effective manner possible. I would hope that no agency under this committee's jurisdiction would escape a thorough examination during the next 2 years.

Clearly, Mr. Speaker, this is not intended as an outline of the committee's entire workload during the 98th Congress. There are a number of legislative musts, investigations, and other issues which will be developed and discussed in the coming weeks and months. But, I am convinced that the Banking, Finance and Urban Affairs Committee must remain close to the issues that directly bear on the economy and efforts to repair the damage that has devastated so many individuals and businesses in recent months.●

THE OREGON WILDERNESS ACT OF 1982

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. AUCOIN) is recognized for 10 minutes.

● Mr. AUCOIN. Mr. Speaker, today Congressman JIM WEAVER and Congressman RON WYDEN join me in introducing legislation—the Oregon Wilderness Act of 1982—which we hope will resolve the longstanding controversy over which remaining national forest roadless areas in the State of Oregon should be added to the National Wilderness Preservation System. Our bill contains many wilderness proposals identical to those included in S. 2031 which was sheparded through the Senate in the 96th Congress by our colleague Senator MARK O. HATFIELD. We have added to his proposals in certain cases and have also proposed additional new wilderness areas which we feel are deserving of permanent protection in their natural state. The acreage designations of the two bills can be compared as follows:

Area	Oregon Wilderness Act of 1982 (Acres)	S. 2031 (Hatfield bill) (Acres)
Columbia Gorge Wilderness	40,900	40,900
Salmon-Huckelberry Wilderness	55,000	8,300
Badger Creek Wilderness	27,000	14,000
Hidden Wilderness	47,000	26,700
Middle Santiam Wilderness	20,000	0
Rock Creek Wilderness	6,500	6,500
Cummins Creek Wilderness	8,800	0
Boulder Creek Wilderness	19,820	19,820
Rogue-Umpqua Divide Wilderness	55,000	0
Grassy Knob Wilderness	22,000	0
Red Buttes Wilderness	26,000	0
Diamond-Thielsen Wilderness	155,000	[1] 55,000
Sky Lakes Wilderness	113,000	113,000
Coleman Run Wilderness	7,825	7,825
Bridge Creek Wilderness	7,100	6,325
Mill Creek Wilderness	14,400	14,400
Ochoco Canyon Wilderness	13,400	13,400
North Fork John Day Wilderness	205,000	65,500
Joseph Canyon Wilderness	31,000	0
Mount Jefferson Additions	13,500	0
Mount Washington Additions	6,000	6,000
Three Sisters Additions	36,000	27,300
Mountain Lakes Additions	3,000	0
Gearhart Mountain Additions	3,730	3,730
Strawberry Mountain Additions	35,100	35,100
Eagle Cap Additions	34,300	34,300
Old Cascades Study Area	40,000	0
Waldo Lake Study Area	65,000	0
Hardesty Mountain Study Area	7,500	0
Cascades National Conservation	0	78,900

[1] Plus natural conservation area.

We would also note that the bill as introduced does not contain a section with so-called release/sufficiency language. It is our understanding that such language will be offered during markup of the legislation using the formula which has already become law in Colorado, New Mexico, and Alaska. This formula will fully protect areas not designated as wilderness from lawsuits seeking to enjoin development on wilderness grounds and will insure that nonwilderness lands may be managed for uses deemed appropriate through the national forest land management planning process.●

NATIONAL HOME HEALTH CARE WEEK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, this week has been proclaimed National Home Health Care Week. I am very pleased that the resolution I sponsored along with Representative BARBER CONABLE has been approved by Congress and signed into law by the President.

I firmly believe that the benefits and contributions to the health care field by home care is deserving of the national attention which has been provided by the Congress and the President. Home health care has proven to be an effective and appropriate alternative to the more traditional and institutional form of health care which patients many times are forced to receive. The services provided by home care organizations have provided many older Americans with the opportunity to remain at home and in their communities. It is important that we continue to recognize health care services which emphasize the human dignity and independence of each patient.

Moreover, we all recognize the urgent need to control the growing cost of health care. Home care has proven to be a cost-effective alternative to institutional care, and certainly this form of care should be encouraged as part of any proposal aimed at controlling the growth in the health care budget.

I do hope that the home care community will receive much deserved recognition during this week, and I hope that this attention will help in the further development and growth of this industry. I trust my colleagues will pay tribute to this industry and the valuable and vital services which it renders.●

CODIFYING THE FCC'S FINANCIAL INTEREST AND SYNDICATION RULES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. WAXMAN) is recognized for 5 minutes.

● Mr. WAXMAN. Mr. Speaker, today I am introducing legislation codifying the FCC's financial interest and syndication rules. These rules were adopted by the FCC in 1970 in recognition of the dominant role the three major networks have in broadcast television programing. In effect, the rules prohibit the networks from domestic syndication of television programs, or from the acquisition of a financial interest in the syndication of nonnetwork programs.

Although the financial interest and syndication rules have met their goals of limiting the networks' involvement in the domestic syndication market, the FCC is now considering their repeal. This morning the Energy and Commerce Committee's Subcommittee on Telecommunications, Consumer

Protection, and Finance held a FCC oversight hearing, and I had the opportunity to question FCC Chairman Fowler on the possible repeal. I am satisfied that the FCC has no reasonable basis for considering or taking this action, and am compelled to offer legislation maintaining the rule.

The folly of repeal is clear by just noting the increase in competition that has accompanied the financial interest and syndication rules. Before the rules adoption, the networks held a financial interest in 93 percent of all aired programs. Since adoption, however, the number of independent television stations has doubled, the number of syndication program suppliers increased by almost 51 percent, the number of prime time suppliers increased by 26 percent, and there have been significant successes in the first-run syndication market. Small, independent companies are thriving, and there is more diversity than ever before. And although there is now greater competition, the entire industry is healthier, with the networks reaching an all-time high number of viewers.

Despite these facts, the networks still press on for repeal. They argue for deregulation, but it appears they want a broacast monopoly. Moreover, they claim the financial interest and syndication rules keep them from competing in an era of technological innovation. I do not believe the financial interest and syndication rules are defective. Too often in Washington we fix what is not broken and ignore what needs fixing. The rules are not defective, and if they are repealed there will be less competition and less diversity.

It is important we not impair the effectiveness of the financial interest and syndication rules, and I look forward to working with my colleagues on both sides of the aisle in protecting the public's interest in this matter.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. FIELDS) to revise and extend their remarks and include extraneous material:)

Mr. COURTER, for 30 minutes, on December 6.

Mr. COLLINS of Texas, for 30 minutes, on December 6.

Mr. COLLINS of Texas, for 30 minutes, on December 7.

Mr. MOORHEAD, for 60 minutes, on December 8.

Mr. DREIER, for 60 minutes, on December 8.

Mr. BADHAM, for 60 minutes, on December 8.

Mr. THOMAS, for 60 minutes, on December 8.

Mr. CHAPPIE, for 60 minutes, on December 8.

(The following Members (at the request of Mr. DYSON) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 30 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. ST GERMAIN, for 15 minutes, today.

Mr. AUCOIN, for 10 minutes, today.

Mr. ECKART, for 60 minutes, December 9.

(The following Members (at the request of Mr. GAYDOS) to revise and extend their remarks and include extraneous material:)

Mr. PANETTA, for 5 minutes, today.

Mr. WAXMAN, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. GRAY, prior to the vote on the Foglietta amendment to H.R. 7205 in the Committee of the Whole today.

Mr. GILMAN, to revise and extend his remarks on impact aid immediately following the remarks of Mr. FISH on H.R. 7205 in the Committee of the Whole today.

Mr. WEISS, following the colloquy on the Roybal amendment regarding CDC on H.R. 7205 in the Committee of the Whole today.

Mr. LOTT, to revise and extend his remarks on the committee amendment offered by Mr. MOAKLEY and the remarks to appear immediately prior to the vote on the committee amendment on H.R. 6995 in the Committee of the Whole today.

Mr. RAHALL, to revise and extend his remarks in support of the Luken amendment to H.R. 6995 and to appear immediately prior to the vote on the Luken amendment in the Committee of the Whole today.

Mr. PASHAYAN, to revise and extend his remarks just before the vote on the Rules Committee amendments to H.R. 6995 in the Committee of the Whole today.

(The following Members (at the request of Mr. FIELDS) and to include extraneous matter:)

Mr. JEFFORDS.

Mr. GILMAN.

Mr. COLLINS of Texas in two instances.

Mr. WORTLEY.

Mr. DERWINSKI.

Mr. GUNDERSON.

Mr. BEREUTER in two instances.

Mr. FIELDS in three instances.

Mr. HOLLENBECK.

Mr. WALKER.

Mr. DORNAN of California in two instances.

Mr. COUGHLIN in two instances.

Mr. PURSELL in two instances.

Mr. EVANS of Delaware.

Mr. SAWYER.

(The following Members (at the request of Mr. DYSON), and to include extraneous matter:)

Mr. MOFFETT in two instances.

Mr. LELAND.

Mr. DOWNEY.

Mr. MINISH.

Mr. MOTTL in two instances.

Mr. STUDDS.

Mr. MONTGOMERY.

Mr. PEYSER.

Mr. GARCIA.

Mr. HAMILTON.

Mr. MINETA.

Mr. GUARINI.

Mr. ALBOSTA.

Mr. NICHOLS.

Mr. FORD of Tennessee.

Mr. MCDONALD in three instances.

Ms. OAKAR.

Mr. APPLEGATE.

Mr. HUBBARD.

(The following Members (at the request of Mr. GAYDOS), and to include extraneous matter:)

Mr. MINETA.

Mr. PANETTA.

Ms. OAKAR.

Mr. GUARINI.

Mr. ALBOSTA.

Mr. MATSUI.

ADJOURNMENT

Mr. GAYDOS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 19 minutes p.m.), the House adjourned until tomorrow, Thursday, December 2, 1982, at 10 a.m.

EXPENDITURE REPORTS CONCERNING OFFICIAL FOREIGN TRAVEL

Reports of various House committees and delegations traveling under an authorization from the Speaker concerning the foreign currencies and U.S. dollars utilized by them during the second and third quarters of calendar year 1982 in connection with foreign travel pursuant to Public Law 95-384 are as follows:

AMENDED REPORT OF EXPENDITURES FOR OFFICIAL FOREIGN TRAVEL, COMMITTEE ON EDUCATION AND LABOR, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN APR. 1 AND JUNE 30, 1982

Name of Member or employee	Date		Country	Per diem [1]		Transportation		Other purposes		Total	
	Arrival	Departure		Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]
Dorothy Strunk (addendum to 2d quarter report)	6/13	6/24	Switzerland				134.06				134.06

[1] Per diem constitutes lodging and meals.
[2] If foreign currency is used, enter U.S. dollar equivalent; if U.S. currency is used, enter amount expended.
[3] Reimbursement by State Department for local transportation Aug. 13, 1982.

CARL D. PERKINS, Chairman.

REPORT OF EXPENDITURES FOR OFFICIAL FOREIGN TRAVEL, COMMITTEE ON AGRICULTURE, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN JULY 1 AND SEPT. 30, 1982

Name of Member or employee	Date		Country	Per diem [1]		Transportation		Other purposes		Total	
	Arrival	Departure		Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]
Codel E (Kika) de la Garza	8/30	9/03	Germany	955	393.00	106	43.40				436.40

REPORT OF EXPENDITURES FOR OFFICIAL FOREIGN TRAVEL'S. ARIEL WEISS, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN AUGUST 19 AND SEPT. 6, 1982

Name of Member or employee	Date		Country	Per diem [1]		Transportation		Other purposes		Total	
	Arrival	Departure		Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]
S. Ariel Weiss			Iraq		93.00						
	8/25	8/26	Jordan		84.00						
	8/27	8/28	Israel		270.00						
	8/29	8/30	Egypt		234.00						
	8/31	9/1	Israel		190.00						
	9/2	9/4	Cyprus		225.00						
	9/5	9/6	Lebanon		150.00						
Commerical transportation							2,618.00				2,618.00
Committee total					1,246.00		2,618.00				2,618.00

[1] Per diem constitutes lodging and meals.
[2] If foreign currency is used, enter U.S. dollar equivalent; if U.S. currency is used, enter amount expended.

S. ARIEL WEISS.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

5198. A letter from the Secretary of the Treasury, transmitting a quarterly report for the period ended September 30, 1982, summarizing the activities carried out under the Olympic Commemorative Coin Act of 1982, pursuant to section 11 of such act; to the Committee on Banking, Finance and Urban Affairs.

5199. A letter from the Assistant Secretary, Office of Educational Research and Improvement, transmitting notice of the delay in meeting reporting requirements regarding studies on the financing of public and private elementary and secondary education in the United States as required by section 1203 of the Education Amendments of 1978, and a schedule of when these requirements will be met; to the Committee on Education and Labor.

5200. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the American Institute in Taiwan's intention to offer to sell certain defense articles and services to the Coordination Council for North American Affair, (transmittal No. 83-07), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

5201. A letter from the Secretary of Agriculture, transmitting the semiannual report of the Department's Inspector General covering the period ended September 30, 1982, pursuant to section 5(b) of Public Law 95-452; to the Committee on Government Operations.

5202. A letter from the Secretary of Defense, transmitting the semiannual report of the Department's Inspector General covering the period ended September 30, 1982, pursuant to section 8(a)(1) of Public Law 95-452; to the Committee on Government Operations.

5203. A letter from the Deputy Assistant Secretary of Defense (Comptroller-Administration), transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

5204. A letter from the Adjutant General, United Spanish War Veterans, transmitting the proceedings of the stated convention of the 83d National Encampment, United Spanish War Veterans, Inc., held in Kansas City, Mo., October 3-8, 1981 (H. Doc. No. 97-260); to the Committee on Veterans' Affairs and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. PERKINS: Committee on Education and Labor. H.R. 2500. A bill to establish a select commission to examine the issues associated with voluntary service; with an amendment (Rept. No. 97-939). Referred to the Committee of the Whole House on the State of the Union.

Mr. PERKINS: Committee on Education and Labor. H.R. 6514. A bill to revise and reform the Immigration and Nationality Act, and for other purposes; with amendments (Rept. No. 97-890, Pt. II). Ordered to be printed.

SUBSEQUENT ACTION ON A REPORTED BILL SEQUENTIALLY REFERRED

Under clause 5 of rule X:

The Committee on Agriculture, Energy and Commerce, and Ways and Means discharged from the further consideration of the bill H.R. 6514; H.R. 6514 referred to the Union Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. WEAVER (for himself, Mr. AuCOIN, and Mr. WYDEN):

H.R. 7340. A bill to designate certain National Forest System lands in the State of Oregon for inclusion in the National Wilderness Preservation System and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BARNARD:

H.R. 7341. A bill to effectuate the congressional directive that accounts established under section 327 of the Garn-St Germain Depository Institutions Act of 1982 be directly equivalent and competitive with money market mutual funds; to the Committee on Banking, Finance and Urban Affairs.

By Mr. GONZALEZ:

H.R. 7342. A bill to authorize the President to award the Medal of Honor posthumously to the family of Armando G. Leal, Jr.; to the Committee on Armed Services.

By Mr. McEWEN:

H.R. 7343. A bill to repeal the withholding of tax from interest and dividends; to the Committee on Ways and Means.

By Mr. MADIGAN:

H.R. 7344. A bill to amend the Federal Food, Drug, and Cosmetic Act to establish Federal preemption for regulations imposing requirements for tamper-resistant packaging and related labeling for nonprescription drugs; to the Committee on Energy and Commerce.

By Mr. MITCHELL of Maryland:

H.R. 7345. A bill to reauthorize the Local Public Works Capital Development and Investment Act of 1976, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. WATKINS:

H.R. 7346. A bill to provide that the Department of Agriculture shall be known as the Department of Agriculture and Rural Development; to the Committee on Agriculture.

By Mr. WAXMAN:

H.R. 7347. A bill to amend the Communications Act of 1934 to establish certain rules relating to the syndication of programing by television networks; to the Committee on Energy and Commerce.

By Mr. WYDEN:

H.J. Res. 626. Joint resolution recommending the Declaration on Prevention of Nuclear War; to the Committee on Foreign Affairs.

By Mrs. KENNELLY:

H. Con. Res. 430. Concurrent resolution expressing the sense of the Congress that a security zone should be established in southern Lebanon; to the Committee on Foreign Affairs.

By Mr. GONZALEZ:

H. Res. 613. Resolution to urge a reaffirmation and a revitalization of the U.S. commitment to the protection of human rights in Latin America and to call upon the President to request the Organization of American States to take certain steps to promote economic progress in the hemisphere and an end to the violence in Latin America; to the Committee on Foreign Affairs.

By Mr. OBERSTAR:

H. Res. 614. Resolution expressing the sense of the House of Representatives that the Secretary of Agriculture should suspend, until April 15, 1983, the imposition of any requirement that amounts be deducted from the proceeds of sales of milk marketed commercially by producers; to the Committee on Agriculture.

By Mr. SHAW:

H. Res. 615. Resolution to amend the Rules of the House of Representatives to require a recorded vote upon final passage of legislation that adjusts the pay of Members, and for other purposes; to the Committee on Rules.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 385: Mr. WHITEHURST.
H.R. 3353: Mr. RITTER.
H.R. 3840: Mr. MARKEY, Mr. ADDABBO, and Ms. FERRARO.
H.R. 3841: Mr. ADDABBO, Ms. FERRARO, and Mr. BRODHEAD.
H.R. 5738: Mr. WASHINGTON.
H.R. 5828: Mr. PANETTA.
H.R. 5920: Mr. RITTER.
H.R. 6433: Mr. PATTERSON.
H.R. 6573: Mr. WASHINGTON.
H.R. 6702: Mr. McCURDY.
H.R. 6751: Mr. DAN DANIEL, Mr. PURSELL, Mr. WAXMAN, Mr. CORRADA, Mr. ADDABBO, Mr. DWYER, Mr. DUNN, Mr. FISH, Mr. CONYERS, Mr. DONNELLY, Mr. MOAKLEY, Mr. MARKEY, Mr. MAVROULES, Mr. FRANK, Mr. SHANNON, Mrs. HECKLER, Mr. HUGHES, Mr. WHITEHURST, Mr. FOGLIETTA, Mr. GUARINI, Mr. MOLLOHAN, Mr. HYDE, Mr. PICKLE, Mr. WINN, Mr. SKELTON, Mrs. SCHNEIDER, Mr. HOLLENBECK, Mr. HOWARD, Mr. FOLEY, Mr. FORSYTHE, and Mr. LEWIS.
H.R. 7181: Mr. JEFFRIES.
H.R. 7182: Mr. JEFFRIES.
H.R. 7220: Mr. FAUNTROY, Mr. BRODHEAD, and Mr. GRAY.
H.R. 7314: Mr. PETRI, Mr. SOLOMON, Mr. ROTH, Mr. SENSENBRENNER, Mr. MARTIN of New York, Mr. McDADE, Mr. CORRADA, Mr. SAM B. HALL, JR., Mr. MITCHELL of New York, and Mrs. SNOWE.
H.J. Res. 81: Mr. WYDEN.
H.J. Res. 460: Mr. MURTHA, Mr. BEARD, Mr. DUNCAN, Mr. QUILLEN, and Mr. STRATTON.
H.J. Res. 524: Mr. PEPPER, Mrs. COLLINS of Illinois, Mr. MINETA, and Mr. TAUZIN.
H.J. Res. 576: Mr. MINETA and Mr. CHAPPIE.
H.J. Res. 591: Mr. DE LA GARZA, Mr. FROST, Mr. McCOLLUM, Mr. McEWEN, Mr. WEBER of Ohio, and Mr. WOLPE.
H.J. Res. 614: Mr. LOEFFLER, Mr. FRENZEL, and Mr. GINGRICH.
H. Con. Res. 392: Mr. FAUNTROY.
H. Con. Res. 411: Mr. DOUGHERTY, Mr. JEFFRIES, Mrs. MARTIN of Illinois, and Mr. WOLF.
H. Res. 606: Mr. FAUNTROY, Mr. BRODHEAD, Mr. YATES, Mr. BARNES, Mr. FOGLIETTA, Mr. KILDEE, Mr. SCHUMER, Mr. WEISS, Mr. RODINO, Mr. SHANNON, Mr. BAILEY of Pennsylvania, Mr. LEHMAN, Mr. CROCKETT, Mrs. CHISHOLM, Mr. DIXON, Mr. DYMALLY, Mr. MITCHELL of Maryland, Mr. FOWLER, Mr. SCHEUER, Mr. CORRADA, Mr. DOWNEY, Mr. STOKES, Mr. SIMON, Mr. BEDELL, Mr. OTTINGER, Mr. MOAKLEY, Mr. McHUGH, Mr. GRAY, Mr. ROSENTHAL, Mr. LOWRY of Washington, Mr. HALL of Ohio, Mr. VENTO, Mr. EDGAR, Mr. WYDEN, Mr. ADDABBO, Mr. OBERSTAR, Mr. WILLIAM J. COYNE, Mr. MINETA, Mr. UDALL, Mr. CONYERS, Mr. LELAND, Mr. PEPPER, Mr. RATCHFORD, Mr. OBEY, and Mr. BROWN of California.

PETITIONS, ETC.

Under clause 1 of rule XXII,

667. The SPEAKER presented a petition of the Western States Land Commissioners Association, Wisconsin, relative to Outer Continental Shelf Revenue Sharing; which was referred jointly to the Committees on Interior and Insular Affairs and Merchant Marine and Fisheries.

SENATE—*Wednesday, December 1, 1982*

(Legislative day of Tuesday, November 30, 1982)

The Senate convened at 10:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Gracious God, sovereign Lord of history and the nations, we pause to express our profound gratitude for the benefits we enjoy in our Republic. Forgive us when we presume upon these inestimable gifts. Help us to realize how rare in the world today and in the history of nations is the freedom we enjoy. Do not let us have to lose it to appreciate it.

Remind us, as our Founding Fathers believed, that liberty is not derived from man's genius in planning and governing, but that it is an endowment of God which governments are instituted to secure; and that when we reject the God who gives human rights, we forfeit the rights which He gives. May we understand that our rights are secure only as we take God seriously.

Father in Heaven, as the pressures of limited time and imminent adjournment compound the stress of legislation, grant to the Senators cool heads, warm hearts, and the ability to complete all they will wish they had done when the 97th Congress is over. In the name of Jesus Christ who finished on a cross the work for which He entered history. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved.

The PRESIDING OFFICER (Mr. DANFORTH). Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I believe there are special orders in favor of the Senator from Pennsylvania (Mr. SPECTER) and the Senator from Virginia (Mr. HARRY F. BYRD, JR.) for not to exceed 15 minutes each. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

ORDER DESIGNATING PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that following on after the execution of the special orders, there be a period for the transaction of routine morning business not to exceed 15 minutes in length in which Senators may speak for not more than 3 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 995

Mr. BAKER. Mr. President, in the course of the day we will continue to debate S. 995, the antitrust bill, on which the committee amendment is pending. The yeas and nays have been ordered.

Cloture motions have been filed which will require votes under the provisions of rule XXII on tomorrow. The motions are against both the bill and the committee amendment, and both votes will occur pursuant to the rule on tomorrow in the sequence in which the motions were filed.

The PRESIDING OFFICER. Unless cloture is invoked on the first vote.

Mr. BAKER. Mr. President, let me say, by the way, that under the previous formulation that the votes would occur seriatim in no way implies that cloture would not occur on the first vote. The second cloture vote would not occur if the first vote produces cloture.

D.C. APPROPRIATIONS

Mr. President, it is my hope that we can take up at least one appropriations bill in the interim. The one that appears to be most appropriate is the D.C. appropriations bill, H.R. 7144, and the companion bill, S. 2917. It may not be possible to do that. I will explore the possibility later today. If it is not possible then, of course, we will proceed with debate for the time being on S. 995.

Mr. President, later in the day I will have a further announcement to make on the date of the convening of the Senate for the 98th Congress, but before I make that announcement I wish to confer further with the minority leader and also have a discussion with the Speaker of the House of Representatives.

Mr. President, I have no further need for my time under the standing order. I see no Senator seeking time at this moment. I will be glad to yield my remaining time to the minority leader, if he has need for it.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader. I have no need for his time remaining under the standing order.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SPECTER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR SPECTER

The PRESIDING OFFICER. Under the previous order, the Senator from Pennsylvania is recognized for not to exceed 15 minutes.

Mr. SPECTER. I thank the Chair.

RAISING THE LEGAL MINIMUM AGE FOR DRINKING AND PURCHASING ALCOHOL

Mr. SPECTER. Mr. President, I rise today to join my distinguished colleague from Pennsylvania, the Honorable WILLIAM GOODLING, Member of the House of Representatives, in introducing a sense-of-the-Senate resolution concerning the legal minimum age for drinking and purchasing alcohol. The essence of this resolution expresses the sense of the Congress that the legal age for drinking should be raised to the age of 21 in those 35 States and the District of Columbia where the drinking age is now less than 21. This resolution follows the recommendation of the National Transportation Safety Board, which has urged that the minimum age for drinking and purchase of liquor be raised uniformly in the United States to 21 years.

The underlying facts are overwhelming. Of the 25,000 persons who die each year in drunk driving accidents, some 5,000 are teenagers. Of the almost 60 percent of fatally injured teenagers in automobile accidents, some 60 percent of those have alcohol

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

in their blood. In the course of the past 75 years, the life expectancy in the United States has increased for every group except one age bracket, and that is in the 15- to 24-year-old category. The leading single cause of death in this group was drunk driving.

The age for drunk driving had generally been 21 until a series of State laws were changed in the 1970's to reduce that age in accordance with general efforts to give full legal rights to those 18 and above. In light of the empirical evidence which we have, there is good reason at this time to reverse that trend and make the legal age 21, as it had been for so long in the past. There was testimony given yesterday by Secretary Richard Schweiker of the Health and Human Services Department, and Secretary Drew Lewis of the Department of Transportation on this subject.

It is my view that it would be most appropriate for the U.S. Senate to enact this resolution to express our sense and join with the House of Representatives in urging that the States which have jurisdiction over this issue raise the legal age for drinking and purchase of alcohol to 21 years of age.

Mr. President, I ask unanimous consent that the full text of the concurrent resolution be printed in the RECORD.

The text of the concurrent resolution follows.

There being no objection, the concurrent resolution was ordered to be printed in the RECORD, as follows:

S. CON. RES. 129

Whereas of the 25,000 persons who die each year in drunk driving accidents, 5,000 are teenagers and almost 35 percent are between the ages of 16 and 24;

Whereas almost 60 percent of fatally injured teenage drivers had alcohol in their blood;

Whereas life expectancy in America has improved over the past 75 years for every age group except one—15 to 24 year olds—and whereas the leading single cause of death for this age group is drunk driving;

Whereas available data shows a direct correlation between minimum drinking age and alcohol-related accidents in the 18-to-21-year-old age group;

Whereas numerous empirical investigations have shown significant increases in motor vehicle crash involvement among young drivers after reductions in the drinking age;

Whereas as the result of this emerging research, a number of States raised the drinking age in the late 1970's and early 1980's; and

Whereas the National Transportation Safety Board has urged that the legal minimum age for drinking and purchasing alcohol be raised to 21 nationwide in an effort to cut the highway death toll from drunken driving; Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that the age for drinking and purchasing all alcoholic beverages should be raised to 21 in those 35 States and the District of Columbia where the drinking age is now less than 21.

FLOOD CONTROL ON THE SUSQUEHANNA RIVER

Mr. SPECTER. Mr. President, I rise to introduce three bills today which would authorize flood control projects for Pennsylvania. These are for Wyoming Valley, Luzerne County, Pa.; Harrisburg, Pa.; and Lock Haven, Pa. All three of these projects are on the Susquehanna River; the first two on the main river and the last on the West Branch.

The cities of Wilkes-Barre, Harrisburg, Lock Haven, and numerous nearby communities were devastated by a series of floods in late June 1972 from the heavy rains of tropical storm Agnes and these projects are in response to that widespread flooding and a subsequent flood from Hurricane Eloise, a few years later.

The Board of Engineers for Rivers and Harbors recommended favorable action, concurring in general with the findings and recommendations of the Baltimore District Engineer in the North Atlantic Division Engineer concerning increased flood protection in the existing Wyoming Valley flood control system. The most severe flood of record, tropical storm Agnes, overtopped the existing levee system by 4 to 5 feet. Flood damages in the area were estimated to have been $730 million at June 1972 price levels. Recurrence of a flood the magnitude of Agnes under today's conditions would cause in excess of $1 billion in damages.

The existing Federal flood control system in Wilkes-Barre provides only a 50-year design level of flood protection for what the Corps of Engineers correctly identifies as an "intensively developed major urban area." The corps plan would protect the Wyoming Valley against a flood magnitude equal to that caused by tropical storm Agnes.

The recommended plan will raise the existing levee system in the Wyoming Valley by 5 to 7 feet, provide new closure and drainage structures, construct a new pumping station, and provide new levees and floodwalls to maintain the system's integrity at five communities in the Wyoming Valley. The five communities are: First, Wilkes-Barre/Hanover Township; second, Swoyersville/Forty-Fort; third, Exeter/West Pittston; fourth, Kingston/Edwardsville; and fifth, Plymouth.

Induced flooding from raising the existing levee system will be mitigated at eight communities. Mitigation at five of the communities with existing flood protection projects—Sunbury, Danville, Brookside, Miners Mills, and Duryea—will be by levee or floodwall raising. At two communities—Plainsville and Port Blanchard—nonstructural mitigation measures consisting of a combination of evacuation, floodproofing, relocation, and a ring levee-floodwall system will be employed. At Bloomsburg, the mitigation measure will consist of removal of an abandoned Conrail bridge.

The Harrisburg project was approved by the Board of Engineers for Rivers and Harbors as long ago as April 28, 1978, and the Chief of Engineers on May 16, 1979.

In 1972, the flood of record caused over $85 million of damage at 1972 prices. Flood protection is critically needed for South Harrisburg against recurrent flooding from both the Susquehanna River and Paxton Creek. The corps plan consists of constructing a flood wall, channel improvements, a pumping plant, and a small dam. Total cost would be $117 million.

With respect to Lock Haven, it should be noted that nearly the entire city is subject to flooding both from the West Branch Susquehanna River and Bald Eagle Creek. The city has been flooded 19 times in the last 130 years. As in other areas, the most damaging flood occurred in 1972, when tropical storm Agnes inundated the entire business district and much of the residential areas of the city and adjoining townships.

The corps plan would provide a local flood protection system consisting of levees, flood walls, interior drainage works, highways, and railroad closure structures. Also, removal of structures affected by flooding in communities directly across the river from the city is contemplated.

The total cost is estimated at $69.8 million.

It has been proposed that the cost sharing policies of the past be abandoned and more stringent requirements be placed on State, local, and private interests. I suggest that, while cost sharing may have its merits, some allowance must be made for ability to pay. In any event, this issue will be subject to extended review in the next session of Congress. We need, in the meantime, to authorize these three flood control projects promptly. Pennsylvanians, frankly, wonder why, 10 years after a devastating flood, these three needed projects have not been authorized.

I ask unanimous consent that the full text of the three proposed bills be printed in the RECORD, as follows:

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3055

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Army acting through the Chief of Engineers, is authorized to implement the project for flood damage prevention at Wyoming Valley, Luzerne County, Pennsylvania, substantially in accordance with, and subject to conditions recommended in, the Report of the Divisions Engineer dated February 16, 1982, at an estimated

cost of $207,000,000. Sections 201 and 202 and the last three sentences of the Flood Control Act of 1968 (Public Law 90-483) shall apply to this project.

S. 3056

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Army, acting through the Chief of Engineers, is authorized to implement the project for flood damage prevention at Lock Haven, Pennsylvania, on the West Branch of the Susquehanna River, substantially in accordance with, and subject to conditions recommended in, the Report of the Chief of Engineers dated December 14, 1981, at an estimated cost of $69,800,000. Sections 201 and 202 and the last three sentences in Section 203 of the Flood Control Act of 1968 (Public Law 90-483) shall apply to this project.

S. 3057

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Army acting through the Chief of Engineers, is authorized to implement the project for flood damage prevention at Harrisburg, Pennsylvania, on the Susquehanna River, substantially in accordance with the plans and subject to the conditions recommended by the Chief of Engineers in his Report dated May 16, 1979, at an estimated cost of $117,000,000. Sections 201 and 202 and the last three sentences in Section 203 of the Flood Control Act of 1968 (Public Law 90-483) shall apply to this project.

PRESQUE ISLE PENINSULA BREAKWATER CONSTRUCTION

Mr. SPECTER. Mr. President, I rise to introduce a bill to authorize the construction of a system of breakwaters along the lakeward length of Presque Isle Peninsula on Lake Erie in the northwest corner of Pennsylvania.

In 1956, the Federal Government, in cooperation with the Commonwealth of Pennsylvania, completed a beach erosion control project on Presque Isle Peninsula. As I recently observed when I visited Presque Isle, the project has proven to be inadequate and sand replenishment measures have been required periodically through the 1960's and 1970's and annually since 1975, in order to protect the Federal structures and State park facilities along the neck of the peninsula. Since the sand replenishment requirements have far exceeded the estimated requirements, a more effective method of protection and beach stabilization is desired. The park is a popular recreational area and provides facilities for a wide spectrum of recreational opportunities. The year-round attractiveness of the park is shown by the over 4 million persons which visit the park annually.

The Corps of Engineers recommended plan of improvement provides for construction of a system of rubblemound breakwaters located offshore along the lakeward length of Presque Isle Peninsula, parallel to the shoreline, and positioned in the trough between the first and second offshore sand bars. Each structure will be 150 feet long with a 350-foot gap between structures. In addition, sand fill will be placed along the shoreline in the lee of the breakwaters to provide a recreational beach berm.

The system of offshore breakwaters allows sufficient wave energy to pass through the gap between breakwater segments to generate an alongshore current in the lee of the breakwater system. Therefore, natural shore processes will continue to transport sand in quantities which will preserve the integrity of the natural environment, especially the sensitive and unique portion of the ecological reservation on the east end of the peninsula. An important element of the recommended plan will be the operation of a post-construction monitoring program which would note the presence of any adverse sediment transport impacts. Should adverse impacts arise, the annual replenishment program would be adjusted to provide sand in order to eliminate, minimize, or ameliorate possible adverse environmental impacts.

The project costs would be $24 million.

Mr. President, I ask unanimous consent that the full text of the proposal will be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3058

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Army, acting through the Chief of Engineers, is authorized to implement the project for beach erosion control at Presque Isle Peninsula, Pennsylvania, substantially in accordance with, and subject to conditions recommended in, the Report of the Chief of Engineers dated October 2, 1981, at an estimated cost of $24,000,000.

ORDER OF PROCEDURE

Mr. SPECTER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I understand that the Senator from Virginia (Mr. HARRY F. BYRD, JR.) has a special order and that he is not going to use his time. I ask unanimous consent that that time be applied to me for use at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

AFTER GATT: A CALL FOR A DOMESTIC ECONOMIC AND TRADE SUMMIT

Mr. GRASSLEY. Mr. President, in the face of the current world recession and mounting protectionist pressures, the delegation to the 88-nation General Agreement on Tariffs and Trade came home with what most participants have described somewhere between a "washout" and a "modest achievement."

As a delegate to the GATT ministerial meeting, in which a majority of my time was geared to the impact the European Community (EC) export subsidy on agricultural products is having on our own domestic farmers, I came away extremely disappointed. Although a special committee was established to conduct a 2-year study on the impact of export subsidies, no recommendations will be forthcoming until 1984. And even though this concession required a unanimous endorsement by GATT members, Wilhelm Haferkamp, vice president of the common market's policymaking commission, stated emphatically that endorsement of the document was not a commitment to any new negotiations or obligations in relation to agriculture. Unfortunately, this strong stance does nothing but pave the way for further escalations between the United States and Europe, not only in the area of agriculture but also other nonagricultural related exports.

Twenty years ago, President Kennedy called world trade a rising tide lifting all boats. Unfortunately, today we can no longer view trade in such a light, as globally we face an industrialized recession in most developed nations and a minidepression in some undeveloped countries. As a result, we are all grappling for concessions, places to expand our trade, protection of our domestic industries, and blaming other nations for the high rate of unemployment we are now experiencing. Unfortunately, it is politics and not market forces that are determining the direction and content of trade flows. The American farmer and industrial workers are not competing with European farmers and European industrial workers, but, instead, with agricultural subsidies and export credit financing. The Japanese are using predatory pricing and targeting high-tech advancements, not to mention inundating our ports with Japanese autos.

If there is one overriding issue in world trade today, it seems to me it is the question of the relevance of the General Agreement on Tariffs and Trade. When GATT was established in 1947, the United States was supreme in technology, management skills, and productive capacity. Since that time, the structure of the world economy has changed dramatically, and devel-

oped and developing countries have become stiff competitors for our domestic and export markets. During last week's meeting of GATT in Geneva, it became apparent to me that GATT either cannot or will not handle the difficult and complex areas of nontariff barriers, export subsidies, import licensing, trade in services, investments, and high technology.

The United States represents the biggest import market in the world; and, by and large, we made our marketplace available to our trading partners with relatively few restrictions. On the other hand, market barriers the American producer faces overseas come in many guises. As a result of the outcome of the GATT ministerial meetings, the time has come to let our trading partners know that we are no longer willing to tolerate one-way streets. The stakes are enormous. A drift away from the principles of GATT could close off the longest era of prosperity the world has ever known. Consumers and producers throughout the world have benefited tremendously from the open exchange of goods and services across international boundaries. The lure of protectionism, although tempting, should be approached with caution and rational thinking, during this emotional and heated time. We should focus not only on the markets that we want to penetrate by using the resources available to us, but also the markets we may lose on the trade surplus of our balance sheet if we are overzealous.

The task of our political leadership is to understand the gravity of the position we are in and to begin to shape a trade policy that makes sense for our farmers, our industries, and our trading partners in the 1980's. It must, however, be a policy which the American people can believe and our trading partners can be convinced is in their best interest as well as ours. We must not only establish a trade policy; we have to grapple with Western economic growth as well.

We must address the issues of: First, assurance of fair access to world markets; second, declaration of a truce in export credit wars; third, elimination of agricultural subsidies; fourth, protection of technology transfer through joint ventures or licensing arrangements; fifth, removal of self-imposed restrictions on American producers by our own Government; sixth, control of exchange rate manipulations; seventh, enhancement of the competitiveness and state of our farm sector and our ailing industries; and eighth, development of cabinet-level office to focus on international trade to coordinate the impact and consequences of political and foreign decisions on our overall economic and foreign trade well being.

Since it is apparent that we as a government cannot solve this problem internally, I am writing to the President today to suggest that he immediately call together a bipartisan group of this country's brightest political, business, labor, and farm leaders, along with members of the academic community to set an economic and trade agenda for this Nation in the 1980's. There is talk of dumping our agriculture products on the world market, in retaliation to the EC's resistance to reducing agricultural subsidies as well as other protectionist measures. These are actions which I would support if it comes down to that. But, I believe the President can take an important first step in defusing pressure for unwise executive or legislative action, with possible dire consequences globally, by calling for a domestic economic and trade summit. There is certainly no shortage of challenges that face us in the 1980's however, as in the past when the American people have been put to the task they have shown the world they have no shortage of creative solutions to those challenges.

At this point I call those creative solutions and the minds from whence they will come into action to help us solve this problem.

PREREQUISITES FOR FULL EMPLOYMENT

Mr. GRASSLEY. Mr. President, the U.S. economy currently finds itself in a unique set of historical circumstances. It is undergoing fundamental structural changes. Yesterday, the chairman of the Council of Economic Advisers, Martin Feldstein, predicted that it could take up to 5 or 6 years to get the unemployment rate down to the 6- to 7-percent range from the current 10.4 percent. And to achieve a jobless rate lower than that, new policies would have to be implemented to address the "structural" problems facing the economy.

Mr. President, no public jobs program is going to put 11.6 million Americans back to work. Obsolete remedies such as pump-priming, bailouts, protectionism, and the like will no longer provide for advancement into a future, world economy. I think my colleagues generally recognize this, and are eager to explore new concepts and new solutions for our economy.

We are presently faced with two types of unemployment problems. One is a cyclical problem resulting from 4 consecutive years of productivity stagnation. We are in a recession. A revived economy is the only solution to this problem. The other unemployment problem is a structural one. Old industries are sizing down while new industries are ready to explode. This problem can only be addressed by new and well-thought-out policies.

Training and retraining programs will be a core part of our efforts toward full employment. A new tax structure is needed, a flexible monetary policy, and a modern international trade policy. These are steps we must take if we are to advance our economy to meet the challenges that confront us.

The real key to devising appropriate policy changes is a broad understanding of the current economy and how it is evolving. This will eliminate the fear factor that often accompanies confrontation with change. Undoubtedly the best description of what is occurring in our economy that I have encountered is an article written by James Cook from a recent issue of Forbes magazine. I urge my colleagues to read this article thoroughly in the hope that they might more clearly understand the unique circumstances surrounding the eoconomy.

Mr. President, I ask unanimous consent to have printed in the RECORD the article by Mr. Cook.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE MOLTING OF AMERICA

(By James Cook)

International Harvester was perhaps to be expected: It had been headed for trouble for years. But the massive layoffs at Deere & Co. and Caterpillar? Chrysler, a long-lagging number three, was one thing. But how do you rationalize the losses General Motors was generating on auto production? The entire U.S. car industry running at maybe one-half its peak capacity? Manville Corp. in Chapter 11? Big banks at the brink? You can go on and on. Steel at 38 percent of capacity, lowest since 1938, and operating losses of hemorrhage proportions. Single-family housing starts still lagging despite the declines in interest rates. Oil drilling collapsed. Ten percent unemployment. Little wonder the word "depression" keeps popping up.

But if it is a depression we are undergoing, it is a strange, undesperate kind of depression. There is plenty of worry in the country, but relatively little real suffering. Still working are 99.7 million Americans—only 1.3 million fewer than the alltime peak in 1981. Disposable income this year is at a record high. Movie box-office receipts are the highest in history and so are advertising revenues. In contrast to the Thirties, when the gross national product fell 30 percent the U.S. economy remains at the highest level in history.

Anyone who calls this a depression hasn't the foggiest notion of what a real depression is like. How do you explain an industrial collapse unaccompanied by an overall economic collapse? Where's the symmetry? How can Akron, once the tire capital of the world, remain relatively prosperous though its main industry long ago moved away?

To talk of depression or of the failure of Reaganomics in the face of such confusing evidence is to misunderstand what is really happening. The U.S., indeed the entire industrial world, is profoundly changing the way it uses men and materials, capital and manufacturing processes. We are undergoing what economists call a structural change, touched off by a spurt in energy prices but stemming from even more fundamental causes.

Take the downsizing of American automobiles—an energy-driven phenomenon much

written about but only dimly understood. It began with the need to save gasoline. It is ending with a saving of everything—rubber, steel, glass and above all labor. Though few people realized it at the time, Congress, in legislating fuel-consumption standards for American cars, committed itself to a radically different industrial structure. You downsized the American car to save gas, and you wound up downsizing not only the U.S. auto industry itself but a substantial part of the industrial base that supported it. You saved gasoline. And you destroyed blue-collar jobs.

The U.S. had already had some experience with what the downsizing of U.S. energy consumption could do to the economy. A reduction in the consumption of energy followed the first price shocks of 1973-74. In a decade, 92 nuclear reactors were proposed and canceled, 13 others abandoned after the expenditure of $5.5 billion; nearly 1,800 oil tankers—roughly 90 million tons—sent to the scrap heap; 23 oil refineries in the U.S. shut down in 1981 alone. Some 100,000 gasoline stations permanently closed down. Even the long-term growth of the oil industry finally came to an end. "We're different from most businesses," Exxon Chairman Clifford Garvin concedes. "The demand for our product continues to decrease, and we encourage that."

Downsizing cannot be done without pain. Lots of pain. Thought of in this sense, the current industrial depression has virtually nothing to do with Reaganomics, Volckernomics or Carternomics. Nor will it yield readily to politicians' simplistic cures. The simple fact is: A given standard of living no longer requires the same amount of iron and steel, labor, energy, rubber or glass it once did. So, lots of people get hurt.

Consider what happened with autos. Over the 1977-82 model years, Ford sloughed off over 1,000 pounds of various materials, reducing its average car weight from 3,760 to 2,704 pounds in five years. By 1985, when the federally mandated 27.5 miles-per-gallon standard has to be met, Ford expects to shed another 170 pounds. GM is already halfway through a program to cut vehicle weight in half by 1995. Says Ford's manager of supply development and planning, Mary Anne Wheeler: "We're not just substituting materials and downsizing cars. We're also using all the materials more efficiently. The 1979 Mustang, for example, was larger than the 1978 Mustang it replaced, yet it was 200 pounds lighter." Heating and cooling systems are smaller, tires are smaller and last longer, and so do antifreeze, engine oil, batteries and lubricating oil. "Everything we were doing," says Alex Mair, head of GM's Technical Staffs Group, "had the effect of using less of the earth's natural resources."

To compound the problem, the Japanese and other foreign carmakers steadily increased their share of the auto market—from 18 percent to nearly 30 percent in four years, while the U.S. carmakers themselves began stepping up their use of lower-cost imported components. No wonder the gloom is widespread. Every imported car that's sold, every component that's imported, every gain in the efficiency of materials use comes out of the hide of Detroit's suppliers, the steel industry most of all.

Autos are only the beginning. A similar sort of downsizing has begun in housing and its satellite industries. Consumers have been forced to downsize their expectations in housing just as they had earlier downsized their expectations in autos. Housing starts have dropped to around 1 million, and houses are beginning to get smaller. "We have a structural change in the capital markets," says General Electric's chief economist, Walter Joelson—"a shift from low interest to high, which is forever going to skew the flow of capital away from housing." Meaning: smaller new houses, fewer new houses, a considerably reduced housing industry.

As housing goes, so goes not only the forest products industry, but also a whole range of building materials—from cement to glass to insulation and, perhaps most critically of all, to copper. With the copper industry's number one market in trouble, and its number two market, telecommunications, threatened by technological developments like fiber optics and satellite communications, the prospects for U.S. producers look grim, especially when production levels abroad are dictated less by the demands of the market than by the needs of government-owned foreign producers to sustain employment and generate foreign exchange. Half of the U.S. copper mining industry has shut down; of that, half will be lucky to go back into production.

Steel is perhaps the most glaring casualty. "There is no reason in God's wide world," says GE's Joelson, "that just because we needed so-and-so-much steel in the Fifties, we're going to need that much in 1990." Says Hans Landsberg, a resource expert with Washington's Resources for the Future think tank, "My metals friends say, 'Where will the world be without iron and steel? Everything rests on it like an inverted pyramid.' That's a childish notion. All the steel industry can hope to do is reduce in size, become more efficient and more competitive."

As recently as 1976, the U.S. steel industry shipped nearly a quarter of its total output to the auto industry. By 1981 the figure was 15 percent—15 percent of a much reduced output. And the prospects are not encouraging. Even if Ford should match its 2.9 million-car 1978 output next year, Ford's steel needs would be at least 30 percent less than they were in 1978. This at a time when some of steel's other basic markets are in trouble—containers, for example, where for the first time last year aluminum captured more than 50 percent of the market—and when foreign competition is, if anything, more intense than ever.

There are two basic ways of dealing with these problems of industrial change. There is the Japanese way. Over the past decade or so, the Japanese have been prepared to let the basic industries in which they are losing competitiveness gradually run down, shifting their resources into new industries capable of generating higher real income for their people. They have already let their shipbuilding and textile industries run down. They seem prepared to accept the eventual dispersal of their consumer electronics, steel, aluminum, petrochemicals and even auto industries to places like Korea, Taiwan and Hong Kong. They are concentrating instead on dominating industries that have greater long-term promise—high-technology industries like semiconductors, computers, telecommunications and fiber optics, areas where the U.S. has as commanding a lead as it once had in autos or steel.

In direct contrast to the Japanese, there is the path the British followed prior to Margaret Thatcher. For 30 years Great Britain attempted to preserve most of its dying industries—shipbuilding, autos, steel—through protectionism and subsidies. The result? The progressive stagnation and impoverishment of Britain's people and its economy. The Japanese way surely has more to offer. Yet it is precisely the British model U.S. liberals hope to adopt. Reindustrialization, taken literally, is a nasty joke.

If not in the steel mills and auto plants and housing tracts, where are the needed millions of jobs to be found for the unemployed and for the nation's growing labor force? The answer is easy, but the means of achieving it are neither easy nor very pleasant.

After all, such changes have occurred before. At the outbreak of World War I, one-third of all employed Americans worked at farming. As farming became mechanized, millions of workers poured off the farm and into industry, where they built the cars and refrigerators and other new consumer goods that have done so much to make life easier and better for all but the wealthiest part of the population. And food? Today little more than 3 million farmers grow more food than 12 million did seven decades ago.

A similar change occurred in the railroad industry a few decades later. U.S. railroads came out of World War II with 1.4 million workers; today they haul nearly 25% more freight with only 436,000 workers. Did the unemployed rail workers starve to death? Not al all. They or their wives and children found work in other industries. The U.S. learned to grow more and ship more with fewer workers. Less labor consumed in producing necessities meant more for luxuries, many of which came to be regarded as necessities— cars, indoor plumbing, suburban housing, education.

It is precisely through the shrinking of old industries—learning to make more with less—that new industries become possible and with them a broadening of the horizons of life for most people. The decline of old industries is sad. But it is not a tragedy.

What are the new industries? They are already being born. The $114 billion electronics industry, for one, is gradually coming to play the core role in the U.S. and world economy that autos played in the past. It is a dazzlingly diverse technology encompassing everything from television sets and microwave ovens to electronic computers and missile-control systems. Electronics is rapidly reshaping the world's industries in ways that turn tradition upon its head. In the process it is minimizing most of the elements that have always shaped industry in the past—labor, materials, manufacture. If the old tool industries were an extension of the human hand and back, the new ones are an extension of the human brain and nervous system. The basic thrust of the technology is immaterial, and its productivity potential is enormous. After all, decision making—the conversion of information into action—is probably the only really productive activity there is.

It is a curious thing. In the early days of industrialization there was a preoccupation with giantism, and in the Soviet Union there still is—the biggest this and the biggest that. But the postindustrial age, by contrast, seems bent on scaling down. Some three-quarters of a century ago, Henry Adams wrote about the Virgin and the Dynamo—the unity of religion giving way to the multiplicity of technology. And now the Dynamo gives way to the implosive force of the Chip—but as yet no Henry Adams has poeticized this cataclysmic event.

No more, the bigger the better. Now it is the smaller the better. ENIAC, the first really large electronic computer, was devised 35 years ago. ENIAC was the size of a

room, with 18,000 constantly overheating vacuum tubes, and cost $3 million. A comparable machine today would occupy a space little larger than a typewriter and cost only $300. That has been the pattern of the electronics industry ever since—to downsize, to reduce the use of materials, labor, capital, manufacturing to the barest minimum. And at the same time to reduce the price. The vacuum tube gave way to the transistor, a hundred times smaller; the transistor was absorbed by the integrated circuit, which itself was transformed by the microprocessor. The pattern was a classic of capitalist development. The cost went down, down, down, and the market went up, up, up. Virtually every major electronic consumer product has repeated the pattern: computers, calculators, tape recorders, radios, watches, television sets, you name it.

"By making things smaller, essentially we don't have any negative tradeoffs," says Gordon Moore, chairman of Intel, the U.S.' pioneering microprocessing outfit. "Everything is improved simultaneously—power consumption, performance, production costs. This is an unparalled engineering situation. There is always a threshold somewhere, below which you can't go, but I can see another decade of progress anyway."

The result has been to convert electronics from a heavy industry into a light one—a process that tends to repeat itself in whatever industry electronics touches. In the Fifties, for instance, at Western Electric's Allentown, Penna. plant, rows of white-smocked women assembled vacuum tubes by hand, backed up by metalworking shops and gas fires for working glass. All this has been phased out. The tubes were replaced by semiconductors—silicon transistors, that is—and by integrated circuits. Printed circuits have replaced wired ones, and high-speed automatic equipment bonds the circuits under a single operator. It's a pattern that has been repeated everywhere.

Take the 1977 Apple II computer. According to Frederick L. Zieber, a semiconductor specialist with Cupertino, Calif.'s Dataquest research firm, that 1977 Apple had 105 semiconductor parts with a value of $693. Last year those same parts cost only $97 and, when the Super Apple II comes on the market, those 105 parts will probably be reduced to 10. "The savings showed up in the prices," Zieber says. "The original machine sold for $2,300, vs. $1,700 today, and if you went back to the original $693, you could build a machine that had 8 times the memory and 40 times the computing power."

The old Friden calculator had hundreds of parts and sold for maybe $800. Its electronic version has 50 parts and costs $10. One microprocessor replaced 350 parts in a Singer sewing machine, and a few dozen microchips can replace 80 pounds of switches and wiring in a vending machine.

What made all the difference was the microprocessor—a device that crowded the central element of a computer, its arithmetic and logic circuits, onto the same chip. Until Intel developed it in 1971, electronic computing had relatively limited applications. You don't use a bulldozer to turn over a rose bed, or a stamping machine to turn out cookies, and you wouldn't use an IBM 360 to index your recipes. The big computers are expensive and most efficient when handling large volumes of material. But like the fractional horsepower motor, the microprocessor opened up an enormous and almost unlimited market in small applications. "A few years ago," says Regis McKenna, head of the Palo Alto public relations firm that represents an inordinately large number of Silicon Valley's electronic entrepreneurs, "everything had a fractional horsepower motor to run it. Today everything has an electronic brain. It's a base industry, the semiconductor industry. It's not really a product; it's process oriented, like oil, and other products and industries will live off it for decades."

"The hardware continues to go down in price," says Intel's Gordon Moore. "In some instances, 100,000-fold in 15 or 20 years. And that means that wherever electronics is appropriate, the electronic solution is going to be the one that eventually dominates."

"The exciting thing that's going on," says TRW Chairman Ruben Mettler, "is the use of the new technology in the older and more mature industries. What you can do for a combine, a tractor, a truck or a car with a little electronics is pretty dramatic. It enhances quality, it enhances productivity, it reduces costs and it permits more sophisticated designs." But it also saves on material and requires fewer workers.

What began as a trickle has become a flood. Industry after industry is beginning to turn to microelectronics. And not just in manufacturing. Microelectronics is beginning to handle sophisticated information of all sorts—the sort now handled by trained professionals—in medical diagnosis, architectural design, oil-well analysis, teaching, accounting, stock analysis, journalism. The increments are often small, but the cumulative impact promises to be enormous, conceivably as enormous in driving down the costs of things as energy proved to be in driving them up.

Looked at in this way, the very advance of electronics, of electronic data processing, dooms the older, labor- and capital-intensive heavy industries. They are still needed but are no longer center stage. Here the analogy with the old agriculture holds true: The knowledge industries are replacing the blue-collar industries in the advanced societies as inexorably as the service and blue-collar industries once supplanted agriculture as the principal activity of mankind.

The ramifications are almost endless. Electronic order processing has already begun to transform the wholesale distribution business. Alco Standard, for instance, has built a $2 billion business in paper, health services and auto parts by computerizing its ordering, warehousing and delivery operations—substituting low-cost electronics for high-cost labor. As a result, Alco turns its inventory 7.5 times a year, instead of 6, and cuts its inventory costs accordingly.

When Foremost-McKesson computerized its drug distribution, it cut its warehouse personnel from 140 to 12 and doubled its business. For the drug distribution industry as a whole, computerization helped cut operating costs from 11.4 percent of sales to 8.3 percent. "Labor's initial attitude is: A robot is going to take a person's job," says Alco Chairman Ray Mundt. "But that robot is necessary to keep that company competitive in the marketplace, and if it's not competitive, there aren't going to be any jobs at all. If you can't stay competitive, forget it, you aren't going to be around."

General Electric expects factory automation to be one of its biggest growth businesses. GE is presently spending $38 million to automate its own dishwasher plant in Louisville as a sort of laboratory to discover what it can do for itself and for others. GE figures it could conceivably replace half of its 37,000 assembly workers with robots. At Erie, Penna., it's spending $300 million to expand its locomotive capacity 50 percent an automated operation will turn out a diesel or electric motor frame a day with no operator whatsoever, a procedure that used to take 68 machine operators 16 days.

The Bell System used to account for 4 percent to 5 percent of the U.S. copper consumption. But AT&T is turning from copper to light-guide cable systems, in which lasers blink millions of times over a glass fiber. Light guide will go into a new transoceanic cable, which will have greater capacity than the five other cables combined, and it is also going into the 776-mile communications network AT&T is building between Cambridge, Mass. and Richmond, Va. In a different time, such a system alone would have used 2.5 to 3 million pounds of copper, equal to about 1 percent of the U.S. 1981 copper consumption. But the light-guide cable is lower cost, higher quality and larger volume. In the circumstances, it's not inconceivable that Western Electric could meet its copper needs for the rest of the country by reclaiming the copper it has in place. Good-bye, marginal, high-cost copper mines.

The implication for the traditional materials is awesome. Steel, copper, lead and zinc will lose more and more of their importance, and lighter-weight, more sophisticated and exotic materials will come to the fore. "The knowledge industry," says RFF's Hans Landsberg, "is the enemy of the traditional materials industry."

When the U.S. emerges from the present recession, it may discover that industry has made enormous gains in productivity but that unemployment has not necessarily been reduced. To take the easiest example: Nobody expects Detroit to rehire more than a portion of the 400,000 or so autoworkers that have been laid off. The Bureau of Labor Statistics expects auto employment will recover to no more than 900,000 down from 1978's 1 million. And, as factory automation proceeds in the auto industry, another 200,000 could lose their jobs over the next several years.

"In the last three or four recessions," says Harvey Hamel, an economist with the BLS, "the recovery has never brought unemployment back down to the level where it was prior to the recession. Unemployment has settled down at the higher rate every time."

A Congressional Budget Office study estimates microelectronic technology could cost the U.S. 3 million jobs by the end of the decade—15 percent of the manufacturing work force—and 7 million by the year 2000. Dataquest's Fred Zieber doubts whether many of these job losses can be avoided. "You can say, 'Don't use electronics because electronics is going to cost jobs.' But you can't hold them back anymore than you can hold back Pac-Man. Somebody in some other country will use it, and those jobs are going to be lost anyway."

The cost savings—and the competitive impact—can be so extraordinary that companies and countries have no choice but to adopt the technology if they want to survive. The Japanese success in the microelectronics market was based in part on their ability to produce a lower-cost and higher-quality product using automatic equipment than the U.S. producers could turn out by hand. And the U.S. producers retaliated by turning to automation themselves.

"A country that wants to participate in the world economy can't keep the technology out," Gordon Moore says. "The alternative to not adopting it does not exist, be-

cause you'll lose the jobs completely, you'll not be competitive in the world market." So reindustrialization—the traditional revival of traditional industry—makes as much sense as fighting unemployment by throwing out machinery and building roads with human labor.

Is the U.S., indeed the world, then doomed to suffering massive unemployment? Not necessarily—not in the long run. Look what has been happening in the U.S. in recent years: Total employment in the country has risen from 75 million in 1970 to 99.7 million in 1982. But of the 25 million new jobs, only 2.3 million were in manufacturing. Virtually all the new jobs have come in the service industries: utilities and transportation, wholesale and retail trade, producer and personal services and government. Union spokesmen like to sneer that the new jobs involve serving hamburgers in fast-food restaurants. They forget electronics, data processing, the law and such fancy new opportunities as environmentalism, affirmative action, astronautics and hazardous-waste control.

According to the BLS, employment in the computer and peripheral industries should grow twice as fast as the national average over the next decade, including such jobs as computer-repair technicians, computer-systems analysts, computer operators, office-machine and cash-register service, computer programmers.

But if bank tellers are to become computer operators and machine operators become computer programmers, there's got to be a massive upgrading of skills involved. You don't have to have a college degree to be a programmer. But you do have to have some basic skills. Old dogs—and most people get to be old dogs by the time they're 35—don't want to learn new tricks, and whether they're salaried professionals or assembly-line workers, they don't want to move elsewhere to learn them. But though Luddite visions of unemployed millions cannot be entirely dismissed, there is no reason to think that a nation that has coped with fair success with the problems of the elderly and the disadvantaged, the ill-educated and the unhealthy cannot find ways and means to make even this problem manageable.

Luckily, the U.S. changing demographics will help. Along with the downsizing of U.S. industry, there has also been a downsizing of the U.S. population growth rate. As the Eighties progress, the U.S. will begin to feel the impact of the lower birthrates of the Sixties. There may not be the population stimulus to economic growth there was in the Sixties, but there shouldn't be so much difficulty in generating new jobs either.

The new entrants to the work force, as management philosopher Peter Drucker points out, are likely to be far better educated than those who are leaving it. This means that a labor shortage could conceivably develop in the traditional manufacturing and service occupations, and a labor surplus in the more capital-intensive, high-skill and technology jobs. Blue-collar industrial and service jobs would go begging. Which may justify the transfer of labor-intensive manufacturing to the developing countries—as is happening already. "The standard of living of the developed world," Drucker says, "can be maintained only if it succeeds in mobilizing the labor resources of the developing world." Foreign competition thus plays its part in the dynamics of changing industry. To assure markets for our higher-skilled output, we're going to need to cultivate the labor-intensive economies of the developing world. Thus, job exports ultimately loom as a means of protecting higher-skilled jobs at home.

"As a practical matter," says TRW's Ruben Mettler, "the commodity, lower-technology, more-labor-intensive tasks are going increasingly to the developing and middle-developing countries. The $20 an hour they pay in Detroit can't compete with the $2 or $3 in Mexico or Taiwan. We are part of the world economy. So it's healthy for the U.S. to move to the higher-value-added segment of the world economy."

But isn't half the U.S. semiconductor industry's approximately 500,000-man employment outside the U.S.—partly because of cost, partly because the best process engineers in the world are in Taiwan and Singapore? Yes, but there's nothing irrevocable about the move. Explains Ralph Anavy, vice president of Gnostic Concepts, a Menlo Park, Calif. research firm, "Once you have wiped out almost all direct labor and automated the process, it doesn't make sense to keep manufacturing in Singapore. In semiconductor assembly, the labor-intensive job of bonding the dies to the lead frames used to be done abroad. Now it is done automatically in the U.S." In such circumstances, automation could conceivably enable the U.S. to recover such industries as textiles, long since lost overseas.

Joseph Schumpeter, the great Austrian economist who for three generations was largely eclipsed by Keynes, wrote of the "gales of creative destruction" in economic life. These sweep away the obsolete and the inefficient and make place for the new. These gales have made a wasteland of large parts of the U.S. Middle West. But they are blowing in whole new industries. The dual nature—creative and destructive—of the changes can be seen clearly in a city like Akron.

A large part of the rising affluence of the U.S. in the post-World War II years stemmed from the fact that the real prices of many of the U.S. most vital commodities declined, and often declined sharply—from gasoline to electric power to automobiles. They did so for a variety of reasons—technological change, the abundance of raw materials, multiplying economies of scale—but by the early Seventies most of those forces had begun to run out. The next unit of almost everything cost more than the last, and when the price of oil lurched out of control in 1973, the game was over. Living standards began to decline.

But those dynamics of falling prices are still valid, and these days it is microelectronics that offers the best hope of getting those costs trending downward again—not from deflation, but from real productivity gains. The microprocessor has an insidious capacity for pervading every aspect of the economy—for filling it, reforming it and reshaping it to its image. And it's a dynamic that corporations from GM to Western Electric are working to get moving again.

"The cost of a lot of things isn't going up," says Western Electric's Vice President William B. Marx. "It's coming down—tape recorders, television sets, long distance telephone service." "In the electronics industry," says Ralph Anavy, "the cost of production typically goes down between 20 percent and 30 percent for each doubling of volume."

Tell that to the unemployed auto, steel or machine-shop workers? You can't. Their futures are not bright. For them, adapting to the new world isn't going to be easy. But for the country at large, for the world at large and for the children of the present generation, there is absolutely no reason to despair for the economic future.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business.

The Senator from Florida is recognized.

HIGH-RANKING CUBAN OFFICIALS ACCUSED OF ILLEGAL NARCOTICS TRAFFICKING

Mrs. HAWKINS. Mr. President, I am convinced that the United States is faced with a problem of major proportions, a crisis that undermines our Nation and threatens the future of our children. That crisis is the trafficking in illegal narcotics that is overwhelming our enforcement efforts.

Until now U.S. enforcement has assumed that the war against illegal narcotics was being waged primarily against organized crime, street hoods, motorcycle gangs and countries that lacked the resources to prevent illegal narcotics from being produced in their country. But now important new information has come to light demonstrating that a cabal of high-ranking Cuban Government officials have been intimately involved in smuggling narcotics into the United States. On November 15, 1982, four of these officials were indicted on Federal charges of smuggling. I believe that this adds a new and ominous dimension to the war against illegal narcotics. Unfortunately, this also marks an extension of Castro's anti-U.S. policy that already includes placing Cuban combat troops around the world, efforts to destabilize countries in the Caribbean Basin, and the Cuban-inspired Mariel boatlift.

I applaud the Reagan administration for their commitment to the war against illegal narcotics. However, I believe that with this new information, concerning Cuban complicity in the smuggling of illegal narcotics into the United States, new actions are needed. I believe that this calls for a reassessment of our relations with Cuba, and that the administration should let it be known in international fora that high-ranking government officials are engaging in illegal narcotics trafficking. In my view, the Government of Cuba should be condemned from every possible platform for this kind of behavior. I have expressed many of my concerns and suggestions in a letter to President Reagan which I ask unanimous consent be printed in the RECORD following this statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mrs. HAWKINS. Mr. President, I believe that my colleagues share my concern and hope they will let your con-

cerns be known to the President as well.

EXHIBIT 1

U.S. SENATE,
THE U.S. SENATE DRUG
ENFORCEMENT CAUCUS,
Washington, D.C., November 26, 1982.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: On November 15, 1982, four high-ranking officials of the Castro regime were indicted on Federal charges of smuggling narcotics into the United States. The indictment of these officials, two of whom are members of the ruling Central Committee of the Communist Party of Cuba, brings into the open an aspect of Castro's anti-American efforts unknown until recently.

The people of Florida, Mr. President, have been the target of Castro's aggression for many years. This is but the last of a long list of actions by the Cuban dictator, which include the illegal shipment of criminals and mental cases to our shores. As chairman of the Senate Drug Enforcement Caucus, I urge you to mobilize every federal agency in order to finish the job started by the U.S. Attorney for the Southern District of Florida.

Jaime Guillot-Lara, a Colombian shipowner who was indicted at the same time as the Castro officials, is believed to have fled to Europe. Mexican authorities, who had been holding him on an unrelated charge, released him despite U.S. and Colombian efforts to secure extradition. Guillot-Lara could shed new light on the Communist drug conspiracy; I urge you to activate the resources of Interpol and U.S. drug enforcement agencies abroad to locate and incarcerate Guillot-Lara.

Castro's support of the drug traffic is linked to his promotion of terrorism in Latin America because the ships loaded with drugs that stopped in Cuba on their way to Florida were laden on their return trips with weapons and terrorists for the South American mainland.

Your recent visit to our state, Mr. President, as well as the successful efforts of Vice President Bush in coordinating U.S., state and local programs to stop the drug traffic demonstrate your commitment to an early resolution of this serious matter.

Perhaps your Administration might want to bring this violation of international law to the attention of the appropriate international bodies. This new development calls for a reassessment of U.S.-Cuban relations.

On behalf of the people of Florida, I would like to thank you in advance for your efforts.

Sincerely,

PAULA HAWKINS,
U.S. Senator.

THE NATION'S UNEMPLOYED

Mr. LEVIN. Mr. President, over the Thanksgiving Day holiday hundreds of thousands of unemployed people in my State of Michigan and millions of jobless workers nationwide were shocked to learn that the White House was considering a proposal which would further tax their jobless benefits so as to give them incentive to find work.

The fact that the proposal was withdrawn has not tempered my anger—my outrage—at yet another insulting and insensitive slap at our unemployed workers.

The attitude of this administration derides and demeans millions of jobless men and women. This attitude supports the cynical belief that people who cannot find jobs are shirking from work and need to be punished. Instead of blaming unemployment on people who cannot find work, the President should be supporting policies to restore their jobs.

This is not the first time this administration has insulted jobless men and women with insensitivity and lack of compassion. What kind of compassion does the President show when he asks whether it is newsworthy that "some fellow in South Succotash" lost his job?

What kind of compassion does the President show when he holds up newspaper want ads and says there is work to be found? He implies again that if only the jobless would get off their behinds and look for work, they would find it.

Well, I would like the President to look at the want ads in newspapers from cities in my State—like the Flint Journal, a city with a 17.8-percent unemployment rate; or the Saginaw News, a city with a 14.1-percent unemployment rate; or the Escanaba Daily Press, a city with a 19-percent unemployment rate; or the Detroit Free Press and Detroit News, a city with a 15.2-percent unemployment rate.

If the President looked at these newspapers he would realize that there are few jobs to be found—certainly not the number of jobs needed to reduce this devastating rate of unemployment my State is suffering from.

The President has a solution, however. He says let the jobless vote with their feet. Let them move to the South and to the West where jobs presumably abound. But these once prosperous Sunbelt regions are now suffering from the effects of the recession and cannot even employ their own workers, let alone displaced workers from the industrial Midwest and Northeast.

And what kind of compassion does the President show when he suggests that families should uproot themselves from relatives and from neighborhoods where they have lived often for generations?

Michigan is bleeding. Its life blood is being drained by a depression in the automobile and housing industries and a recession in almost every other sphere of our economic life. Indeed, a recent newspaper story reports that unemployed people are literally pouring their life's blood to make ends meet. Two blood plasma firms report that the unemployed in Lansing, Mich., are selling their blood in record numbers. An unemployed man says he sells plasma once and sometimes twice a week. He says, "I've got three kids at home. It helps pay for my babies' milk."

Mr. President, this is the kind of compassion—compassion that a father shows his children by selling his blood to feed them—that we need from the White House. There are 685,000 unemployed workers in Michigan. My State's 16.1 percent seasonally adjusted unemployment rate is the highest in the Nation. We have had a double-digit unemployment rate for 34 consecutive months—almost 3 years of double-digit unemployment. With 11.5 million men and women out of work nationwide, it is time for the White House to stop blaming the jobless of our country for unemployment and strive toward putting them back to work.

I thank the Chair and yield the floor.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MURKOWSKI). Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Time for morning business has expired.

ANTITRUST EQUAL ENFORCEMENT

The PRESIDING OFFICER. The clerk will now report the pending business.

The legislative clerk read as follows:

A bill (S. 995) to provide for the contribution of damages attributable to an agreement by two or more persons to fix, maintain, or stabilize prices under section 4, 4A, or 4C of the Clayton Act.

CLOTURE MOTION

Mr. THURMOND. Mr. President, I sent to the desk a cloture motion.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the committee amendment to S. 995, a bill to provide for contribution of damages attributable to an agreement by two or more persons to fix, maintain, or stabilize prices under section 4, 4A, or 4C of the Clayton Act.

Strom Thurmond, Paul Laxalt, Howell Heflin, Orrin G. Hatch, Mark O. Hatfield, Dennis DeConcini, John Glenn,

Chuck Grassley, Jesse Helms, Don Nickles, Dan Quayle, Jennings Randolph, Alan Simpson, Ted Stevens, James A. McClure, and John Tower.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, under the motion just filed and pursuant to provisions of rule XXII, a vote on this question will occur on Friday next, assuming that cloture is not invoked prior to that time 1 hour after convening and after the establishment of a quorum, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I thank the Chair.

Mr. President, I anticipate that the debate on this measure will continue during the course of the day. It is still my hope that we might be able to take up the D.C. appropriations bill or another appropriations bill. No agreement to that effect, however, has been reached. It is not my intention to displace this measure by motion. Therefore, I assume that, absent agreement, we will be on this for the remainder of this day. I would not expect the day to extend past approximately 6 p.m.

Mr. President, I yield the floor.

Mr. BAUCUS addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, first I wish to thank the majority leader for outlining the proceedings for the day, as well as for tomorrow, Thursday, and to some degree, the votes that will transpire on Friday.

At this point, I would like to read into the RECORD the views of this Senator, Senator DENTON, and Senator DOLE on S. 995. These are the views as contained in the committee report to S. 995.

I think these views very adequately summarize our views and our position on why we are opposed to the bill and very specifically why we are opposed to the bill insofar as it contains provisions on retroactivity.

We strongly support S. 995 as it was introduced by Senators Thurmond, Baucus, Laxalt, Hatch, DeConcini and Heflin. We believe that the contribution and claim reduction principles embodied in S. 995 will make our antitrust laws more just and equitable. Furthermore, we commend the Chairman for his leadership in pursuing this important legislation. However, we do not support the committee amendment which applies the legislation to pending cases. This amendment, which only narrowly passed the Committee, is unsound policy and needlessly jeopardizes the passage of otherwise highly desirable legislation.

If I might parenthetically insert there, Mr. President, we support—that is, Senator DENTON, Senator DOLE, and myself, and I think I can speak for other Senators not only on the committee but on the floor—we do support S. 995 as it was introduced. In fact, Mr. President, I am the primary cosponsor of S. 995. I supported the bill when it was introduced in the prior Congress. Senator Bayh, the former chairman of the Senate Judiciary Committee, introduced the contributions bill. I supported it then and I support it now.

However, I do not support the amendment that was moved by the Senator from South Carolina, Senator THURMOND, which makes the bill retroactive to pending cases. I will enumerate those reasons as follows:

The basic legislation would change the antitrust laws in two respects: First, by creating a new right of contribution permitting defendants in antitrust price-fixing cases to bring into the case other parties who were not sued by plaintiffs but may have been part of the price-fixing conspiracy; and second, by creating a new statutory right of claim reduction, under which any judgment obtained by plantiffs in a price-fixing cases against defendants would have to be reduced by the market shares represented by any defendants had who settled their cases, rather than, as now, by only the dollar amount paid by the settling defendants.

We believe that the contribution and claim reduction principles embodied in S. 995 represent sound policy. They will permit businesses who are convinced of their innocence to litigate without fear of a devastating and disproportionate judgment; they will discourage "sweetheart settlements" and *in terrorem* tactics by plaintiffs; and they will make it more likely that defendants will be liable for their proportionate share of damages in a price-fixing conspiracy. It is for these reasons that we strongly support S.995, as introduced.

During its consideration of this legislation, the Judiciary Committee narrowly accepted an amendment which would apply the principles of S. 995 retroactively to pending cases. We believe this amendment represents bad policy and transformed S. 995 into a highly controversial piece of legislation.

And I might add here, Mr. President, that S. 995, as introduced, was basically a noncontroversial bill. Sure, there were several Senators who were opposed to the bill. It is not uncommon to have several Senators oppose a bill. But, in the main, the bill was noncontroversial. But when the amendment was added to make this apply retroactively, I could say that suddenly the bill became very controversial and so controversial that it jeopardizes the passage of the basic bill.

And I reemphasize here my own personal view that I will undertake every effort possible to prevent the bill from passage as it is now written; that is, if the amendment is not modified or changed. But if it does not include the provision to make the bill apply retroactively to pending cases, then I will be a fervent supporter of S. 995 and I will join the Senator from South Carolina to insure passage of the bill. But, at this point, I cannot.

I will exercise every effort at my command to oppose the bill itself because of the abuse of public policy that will occur if S. 995 is applied retroactively to pending cases.

It is important to remember that when legislation was originally introduced (see S. 1468, 96th Congress) it was to be applied prospectively to cases filed after the date of enactment. That bill passed the Senate Judiciary Committee with little controversy. Similarly, when S. 995 was introduced early in the 97th Congress it included the same prospectivity provision.

There were very few serious concerns raised about the legislation until verdicts were entered in three major price-fixing cases: *Corrugated Containers*, M.D.L. 310, *Plywood*, M.D.L. 159, and *Burlington*, Civ. No. 71-306 (D.S. Car.). After these verdicts were entered, five of the losing defendants realized that S. 995 could provide them with an excellent opportunity to escape the potential judgments they were facing in their price-fixing cases. Since that time, the five companies have aggressively pursued their effort to use S. 995 as a vehicle to cut their liability for price-fixing.

Congress has historically disfavored retroactive legislation because it upsets the expectations of parties who have relied in good faith upon existing law. In the past, when Congress has applied antitrust legislation retroactively, it had a specific justification for remedying an unexpected and inappropriate FTC or court decision (see, Soft Drink Interbrand Competition Act, S. 598, 96th Congress). S. 995 does not present Congress with such a case.

That is, it was not an unexpected or inappropriate agency or court decision.

No one is arguing that the courts have interpreted the antitrust laws concerning joint and several liability in a manner that was inconsistent with Congress' intent or the parties' expectations.

No one is arguing that the bill before us is necessary because for some reason the courts have misinterpreted the prior act of Congress or because the parties have been surprised. That is not the point.

Those are the only two instances when Congress has applied antitrust legislation retroactively. That is when there is surprise, when the litigants are surprised, of a court or agency action, or where a court or an agency has misinterpreted an act of Congress. Those are the only two instances, and no one today here is arguing that either of those two instances apply. No one is making that point.

Again, the solid general rule is not to apply antitrust legislation retroactively because to do so would upset the parties' expectations about what the law is or is not.

In pending antitrust cases, plaintiffs and defendants have based their decision about whether to settle or litigate on the existing law which provides for full recovery in the event of settlements. Judges and juries have similarly relied on this rule in approving settlements and reaching verdicts. To change the rules in the middle of the game, as the retroactivity amendment to S. 995 would do, would be unfair and unjust to all of these parties. To do so solely to enable convicted price-fixers to reduce the damages which they would otherwise have to pay to the innocent businesses which have

been injured by their misconduct is unconscionable.

Mr. President, we are not talking about two parties in a contract action trying to decide what their rights should or should not be under the legislation. We are talking about price fixers who have been found guilty of price fixing. Those defendants have come in here and asked the Congress to be a court of last resort, asking that the Congress change the rules in the middle of the game or change the rules at the end of the game so they can go back and play the game all over again. To do so I think is grossly unfair and certainly reprehensible to the American sense of decency and fair play.

There are additional problems with the retroactivity amendment to S. 995:

First, noted constitutional law experts Charles Alan Wright of the University of Texas Law School and Ernest Gellhorn of the University of Virginia Law School have pointed out that retroactive claim reduction would raise serious due process questions, because it could deny plaintiffs the benefit of damages to which they were entitled under existing law.

Second, enormous disruption will take place in our already overburdened judicial system as litigation multiplies in scores of pending antitrust cases, 900 cases.

Claim reduction, the constitutionality question and the preservation of settlements will be litigated at length, substantially prolonging cases that are already far too costly, complex and slow-moving. The "day in court" which the retroactivity amendment purports to provide will actually add years in court for everyone in order to benefit companies which have already had their day in court, and in that "day in court" were found guilty of price fixing.

Third, Congress would be sending a signal that it can be used as a court-of-last-resort by parties found liable under existing law, undermining the deterrent value of our antitrust laws.

That is an important point, Mr. President. Let me elaborate.

If Congress passes this bill in its present form, it will be telling price fixers, it will be telling all parties, all potential litigants, all Americans, "Do not worry, do not follow the law. If you follow the law and you are found guilty of misconduct, do not worry about it. Just come back to Congress and ask Congress to change the law, change it back and have it applied in your instance even though you relied upon the law in the past and other parties relied upon the law."

In effect, in passing this bill, we are telling the country that the Congress is the court of last resort which will undermine the judiciary and undermine confidence in what the present law actually is, regardless of what that law might actually be.

There is a very important principle here called separation of powers, checks and balances. Our Founding Fathers when they wrote our Constitution set up three distinct, separate branches of Government: the executive to enforce the law, the legislative to make the laws, and the judiciary to interpret the laws.

It is important to maintain those distinctions. It is important that Congres pass laws, not interpret or enforce the laws.

It is important that the judiciary interpret the laws that Congress passes, not pass the laws or enforce the laws.

It is important for the executive to enforce the laws and not also pass the laws and interpret them.

They are three distinct, separate, equal branches of Government. Applying laws retroactively, by Congress saying that laws will be applied retroactively, is to obliterate, to blur, to say the least, the distinction between the legislative and the judicial branches. To apply legislation retroactively, that is, for Congress to be a court of last resort, is to say to American citizens wondering what the law is, "Well, courts are not going to interpret the laws. You need not worry about what the law is. If you do not like what the law is, come back to Congress and have Congress change it not only for the future but also in past cases."

I do not think that is what we want to hear today.

Many settlements entered in pending cases will be potentially threatened since their approval by Federal courts has been expressly premised on the rights of the parties under existing law, which would be overturned by the retroactivity amendment to S. 995.

Let me summarize very briefly, Mr. President.

The portion of the bill we are talking about today, the retroactivity portion, as I said, changes the rules of the game. Here is how it does it: Let us say that the Monday after the Super Bowl football game the National Football League decides that field goals are going to be worth 6 points and touchdowns only worth 3 points, and that the losing team on Monday after the Super Bowl game say, "We want the rules change. We want the extra points to be worth 6 points and the touchdowns to be worth 3 points." Let us say for some reason the National Football League agrees with that. That is fine for future Super Bowl games, but to apply this retroactive principle that we are asked to apply today to this situation, that is, where the rules of the football games are being changed, would be saying to the teams, "OK, we will go back and agree to play yesterday's football game, and when we play the game the touchdowns will be worth 3 points and field goals worth 6 points."

That is not fair. It is effrontery. It is ridiculous to suggest those two teams go back and play the game again. That is exactly what this amendment would do. It would tell the parties in antitrust cases, "Even though you relied on present law and decided whether to litigate or not to litigate, how to handle litigation, that is OK, we are going to go back, adopt new rules, and we are going to play the game all over again."

That is what is at stake here.

As I said, only twice has the Congress ever applied antitrust legislation retroactively. That was in a case of surprise, where the court has come up with a ridiculous decision, or where the court has interpreted laws in unexpected or unanticipated ways. None of those cases are here today.

Again, I strongly urge the Senate not to agree to this provision.

For all of these reasons, objective observers have strongly opposed retroactive application of S. 995. The American Bar Association's antitrust section specifically opposed retroactivity on the ground that it would "upset settlement calculations already in progress, and * * * parties could be prejudiced who had already participated in the conduct of joint defense efforts on an assumption of no contribution."

The American Bar Association opposes retroactive application of S. 995. They do favor prospective application—that is, the main bill—as do I.

Editorial comment has been widespread around the country and virtually unanimous in opposition to retroactivity.

One final point ought to be noted. It could be argued with some justification that defendants in pending cases ought to be permitted to have the advantage of S. 995's provisions, particularly where there has not been extensive reliance upon existing law in terms of settlements, judgments on the merits or jury verdicts. The retroactivity amendment to S. 995 does not accomplish this. It would allow claim reduction to be applied in pending cases even after judgments and jury verdicts have been entered in favor of plaintiffs.

In conclusion, Mr. President, S. 995, as introduced, was a bill we strongly supported. We believe it was a relatively noncontroversial bill that brought more commonsense and fairness to our antitrust laws.

The retroactivity amendment adopted by the Judiciary Committee has made S. 995 a highly controversial bill. It has turned a constructive piece of legislation into what has been referred to as a "bail-out" for price fixers. The retroactivity amendment delayed our committee's reporting of S. 995 for more than 6 months. We believe it will

seriously reduce the bill's chances for enactment by the other House. We hope, and expect, therefore, that the full Senate will reject the retroactivity provision of the committee bill, move this important legislation forward.

Mr. President, I understand the majority leader wishes to have the floor. I therefore yield the floor to him.

CONVENING DATE FOR 98th CONGRESS

Mr. BAKER. Mr. President, earlier today, I announced that after I had talked with the Speaker of the House and conferred further with the minority leader of the Senate (Mr. ROBERT C. BYRD) I would have a further announcement to make on the plans for the convening of the 98th Congress. I have now talked to the Speaker, who indicates to me that he is firm in his decision to ask the Congress to reconvene on January 3 to fulfill certain obligations in respect to the organization of the House of Representatives, then to go out, as he suggests, until the 25th of January.

It is traditional, of course, that Congress does not enact major legislation or perhaps do any business at all prior to the incoming requests in the state of the Union message. The schedule is to accommodate that.

I have also consulted with the minority leader and indicated to him that it will be my intention to ask the Senate to follow the same schedule. Therefore, I announce at this time that the leadership will propose that, when this Congress adjourns sine die, it do so until the constitutional date of January 3, 1983, at 12 noon. It will be the intention of the leadership on this side, and I believe it is perhaps agreeable to the leadership on the otherside, that the only business we shall transact will be the organization of the new Senate. That will include, of course, the administering of the oath of office to newly elected Senators and the appointment to committee vacancies. It is hoped that both party caucuses can supply those names well in advance of the time that the new Senate will act. I fully expect that the Senate will be able to conclude that business during the day on the 3d of January, in which case, we would either go out in recess until the House adjourns or adjourn until January 25.

I repeat, it is the intention of the leadership to ask the Senate, after adjournment sine die of the 97th Congress, to reconvene on January 3, 1983, at 12 noon, to go about the routine business of administering the oath of office to newly elected Senators, to complete the appointment of committees, and then to adjourn until January 25.

Mr. President, I thank the Senator for yielding so that I may make that announcement. I have conveyed that information to the minority leader, who indicated that he did not need to be present on the floor at the time the announcement was made. I am grateful to him for that. I wanted to make the announcement as soon as possible so all Members could make their plans.

Mr. President, I yield the floor.

ANTITRUST EQUAL ENFORCEMENT

The Senate continued with consideration of the bill.

Mr. BAUCUS. Mr. President, I want to make it clear at the outset of this debate that I have absolutely no objection to the underlying substance of S. 995 as that bill was introduced. In fact, I would be anxious to see the bill passed if the retroactivity amendment were dropped and the bill returned to its original prospective form.

However, I am forced to oppose S. 995 in its current form because what was a sound piece of legislation when originally introduced has now been converted into one of the worst special interest bills I have seen in my 8 years in Congress.

What was once a bill to guide the course of the future conduct of parties in price-fixing cases has now been converted into a relief bill for adjudged price-fixers.

What was once a legitimate effort to improve the conduct of future antitrust litigation has now been perverted into a bailout bill for a few large companies trying to avoid judgments lawfully rendered against them.

What was originally intended as a bill to benefit antitrust litigation for all parties has been changed into a blatant effort to give price-fixers a second bite at the apple.

As we shall learn in more detail later, the special-interest nature of S. 995, as amended, has been noted by newspaper editorials from around the country; 28 States have newspapers which have roundly and soundly condemned retroactivity as a special interest bailout. In some States, multiple papers have come to this inescapable conclusion—two in Arizona, three in California, five in Florida, two in Illinois and in Iowa, three in Minnesota, two in Missouri and in New Mexico, six in North Carolina, six in Pennsylvania, two in Tennessee and in Texas, and three in West Virginia.

While many of these editorials will be read to the Senate later, what a few have to say about the special-interest nature of the bill, as it has been amended, is important to note now:

The New York Times in its March 16, 1982, editorial hit the nail on the head. It stated, in pertinent part:

> Price-fixers, who usually conspire in secret, have banded together for a brazen, daylight attempt to rig the federal antitrust laws. Spending money as freely as they collected it from overcharged customers, a few large companies are baldly seeking Congressional rescue from more than $3 billion in court judgments.
>
> The companies are seizing on a bill to change the rules for future litigation; they also want Congress to apply it retroactively. The basic bill would make life harder for lawyers suing alleged price-fixers and easier for the companies they sue. It has wide support in Congress. Its merits are debatable, but retroactivity is not. That part of the proposal is an outrage * * *
>
> The current legal rules that allow * * * divide and conquer tactics would be scrapped for future cases under the pending bill. In the future, a company's price-fixing liability would be limited to its share of the legal profits. What some price-fixers want, however, is to apply that principle to their own cases—after they have gambled on going to trial and then lost, under the existing rules.
>
> It is a repugnant spectacle, especially with so many high-priced lobbyists arguing for retroactivity * * *
>
> To be fair any new law would apply only prospectively * * * If the stakes are clear so is the principle: Congress shouldn't change the rules in the middle of the contest.

That was a New York Times editorial of March 16 of this year on this bill, particularly on the retroactive portions that I find so objectionable.

The Cedar Rapids, Iowa, Gazette on March 6, 1982, likewise drove home the special interest nature of the measure the Senate is now being asked to consider:

> Several companies now facing heavy damage payment to their price-gouged customers and penalty for past offenses (in the Plywood, Corrugated Container, and textile machinery fields) now are trying hard to wiggle out. They hope to wiggle out by getting the new law made retroactive as to past violations. In other words by changing game-rules in mid-game. That isn't fair.

The Hagerstown, Md., Daily Mail has also put the issue directly:

> This is a simple matter of equity. There are laws against price-fixing. There are long-established rules under which price-fixing cases are tried. Now the guilty price-fixers want Congress to change those rules retroactively. They seek nothing less than a bailout. This, however, is an unusual bailout. It would let the price-fixers victimize their victims all over again.

The Huntsville, Ala., Times put the issue cogently:

> No law apportioning damages, or changing procedures ought to be made retroactive. No one made the companies break the law, and no amount of string-pulling by high-paid lawyers and PR men ought to convince the Senate to change the law to benefit a favored few.

To understand how it is we have gotten to the point where the Senate is being asked to consider this special bailout bill, it is important to understand the backgroud that led to our current situation.

For some time, there has been considerable concern among antitrust practitoners and the business community about certain inequities in the antitrust law. Contrary to what has

become the growing practice in tort cases, there is currently no right of contribution among and between defendants in antitrust cases; nor do defendants have any right to bring into an action other parties who may have joined with them to violate the antitrust laws. Thus a plaintiff is permitted to pick and choose among the potentially guilty coconspirators in a price-fixing scheme, and the defendants ultimately sued are bound by the plaintiff's choice and cannot ask parties not named to share their damages.

Any question about whether a right of contribution exists was put to rest by the U.S. Supreme Court on May 26, 1981, in the case of *Texas Industries, Inc.* v. *Radcliff Materials, Inc.*, 101 S. Ct. 1061 (1981) which unanimously held that there does not exist a basis in either Federal statutory law or in the Federal common law for the courts to fashion rules of contribution in antitrust cases. This case simply confirmed what has been understood by the antitrust practitioners for decades.

It was the desire to permit a right of contribution that initially led to the impetus for legislation. The idea behind the original bill was not to reduce the amount a plaintiff-business overcharged by defendant-price fixers could recover, but rather to permit defendants to share any damages they might have caused to a plaintiff's business with others who might be equally culpable.

Thus, one of the purposes of the initial legislation was to create a statutory right of contribution according to the damages attributable to a particular defendant's sales or purchases of goods or services. It was intended that a claim for contribution by a person or persons against whom an antitrust action had been commenced could be asserted by cross-claim, counterclaim, third-party claim, or in a separate action, whether or not an action had been brought or a judgment had been rendered in the antitrust matter against the persons from whom contribution is sought.

In developing this legislation, it was then recognized that, standing alone, this right of contribution might deter settlements. Thus, a defendant might have no incentive to settle if that defendant might still be liable for contribution to other defendants who decided not to settle their cases. Therefore, a second change in the prevailing antitrust laws was made to protect settling defendants against a right of contribution and to create a new right of claim reduction or carve out.

Under this new claim reduction principle, if and when a defendant settled, that defendant's market share—rather than the dollar amount of its settlement—would be carved out of the plaintiff's ultimate recovery against any nonsettling defendants. Put another way, under the law as it now exists, a judgment against a defendant is reduced only by the dollar amount of the settlements entered into by settling defendants. Under the new principle, that verdict would be reduced by the market share represented by the settling defendants.

Thus, claims reduction came in as follows: Permitting a right of contribution seemed just, but it might deter settlements if exercisable against defendants who had settled: This could be taken care of by barring contribution claims against a defendant who settled. However, this solution by itself would leave the nonsettling defendants who could not get contribution against a settling defendant holding the bag for the remainder of the damages. Thus, in an attempt to be fair to them, the new legislation should provide that the settling defendants' market shares would simply be taken out of any ultimate recovery against remaining defendants. Thus, the two features of contribution and claims reduction work hand in hand, each supporting the other.

These two changes were incorporated into S. 1468, introduced by former Senator Birch Bayh of Indiana in 1979.

S. 1468, in subsection (e), was made explicitly applicable only to future cases. Subsection (e) stated as follows:

> This section shall apply only to actions under section 4, 4a, or 4c of this act commenced after the date of enactment of this section.

S. 1468, applying only to future cases, passed the Senate Judiciary Committee in the 96th Congress, but did not reach the Senate floor. Nor was a companion bill reported out of the House Judiciary Committee in that Congress.

The same legislation was reintroduced in the first session of this, the 97th Congress. I was proud to be a cosponsor of that legislation. The new chairman of our committee, Senator STROM THURMOND, of South Carolina, was also a sponsor of that legislation; in fact, the primary sponsor. It was directly patterned after S. 1468 and, like S. 1468, was made applicable only to future cases. When the bill was introduced, subsection (e) of S. 995 contained the same prospective provision, applying the new statutory right to contribution and the new statutory right to claims reduction only to actions commenced after the date of enactment of this section.

Mr. President, I believe that it is clear that if the bill had been left in its original prospective form it would have long since passed the Senate. As introduced, it would have constituted a major improvement in the antitrust laws.

However, toward the very end of last year, 1981, this legislation, which had broad support, began to take on an entirely different complexion. Jury verdicts had been entered in three separate cases against five defendants.

In the textile machinery case, Burlington Industries won a $21 million verdict against Milliken & Co. of South Carolina for fixing prices on royalties for textile machinery which Burlington obtained from Milliken. This case was brought by Burlington alone. That is, Burlington won a $21 million verdict against Milliken of South Carolina for fixing prices on royalties for textile machinery which Burlington obtained from Milliken.

A second case, called the Plywood case, involved a jury verdict against Georgia-Pacific Corp., Weyerhaeuser, and Willamette. That case is now being appealed by those defendants and is before the U.S. Supreme Court. A special master will compute damages on the basis of existing law if the jury verdict is upheld. The jury found in the Plywood cases that the three defendants and their coconspirators had engaged in a price-fixing scheme to increase the price of plywood sold to the plaintiff businesses by charging them with transportation costs from the west coast—even though the plywood supply was not shipped from the west coast but rather from locations in the East, much closer to the location of the plaintiff businesses. Virtually every State has some plaintiff businesses who were overcharged as a result of the price-fixing scheme and whose hard-earned jury verdicts could be substantially reduced under Senator THURMOND'S retroactivity amendment.

In the Milliken case, the amount of the reduction in the verdict would be from $21 million to approximately $8 million if the retroactivity amendment passes. In the Plywood case, there would be a 25- to 30-percent reduction in the verdict if claims reduction is applied.

The third case which gave rise to the retroactivity amendment was the Corrugated Container case in which defendant Mead Corp., was found to have been engaged in a conspiracy with a number of other defendants to fix the prices of boxes sold over a number of years to the plaintiff businesses. The Mead Corp., recently settled its case for an amount almost identical to what would have been their liability if the retroactivity amendment passed. However, had they not settled, they would have been able to obtain a 90-percent reduction in their damage verdict with passage of the retroactivity amendment.

For months, there were rumors that a retroactivity amendment would be offered. Finally, it was introduced by Senator THURMOND. It then took some six markup sessions before the amendment was rammed through the Senate

Judiciary Committee by a highly divided vote.

In effect, these five defendants, found liable by juries in each case for price fixing, have banded together to get Congress to bail them out of their jury verdicts. This amounts to a classic "heads I win, tails you lose" effort. Knowing clearly what the law was and had been for many years—namely, no contribution and no claims reduction—each of these defendants made the decision to go to trial rather than to settle its case. Had they won their jury verdicts or had they been able to upset them on appeal, they would not be here trying to change the rules giving them victory. But now, with appeals pending, they are asking Congress to change the very principles of law under which they and the plaintiffs decided to go to trial and under which jury verdicts were rendered.

Mr. President, this simply constitutes a brazen effort by losing defendants in antitrust cases to have the Congress bail them out of decisions they made knowing the rules of the game.

The retroactivity provision of S. 995 has become one of the most heavily lobbied issues ever to come before the Congress, and it has created a classic situation of the tail wagging the dog. Almost all the attention of the Senate has been focused on the retroactivity amendment rather than the basic legislation, and what was once a relatively noncontroversial bill has now become the center of an enormous controversy.

The lobbying and politics involved with retroactivity are most unfortunate. They have slowed down a bill that otherwise would have been considered and passed long ago. Enormous sums have been expended on lobbying. According to lobbying reports from 1981 through June 30, 1982, the five defendants who are seeking to bail themselves out of these jury verdicts have paid their counsel over $630,000. And these lobbying reports only include direct contacts with the Congress, without reference to all the other work necessary to strenuous lobbying efforts.

Mr. President, at this point I yield the floor. I understand that the Senator from Washington (Mr. GORTON) wishes to make a statement on this bill. I am happy to yield the floor.

The PRESIDING OFFICER (Mr. KASTEN). The Senator from Washington is recognized.

Mr. GORTON. Mr. President, I have listened with care to the presentation by my friend, the Senator from Montana, and have, of course, discussed this subject with him at length in private conversations as well.

I wish to commend him on what I think is a thoughtful, cogent, and persuasive analysis of the controversial aspects of S. 995.

At this point, I wish to echo the views which he has just expressed that S. 995 as prospectively applied has a great deal of merit, and that there are problems in connection with the combination of joint and several liability and treble damages which can under certain circumstances be utilized in a fashion which is unjust.

Therefore, the Committee on the Judiciary and its chairman as well as the Senator from Montana are to be commended for dealing with an issue which is difficult at best.

At the same time, however, I feel constrained to express my agreement with the Senator from Montana about the extremely troubling aspects of the provisions of S. 995 which make it retroactive.

I do that, I must confess, in spite of the fact that a number of my own constituents are significantly affected by those provisions in a way which has caused them to express their strongly favorable views to me.

Nevertheless, any retroactive legislation must be looked at with great care in the interests not only of those who are affected positively by it, but also of those whose justified expectations are negatively impacted by it.

This is not to say that I do not believe that there are no circumstances under which retroactivity may be appropriate in the antitrust field. At the very least, however, the retroactivity provisions of this committee amendment seem to be too broad and too general in scope for this impact easily to be predicted by those of us who are asked to vote on it.

A major reason, of course, for the longstanding congressional aversion to retroactive legislation is that it strongly tends to upset the expectations of parties who have relied in good faith on existing law and on judgments which they have already attained.

Therefore, one starts with a presumption that these retroactivity provisions would be unfair to people who, for better or for worse, have benefited by the present law. To change the rules in the middle of the game is likely to be unfair both to a plaintiff business and to settling defendants in pending cases who clearly relied on existing law in deciding both whether or not to settle and when they made that decision how much to settle for as opposed to going to trial.

There are, Mr. President, a number of other additional problems in connection with these retroactivity provisions which would be likely to encourage massive continued extensive litigation. The penalties of that litigation could easily be imposed on innocent plaintiffs who have already prevailed on the merits in litigation which is very highly complex, and very likely on defendants who have bargained settlements in connection with cases brought against them.

One issue which would be relitigated would be that of the preservation of settlements. The committee amendment purports to protect settlement agreements entered into prior to the date of enactment. A number of scholars and eminent antitrust lawyers believe, however, that due process and public-interest considerations would dictate the reopening of these agreements.

Again many of the settlements were agreed to and approved by courts on the basis of the clear expectation, based on existing law, that the plaintiffs could recover all remaining damages from nonsettling defendants.

Another issue, of course, relates to the constitutionality of the retroactivity provisions of the amendment. I do not stand before this body to assert the unconstitutionality of these proposals, but simply to point out that this also is a matter which is likely to be litigated extensively and all the way to the Supreme Court of the United States.

As a consequence, I do not believe the committee amendment, with its current retroactivity provisions, to be an appropriate balancing of the very real interests on both sides of the controversy which has brought S. 995 here before us. I, therefore, must join with the Senator from Montana in urging my colleagues to vote against the retroactivity provision of this bill, although if they were defeated or modified in such fashion as to make them clearly in the public interest, the bill then would be an appropriate subject for discussion even in this lame-duck session, and an appropriate addition to the antitrust laws of the United States.

I do, Mr. President, have another subject which I wish to discuss, and I am delighted that the most distinguished chairman of the Judiciary Committee is here while I do so.

Together with Senators RUDMAN, DANFORTH, and STAFFORD, many weeks ago I filed an amendment of my own to S. 995, which is printed amendment No. 1893. That amendment would not have changed any of the provisions of this contributions bill as it is reported, but would have substantially improved the bill, the title of which is "Antitrust Equal Enforcement Act," by providing for equitable treatment for the victims of price fixing as well as for those changed with price-fixing violations. It would have added new language that would overturn in part, in a carefully confined manner, a 1977 Supreme Court ruling which has caused severe economic consequences both to the States and to their citizens. The case is *Illinois Brick Co.* v. *Illinois*, which is found at 431 U.S. 720, a 1977 decision.

In that case, the court held that only those who deal directly with an

antitrust violator, that is to say, direct purchasers, are entitled to sue that violator in order to recover damages for price fixing of which they have been the victims.

States and their citizens normally are not direct purchasers. Through the normal business cycle they purchase goods through independent retailers and other intermediaries. Frequently these intermediaries have passed on to the ultimate consumers the higher prices caused by illegal price fixing by the suppliers or the manufacturers from whom those intermediaries purchased their goods.

Not only have the intermediaries not been injured in such case, but they are typically reluctant to bring suit because they are dependent on a good relationship with their suppliers or their manufacturers for future business success.

The States and their citizens, who paid higher prices to the intermediaries for the goods, are the true injured parties; but the Illinois Brick decision unfairly precludes these victims of this particularly blatant and costly form of antitrust violation from any meaningful means of redress. That decision has seriously eroded the fair and effective enforcement of the Nation's antitrust laws. Especially in these difficult economic times, it is essential that States be given the ability to fight price fixing which substantially increases the cost of goods to their citizens, as taxpayers and as consumers.

The Supreme Court, in its Illinois Brick decision, clearly recognized, explicitly recognized, that the decision might conflict with the intent of the Federal antitrust statutes. It, therefore, invited the Congress, if Congress disagreed with the result in the case, to provide "clear directions * * * to the contrary." S. 1874 in the 95th Congress, and S. 300 of the 96th Congress were the Senate Judiciary Committee's responses to the Court's invitation. Although placed on the Calendar, neither bill was considered on the floor of the Senate.

The language of my amendment also would respond to the Supreme Court's invitation. But, unlike the previous expansive and controversial proposals, it would take a more strictly limited approach. It would overturn Illinois Brick in part, but would limit prosecution on behalf of indirect purchasers to the U.S. Attorney General and to the attorneys general of the 50 States. The attorneys general would be able to prosecute on behalf of the States and on behalf of the citizens of their States as parens patriae. In this manner my proposal would permit indirect purchasers their day in court, but by limiting prosecution to a set group of law enforcement officers it would dispel most the fears that reversing Illinois Brick might open the floodgates of private litigation and class actions.

Mr. President, my amendment to S. 995 would also insure that defendants would not suffer multiple liability arising out of actions by both direct and indirect purchasers. Defendants would be allowed to prove as a partial or complete defense that the purchaser passed on additional costs in higher prices to subsequent purchasers. This would permit apportionment of any damage award to victims according to their actual losses. The proposal further would provide for attorneys' fees to defendants in the case of bad faith or vexatious prosecution. It would apply prospectively only.

Mr. President, I believe this new Illinois Brick proposal is a responsible, carefully confined approach to the problem of restoring to our Federal and State governments the opportunity to initiate suit to recover dollars illegally appropriated from their taxpayers and citizens by price fixers and bid riggers. The distinguished chairman of the Judiciary Committee was concerned, however, that S. 995 was already highly controversial and that no Illinois Brick bill has been the subject of hearings during this Congress.

In fact, when he expressed that concern, no Illinois Brick bill had been introduced into the 97th Congress, He, therefore, prefers to have any Illinois Brick legislation considered separately from S. 995.

I must say that I find that desire on the part of the distinguished chairman of the Judiciary Committee to be valid. As important as I feel Illinois Brick legislation to be, it clearly should be the subject of hearings and the opportunity for comment both on behalf of its proponents and opponents before it is considered on the floor of the Senate of the United States. Especially, of course, in a relatively short session such as this, appropriate debate on the floor of the Senate is not possible.

Graciously playing the role of a statesman once again in relationship to this legislation, the distinguished Senator from South Carolina, the chairman of the Judiciary Committee, has told me that if I will take down my Illinois Brick amendment to S. 995 the Senate Judiciary Committee will hold hearings during the first half of 1983 on such bill as may be introduced on the subject into the 98th Congress and will also see to it that the members of the Judiciary Committee have an opportunity to express their will and to report such a bill if a majority desire to do so.

I am assured, in other words, that the will of the majority in this respect will govern and will not be frustrated by any individual member of the committee or by a majority.

Mr. President, I am most grateful for that generous assurance on the part of the Senator from South Carolina. I am most grateful for his customary magnanimous approach to resolve this legitimate but very, very difficult and controversial dispute. I have, therefore, accepted his offer and will not call up amendment No. 1893 at any time during this debate.

I also should like to add to that a strong urging to all of my colleagues interested in passing Illinois Brick legislation to follow the same course of action. I believe that to discuss that subject in this context would hurt the opportunities of such legislation ultimately to be passed. I am firmly convinced that the best chance to pass legislation on the subject of the Illinois Brick decision will now come by waiting until the 98th Congress, pursuant to my agreement with the distinguished Senator from South Carolina, at which time the matter can be thoroughly discussed both in committee and on the floor of the Senate.

For those reasons, Mr. President, while I regret that I cannot agree with the retroactivity provisions of S. 995 as they are presently drafted, I do hope that the debate on this issue will be on S. 995, cn contributions and on retroactivity, so that the Senate's will will be done thereon.

Once again, I do wish to commend the very distinguished Senator from Montana on what I feel to be a brilliant and persuasive statement on this subject.

Mr. BAUCUS addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I wish to thank the Senator from Washington for, as usual, being very thoughtful, cogent, and perceptive, not only this issue but on every other issue which he addresses. Perhaps I say that because we are in agreement on this issue, but, more important, Mr. President, I say that because, even on those issues where we disagree, I find the Senator from Washington to be one of the several best Members of the Senate in terms of intelligence, perseverance, effectiveness, and basic conscientious dedication to the job of a public servant. He is highly regarded in this body.

Mr. METZENBAUM. Mr. President, I send to the desk a number of amendments to the pending measure.

The PRESIDING OFFICER. The amendments will be received and ordered to lie on the table.

Mr. METZENBAUM. I thank the Chair.

Mr. BAUCUS. Mr. President, I was briefly, when I last spoke, referring to editorials of various papers around the country in opposition to the retroactive portion of S. 995. I was also referring to a brief history of the bill; that is, how the bill originally was introduced several years ago to be prospec-

tive in nature only, how that second introduction of the bill in this Congress, in the 97th Congress, was prospective only, but how, because of five defendants in three separate antitrust actions, lost jury verdicts and began to work their way, to wriggle into the Congress, particularly in the Senate, and try to get the bill amended to bail them out, even after they had been found guilty of price fixing; that is, efforts on the part of a few firms to get Congress to change the rules in the middle of the game in order to benefit them personally.

It is at that point, Mr. President, that I would like to go on and address other portions of the bill and also explain in other ways why I am opposed to the retroactive part of the bill.

Mr. President, the business community which endorsed S. 1468 and S. 995 as originally introduced was initially neutral or antagonistic toward retroactivity. That is an important point. When these bills were introduced, the contribution and claim reduction bills, which the Senator from Washington firmly supported, those bills, as introduced, were bills that found either the neutral or the antagonistic attitude of the business community toward retroactivity; that is, the business community was either neutral toward or antagonistic to the retroactivity concept that may or may not be contained in that bill.

Now, however, many businesses and business organizations have been bludgeoned into supporting retroactivity, not because they believe it is right but because they have been told very clearly by the sponsors of the retroactivity amendment that there will be no contribution legislation at all unless it is made retroactive to pending cases.

Mr. President, I believe that to be the fact; that is, that originally most businesses in the business community were either neutral toward or antagonistic to retroactivity application of the claims reduction contribution in this bill. But now many businesses and business organizations have been bludgeoned into supporting retroactivity, not because they believe it is right but because they have been told very clearly by the sponsors of the retroactivity amendment that there will be no contribution legislation at all unless it is made retroactive to pending cases.

I have personally told leaders of the business community of my continued support for the basic legislation. But with retroactivity this bill has become a perversion. The retroactivity provision is a malodorous amendment, as the Charlotte Observer pointed out, for the benefit of adjudged price fixers at the expense of the innocent businesses which for years bore the burden of the price fixing and have fought in court for still more years to recover a part of what they were overcharged by these defendants.

It is indeed an unhappy day when special interest legislation such as this would even be considered by Congress, particularly when so many legitimate issues require our attention, that is, jobs, infrastructure, unemployment, during this lameduck session.

That is what we should be debating today: What is the best jobs bill? What is the best highway bill? How do we best build our roads, our streets, our bridges? How do we best repair them? How do we pay for it? How do we get America back to work again? How do we get America moving?

That is why we should be here today, not taking up valuable time on a special-interest bailout provision.

An example will show why retroactivity in this case is so fundamentally unjust and wrong.

I ask each Senator to consider that he or she is a plaintiff business which has been overcharged due to a price-fixing scheme by defendants A, B, C, and D.

Pretend like you are a business plaintiff. You have been overcharged in a price-fixing scheme by defendants A, B, C, and D. You, the plaintiff business, bring suit and several years after the case is commenced and extensive discovery is conducted, the first three defendants, A, B, and C, settle. They settle their cases with you, the plaintiff, for a sum of $100,000. They represent 50 percent of the market for the price-fixed goods.

The last defendant, defendant D, however, who also has 50 percent of the market, decides not to settle and believes that he can win at trial. That means that you as the plaintiff continue to pursue the matter.

Let us say you win a jury verdict against defendant D, the last defendant, for what the jury finds to be $1 million in damages done to you by a conspiracy between and among defendants A, B, C, and D.

As the law has been for decades in the antitrust field, your recovery as a plaintiff business against defendant D would be $1 million, less the $100,000 settlement you already received from the three defendants. That is a net award of $900,000. That is the present law.

Now let us assume the exact situation, but with the change in the law S. 995 would make. The outcome would be very different.

Again let us assume that you are a plaintiff business and have been the victim of a price-fixing scheme on a product you have been purchasing from defendants A, B, C, and D. Again, you settle for $100,000 with defendants A, B, and C, who again have a 50 percent market share of the product on which the price has been fixed.

Again let us say the last defendant, defendant D, decides not to settle and you as the plaintiff win a jury verdict for $1 million against him.

So far it is just as it was in the first case.

Under the change in the law, however, which S. 995 would bring about, your judgment against price fixer D, the last defendant, would be $1 million less 50 percent of $1 million, or $500,000, since you carve out of the verdict the market share of the settling defendants, not just the amounts of their settlements. That is what S. 995 is all about.

Now, Mr. President, it is one thing for this result to occur to a plaintiff business, the settling defendant, and the defendant who decided not to settle and lost that trial, altering the principles of the law under thich they played. But it is something else to change the law after jury verdicts have already been rendered and after settlements have already been entered.

In that case, the guilty price fixer, defendant D, would be given a $400,000 windfall, the difference between what he would pay under the old law and what he would pay under the change in the law at the expense of the innocent plaintiff who is the victim of the price fixing.

The plaintiff would likely contend that his constitutional rights had been violated because of his property right and due process interest in the verdict he obtained under existing law.

Moreover, he would contend that he would never have accepted the settlement of $100,000 from defendants A, B, and C had he known that their market share would later be taken out of his verdict by a change in the law. Yet this is precisely what we are asked to do by adopting the retroactive amendment.

Under the amendment, a court would be mandated to reduce claims even in pending cases, even after verdicts and judgments, if it would be inequitable not to do so. That is what the bill before us, including the retroactive portion, provides for. Plaintiffs in scores of pending cases, including the Milliken and Plywood cases, would be required to go back into court and spend still more years protecting jury verdicts they have already secured under an established set of legal principles. A cloud would hang over both the settlements they entered and the verdicts they received.

The Mead Corp., has already used the threat of retroactivity to convince the plaintiffs to accept a settlement of $45 million although their potential liability under prevailing law would be in the range of $650–$700 million.

I am personally offended, and I think the entire Senate should be offended, that a few huge corporations want us to give them the chance to force thousands of small businessmen,

who have already been victimized by price-fixing conspiracies, back into the court to defend their verdicts and to risk having those verdicts substantially reduced.

Mr. President, at this point I send some amendments to the desk which I would like to have printed.

The PRESIDING OFFICER. Without objection, the amendments will be printed.

Mr. BAUCUS. I thank the Chair.

Retroactivity, therefore, should be rejected for a number of reasons. First, it undercuts the reliance which innocent plaintiffs, as well as settling defendants, placed on existing law and on the prevailing rule of no contribution and no claim reduction. It smacks of the type of ex post facto law the Constitution prohibits in criminal cases. Even though we are dealing here civil litigation, constitutional scholars such as Prof. Charles Alan Wright of the University of Texas and Prof. Ernest Gellhorn of the University of Virginia have indicated that the change in law made by retroacive application of S. 995, would present serious due process problems that might have to be resolved by the U.S. Supreme Court.

The American Bar Association looked at this issue in 1979. They appointed a special task force to review the issue of whether any legislation was necessary in the area and, if so, whether it should be applied to pending cases. The section on antitrust law of the American Bar Association supported the basic contribution statute but strongly opposed retroactive application because it would upset reliance already placed on existing law. The National Association of Attorneys General strongly opposes retroactivity for the same reason.

There are few precepts more important to American jurisprudence than the stability and reliability of our laws. Americans have always had the assurance that the laws upon which they have relied in taking actions will not be preemptorily changed—and certainly not for the benefit of persons already found guilty of violating those very laws.

The second reason retroactivity should be rejected is that Congress does not traditionally make changes in the antitrust laws retroactive to pending cases. This is shown by the prospectivity of the Hart-Scott-Rodino Antitrust Improvement Act of 1976; by section 4A of the Clayton Act allowing the United States to sue for single damages in its proprietary capacity; the 1980 Antitrust Procedural Improvement Act, giving judicial discretion to award prejudgment interest in antitrust cases; and numerous other changes in antitrust law. That is prospective only.

Congress has spoken on this point. When it does so, it speaks with a prospective voice, not retroactive.

Congress has traditionally respected the right of parties in pending cases to rely on the law as it was when the cause of action arose and when the lawsuit was filed.

Congress has perceived accurately that to intervene in ongoing litigation is to breach the wall between the legislative and judicial branches and to interfere with what is essentially judicial business.

Congress has only acted retroactively in the antitrust area in a few instances like the soft drink bottlers bill and the Newspaper Preservation Act, where it passed curative legislation to correct a misinterpretation by the Federal Trade Commission or the courts of congressional intent behind an antitrust statute. Congress in these limited instances wants no defendant, even in a pending case, to suffer under that same misinterpretation. No one could argue that this is the case here. No court of Federal agency has misinterpreted congressional intent. There is no congressional statute on contribution or claims reduction to begin with, and the law has been clear for more than half a century.

There is no doubt, no question. No one has argued surprise. No one has argued that we need to pass curative legislation. The defendants who have lost their jury verdicts simply want Congress to change the law to reduce the verdicts against them in case they do not succeed in doing so through their appeals in court.

As we shall see in more detail later, Philip A. Lacovara, one of the chief drafters of this retroactive provision, represented the business community's view that the Illinois Brick legislation being considered in the last Congress should not be applied retroactively.

While we shall hear extensively of his views later, it is worthy of mentioning a pertinent part of his testimony:

> Congress historic disinclination to amend the antitrust legislation retroactively is rooted in considerations of fairness and sound regard for the disruption retroactivity causes. This historic course of prudent legislation ought not to be abandoned now.

Those are the words of Philip Lacovara, one of the chief drafters of the retroactivity provision, as he spoke about the Illinois Brick bill; that is, that it should not apply retroactively because to do so would upset sound principles of American jurisprudence.

The business community strongly opposed retroactive application of Illinois Brick. Counsel for the Business Roundtable stated:

> The Committee could limit the adverse impact of the legislation on current litigation by making it prospective only.

The counsel to the National Association of Manufacturers stated:

> There are, of course, significant defects in the proposed legislation not treated—such as its applicability to all internal "pending" litigation.

The late Senator James B. Allen, who had great respect for reliance of parties on existing laws, stated in his additional views on Illinois Brick:

> It is unseemly for the Senate to yield to pressure to rescue unsuccessful litigants by passing what amounts to a private relief bill and retroactively creating rights the Supreme Court has said they do not have.

Mr. President, those are the words of Senator Allen on the issue of retroactivity as it applies to antitrust laws, the changes in antitrust laws. Exactly the case before us. It could not be more precisely the same.

Mr. PERCY. Mr. President, I voted yesterday to proceed to the consideration of S. 995, not because I support it in every respect—I do not—but because I believe there is a need for most of the changes in our antitrust law this legislation would bring about. I hope that the debate over the next few days will illuminate for the general public—and I believe that such public education is a major purpose of extended debate—what I consider to be the major flaw in this measure and one which I will work to have removed and hope can be removed before we pass S. 995. In particular, I object to the applicability of certain proposed changes in the antitrust laws to pending cases—the "retroactivity" provision.

First, plaintiffs and defendants in existing cases relied on the existing law of full recovery and no contribution. The plaintiffs relied by accepting amounts in settlement believing that only those dollar amounts would be taken out of any jury verdict. In addition, they decided to go to trial and won cases for price fixing under current law and would be entitled to recover under current law.

The current law is no surprise to anyone. The companies involved knew the law when they made a decision not to settle and instead to roll the dice and try their cases. Certainly, had they won their jury verdicts they would not be here seeking retroactivity. Now that they have taken their chances under existing law and lost, they want us to change the law to relieve them of the results of decisions they made. They had the opportunity to settle and chose not to. This is certainly their right, but having made that choice and lost the trial, it ill behooves them to come to the Congress and have the Congress undo the decision which they made in full knowledge of the consequences if they lost.

Ex post facto laws have been in disfavor since the time of the Founding Fathers. Indeed, the proscription against ex post facto legislation is written into the Constitution.

Eminent constitutional authorities like Prof. Charles Alan Wright of the University of Texas Law School and Prof. Ernest Gellhorn of Case Western Reserve Law School believe that there are very serious constitutional issues in applying this legislation retroactively, because it takes away from the plaintiffs rights which they earned under prevailing law.

It was concern for this issue of reliance that led the American Bar Association's antitrust division to oppose retroactive application of contribution.

A second reason for which I oppose retroactivity is that Congress does not normally make antitrust changes applicable to pending cases, except in those few instances, such as the Newspaper Preservation Act and the soft drink bottlers bill, when Congress is attempting to correct a misinterpretation of congressional intent by the courts of the FTC in applying congressional statutes. This is clearly not the case here and no one contends that it is. The effort here is not an attempt to correct a misinterpretation but to fundamentally change the law. It is one thing to do this for future cases when everyone knows what the rules of the game will be, but quite another to do it for pending cases when parties have already relied on the existing law in making their decisions on whether and how much to settle for and whether to go to trial.

Third, I believe that there will be procedural havoc if the retroactivity amendment to S. 995 were to pass. At a time when our courts are already overburdened, this would add a substantial additional burden to the Federal courts in some 900 antitrust cases, who would have to attempt to make the tough decisions imposed upon them by this legislation. Settlements will be challenged by plaintiffs if the new rules are applied retroactively, because plaintiffs will justly contend that they would never have accepted the dollar amounts that they did accept had they known that the market share of the settling defendants was going to be taken out of any jury verdict they obtained rather than the dollar amounts of the settlements as is the current law. The issue of "manifest injustice" will have to be litigated in each case where there is a settlement or a judgment. It is simply unprecedented for Congress to, in effect, undo a jury verdict.

Fourth, I am concerned that antitrust deterrence will be hurt if defendants, after a jury verdict, can substantially undo the impact of that jury verdict. It is an open invitation to others convicted of antitrust violations to come to the Congress for another bite at the apple.

This is not our job.

Last, I note the history behind this legislation. It was prospective, that is applicable only to future cases, when it was first introduced in 1979 in the 96th Congress and it was prospective when it passed through the Senate Judiciary Committee. Retroactivity was never an issue. It was also prospective when it was reintroduced in the 97th Congress. Retroactivity became an issue when five companies in three major antitrust cases lost jury verdicts and wanted Congress to undo the results of those jury verdicts for them. I believe this is highly inappropriate.

I hope this matter can be settled in the next few days. I can understand, appreciate, and agree with the individual businesses and organizations who have pointed out the need for most of the changes in antitrust law which S. 995, if passed with prospective application, would achieve. I shall certainly vote to remove from S. 995 any references to its applicability to pending cases and hope that my colleagues will join with me in this effort.

Mr. EAGLETON. Mr. President, to the lay observer the subject of this debate might seem an excruciating combination of bewilderment and technicality. Antitrust law is highly complex. Few lawyers are willing to plumb its murky depths, and even fewer nonlawyers understand its intricacies. So, too, do the constitutional and statutory fine points surrounding retroactive application of laws defy simple, consistent summary.

However, at the risk of sounding oversimplistic, I would submit that the question before this body can be stated rather simply: Should we, as the Judiciary Committee-passed version of S. 995 proposes, change the rules governing liability of price-fixing defendants in the middle of the game?

I do not mean to suggest, Mr. President, that it is never appropriate to change the way our legal system applies to ongoing cases. There may well be a situation where a reform bill seeks to reverse a recent and aberrational decision and restore relative harmony to the legal system. There may be cases in which changes applied to current litigation would not disturb the expectations of the parties and could be accomplished with a minimum of delay and uncertainty. There may well be circumstances in which the equities are so strong on the side of those who would be helped, so meager on the side of those who would be hurt, that they cry out for retroactive reform, and not a moment too soon.

I simply do not believe that S. 995 presents such a case. I oppose the retroactive application of its provisions and urge my colleagues to do the same.

The case for retroactive application of remedial legislation is at its strongest when Congress seeks to clear away in one stroke a recent legal aberration—for example, a court opinion running counter to the established body of law or clearly misconstruing Congress intent in passing a statute. Of course, even in such a situation care must be taken to avoid preempting the option of appellate bodies to reverse the offending case on appeal; among other entities, the judicial system suffers when litigants believe that they can "appeal to Congress" rather than through the normal judicial channels. Still, it is in such a situation that retroactivity can be justified as merely returning all parties to the status quo ante, to the relatively smooth way in which the legal machinery was running before a judicial monkey wrench was thrown into it.

Yet, S. 995 is a response to no single aberrant case or shocking new development. Rather, it is a response that has developed after several years of concern about years long trends in price-fixing litigation, including the availability of new legal tools to challenge price fixing, significant increases in the monetary value of the damages that face potential violators and new plaintiff strategies that can, at the very least, be described as "creative."

Since S. 995 poses a change in the rules of antitrust liability in response to a situation that has developed over time, the case for its retroactive application must be made, I believe, on other policy grounds. Proponents have to demonstrate that retroactive application could be accomplished manageably and certainly and that it would not disrupt the orderly conclusion of pending cases. Proponents would also have to demonstrate that the substantial equities weigh in favor of those who would be helped by this legislation. I believe the proponents can show neither of these.

Any attempt at assessing S. 995's impact on the legal system must begin with the realization that it could change the price-fixing liability in hundreds of pending cases. One estimate by the Administrative Conference of the U.S. Courts puts the number of price-fixing cases currently in the courts in various stages of development at some 900. Obviously, this fact means that retroactive application would not be a discreet remedy for a few isolated cases. Its sweep could be incredibly broad.

I say that S. 995 could change hundreds of cases, rather than would, because of the way in which the retroactive provision has been drafted. Section f(1) of the bill would not grant claim reduction automatically. It would occur "if upon proof by any party subject to liability to damages in (a price-fixing case), the court determines that it would be inequitable in light of all the circumstances" not to grant claim reduction. Now, inequitable is an inherently subjective term, and the lack of guidance in the Judiciary Committee report does not help

matters. The standard would almost certainly encourage defendants in hundreds of cases to claim that they meet it; plaintiffs in hundreds of cases would respond with full vigor that claim reduction is not appropriate. Whatever result a district court reached would almost certainly be appealed all the way up the line. Differing interpretations of the meaning of "inequitable" would no doubt pop up both within judicial circuits and among them. Judicial development of generally applicable and consistent principles could take years.

Thus, delay and uncertainty would be introduced into cases which are already subject to interminable delays, complexities and procedural wrangling. For cases relatively far along the way to completion, S. 995 would amount to nothing less than a reopening of one of the major, if not the major issues in any price-fixing case: amount of damages. Cases already aging, nongracefully, in the Federal courts—including one which dates from 1969—could have years added to their tortuous life in court. And there is some suggestion that, despite the bill's efforts to preserve settlements already reached in pending cases, such settlements could be undermined as plaintiffs scramble to respond to significantly changed circumstances. Even in cases that are relatively new, the change in basic damage-assessment standards would likely cause substantial delay while litigants adjust their strategies and responses.

The chaos that would be imposed by retroactive application of S. 995's claim reduction principle not only belies that it can be discreetly and manageably accomplished, but also has a direct bearing on the weighing of the equities. In essence, S. 995 is justified as a reform for small- and medium-sized businesses which should not be made to bear full treble liability for the price-fixing activities of an entire class of defendants. As this theory has been expressed by the Senate Judiciary Committee reports in two Congresses, the prospect of mammoth liability is unfair to these smaller defendants because it may serve to coerce excessive settlements from them. The reports indicate that such coercion may be felt both by defendants who are guilty, but relatively less so than defendants who got off the hook for less and, worse, by defendants who believe they are truly innocent of wrongdoing, but are unwilling to run the huge monetary risk of a crushing adverse judgment if their attempts to persuade a judge are, for some reason, unsuccessful.

I do not dispute that these abuses occur. Certainly the Judiciary Committee is in the best position to judge. What I would point out is that not all price-fixing defendants who could assert a right to claim reduction are small and innocent. (Indeed, some very large defendants, already adjudged to be guilty of price fixing, have been in the forefront of the fight for retroactive application of S. 995.) And, not all plaintiffs who could have their potential recovery reduced by claim reduction are devious employers of the "whipsaw" method of extorting settlements.

Given the uncertainty of the "inequitable" standard and its judicial evolution, there is simply no guarantee that in practice the claim reduction remedy would be carefully tailored to all of the situations in which it seems justified—and only those. Many defendants in whose name this remedy is pressed might well find after all the judicial wrangling over the concept of "inequitable" that their liability remains huge. To the contrary, it is very likely that, in interpreting S. 995's uncertain standard, some courts would award claim reduction in pending cases to defendants who are less deserving and against plaintiffs who have quite innocently relied on the current standard of damages in proceeding with a case which vindicates the interest of State governments, consumers or our economic system.

In short, it is simply not logical or wise policy to base a claim for retroactive application on substantial equities pointing toward one group of defendants and against one group of plaintiffs and then provide a remedy so uncertain in its potential application.

Finally, I believe that any assessment of the equities involved would be incomplete without a close look at the timing and circumstances of our consideration of this bill. The lameduck session upon which we have embarked is of very limited duration. It is obvious from the controversy this bill has generated and the various amendments that have been proposed or hinted at that we are substantial hours away from concluding action on it. The House Judiciary Committee has not reported a similar bill. Indeed, it is not very far along in its consideration of this complex and controversial question. Nor has there been a clamor among other House Members for Senate action on this bill.

Mr. President, I submit that it is highly unlikely that this bill could be enacted into law before this session of Congress ends—particularly if we take the unwise step of applying its provisions retroactively. If many words on this subject would not a bill produce, only two possibilities remain. Either we are embarking on a robust exercise in futility, or it must serve someone's hidden agenda for the Senate to pass this bill, even if it thereafter falls into a legislative abyss.

Whichever is true, I believe we have far more important issues to deal with—issues on which our deliberations might yield significant results: A response to the crushing and growing burden of unemployment. Hope to millions of people faced with staggering natural gas bills. Even passage of appropriations bills would be a far more important accomplishment.

Surely we have more important business than acting at this late date to change the rules in the middle of the price-fixing enforcement game. I suggest we get on with it.

Mr. DURENBERGER. Mr. President, I admit to harboring some mixed feelings in arguing against this bill, because I agree with its principal objective—establishing a right to contribution in antitrust litigation. The fight for this reform was begun in the 96th Congress by our distinguished former colleague from Indiana, Senator Birch Bayh. It has been ably carried on in the 97th Congress by the distinguished chairman of the Judiciary Committee, Senator THURMOND. Yet as strongly as I believe in the need for reform, I am absolutely opposed to making this change, or any similar change in legal principles, retroactive. Because this bill contains a retroactivity clause, I am rising to oppose it and to put my colleagues on notice that I will support a filibuster effort designed to force removal of the retroactivity clause.

American jurisprudence has traditionally recognized two fundamental premises: That victims of wrongdoing will be compensated to the full extent of their loss, and that perpetrators of wrongdoing will be held liable to the full extent of their participation.

For more than 200 years we have rejected any legal theory that would excuse a wrongdoer from the full consequences of his acts. For the same reasons of fundamental fairness, we have rejected the notion that any defendant should face liability for damages in excess of those inflicted by his own conduct. That is why the principle of contribution has been an essential element in multiparty litigation, both in State and Federal courts, for two centuries. It insures fair results by protecting a plaintiff's right to recover, while making certain that no defendant is assessed more or less than his due.

Antitrust law is one of the few branches of American jurisprudense that lacks some form of contribution. We have all seen the impact of that exception. It has produced a field of the law with penalties so broad that they engulf not only price fixers, but any business—innocent or guilty—unfortunate enough to become a named defendant. The ability to confront every defendant named in a law suit with the prospect of sole liability for the damages suffered by the entire economy gives the suing party an insuperable advantage. The simple pros-

pect of that liability is often enough to cut off a defendant's access to credit. The existence of treble damages, the cost of litigating these complex suits, and the prospect of facing full liability for the injuries inflicted by other parties combine to force costly settlements, often without regard to questions of complicity or noncomplicity. More often than not, the absence of contribution in antitrust law has proven to be an obstacle to fair resolution of the issues raised in these cases. And it has created an unfair system in which the same penalty applies to all, be they a primary conspirator or a party with peripheral or incidental involvement.

Creating a right to contribution will do nothing more than insure that every guilty party faces liability to the full extent of its wrongdoing. The only parties relieved from liability are those who should never have faced liability in the first place. Contribution has worked well in other complex areas of the law, and there is no reason why it should not work equally effectively in antitrust law.

The tragedy of today's debate is that in order to reach certain defendants in the corrugated container antitrust suit and similar pieces of pending legislation, the authors of this bill have made a serious, and perhaps mortal, error by making its provisions retroactive—at the discretion of the court. No matter how any of us might feel about the principles of law under which these and other pending cases were tried, all parties to those cases acted in reliance on that law, and made decisions accordingly. Those who settled—as well as those who did not—factored in the lack of contribution as well as the unsettled state of the law when they priced out their settlement offers. It is impossible to justify changing the rules of the game after the parties have made commitments based on their existence. Congress has traditionally been hesitant to take any action that would change the outcome of pending or past lawsuits. Once we abandon that posture we will open Pandora's box with indefinable consequences.

Giving the courts the discretion to apply the law to certain pending cases begs the question of retroactivity. This discretion can only work one way—in favor of the convicted price fixer. The best any injured party can do is hold on to the status quo, and retain rights already won. That is unfair by any criteria. The discretion clause also creates a virtual guarantee of inconsistent judgments.

I am also unconvinced that the committee's efforts to prevent this legislation from vacating prior settlements will have any effect. Bear in mind that plaintiffs in these actions, relying on existing law, settled with some defendants in the expectation of getting their remaining damages from the defendants who did not settle. The courts approved these settlements in reliance on existing law, thinking this was the case. Retroactive claim reduction destroys both the party's and the courts' expectations.

Legislatively overruling the foundation of these decisions raises constitutional questions. As the well-known constitutional scholar Charles Alan Wright has observed, "The manifest injustice of—reducing plaintiffs' recovery after the fact—is apparent." We can place language in the law purporting to protect existing settlements, as the committee has done. But we cannot guarantee the courts will enforce that language. A Federal court could easily find that denial of plaintiffs' rights in this manner violates due process, and that existing settlements must therefore be reopened as a matter of constitutional right. In the plywood and corrugated class actions alone, this would expose more than 40 parties who thought they had reached valid, arms-length, court-approved settlements to the possibility of continued litigation. The simple fact that this issue could be raised again, and settling parties forced to relitigate their settlements, is reason enough to reject the retroactivity clause in this bill.

The public outcry against the retroactivity clause has been extensive, and should not have escaped any of our notice. One major newspaper after another has taken a stand against that clause by focusing on the degree to which it caters to the special interests of a few parties at the expense of the majority of those involved in the litigation. I want to read into the record just a few examples:

Minneapolis Star and Tribune.—Price fixers don't usually conspire in the open. But some of them are lobbying to change—retroactivity—the laws they broke and the penalties they must pay. Their campaign is shameless, and their proposal to change the rules in the middle of the game is an outrage.

The New York Times.—Price fixers who usually conspire in secret have banded together for a brazen, daylight attempt to rig the Federal antitrust laws. It (the bill) has wide support in Congress. Its merits are debatable, but retroactivity is not. That part of the proposal is an outrage.

Chicago Sun Times.—If it were permissible to change the rules after a game is played . . . the Cubs might be world champions. But you can't do that, you say? Oh, but you can try. Five big corporations convicted of price fixing are tring it right now. At a time when the public wants to get tough with common thieves, there is no compelling reason to go soft on those who happen to wear pinstripes.

San Francisco Chronicle.—Retroactive laws and penalties are generally bad law . . . and dubiously constitutional. This retroactive feature of an otherwise reasonable antitrust reform should therefore be opposed.

Frankly, Mr. President, I find it difficult to believe that with the economic difficulties facing us in this country and the critical items remaining on the Senate calendar, we are consuming hours and possibly days debating antitrust retroactivity. The best solution is to strike this clause immediately, and move onto matters that have a greater bearing on the future of this country. I urge every one of my colleagues to join me in opposing this legislation.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 2 P.M.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate stand in recess until 2 p.m. today.

There being no objection, the Senate, at 1:09 p.m., recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. COCHRAN).

SOCIAL SECURITY REFORM

Mr. ARMSTRONG. Mr. President, earlier this week, I sent to each Member of the Senate a "Dear Colleague" letter in which I discussed at some length the options and background information relating to the task of the National Commission on Social Security Reform.

The National Commission is considering a number of ideas, and recently the Commission reached a unanimous consensus on the need to close the gap between projected benefit payments and tax revenues in the OASDI system, approximately $150 to $200 billion in the 1983–89 period and what is termed 1.82 percent of payroll over the longer term, an amount equivalent to $1.6 trillion.

Mr. President, I rise to call the attention of my colleagues to this letter which I have sent to them and to ask unanimous consent to have printed in the RECORD my "Dear Colleague" letter and the associated material, for the benefit of all Senators and others who may read the RECORD.

[The material referred to will appear at the end of today's Senate proceedings.]

ANTITRUST EQUAL ENFORCEMENT

The Senate continued with the consideration of S. 995.

Mr. METZENBAUM. Mr. President, if nobody seeks recognition, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I wish to speak in opposition to this proposal. However, I have just been informed that the Senator from New Hampshire is under the constraint of time and would prefer that he be accorded the privilege of the floor at this point, to make his statement. If that be the case, I am very happy to yield the floor to the Senator, so that he may address himself to the pending issue.

Is the understanding of the Senator from Ohio correct?

Mr. RUDMAN. The Senator from Ohio is correct.

Mr. METZENBAUM. I have no objection, and I yield the floor to the Senator from New Hampshire.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. RUDMAN. Mr. President, first, I thank the Senator from Ohio for his courtesy.

Mr. President, I come before the Senate today to speak in opposition to legislation which would alter, significantly, the enforcement of our antitrust laws. Like many of my colleagues, I am strongly opposed to this bill's inequitable treatment of parties who have already litigated their antitrust claims. I find it repugnant that the Congress would provide relief to price fixers who chose to violate the law and got caught. However, unlike some of my colleagues, I do not support the underlying bill, and will not support it even without the retroactive section.

My opposition to the bill is threefold. First, I believe it will reduce the deterrence that exists in present law which acts to prevent firms from participating in anticompetitive business practices.

Second, I believe that claim reduction will severely reduce the incentive for settlement among parties involved in these suits, despite the fact that society has a deep interest in such settlements.

Third, and partially a consequence of fewer settlements, I think that contribution will foster an immense amount of added litigation, the cost of which will be borne by the innocent victims of price fixing.

Proponents of S. 995 suggest that the current law leads to an unfair apportionment of liability in civil price-fixing cases. They say that it is unfair for guilty defendants in a price-fixing case to pay more than their share of damages. My response to that is simple: Who told them to join the conspiracy? After all, it has been very clear for decades that price fixing is illegal, and it is also clear to each and every guilty defendant that he could be liable for the entire amount of damages. Why then should we heed their calls for assistance, especially at a time when decreased enforcement efforts make it less likely that these activities will be discovered?

The argument against present laws amounts to dissatisfaction with the concept of joint and several liability. I find this to be an interesting reaction to a rule of law which has existed far longer than our antiturst laws.

As is well known, the courts have generally characterized antitrust violations as torts. There are some arguments against such a broad characterization, but generally it is a useful characterization. What many of the proponents do not understand is that even under present tort law there is no basis for contribution. As some legal historians will note, the rule regarding contribution is attributed to an old English case called Merryweather against Nixan. In the case, Lord Kenyon established a rule that contribution would not be allowed "where the former recovery was for a tort." Later, the English courts did permit contribution when the tort was unintentional, or negligent. However, the law was always clear that contribution would not be allowed for intentional torts.

Although American courts for some time did not permit contribution under any circumstances, statutes which later liberalized the law clearly included the distinction that intentional wrongdoers would not be able to seek relief from damages rising out of their own actions.

A very few exceptions do exist, but as William Prosser states in his treatise on the law of torts, the law still tends "to continue the original rule that there is no contribution in favor of those who commit intentional torts." Make no mistake about it. Those who engage in price fixing are involved in a consensual act that is deliberate.

The proponents of S. 995 now suggest that we overturn the centuries old common law rule in favor of relief for intentional violators of our antitrust laws. Price fixers cost American taxpayers and consumers enormous sums of money each year. They steal from the American public, and most of it goes undetected every year. And these acts are intentional. As stated in the bill, they are agreements to fix, maintain, or stabilize prices. Each conspirator fully intends to bilk—and I use that word "bilk"—the American consumer, and every one of them, in their capacity as price fixers, is responsible for the damages, because without any single firm's participation, the conspiracy to fix prices would inevitably fail. With their participation, the conspiracy exists and the damage is done.

As an aside, Mr. President, I find it most interesting to note that the one case in a circuit court where contribution was allowed would not be covered by S. 995. Professional Beauty Supply against National Beauty Supply involved a conspiracy to monopolize and, as such, would not be provided the relief that is offered under the bill for price fixers since contribution would be limited to price fixing only, not attempts to monopolize. I would not support extending the bill to cover such activities, but I do question making price fixers almost a privileged class. I find no reason to support such a privilege. If in fact, a complete review of our antitrust laws is called for, so be it. But let us do it completely, not in this manner, which would benefit only one particular class of violators.

The proponents of S. 995 suggest that S. 995 will offer a greater deterrent effect than the present law provides. I seriously question that argument. In an October 1980 article in the Journal of Law and Economics, three distinguished professors of the University of Chicago Law School—Frank Easterbrook, William Landes, and Richard Posner—found that even if executives were assumed to be neutral to the risk factor, deterrence would be the same with or without contribution. However, I agree with most economists who believe business executives are very cognizant of risk factors. I might add parenthetically since some of them recently have gone to jail. Thus, the far greater deterrence is provided by present law under which firms face the possibility of greater, not lesser, liability.

Reading the committee report on this bill is very interesting. I found that the proponents of the legislation are not really clear on the deterrence question themselves. On page 16 they claim that S. 995 will increase deterrence. However, on page 18, the report states that "the committee is mindful of the damage of overdeterrence raised by a denial of a right of contribution." This seems to be a clear contradiction. On the one hand, they say that S. 995 will increase deterrence, and, on the other hand, they say that the present law is too harsh and the penalties should be reduced. I really do not think it can work both ways. But, if there is a question, I certainly do not advocate lessening deterrence to price fixing, and I believe that is what S. 995 would do.

The second and third arguments I have against the bill are very straight forward, and I see no reason to spend much time on them, although they are certainly important considerations. It seems obvious to me that a change in the law as is suggested in S. 995 would

discourage settlements and prolong litigation. This is simply because under S. 995 not only would defendants risk less going to trial, but of more importance plaintiffs, because of claim reduction based on market share rather than amount of settlement, would have little inclination to settle claims out of court. Market share determination would simply add to litigation issues. These effects would have a detrimental impact on our legal system and reverse the general nature of our legal system in favor of settlements. I think this is a direction we do not wish to take.

Mr. President, as a former attorney general of the State of New Hampshire, I favor strong protection for consumers and taxpayers. The present law offers that protection, and I do not want to see it weakened.

The National Association of Attorneys General representing the attorneys general of each State and territory of this country is in agreement and I wish to read the resolution that was issued by that organization indicating their unanimous opposition to S. 995.

This is dated June 1981. It is entitled "Contribution Among Price Fixers," and it reads as follows:

Whereas, the Congress of the United States is considering legislation, S. 995 and H.R. 1242, to authorize contribution among price fixers; and

Whereas, S. 995 and H.R. 1242 will unnecessarily complicate antitrust damage litigation, will confuse and hinder the settlement process, and will diminish the deterrent effect of the potential treble damage claim; and

Whereas, on May 26, 1981, the Supreme Court ruled in *Texas Industries, Inc.* v. *Radcliff Materials, Inc.*, [1981-1] Trade Reg. Rep. (CCH) ¶ 64,020 (1981) that, absent Congressional action, no right of contribution exists among antitrust defendants; and

Whereas, the impact of such bills on the ability of states to recover damages and punish wrongdoers efficiently and promptly will be severe and immediate;

Now, therefore, be it resolved, that the National Association of Attorneys General:

1. is opposed to legislation authorizing contribution among defendants in antitrust cases, especially S. 995 and H.R. 1242; and

2. the General Counsel is authorized to communicate the views of this Association to the United States Congress and to the Administration.

Mr. President, a letter dated May 3, 1982, to my colleague, the Honorable WILLIAM PROXMIRE, from his State's attorney general, Bronson C. LaFollette, I think is an excellent presentation as to the specific opposition of State attorneys general, who, after all, are out there on the front lines of consumers and their problems.

I ask unanimous consent that that letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF JUSTICE,
Madison, Wis., May 3, 1982.

Re: S. 995 "The Contribution Bill."

Hon. WILLIAM PROXMIRE,
U.S. Senate, Senate Office Building, Washington, D.C.

DEAR SENATOR PROXMIRE: First of all I want to apologize for waiting until the last minute to write to you concerning the above bill, but to be perfectly honest with you, I viewed the bill as so ludicrous that I never thought it would get as far as it has. It is my understanding that it is set for a floor vote within the next few weeks, and therefore, I am taking this opportunity to advise you now of my views concerning this regressive piece of legislation.

As you are aware, S. 995 would amend existing federal antitrust law, specifically the Clayton Act, to eliminate joint and several liability on the part of antitrust violators. Even more curious is the fact that this bill pertains only to those individuals convicted of price fixing, which is uniformly recognized as the most pernicious antitrust violation that one can commit. Since the enactment of the Sherman Act in 1890, individuals and businesses victimized by antitrust price fixing conspiracies have been able to seek full treble damages for the entire conspiracy from any one or more of the conspirators. The courts have consistently refused to recognize a right of contribution amongst non-settling and settling defendants in such cases. This bill is an attempt by a few large corporations, which have violated with impunity the fundamental charter of our economic system—the Sherman Act, to escape their legal responsibility for such violations. I am extremely appalled at the contents of this bill, in general, and am specifically concerned with its proposed retroactive effect, which would let off the hook certain large corporations that are facing substantial money judgments for their felonious conduct.

The enactment of this bill would severely modify the existing method of collecting damages, thereby eliminating the best deterrent against antitrust violations. As one highly experienced and reputable United States district court judge pointed out, settlements would be few and far between since a wrongdoer would prefer to roll the dice and take a chance at trial that culpability will not be assessed. If the price fixer happens to lose, then contribution could be obtained from those wrongdoers who chose to settle out before trial. Furthermore, trials would become even more complex because if contribution is allowed juries will be called upon to assess market percentages of both settling and non-settling defendants so that contribution can be made proportionately. Even in basic tort suits, we see the difficulty which juries have with such a concept. When one adds in the factor of enormous multi-national corporations that are engaging in conspiracies involving hundreds of millions of dollars, it becomes quite apparent what the proponents of this bill are seeking. They are seeking to inflict utter hopelessness and confusion on the part of would-be litigants and juries in the hope of escaping paying the price for their wrongful conduct.

The effectiveness of the lobbying effort that has gone into this bill is best demonstrated by the fact that this bill is to have retroactive effect and will be applicable to presently litigated antitrust actions. Irrespective of the constitutional problems which some legal scholars have pointed out regarding such a provision, it also violates all fundamental concepts of fair play. The best example of this is the Corrugated Container cases in which thirty-six defendants have entered into settlements paying out $321,000,000 in damages relying upon the present law which does not allow for contribution against them. The lone remaining defendent, the Mead Corporation, has elected to litigate this lawsuit, and a jury has rendered a verdict against it. Damages are yet to be assessed. Now after losing in the courts, the Mead Corporation is attempting to overturn this result by the enactment of this bill. The result would be that all of the enactment of this bill. The result would be that all of the companies which engaged in wrongful conduct and were willing to admit their liability by entering into settlements would have the rules changed during the middle of the game and would be liable for contribution to the Mead Corporation.

Quite frankly, I am totally amazed at the receptiveness of Congress to this bill. The bill has been soundly condemned by legal scholars, the judiciary and in editorials from coast to coast in just about every prestigious newspaper on both sides of the policital spectrum. Yet, because of the power that certain major corporations wield, this bill has reached the Senate floor where the chances for passage appear excellent. I strongly urge you to stand up in opposition to this bill in its entirety and, at the very least, fight for a removal of the retroactive effect clause in it. The damage provisions of the federal antitrust laws have remained virtually unchanged for decades. Under these laws, our country, despite certain inevitable difficult periods, has prospered. To now emasculate these laws with the passage of S. 995, which only aids those who commit the most egregious type of antitrust violation, would indeed be a bleak day for the entire nation. I and my staff stand ready to discuss this matter with you at any time.

Sincerely yours,

BRONSON C. LAFOLLETTE,
Attorney General.

Mr. RUDMAN. Finally, Mr. President, and as I alluded to earlier, perhaps our antitrust laws should be reexamined in order to determine whether or not they clearly set forth the criteria by which society will judge anticompetitive practices. If innocent parties are being caught in the trap of litigation and unjust settlements our laws should be changed. However, the change should be to the substantive portion of the law not the penalties for those who have been found to violate it. We should not address the problem of unjust application by the simple expendient of making it cost less to have been unjustly caught.

I thank the Chair, and I yield the floor back, if necessary, then to the Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. METZENBAUM. Mr. President, the Senator from Ohio is prepared to speak to this bill, but wants it clearly understood that if others are inclined to seek the floor, I have no problem in yielding to them.

Does the Senator from Montana desire the floor at this time?

Mr. BAUCUS. If the Senator from Ohio will yield the floor, this Senator wishes to have the floor.

Mr. METZENBAUM. In that case I yield the floor to the Senator from Montana.

Mr. BAUCUS. Mr. President, let me first take this opportunity to commend the Senator from New Hampshire for his courageous leadership on this issue. I have found the Senator from new Hampshire to be very forthright, very perceptive and very perspicacious in his views as to the legislation we have before us as to what its implications will be, and I commend the Senator for taking the floor and explaining his point of view, based in part on his experience as a former attorney general of the State of New Hampshire as to what the proper legal remedies should be and what American jurisprudence is and the reasons for the principles contained in American law, and I appreciate the Senator's aid in that regard, particularly the Senator's efforts in opposition to the retroactivity portions of this bill.

Mr. President, I have been deeply troubled by reports in the press that several of us are responsible for holding up this legislation because we are voicing strong opposition to the retroactivity provisions in S. 995. If the record is clear on nothing else, let the record show that this Senator and many other Senators who oppose retroactivity strongly support S. 995 as introduced.

This Senator, the Senator from Montana, supports S. 995 as introduced, that is on contributions, so long as it does not apply to pending cases.

Senator DOLE supports S. 995 as introduced.

Senator DENTON supports S. 995 as introduced.

Senator LONG supports S. 995 as introduced.

Senator ZORINSKY supports S. 995 as introduced.

Senator LEAHY supports S. 995 as introduced.

Senator BENTSEN supports S. 995 as introduced.

We all support S. 995 as introduced.

I might say, Mr. President, I think that the vast majority of the Senators in this body support S. 995, the concept of S. 995, as introduced, but not the retroactive portions of the bill.

We all wish that that bill, S. 995, as introduced was the bill before us here so that we could vote for it and support it. But we are opposed to retroactive application because we believe retroactivity has turned a good bill—let me repeat, a very good bill—into a bailout for price fixers.

The original bill is a good bill because it tries to make the rules of antitrust litigation more fair. It tries to help the business community in a manner that is reasonable.

The retroactivity provision has ruined the bill by trying to help a handful of corporations unfairly.

It is the retroactivity provision that is killing this bill—not those of us who support the bill as it was introduced.

It is the retroactivity provision that is keeping this bill from being enacted. It is the retroactivity provision that is preventing us from reaching a general consensus on a fair piece of legislation.

It is the proponents of retroactivity that are tying up the Senate unnecessarily.

In this lameduck session we should be addressing the issue of jobs, unemployment, the highway tax, highways, roads, bridges, streets, putting America back to work.

In this lameduck session today and in the remaining 2½ weeks we should only be dealing with essential pieces of legislation or legislation on which there exists a broad consensus. S. 995 had that broad consensus until the proponents of retroactivity insisted on turning it into a price fixer's relief act.

I originally supported and continue to support S. 995 because I believe it is a pro-business bill that can help small businesses get a fair shot at litigating the merits of price fixing cases brought against them. The business community, in my judgment, deserves S. 995 as introduced.

But the business community does not deserve the retroactive bill in front of us. In fact, if the truth were known, they would not want it. They have been pushed into it, bludgeoned into it, not because they support retroactive application but because they are told if they do not, there may not be a bill. It is not in the interest of the business community to have convicted price fixers rewarded by special interest legislation such as this bill that is before us today.

It is not in the interest of the business community to have a bailout bill tying up the country's business. It is certainly not in the interest of the business community to run roughshod over the judicial branch.

What is in the interest of the business community, in my view, is to have fair prospective legislation passed by this body in this lameduck session. That is what I have fought for. That is what I will continue to fight for.

But let the record be clear. This Senator is for S. 995 as introduced and as long as a few companies and a few Senators insist on converting it into a bailout—which it was never intended to be—this legislation will never pass and the large majority of the business community will never be able to have the benefit of the fairer rules that it would provide. That is an unfortunate result, but that outcome is due to those who are insisting that the only way this bill can be enacted is if it provides retroactive relief to a handful of price fixers.

Mr. President, I understand the Senator from Ohio wishes to speak on this matter, and I now yield the floor to the Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I rise to discuss the substance of the legislation pending before us. However, prior to doing do, I want to repeat the point I attempted to make yesterday—that is, that the U.S. Senate should not be using its time in dealing with this kind of legislation.

We were called back by the President for a special session. He actually did not have to call us back. He asked us to come back, and the leadership agreed to do so. Having done so, it was with the understanding that it was for the purpose of dealing with certain appropriations bills. Certainly, those measures have a higher priority than does S. 995. Certainly, the problems of unemployment and the problems of the economy being in a mess are of greater consequence than the issues pertaining to S. 995.

Mr. President, I very much commend the leadership of the Senator from Montana in opposing this legislation, and I understand also his view that with the retroactivity provision out he could find the legislation more acceptable.

I am in strong opposition to the bill with or without the retroactivity provisions because I believe it to be another in the many attempts in this session to weaken our Nation's antitrust laws.

The simple and only purpose of this legislation is to make life easier for price fixers, which it would do in a variety of ways.

Now, I know that many of my colleagues have addressed themselves to the bill's retroactivity provisions, as has my good friend, the Senator from Montana.

That retroactivity provision is particularly egregious because it would enable a small handful of well-heeled firms to escape from adjudged liability for hundreds of millions of dollars in price-fixing overcharges.

In the heat of the retroactivity battle, though, some may have overlooked the fact that the bill itself would do much to destroy the private enforcement of our antitrust laws. And I feel very strongly that the total question of enforcement of our antitrust laws is a matter that more and more is being swept under the table, both from an administrative standpoint as well as from a legislative standpoint.

S. 995 alters price-fixers' exposure to antitrust damages liability in two principal ways. First, it permits defendants to bring into the case, for the purpose of seeking contribution, other parties whom they allege also participated in

the unlawful conspiracy or to file separate legal actions against such parties.

Currently, such joinder of third party defendants is not permitted in any antitrust suit. That is, under current law, whichever firms or individuals are sued for price fixing can be held responsible for all of the injury caused by their conspiracy. And there is nothing radical or unusual about that. If you are a coconspirator, you are held liable for the total damages.

Exposing potential price fixers to such joint and several liability deters their future illegal activity. And is that not the purpose of much of our legislation having to do with punishment, to deter illegal activity?

This legislation, by permitting price fixers to spread their potential liability, would seriously undermine this deterrent effect and make private enforcement vastly more complicated and protracted.

Second, S. 995 provides for mandatory reduction—mandatory reduction—of each defendant's share of the liability by a formula which, in most cases, will be three times the damages attributed to the market share of the firms who have settled prior to judgment. This mandatory claim reduction aspect of S. 995 sharply limits the potential liability of defendants in price-fixing cases, precisely those cases where defendants should be most severely punished for their illegal behavior.

In other words, they have a right to set off three times the amount of the damages that could have been claimed against a defendant when that defendant has already settled its case.

In addition, mandatory claim reduction will clearly discourage settlements. I think, Mr. President, that that is a very significant and disturbing factor about this bill.

Under our current system of joint and several liability there is a substantial deterrent to potential price fixers. A firm making calculations of the risks involved in engaging in illegal price fixing must consider the possibility that it will be liable for all of the injury caused by the conspiracy. Under current law, it may not bring into a case other parties whom it alleges were part of the scheme in order to seek contribution from them. Potential price fixers build this lack of contribution, this total liability for all the damages caused by the conspiracy, into their comparative risk calculation.

S. 995 would change all of this. Under S. 995, potential price fixers would know that they may spread the liability around among many of the parties involved in the conspiracy. This inevitably would change the firm's risk equation and make price fixing less costly.

Contribution would also make actual price fixers who are sued less likely to settle because their maximum exposure from going to trial is reduced by their ability to spread the risk. Yet, early settlement of claims against some defendants is essential to effective private enforcement of the antitrust laws.

In addition, by making pricefixing cases more complex, time consuming and expensive, the bill's contribution provisions will at best make private price-fixing suits less effective deterrents and could actually discourage the filing of such lawsuits in the first place. Permitting contribution will shift control of antitrust suits from the victims to the often huge and well-financed defendants who frequently seem to increase the complexity of the case in the hope that their interests will be served by confusion and delay. The right to contribution is a right to complicate.

In fact, contribution could easily create more litigation than the plaintiffs' suit on the merits, because the number of additional parties brought into the case by the named defendants could be tremendous. Taxpayers would be required to shoulder the burden of this increase in court costs. Victims of price fixing would be seriously burdened by having to litigate against an increased number of well-heeled defendants and by being delayed in receiving their rightful damages. As one senior U.S. district court judge with much experience in handling such cases has said:

> All of these additional management problems fly in the face of the Supreme Court's message in Illinois Brick, that policies must be shaped to eliminate, not to add to, the complexities of antitrust litigation. From my vantage point as a judge who has spent over two decades presiding over such complex litigation, it is clear to me that contribution and claim reduction would add enormous difficulties in managing antitrust cases which would in turn threaten the basic antitrust enforcement mechanisms currently in place.

This final point is a significant one. Not only will the complexities introduced by S. 995's contribution provision increase the burden in cases before the courts, it would likely deter many price-fixing victims from filing suit in the first place. By increasing the time and expense involved in achieving an antitrust remedy, S. 995 would discourage small firms who have suffered price-fixed overcharges from attempting the difficult process of seeing an antitrust suit through to the finish. In this time of budget cuts and limited Government resources, the private enforcement of the antitrust laws is a more important means than ever for assuring a competitive and productive economy. Indeed, in the presence of a Federal enforcement establishment that does not even believe in many of the laws it is supposed to enforce, the need for effective private antitrust enforcement is doubly required.

As if these harmful effects were not enough reason to oppose S. 995, the bill goes on to relieve price fixers of much of the sting of an antitrust judgment by creating a right of "claim reduction." This ghastly provision would be an early Christmas present to price fixers.

Businesses who are victims of a wide-ranging price-fixing conspiracy immediately become aware of several antitrust facts of life. First, litigation of their claims will require much time and expense, diverting corporate resources away from their most useful purpose of producing the firm's goods or services. Second, not all defendants will be equally able to defend the suit or, if found liable, to pay the victims' damages. Finally, these victims will discover that the only efficient means to be made reasonably whole without too much waste of corporate resources will be early settlements with as many of the defendants as possible.

Mandatory claim reduction, however, would sharply discourage settlements by preventing plaintiffs from recovering the entire amount of damages caused by a price-fixing conspiracy. This is because in most cases, nonsettling defendants' liability would be reduced under the bill by three times the settling firms' market shares rather than the actual amount of any settlements. The claim reduction amount will inevitably be larger than the actual settlement amount because there is little incentive for defendants to settle before trial for an amount even approaching their liability after trial.

Not only is such claim reduction unfair to victims of price-fixing conspiracies, it also would destroy the incentive to seek early settlements. This would make the victims' private suits much less manageable and would weaken the value of such suits as enforcement tools against price fixing.

By discouraging settlements, S. 995 would require small business plaintiffs to finance litigation, not out of settlement pools, but out of the funds that will be diverted from more productive endeavors. In addition to having to put up the money to finance the litigation from their own pockets, business plaintiffs would remain deprived of their rightful recovery of price-fixed overcharges for many more years. This would occur while often criminal price fixers reap the benefits of their ill-gotten gain throughout the litigation period. As one court recently described this enherent value of settlements,

> These settlements conferred a further benefit on the plaintiff class by permitting it to reduce the complexity and expense of trial against the remaining nonsettling defendants. Plaintiffs were able to streamline their evidence to focus on the conduct of a

small group of nonsettling defendants. Thus, they not only saved trial expenses by settling but also improved their chances of success in trial against nonsettling defendants and in defending any resulting verdict on appeal . . . most important, these are partial settlements that specifically and explicitly preserved plaintiffs' right to litigate against all remaining defendants for the entire amount of plaintiffs' damages, on the basis of joint and several liability, for all the injury casued by the conspiracy. The court considered this to be a valuable provision supporting the approval of the settlements.

This is the statement of the court in the Corrugated container case in 1981 S. 995's mandatory claim reduction provision does not preserve this right to joint and several liability. It therefore makes settlements much less likely and private enforcement much less effective.

Mr. President, there is a great irony in the argument made by some proponents of this legislation that the bill is designed simply to prevent alleged "unfairness" that results to small businesses that get squeezed by supposed whipsaw tactics into settling. Not only is there no evidence whatsoever that plaintiffs routinely settle with big firms early on in order to coerce the little guy into settlement, it would be obviously against the victims' interest to do so. Why should parties give a break to the deep pockets in order to crush the less well-off firms? This makes no sense.

Even if this counterproductive strategy were adopted, S. 995 would not solve the problem. Would it matter to the small businessman that his potential liability would be reduced from hundreds of millions to merely tens of millions? The only allegedly squeezed small business that testified on behalf of the bill admitted that its passage would not have enabled it to fight the case out to the end. Indeed, the sheer expense of litigation—made much worse by the contribution part of S. 995—would probably be enough to encourage the true small business to settle. Claim reduction would only benefit firms which are large enough to pay high-priced attorneys to slug it out with plaintiffs' lawyers to the bitter end. An end, I might add, which is usually put off for years by defendants' delaying tactics.

A final point in relation to the effect of this bill on small businesses. The irony of claiming that this bill is designed to help small business is driven home, I believe, when one considers that small businesses are on the plaintiff side of Federal antitrust cases 19 times out of 20. This figure is not an idle exaggeration, but rather, comes from a study done for the Justice Department of small business representation in Federal antitrust cases. In fact, the study showed that small businesses collect an astounding 60 times as much in antitrust damages as they pay out. If one has any real interest in helping the beleagured small businessperson in these difficult economic times, one would quickly work to prevent the passage of this highly anti-small-business measure.

In addition to these harmful effects on the direct victims of price fixing, claim reduction would cause great injury to the general public by reducing the deterrent value of private antitrust enforcement. As fewer and fewer private suits are filed, more and more firms will calculate that price fixing is a worthwhile activity. This in turn will mean artificially higher prices throughout our economy.

Some of the proponents have argued that existing criminal penalties are sufficient to deter price fixers. However, this proposition is manifestly incorrect, as the wealth of pending price-fixing cases shows. The burden of having to assemble proof to meet the criminal standard of "beyond a reasonable doubt" is much greater than the civil law test of a preponderance of the evidence. For example, in the Corrugated Cardboard case, several firms were found innocent of criminal charges but were found civilly liable.

To the extent that the threat of treble damages has worked as an effective deterrent to at least some potential antitrust violators in the past, S. 995 would seriously undermine this beneficial effect. If a potential price fixer knows that it may be held liable for three times the entire amount of overcharges resulting from the conspiracy, it will calculate this risk versus the value to it of making illegal profits. However, if the same firm knows that, even if it gets caught, it will only have to pay back its own illegal profits, the calculus tilts greatly toward the profitability of price fixing.

One might argue that this explanation ignores the existing deterrent value of the treble damage penalty itself. That is, that firms would still pay treble some damages even with claim reduction. However, the pressures toward settlement which I have already mentioned mean that plaintiffs rarely recover all of their actual damages through private litigation under existing law, let alone with claim reduction. The settlement process is necessarily a compromise where the plaintiff gives up a larger post-trial recovery in exchange for immediate gains, while the defendant trades risk of large liability for the opportunity to create additional delay. Unless future plaintiffs decide to keep many parties in the case in order to maximize their post S. 995 recovery, the cost of settlement to defendants is likely to be much less in a world with claim reduction, because the risk of total liability is eliminated. With settlements as an even smaller portion of some theoretical treble damage liability, potential defendants armed with the powerful weapon of claims reduction would have little to fear from the threat of treble damages.

The maintenance of the private antitrust suit as a law enforcement mechanism is essential to the health of our free enterprise system. The Federal Government and State attorneys general simply do not have the resources to police all of the possible price fixing in our economy. The law is not designed to allow the Federal enforcers to collect treble damages, and the Illinois Brick case severely hampered the ability of the States to assist in this law enforcement area. Finally, the disgraceful unwillingness of some of our administration's current crop of so-called law enforcers to do their duty by enforcing the laws that we have made, not simply the laws with which they are in philosophical agreement, makes the presence of private deterrent suits that much more crucial. S. 995 would do much to set price fixers free from the burden of having to obey our antitrust laws.

A final flaw in this legislation that may have gone relatively unnoticed is the inherently vague and litigation-producing language of the bill.

S. 995 would require claim reduction by measuring a firm's sales. However, no time frame or other criteria are set out to help determine which sales the drafters have in mind. This is not a simple problem of judicial interpretation. The fight over which market should be considered is often the most protracted part of antitrust suits. To alleviate this problem in the most obviously harmful contexts, the Supreme Court has said that price fixing is within the so-called per se category of antitrust violations. Thus, under existing law, one is spared the agony and expense of this fight over market definition in price-fixing cases.

By injecting a sales test into private price-fixing suits S. 995 would in effect overrule the per se decisions of the Supreme Court. And, even worse, the battle over claim reduction measures would be fought only among parties which all have the incentive to delay, because it would be fought only among the defendants.

We should not allow the de facto repeal of our antitrust laws under the guise of "unfairness." Many persons who are opposed to the retroactive application of claim reduction to pending cases but support a purely prospective bill have said that they believe in antitrust, but are simply trying to cure an alleged defect in the present system. Mr. President, I submit that the only defect in existing laws against price fixing is that they are apparently not strong enough to prevent the billions of dollars in overcharges that have caused this debate in the first place.

We must not allow a handful of price fixers and an army of potential

price fixers to persuade us to swallow medicine that is much worse than any perceived illness. In the post-thanksgiving spirit, I urge my colleagues to put this leftover turkey in the freezer and defeat this legislation.

Mr. President, I repeat, today is Wednesday. We have been here Monday. We have been here Tuesday. We have been here Wednesday. We have not accomplished one single thing. I doubt very much that we will accomplish much on Friday.

The economy is crying for our attention. Unemployment continues to rise. The problems of this Nation are so great that they demand our attention.

This administration today is talking about cutting funding for health services in this country. The problems of social security need our attention, whether we act on the issue or not during this special session.

We have not even taken up one appropriations bill, the very purpose for which we were called back. At least, that made some sense. At least, there was an arguable reason for us to come back. Instead, we are spending our time with tweedledee and tweedledum—S. 995, with or without the retroactive provision.

Where are the people in this country who are asking for this bill? Show me one group other than the special interests that is claiming that they want this legislation.

We have many things on which we could be spending our time which would mean a great deal more to this country. But, no, the lobbyists want this bill. The special interests want this bill. So we spend Monday and Tuesday and Wednesday and probably Thursday and probably Friday fighting over S. 995.

I call upon the leadership of the Senate to take this bill down and let us get to the business for which we were called back here. Let us tell the American people that we are prepared to accept our responsibility, and let us tell them that we are not wasting time, trying to relieve the responsibility of those who have been found guilty of price fixing and that we are not trying to change the antitrust laws of this country so that some future price fixers may be able to get by without being responsible for their damages.

Our actions are not responsible, and I believe that the sooner we take this bill down, the sooner we will gain the respect of the American people.

Mr. LEAHY. Mr. President, S. 995 as introduced in the Senate on April 10, 1981, was a bill that was very much needed to restore a sense of fairness to our antitrust laws. For the last few years plaintiffs in class-action price-fixing suits have had very unfair advantage over their adversaries. By settling the suit with one or two defendants early in the game, other defendants are compelled to settle, irrespective of their guilt or innocence. Under the common law, which has never been changed by Congress, each party to a civil price-fixing conspiracy is jointly and severally liable for the total damages without claim reduction. A settlement with one defendant removes from the total pot of damages only the amount of that settlement, not the amount of total damages represented by that defendant's market share. The result is that a defendant with a 5-percent market share can end up facing the payment of 95 percent of the damages. In addition, there is no right of contribution against codefendants.

Since damages are trebled under the Sherman Act, it is fair to say that most defendants, however innocent they believe they are, cannot risk defending their innocence in court. The advantage the plaintiffs have due to the "ratchet" settlement game is thoroughly unjustified and archaic. Congress and the States have eliminated the common-law joint liability and noncontribution rule in many other areas, and it is high time it was deleted from the antitrust laws.

But as necessary as this bill is to render our antitrust laws fair and equitable, I strenuously object to the bill in its present form, since it would apply to pending cases as well as future cases.

Throughout our history, we have had a strong dislike for ex post facto criminal laws and for retrospective civil statutes.

In Federalist Paper No. 44, James Madison described retroactive laws as "contrary to the first principles of the social compact and to every principle of social legislation." The reason for this aversion to retroactivity is simple but compelling: Citizens should be able to act with reasonable knowledge of legal consequences and expect reasonable stability in the rights and liabilities that attach to their acts or those of others. They should not be exposed to liabilities created after the fact.

Following Madison's principle, it has been the usual practice of Congress when enacting antitrust legislation which creates a new remedy or cause of action to give such legislation prospective effect only. This is particularly true where application of the legislation to pending cases might upset preexisting settlement contracts that were entered into and court rulings that were made, all based upon the law obtaining at the time and upon which the court and parties legitimately relied.

In those few instances where retroactive antitrust legislation has been enacted, it has been done to reverse so-called surprise decisions by courts or the Federal Trade Commission which applied the antitrust laws in ways in which Congress never intended and the parties never expected. This was the case with both the Newspaper Preservation Act and the Soft Drink Interbrand Competition Act. Never has the Congress granted retroactive effect to new antitrust legislation that would affect the rights of the parties in pending cases as profoundly as reported by the Judiciary Committee.

There is no conceivable way for anyone to know how S. 995, if adopted in the form in which it was adopted by the Judiciary Committee, might prejudice the many parties to such actions or how it might otherwise affect these cases. This much is clear, however: For every nonsettling defendant who would be helped by retroactivity, there are many plaintiffs and many settling defendants as well who would be injured by it. Moreover, it is a virtual certainty that already complex litigation will become even more complex, and the duration of these suits, many of which have already been in the courts for years, almost surely will be protracted.

But more is at stake here than judicial disorder and crowded dockets. Despite the attempts of many who have approached Members of this body as would-be scholars, plumbing the reports of the Supreme Court for some hint of a rule that would buttress the argument for applying this bill to pending cases, the stakes and the arguments could not be simpler. The stakes in retroactivity are some $2 billion or more in judgments standing against a number of price-fixing defendants who are coincidentally the very same companies whose monographs on the fairness of retroactive laws are piled on our desks.

These companies in every case have been served by very able trial counsel. They all asserted their innocence in court and had every right to do so. They chose to litigate based on their convictions of innocence, rather than to settle, and they had every right to do so. The ratchet settlement effect which is so unfair in the current law simply did not work against these defendants. In most cases, it is fair to say that these defendants argue their innocence today, but in every case a jury decided otherwise.

As a former State's attorney, I will concede that the jury system is not perfect but it is the system by which these defendants were judged, by their own election. Having lost, they now appear before the U.S. Senate as if it were some appellate tribunal empowered to set aside a judgment, notwithstanding the verdict of the jury. In all of my days as a prosecutor, I never once encountered a defendant convicted in a jury trial who sought to appeal to the Vermont Legislature to have the verdict set aside. To the extent that S. 995 attempts to do this, it is a

serious breach of the principle of separation of powers. Despite the attempts of the draftsman to protect existing settlements, I believe the bill, if adopted, would seriously compromise the due process rights of plaintiffs who have settled with some defendants in fair reliance on existing law and whose further rights against remaining defendants are extinguished by the legislation before us.

It is no answer whatever to argue that, under the committee version of the bill, the judge in each case has the discretion to apply the new law to pending cases or not. A New York Times editorial that appeared last March, after declaring that the merits of the bill were debatable, went on to add—and here I could not agree more—that retroactivity is not debatable. "That part of the proposal," the editorial said, "is an outrage." I would only add, for those who think that this bill is saved by a large dollop of judicial discretion, that there is no way to apply an outrageous law equitably. In its present form, S. 995 changes the rule of law in the middle of the game, and however unfair the so-called ratchet settlement process was, it grew out of longstanding common-law doctrine. While archaic, and I believe unfair, it was not an unconscionable ruse invented by plaintiffs. It is at this very moment the law of the land, though I understand there are still efforts under way to overturn the principle judicially.

Perhaps the most important reason to reject a bill that applies to pending cases is the disrespect for the Congress and for Government in general that will inevitably follow passage of a bill like the one before us. This session of Congress was called to deal with a national economic crisis. The eyes of the Nation are on this body. What will the people see? Are we creating jobs? Are we feeding the hungry? Sadly, we are spending critical days debating the merits of a cynical attempt to use the Congress to reverse the outcome of a decision in another branch of Government. While the country is suffering, we are meddling. By all indications, the Senate could have dealt with the principal goal of this bill—the ratchet settlement syndrome—in a few minutes if there had been no attempt to make it special interest legislation. It is my own view that a prospective S. 995 would have actually strengthened the laws against price fixing, because there would be no incentives for cheap, early settlements. Price fixers would have to contemplate treble-damage judgments that reflected their proper market share. While the roulette principle would have been eliminated—threatening the guilty and innocent alike with horrendously large judgments—gone also would have been the easy escape routes for the worst price fixers.

The point is that a good and necessary bill is getting lost while we battle over an unnecessary and unfair one. S. 995, as introduced, should be enacted immediately, but the committee amendment before us should be soundly defeated. A defeat would send the right message to all of those who would influence legislation that the Senate is a body that takes a long view of the Constitution and a keen view of its own priorities.

Mr. President, I yield to the distinguished Senator from Louisiana.

Mr. LONG. Mr. President, I should like to make a statement on this subject, if the Senator is prepared to yield the floor.

Mr. LEAHY. I yield the floor.

The PRESIDING OFFICER (Mr. CHAFEE). The Senator from Louisiana.

Mr. LONG. Mr. President, I wish to state my objection to having the changes in the antitrust laws made by S. 995 applied retroactively.

Until this year, antitrust contribution bills introduced in the House and Senate in the 96th Congress and then reintroduced in the 97th Congress have always been prospective only. Thus, they have applied only to cases filed after the effective date of the law, when all parties would know what the law was. They have not applied retroactively until after jury verdicts were entered against five big companies in three antitrust cases, the Corrugated Container case, the Plywood case, and the Textile Machinery case. Losing defendants in those cases were found liable by jurors of having fixed prices to plaintiff businesses, have banded together to try to undo the full effect of those jury verdicts. They are trying to get Congress to do for them what they have been unable to achieve in the courts.

Therefore, Mr. President, retroactivity is being sought primarily by a few defendants who elected to go to trial knowing the present rules, were convicted of price fixing, and are now seeking a second bite at the apple. At the same time it will jeopardize the agreements of plaintiffs and defendants who settled in good faith, and prolong and delay litigation for everyone.

Proponents of retroactivity argue that defendants in pending antitrust cases should not be denied the benefits of contribution and claim reduction and that these features ought to go into effect immediately. Whatever the merits of these arguments, it is clear that S. 995 does not provide for application to pending cases in a manner that would be useful to the vast majority of litigants in these cases. Thus, the amendment does not make contribution, the primary objective of the bill, available in pending cases at all.

The creation of a new right of contribution is like the original legislation when it was introduced, applicable only to future cases. The only part of the bill which is made retroactive is the creation of a new right called claims reduction. Under claims reduction a losing defendant in a price-fixing case may have his damages reduced by the full market share of any defendants who have settled their case, rather than simply by the dollar amount of those settlements. Thus, for example, if two defendants were sued by a business for price fixing, both of whom had a 50-percent share of the market, under current principles if defendant A settled for $100,000 and defendant B refused to settle and was found liable for a $1 million price-fixing verdict, the plaintiffs recovery against defendant B pursuant to his jury verdict would be reduced only by the $100,000 settlement he had already gotten. Under the change in the law, however, that recovery would be reduced by 50 percent—the market share of the settling defendant—or by $500,000. Only this provision is made retroactive, for the clear purpose of benefiting those defendants found guilty of price fixing.

While the benefits of S. 995's retroactivity provision are limited, the potential for injustice is great. Judgments and jury verdicts could be overturned. Plaintiffs who has bargained for settlements, in the expectation of full recovery against the remaining defendants, would find their recoveries cut by at last 50 percent.

Parties to scores of price-fixing cases have relied on the long-standing rules governing antitrust cases. Plaintiffs relied on existing law in settling cases and deciding to go to trial, and in obtaining jury verdicts under current law. Settling defendants relied on their right to buy their peace through traditional settlement means. Defendants who decided not to settle and who lost jury verdicts also relied on current law. They knew what the rules were. They were represented by competent counsel. They were under no misapprehension about the state of the law.

Indeed, there is a "heads I win, tails you lose" sense about this whole amendment. Had the few defendants who are pushing for retroactivity won their jury trials they certainly would not be here pushing for a retroactive change in the law. Because they took their chance and lost, they now want Congress to undo the effect of those jury verdicts. This we should not do.

Noted constitutional scholars like Prof. Charles Alan Wright of the University of Texas Law School and Prof. Ernest Gellhorn of Case Western Reserve Law School have found severe constitutional problems with retroactivity in the context of the antitrust contribution bill. They have indicated that basic fairness would be upset and due process rights potentially violated

by retroactivity, since plaintiff businesses would find that settlements and jury verdicts were at risk which they had obtained under existing law.

It is also important to recognize that the American Bar Association's Antitrust Division has opposed retroactivity. They did so out of "a great concern, first that such a rule would upset settlement calculations already in progress, and that second, that parties could be prejudiced who had already participated in the conduct of joint defense efforts on an assumption of no contribution. Accordingly, our statutory proposal would apply only to proceedings initiated after its effective date." This is precisely what we should do. We should not apply the changes in S. 995 retroactively and upset the reliance of parties on the prevailing rules of law. We should apply this only to future cases.

If we apply S. 995 retroactively we would be hurting the very parties the antitrust laws are designed to protect—the businesses who have been victims of the price fixing—and rewarding the very parties the antitrust laws are designed to deter, those companies found guilty of price fixing.

It would send an unfortunate message for retroactivity to pass for precisely this reason. We would be saying that Congress is prepared to do special interest legislation to aid those defendants who have lost jury verdicts for price fixing at the expense of the businesses who have been the victims of price fixing. This is justice turned on its head. It will upset the deterrent effect of the antitrust laws as well and serve as an open invitation to losing defendants in antitrust cases to come seek special relief from the Congress.

The New York Times has editorialized that the retroactivity proposal "is an outrage,"—a view echoed by newspapers across the country. The Congress should not allow itself to be steamrolled by the proponents of retroactivity, and, therefore, I strongly urge that Congress reject the efforts at retroactivity.

Mr. BAUCUS. Mr. President, I first wish to thank the Senator from Louisiana for his position on this bill. He and I both agree that the concept of contribution is due, is needed, and the antitrust law needs to change. He and I also agree that it is unfair to apply the principle back retroactively in pending cases.

I simply wish to applaud the Senator for his help in this regard.

I think it is important for Members of the Senate to know where the Senator from Louisiana stands because the Senator from Louisiana has long experience in this body. He is a student of this body, a student of American law and American jurisprudence, and it means a lot to this Member, as I know it does to other Senators, to know where the Senator from Louisiana stands on this issue.

I personally take my hat off and thank the Senator for his help in this regard.

Mr. LONG. Mr. President, I thank the Senator. I wish to say to the Senator that there may be and I am sure sometimes there are cases where retroactivity is justified. This just does not happen to be one of them. If retroactivity is to be enacted it should be only in exceptional cases where there would be a grave injustice or a grave discrimination or unfair treatment to do otherwise.

I think the Senator from Montana has made the case that there is no basis for that type of special treatment in this instance. I support that case.

Mr. BAUCUS. Mr. President, if the Senator will yield, I think he is precisely on target because I agree there may be cases where retroactivity application would be appropriate and does make sense.

In fact, there are two general categories in antitrust law where Congress has applied a change in antitrust laws retroactively and those two areas are where the Federal agency or a court has made a mistake. It has erred in its interpretation of a statute and it has been incorrect in its interpretation of a statute, and in those cases Congress has come back and said: "You made a mistake. It was unfair to the parties because anyone reading the statute would come up with another conclusion. You made a mistake." In those cases that certainly is an area where we should apply a change in antitrust laws retroactively.

But this is not that case, and no one here today is even suggesting that exception applies. No one is suggesting that it applies.

All parties know the antitrust laws are in areas of claims reduction and contributions. That is where we feel it should not be applied retroactively. I think that is important. As a general rule, there is no retroactivity generally. There may be exceptions, but there is not an exception in this case.

Mr. LONG. Mr. President, I am pleased to support the thinking of the Senator from Montana who is rendering a valuable contribution in making a fight on this issue. I congratulate the Senator.

Mr. BAUCUS. I thank the Senator.

Mr. President, earlier today I was indicating various reasons why I think it would be inappropriate to apply retroactivity to S. 995.

I gave two basic reasons. I now wish to continue to suggest the reasons why we should not apply the principles of claims reduction and contributions retroactively, although it certainly makes sense to apply them prospectively.

Mr. President, the third reason is that it is bad public policy. It would be bad public policy that would cause both procedural and substantive havoc in hundreds of pending antitrust cases, many at very advanced stages, involving some 900 defendants and thousands of plaintiffs. That is not an important point. If we were to amend the present law and apply claims reduction and contributions retroactively that would mean that in over 900 cases, those cases would be reopened. Some 900 defendants and thousands of plaintiffs would have to go back to the courts and say: "Judge, because Congress has applied this principle retroactively we feel we were dealt with unfairly because we have to now ask our settlements to be set aside, reopen our case and have it relitigated because Congress changed the rules."

In addition to other reasons that is upsetting to the usual expectations of the defendants and parties to apply this concept retroactively would mean that some 900 defendants and thousands of plaintiffs would begin to reopen those cases.

The *Miliken* case is on appeal to the circuit court of appeals. The *Plywood* case is now pending before the U.S. Supreme Court. And many other cases, such as a natural gas case in New Mexico; a cement case in Arizona; a crayon case involving several States and many school districts; suits by Delaware, Maryland, Pennsylvania, Virginia, West Virginia, and the District of Columbia against Toyota dealers and distributors involving alleged price fixing; a case in Iowa involving 500 beef producers alleging price fixing by 24 retailers and 4 meat packers in the purchase of beef; and many more cases would all be thrown into confusion. Despite the language in the Thurmond amendment, settlements entered in reliance on the fact that only their dollar amounts would be removed from any verdict would be challenged by plaintiffs if market shares were carved out instead. And defendants would have an open invitation, under the vague standard of "inequitable," to reduce verdicts against them.

The issue of whether there has been an inequity would have to go to higher courts, and the Supreme Court would ultimately have to decide the constitutionality of retroactive claims reduction, after courts throughout the country first decided it on a case-by-case basis.

Five justices of the U.S. Supreme Court—Justices Stevens, Powell, Brennan, White, and Burger—have urged that extraordinary steps be taken to reduce the caseload on the Federal Judiciary.

The amount of additional litigation which the Thurmond amendment would invite, and even assure, is staggering. Years of additional litigation would ensue with resulting uncertainty about the status of cases, some of

which have gone all the way through a jury trial. Courts in case after case would be forced to rehear issues already considered. Federal Judge Hubert L. Will of the Northern District of Illinois has testified eloquently as to the additional burden which retroactivity would bring, and has likewise stated that—

It is basically unfair for litigants to try to use Congress to upset results fairly reached in lawsuits tried under the existing rules when these rules were known to all the parties before they made their litigational settlement decisions.

Let us not as the U.S. Senate act merely to benefit a few private companies when the result will be to create havoc in our already overloaded Federal courts.

The fourth problem with the retroactive application of S. 995 is that it would hurt antitrust deterrence. Defendants who lose jury verdicts would see that under political pressure, the Senate of the United States may be willing to create a vehicle for the reduction of those verdicts. They would feel less compunction about violating the antitrust laws and, if sued, less compunction about settling them since they would feel that they could convince Congress to undo the jury award against them for damages caused to an innocent plaintiff. Mr. President, if S. 995 is passed by the Senate with the retroactivity amendment, it could send a terrible message to the country at large and to potential antitrust violators—namely, that we are willing to bend to the pressures of a few large companies to bail them out of pending judgments, and that we are open to special pleas from those who have lost under one set of rules, to change those rules for the benefit of the losers.

A fifth reason why we should not consider S. 995 with the retroactivity provision is because retroactivity has split the business community, has slowed down the bill, and has made its passage highly unlikely. It is clear that there is great opposition in the Senate to S. 995 with retroactivity in it, and it is equally clear that the House of Representatives is unlikely to pass a bill that is or could be applied retroactively.

Mr. President, we would be guaranteeing the defeat of what would otherwise be sound legislation by insisting on retroactive application. This might doom the legislation, even prospectively, for the future. In these circumstances, it is better not to vote on the bill at all than to have action taken that could prejudice the chances of a "clean" prospective bill passing in the future.

I want to conclude by making clear the special interest nature of S. 995 with the retroactivity amendment on it.

As I have indicated at some length, the history of the retroactivity effort makes it clear that retroactivity only became an issue after these five defendants lost their jury verdicts. Where were the voices for retroactivity when S. 1468, which was specifically prospective, was introduced in the 96th Congress, and passed through the Senate Judiciary Committee—making the very same substantive changes as S. 995 in the antitrust laws? Not one whisper was heard for retroactivity. Not one mention was made of it in the committee report. Not one effort was made to change the specifically prospective nature of S. 1468. Where were the voices for retroactivity when S. 995 was reintroduced in the 97th Congress, again being specifically prospective? There were no such voices because the five defendants in these three cases had not yet gotten together to seek a bailout. It is unmistakable that the motivating force behind retroactivity is the effort by these five defendants to be able to go back into court and retroactively reduce the size of the verdicts entered against them.

A second evidence of the motive behind this retroactivity provision is the structure of the Thurmond amendment. The change creating a right of contribution remains prospective only. This change in the law, which was the initial motivating force behind the whole legislation, still remains applicable under the Thurmond amendment to future cases only, both because of the disruption which would otherwise occur and because of the reliance on existing law by the parties to pending legislation. The only part of this bill that has been made retroactive and applicable to pending cases is the claims reduction or "carve-out" section, which is the very part permitting these five large companies to retroactively reduce the size of their jury verdicts at the expense of the plaintiff businesses who were the victims of their price fixing.

The very structure of the Thurmond amendment therefore reeks of special interest. The sponsors of the amendment want to limit contribution to future cases because of the problems which would otherwise occur for defendants. But they are willing to apply retroactively that section which would hurt innocent plaintiffs who have been the victims of price fixing in pending cases.

A third, clear evidence of special interest was shown in the reaction to an effort suggested by Senator DOLE in the Senate Judiciary Committee that addressed the only conceivable public policy argument there is for retroactivity. The proponents of retroactivity were saying: "All we want to do is assure that defendants in existing cases have the same right as defendants in future cases will have; if the law is good for future cases, it should be good for pending cases."

Senator DOLE tested their sincerity in making this argument by proposing to offer an amendment which would have applied claims reduction and contribution to all pending cases except those pending cases where there are outstanding settlements, jury verdicts, or judgments, indicating the parties had already relied on the existing law. All other cases would be subject to the change in the law. This was flatly turned down by the proponents of retroactivity on S. 995, apparently because it would not permit these five defendants to bail themselves out of their jury verdicts.

Mr. President, for these reasons I simply cannot support S. 995 with the retroactivity provision. If the sponsors of the retroactivity amendment will agree to drop it and return to the original prospective language of S. 995 or to change the law and apply it to pending cases so long as there is no judgment or verdict or substantial settlement, I will be more than happy to support such an effort. Until then, it is important that the full Senate have the opportunity to be educated on precisely what is at stake. This is a complex issue of great importance. Respect for the Senate and respect for our antitrust laws is at stake. I cannot let that respect be tampered with easily.

Mr. President, to pass this retroactive provision would be, to a plaintiff-business, like telling a football team that was ahead 21 to nothing going into the last quarter that the rules of the game have suddenly been changed and that its touchdowns were only worth 1 point, thereby putting the team at risk of losing what it had already achieved. If such a change is not appropriate on a field of play, how can it possibly be appropriate for the Congress or a court of law, particularly as it implies to price fixers found guilty of violating antitrust laws?

Mr. President, opposition to the retroactive application of S. 995 is an issue that crosses party and ideological lines. The Senators who are fighting retroactivity come from both parties and represent the broadest spectrum of political views.

In the Senate Judiciary Committee, retroactive application was opposed not only by me, but also by Senators KENNEDY, LEAHY, and METZENBAUM on the Democratic side and Senators DOLE, DENTON, SPECTER, and EAST of the majority. The views of these Senators, as expressed in the committee's report of S. 995, provide a concise and persuasive summary of the arguments against retroactivity.

At this point, I would like to read the statements of the various Senators on the committee in opposition to S. 995 as it is presently written. First, the supplemental views on S. 995 by Senator SPECTER, of Pennsylvania.

After extensive consideration, it is my conclusion that S. 995 should not be made applicable to pending cases. In my relatively brief tenure in the Senate, I have probably spent more time on this bill than any other single matter, and I have come to the issue with background in the fields of federal court litigation, the antitrust laws and the laws on contribution.

It is undeniable that there are pending cases that involve enormous losses to companies under circumstances which have significant elements of unfairness. The issue before this Committee is whether we should change existing law through this legislation to alter the balance between parties to this pending litigation. In my judgment, we should not.

I say that because these cases involve decisions by sophisticated, experienced, highly-qualified lawyers and businessmen. On all sides of these complex litigation matters, the issues have been researched, studied, and extensively analyzed. Risks were undertaken by all parties to the pending cases with full knowledge of the existing law. That existing balance, in my judgment, should not be disturbed by the Congress with respect to pending cases.

Those are the supplemental views of Senator SPECTER, of Pennsylvania.

Now I would like to give the additional views of Senator EAST on S. 995.

I will not repeat the persuasive arguments supporting prospective legislation allowing contribution and claim reduction in price-fixing cases. These arguments are well expressed and carefully documented in the views of the majority. Defendants should not be faced with liability so awesome that they must forgo an opportunity to prove their innocence before a jury.

Only when we come to the question of applying claim reduction retroactively do I differ with my colleagues and the Report of the majority. As a general rule, retroactive legislation is not favored nor is it customary. The wisdom of this policy is demonstrated by consideration of the effects of the bill, as modified by the amendment providing retroactive application, would have on the thousands of parties to pending cases.

Without question, application of claim reduction to a case in which settlements have already been made would forever bar the plaintiffs from recovering treble their full damages. By reducing the exposure of nonsettling defendants by treble the damages attributable to settling defendants, rather than the amount of the settlements, claim reduction would frustrate the antitrust policy of granting treble damages to injured plaintiffs. A purely prospective application of the bill would avoid this injustice because every party in future litigation would know of the new rule of claim reduction and conduct their settlement negotiations accordingly. There would be no "cheap" settlements to build a litigation war chest.

Years of uncertainty, litigation, and a tangle of legal problems will result if Congress makes claim reduction available retroactively. For example, the bill, as amended, conditions retroactivity upon a finding that it would be "inequitable" not to apply claim reduction. This standard would have to be litigated and ultimately defined by the Supreme Court, thus imposing substantial litigation costs and delays in collection of judgments on innocent plaintiffs.

In addition, the possible effects of retroactive application of claim reduction on existing settlements are troubling. While the bill expressly attempts to protect existing settlements, plaintiffs will surely seek to upset them, for that is the only manner in which they could recover their full treble damages. Some of the settlement agreements consummated in pending cases are conditioned on clauses that expressly preserve plaintiffs' rights to pursue remaining defendants for the entire amount of damages, based on joint and several liability. Litigation as to the validity of section (f)(2) would pull settling defendants back into lengthy litigation.

Serious constitutional questions are also raised by the retroactive legislation. Retroactive legislation must meet a higher due process standard than prospective changes in laws. As the Supreme Court said in *Usery* v. *Turner Elkhorn Mining Co.*, 428 U.S. 1, 16-17 (1976), "The retrospective aspects of legislation, as well as the prospective aspects, must meet the test of due process, and the justifications for the latter may not suffice for the former." Retroactive application of this bill will surely be challenged in the courts.

For the foregoing reasons, I cannot support this bill as amended to have retroactive application. I hope that it can be enacted as originally introduced.

That, Mr. President, is a statement by Senator JOHN EAST providing his supplemental views to the pending bill, S. 995; that is, his views in opposition to the bill in its present form, particularly insofar as it applies to the principle of claim reduction retroactively.

Now, Mr. President, I would like to present the views of Senators METZENBAUM and KENNEDY in their supplemental views on S. 995. I will now go through a portion of their supplemental views.

When this committee first reported out a bill on the subject of antitrust contribution—S. 1468—the legislation was applied only to future cases. In the more than two years since S. 1468 was approved by the committee, there has been an intense effort to make the bill applicable to cases pending in the courts at the time of enactment. This resulted in the addition to S. 995 of the so-called Thurmond-Laxalt-Hatch amendment, which would allow the claim reduction—but not the contribution—provisions of S. 995 to be applied retroactively to pending cases. The most significant portion of the amendment reads:

"(f)(1) The claim reduction principle of subsection (b) of this section shall also apply to actions alleging an agreement to fix, maintain, or stabilize prices under section 4, 4A, or 4C of this act which are pending on the date of enactment of this section, if upon proof by any party subject to liability from damages in such an action, the court determines that it would be inequitable, in light of all the circumstances and notwithstanding subsection (f)(2), not to apply the principle in that action."

Although there are some estimated 900 pending price-fixing cases in Federal courts, the retroactivity provisions of S. 995 are apparently intended to assist nonsettling defendants in three major cases: *Corrugated Containers*, M.D.L. 310, *Plywood*, M.D.L. 159, and *Burlington* Civ. No. 71-306 (D. S.Car.). Nearly all of the witnesses who testified before the committee represented firms involved in one of these cases. All of these cases have been in the courts for many years: The *Burlington* case, for example, was originally filed in 1969. Relying on the rules of joint and several liability, which have been part of the antitrust laws for as long as there has been private antitrust enforcement, attorneys for plaintiffs and some defendants have carefully worked out settlements that offered benefits to both sides of each case.

In the *Corrugated* case, the trial court expressly relied on the joint and several liability standards in approving certain settlements:

"Most important, these are partial settlements that specifically and explicitly preserved plaintiff's right to litigate against all remaining defendants for the *entire* amount of plaintiff's damages, on the basis of joint and several liability, for *all* the injury caused by the conspiracy. The court considered this to be a valuable provision supporting the approval of the settlements. In effect, in each successive settlement, all the plaintiffs gave up was the right to recover that settlement amount against nonsettling defendants."

We are now asked to make it possible for the nonsettling firm—which had many opportunities both prior to and after trial to settle for reasonable amounts—to escape liability which has been expressly found by a jury. We are asked, for example, to make it possible for the nonsettling defendants in the *Corrugated* case to escape the liability which the court expressly found was necessary in order to make the carefully negotiated settlements fair to the more than 200,000 victims of price-fixing who are the plaintiffs in that case. Although under S. 995 as reported the court must first examine the equities of applying claim reduction, to even raise the possibility that existing agreements might be unravelled and plaintiffs and settling defendants might be subjected to more litigation and uncertainty is grossly unfair and is bad public policy as well. Having chosen to litigate and having lost, nonsettling firms in pending cases should be required to obey the rules which they knew existed throughout the years of litigation, and on which both sides have reasonably relied in making their tactical and strategic decisions.

Permitting these nonsettling firms to be relieved of their rightful obligations would be tremendously unfair to the thousands of small businesses who were overcharged for years by the proven price-fixing conspiracies. In the *Corrugated* case, for example, the plaintiff class has negotiated settlements from nearly all of the defendants which reimburse the price-fixing victims for only *15 percent of the actual damages* suffered as a result of the decade long conspiracy. These settlements were, as noted above, approved by the court on the express finding that the remainder of the damages during the statutory period would be recoverable from the nonsettling parties. The retroactivity provision of S. 995 would allow the court to reduce the nonsettling firm's exposure to approximately one-tenth of its expected liability under current law. The victims of the conspiracy would have hundreds of millions of dollars of their rightful reimbursement taken out from under them. The antitrust laws provide for recovery of three times the amount of the actual damages suffered by victims of antitrust violations. The application of S. 995 to pending cases would allow the reduction of plaintiffs' recovery in *Corrugated* and other cases to only a small percentage of their actual

injury. We cannot support the creation of such a gross injustice.

Applying S. 995 to pending cases would also be unfair to settling defendants, as their strenuous and repeated testimony against the retroactivity provisions of the bill shows. Despite the fact that the Thurmond-Laxalt-Hatch amendment purports to remove the courts' ability to modify or rescind existing settlements by the application of claim reduction to pending cases, settling defendants would be required to appear before the court to assist the determination of the amount of claim reduction. The bill requires reduction of claims in a manner related to relative sales by each firm, and settling firms would be required to testify and produce voluminous documents related to their participation in the markets at issue. This retroactive requirement will greatly increase the cost incurred by these firms as part of the litigation, and may well have affected the firms' decisions as to whether to settle or how much settlement would be worth if they had known about this requirement at the time of settlement.

In addition, many of these firms settled on the basis of their knowledge of the existing rules of joint and several liability. If they had known that their liability might be limited to their market share, they certainly would have either settled for less or perhaps not settled at all. S. 995 as reported would allow these firms to rescind their settlements if such an action is consented to by all the parties to the agreement. If this procedure is utilized, the effect of the retroactive application of claim reduction may well be to force plaintiffs and defendants in long-pending cases to go back to square one in negotiating settlements. Not only would this cause great additional expense and delay, it would require victims of price-fixing as well as previously settling firms to wait an indeterminate—but certainly lengthy—period before the issues are finally resolved. It would be unconscionable for the Congress to place this burden on so many firms which have acted in good faith over many years to resolve their disputes under known rules.

C. DOUBTS AS TO THE CONSTITUTIONALITY OF RETROACTIVE CLAIM REDUCTION WOULD CREATE UNNECESSARY LITIGATION

The committee received the testimony of many constitutional law experts concerning the constitutionality of the retroactive application of claim reduction. It is not surprising that these experts reached differing results. While we do not express an opinion on this question, it is clear that the constitutional issues would require significant court attention and concommittent resource expenditure by the parties to pending cases.

Mr. President, as I said, these are the views of Senators METZENBAUM and KENNEDY.

As one attorney representing plaintiffs in a pending case testified,

"Certainly they will have to litigate, and we the plaintiffs in the *Corrugated* case are going to make them litigate because there is too much doubt as to the constitutionality of applying S. 995 retroactively for us to fulfill our fiduciary duties to the class by settling at a small amount."

Mr. President, I see that the Senator from Pennsylvania is now in the Chamber. I am wondering whether at this point he would like to make a statement on S. 995.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I thank the distinguished Senator from Montana for yielding to me.

After extensive consideration, it is my conclusion that S. 995 should not be made applicable to pending cases. In my relatively brief tenure in the Senate, I have probably spent more time on this bill than any other single matter, and I have come to the issue with background in the fields of Federal court litigation, the antitrust laws and the laws on contribution.

It is undeniable that there are pending cases that involve enormous losses to companies under circumstances which have significant elements of unfairness. The issue before this body is whether we should change existing law through this legislation to alter the balance between parties to this pending litigation. In my judgment, we should not.

I say that because these cases involve dicisions by sophisticated, experienced, highly qualified lawyers and businessmen. On all sides of these complex litigation matters, the issues have been researched, studied, and extensively analyzed. Risks were undertaken by all parties to the pending cases with full knowledge of the existing law. That existing balance, in my judgment, should not be disturbed by the Congress with respect to pending cases.

It is unfortunate, in my judgment, that the focus of this legislation has been on its application to pending cases. The issue of contribution in antitrust cases is a very important one and does require modification. If the provision making this legislation applicable to pending matters could be eliminated, I would like to see this bill moved forward and be enacted. We would then have a more sensible application of the laws of contribution in antitrust cases.

I do not think, however, that this important modification can be accomplished as a part of legislation which is essentially a bailout. Where cases have been litigated, where verdicts have been rendered, where judgments have been entered, or even where settlements have been agreed to, applying this legislation to pending cases would create a change in the fundamental rules by which the parties operated.

I thank the distinguished Senator from Montana for yielding the floor to me. I am prepared to yield the floor.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LEVIN. Mr. President, I ask unanimous consent tht the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. I thank the Chair.

Mr. President, S. 995 is a significant effort to modify the antitrust laws to assure justice for persons alleged, and I emphasize the word "alleged," to have fixed prices as well as to continue protection for those who claim to have been the victims of such alleged price fixing. Unless we change the law as provided by S. 955, the present inequity will remain. That intolerable injustice results from each defendant alleged to have price fixed being held accountable for three times the damage perpetrated by all defendants, not just three times the increased profits that he or she individually was alleged to have received. For instance, a defendant with a market share of 1 percent and who has received $1 million worth of increased profits out of a total of $100 million of damage to plaintiff would be responsible for up to a $300 million judgment. If another defendant who received 50 percent of the increased profits, $50 million, settles for $100, our 1 percent market share defendant would still be responsible for the full $300 million in damage, less the $100. This type of inequity has terrorized defendants alleged to have price fixed into settling cases that they would have preferred to fight but could not because they cannot afford the risk, a risk so grotesquely out of proportion to the benefits they allegedly received and, in many cases, so immense that the survival of their company itself was the issue.

S. 995 corrects this by allowing defendants in price-fixing cases to bring into court other persons who they claim should share responsibility—that is called contribution—and by applying a principle of claims reduction so that the market share of the settling defendant is deducted from the claim of plaintiffs, instead of just subtracting the amount of the settlement from the trebled damages.

There seems to be substantial sentiment that fundamental fairness requires such a change in the law. That sentiment is less substantial on the issue of whether such change should be applied to pending cases or just to future cases. In the absence of any explicit expression on Congress part in this regard, the courts would decide the issue of application of this new legislation to pending cases and, indeed, it would be best that such decision be left to the courts.

As Charles Renfrew, a former Deputy Attorney General and a former Federal court judge, said:

Congress has on many occasions made numerous antitrust and other statutes applicable to pending cases. Indeed, a basic rule of statutory construction is that newly enacted legislation is to be applied immediately upon its effective date and in pending cases, unless to do so would result in manifest in-

justice or Congress expressly providing otherwise.

Mr. President, the committee having waded into this thicket, it is probable that silence on issues of application to pending cases cannot extricate us because of the legislative history that has already been created and the potential misreadings of congressional silence on the issue of retroactivity, given that the committee had previously adopted an amendment allowing for it. So, I am afraid we must now clearly and explicitly address ourselves to the pending case application issue.

There are many different types of pending cases and balancing the equities is difficult to do at this distance, at least with any certainty. The first group of pending cases might include cases in which there have been no settlements and no verdicts by juries. There would seem to be relatively little injustice in those cases in allowing courts to apply our new fairer claims reduction principle to pending cases, instead of continuing the regime of legal terrorism that we now have against defendants who are alleged to have price fixed. If persons charged with crimes in this society are entitled to justice, it would seem that persons alleged, but not yet found, to have committed civil wrongs should also be justly treated.

A second group of pending cases might be those in which a small percentage of the defendants have settled, presumably for much less than their market share. Let us assume a $100 million price-fixing damage suit with 100 defendants, each with a 1-percent share, and one defendant has settled for $500. The other 99 defendants are still only alleged to have committed the price-fixing act. The argument for allowing a court to apply claims reduction is that 99 defendants should not be unjustly treated just because the case is pending, where they would be justly treated if the case were filed the day after the law were changed. The case against claims reduction argues that since the committee amendment prohibits unraveling the settlement, the plaintiffs could never recover their $100 million, trebled because this is an antitrust case. Plaintiffs would be limited to $99 million times 3 plus the $500 rather than the $100 million times 3 minus $500 that they could otherwise receive. Which is the greater injustice? Is it to plaintiffs alleged to have been injured, or to defendants alleged to have been the cause? I repeat—still only alleged to have been the cause. I do not know for sure, but I do know we are not in a very good position to weigh the equities from this distance, at least with any certainty.

In the next group of cases, a significant number of defendants may have settled. In a further group of cases, the fewest in number, by the way, that is pending cases, a verdict may have been reached by a jury on one or more defendants, with or without the belief that defendant might achieve claims reduction if they found the defendant liable. Even in cases where verdicts have been reached, the defendant may wish to appeal a verdict and be terrorized into dropping the appeal, again because the risk is so horrendously and unfairly high. The injustice of these terrorized settlements, even after a jury verdict, is perhaps seen in a recent instance where a defendant was found liable by a jury and faced the possibility of over $700 million in damages, but was able to settle for $45 million by giving up its desire to have its day in the Court of Appeals. The injustice of the $750 million ruinous prospect was most eloquently dramatized by the fact that plaintiffs took less than 10 percent of that in settlment even though they had a verdict in hand.

The issue before the Senate is whether we should allow a court to apply claims reduction in one or more of all these categories or whether we should prohibit it. It seems clear to me that, once we have jumped the hurdle of saying claims reduction is essential for a just legal regime prospectively, there may be—I emphasize may be—instances where it is appropriate in pending cases. And then the question arises: Is Congress or the courts in a better position to weigh those equities in hundreds of pending cases, most of them where I understand, no verdicts have been reached? My answer is that courts are in a better position and that, historically, that is often where we have left the issue of applying new laws to pending cases.

But the problem with the committee amendment on retroactivity is that it goes too far. It seems to suggest that courts should apply claims reduction retroactively. It is not neutral enough and does not put a sufficient enough burden on persons who seek application of the new rules in pending cases.

Instead of providing, as the committee amendment does, that the claims reduction proposal shall apply to pending actions if the court determines, upon proof by the defendant, that it would be inequitable not to do so, the language should read that the court shall not apply claims reduction to pending actions unless it determines that equity clearly requires it to do so. Such a change in language would preserve the principle that we should allow courts to apply new rules of claims reduction in pending cases without tilting the congressional mandate in favor of a court exercising the discretion we granted.

In other words, while we should permit claims reduction to be applied to pending cases by the courts, as the instrumentality that is in the best position to know what the complex equities are in the cases before it, we should make it clear that there is a burden to be carried by those who would seek application to pending cases, and we should take steps to assure that allowing courts to consider application of new rules to pending cases is not used as a dilatory tactic by defendants filing frivolous petitions.

To achieve this, we should require that interest be paid at prime rate upon judgments that are entered by courts. The prime rate is typically 3 percent higher than the usual rate that is awarded on these judgments.

When and if the Senate considers specific amendments to the legislation, I intend to offer an amendment to achieve both the proper burden in the exercise of court discretion in pending cases and to prevent dilatory tactics by defendants. I intend to offer such an amendment, however, only in the event that other amendments that would strike or more greatly restrict the courts' power to apply retroactive application have been disposed of, because if such amendments were adopted, they would probably undercut the usefulness of my amendment.

I yield the floor.

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER (Mr. HAYAKAWA). The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I compliment the distinguished Senator from Michigan on his customary erudite statement.

In the course of it, he has raised an area where I find agreement with him—the application of this legislation to cases which are currently filed but in which there have been no settlements.

The statement I made to the effect that I do not believe S. 995 should be applied to pending cases referred to a controversy that has arisen over some specific cases in which judgments have been entered. If someone were to propose that S. 995 be amended to apply to cases which had been filed and in which no settlements had been reached, no verdicts had been rendered or no judgments had been entered, then I would think it appropriate that S. 995 be so applied.

There arises a more complex area on a hypothesis, as the distinguished Senator from Michigan has proposed, where there are 100 defendants and only one has settled, and that is an issue which could require some further analysis.

As I said earlier, I think it is unfortunate that S. 995 has become embroiled in a consideration of a number of specific cases where judgments have been entered. This has created such an intense and limited focus that other considerations in this legislation have not been fully addressed. But were the Senator from Michigan to propose

that S. 995 be applicable to cases which are pending, to the extent of having been filed and without settlements, that is an issue where I could readily agree. There might in addition be some intermediate ground to allow judicial discretion to be applied in cases such as those where only 1 of 100 defendants has settled. I would, however, oppose expanding such discretion to any case in which a judgment has been entered.

Mr. LEVIN. Mr. President, I thank my friend from Pennsylvania. He has perceived the heart of the matter. He has put his finger on the real issue that should be the debate in the Senate, and that is whether or not we ought to apply the new rules so far as verdict situations are concerned. I think that is a critical issue. Reasonable people could differ on that issue, and I may differ with my friend from Pennsylvania on that issue. I am not certain that we should allow it, although I think perhaps there could be situations in which a court might want to.

My friend has made a very helpful, clarifying statement on this issue, and I thank him for his kind comments on my statement.

Mr. DODD. Mr. President, I strongly oppose passage of S. 995 with the retroactivity amendment that was added at the 11th hour in the Senate Judiciary Committee.

My first concern is the special interest nature of the retroactivity amendment. It is consciously crafted to benefit a few large companies which lost jury verdicts under prevailing law and want the Congress to change the law under which they were found liable for price-fixing. It will permit them, after the fact, to reduce the amount of the recovery to which those plaintiff businesses, who were the victims of the price-fixing scheme, are entitled.

The special interest nature of this legislation is underscored by several factors—the history behind the retroactivity drive on S. 995; the structure of the retroactivity amendment, which so clearly demonstrates its special interest nature; and proposals which were made in the Senate Judiciary Committee but rejected by the proponents of retroactivity.

First, we should turn to the history. S. 995 had its derivation in a bill introduced in the first session of the 96th Congress, S. 1468. That bill was called the Antitrust Equal Enforcement Act, the same name given to S. 995. That bill is virtually identical to S. 995 as it was reintroduced in the 97th Congress. S. 1468 created two new rights. First, it created a right of contribution, permitting defendants in price-fixing cases to share any recovery against them against other conspirators to the price-fixing scheme. Second, it created a right of claims reduction which effectively limited a defendant's responsibility in a price-fixing case to his market share of the damages. As that legislation was passed through the Senate Judiciary Committee in the 96th Congress, it was explicitly prospective, as indicated by subsection (e) which stated as follows: "This section shall apply only to actions under section 4, 4A, or 4C of this act commenced after the date of enactment of this section." The section-by-section analysis in the committee report to S. 1468 made this equally clear, by stating that "subsection (e) provides that application of this act will be prospective from the date of enactment."

The committee report makes it absolutely clear that retroactivity was never raised as an issue by the committee. Indeed, during this time, the American Bar Association set up a special task force under its section on Antitrust Law to look at the issue of contribution and the effective date of any statute. The American Bar Association's section on Antitrust Law concluded, after a lengthy study, that the modifications were sound but should not be applied retroactively because they undercut the reliance of existing parties on the prevailing law.

When S. 1468 failed to pass the 96th Congress, it was reintroduced as S. 995 in the 97th Congress. Again, the bill was introduced as an explicitly prospective piece of legislation. Subsection (e) of S. 995 stated as follows: "This section shall apply only to actions under section 4, 4A, or 4C of this act, commenced after the date of enactment of this section." S. 995 stayed like that, explicitly prospective, until March 31, 1982, when the chairman of the committee, the distinguished Senator from South Carolina, was able to get a retroactivity amendment passed after five separate markups had been scheduled and canceled, by a sharply divided vote in that committee.

Why the sudden shift in position on retroactivity? Why had retroactivity become an issue now when it had never been an issue before, either with S. 1468 or with S. 995 which was introduced, as I mentioned, in this Congress? The answer, Mr. President, is very revealing in terms of the motive behind retroactivity. What had happened was that five losing defendants in three antitrust trials, the Corrugated Container trial, the Plywood trial, and the Textile Machinery trial, lost jury verdicts and got together to ask Congress to change the principles of law under which they were found liable so that they could reduce the costs they now face as a consequence of the jury verdicts. The major business organizations had been either neutral or hostile to retroactivity until they were told that there would be no contribution bill at all unless they supported the retroactive features. It was only in 1982 that any of the business groups switched positions under this threat and supported retroactivity.

Therefore, the history behind the move for retroactivity reveals the special interest nature of this legislation.

Weighed against the special interest benefit to these five companies who have already lost jury verdicts and now want the results reversed is the incalcuable millions of dollars in damage that will be done to the innocent businesses who were the victims of the price-fixing schemes by these defendants to begin with. They stand to lose substantial parts of the jury verdicts that they won after many years of litigation, verdicts which are designed to compensate them for the losses they sustained due to the price-fixing.

An additional cost is the cost to the judicial system which will be burdened with hundreds of additional actions brought by defendants who wish to have claim reduction applied to them. In any pending case which a plaintiff has accepted a settlement, defendants will seek to have claim reduction apply as to those settlements. The amount of additional litigation that will be spawned in the scores of such cases in which these attempts will be made is mind-boggling. In addition, settlements will be threatened. A noted constitutional expert, Charles Alan Wright, professor of law at the University of Texas, has indicated that if a right of claim reduction were passed retroactively so that plaintiffs could no longer collect from losing defendants their full treble damages, as they can under the current law, "plaintiffs would surely be before the court arguing that settlements must be reopened. This is an argument that the courts, which act as a fiduciary for absent members of the class in approving settlements, could not lightly reject."

There is a second factor beyond the history of retroactivity which bears on the motive behind retroactivity. That second factor is the structure of the bill as amended. It is noteworthy that of the two changes made by S. 995, the provision creating a right of contribution among defendants remains prospective, as it had been in the original legislation. Thus, in terms of providing defendants with the right of sharing their damages among other coconspirators, this can only be done for cases filed after the effective date of enactment, rather than for those now pending.

The second of the two changes made by the bill, the creation of a right of claim reduction, is the only part that is made retroactive to pending cases. Of course, that is the very change that permits these few defendants, after their jury verdicts, to reduce damages they would otherwise have to pay.

It is certainly no accident that the only part of the bill that is made retroactive, contrary to the way in which S. 995 and its predecessor were introduced, is that part which harms the innocent businesses who were the victims in price-fixing cases and benefits the parties who have been found liable for price-fixing.

It all demonstrates how the bill benefits a very few defendants.

A third factor which reveals the special interest nature of the retroactivity provision is the defeat of the effort which was made in the Senate Judiciary Committee by Senator DOLE and Senator BAUCUS to offer an alternative to the retroactivity provision which ultimately passed. Senator DOLE took up the only argument which can conceivably be made to conceal the special interest nature of the retroactivity push, namely, that if the changes made by S. 995 are reasonable for cases filed after the date of enactment, these changes should also be applicable to pending cases and existing defendants. The Dole-Baucus proposal tested this thesis by suggesting that S. 995 be applied in full to all pending cases except those pending cases in which the parties had relied on existing law as indicated by settlements, jury verdicts, and judgments already entered. To all other cases where there had been no such reliance and where the expectations of the parties and their actions had not been detrimentally affected by their reliance on existing law, the changes made by S. 995 would apply.

This was rejected; this suggestion, I might add, was rejected, soundly. This reasonable compromise failed because it did not give the losing defendants the opportunity to bail themselves out of their jury verdicts.

The real problem behind retroactivity is that it undercuts the reliance parties placed on existing principles of law. This proposed compromise would have lessened this impact, dealing only with cases where there had been no settlements, jury verdicts, or judgments.

Mr. President, I am very concerned that a bill which had broad support and which would have passed the Senate quite easily, if applied as originally intended only to future cases, has now been bogged down with this pernicious retroactivity amendment. I urge the proponents of retroactivity to drop their effort at retroactivity so that the Senate can get about the business of passing S. 995 as originally introduced, thereby removing the unfairness which would otherwise be created to the businesses which, in fact, have been the victims of price fixing.

Mr. BAUCUS. Mr. President, I see the Senator from Tennessee (Mr. SASSER) in the Chamber. I believe he has a statement to make on this bill before us.

I yield the floor so the Senator from Tennessee may address himself to the issue.

Mr. SASSER. I thank the distinguished Senator from Montana for yielding to me.

Mr. President, I rise to express my strong opposition to the retroactivity provision of S. 995.

When it was first introduced, S. 995 applied only to antitrust cases commenced after the date of its enactment. This explicit provision was in the antitrust contribution legislation, S. 1468, which was reported by the Senate Judiciary Committee in the 96th Congress. Unfortunately, in this Congress, the Senate Judiciary Committee, by a narrow margin, amended S. 995 to provide that the claim reduction portion of the bill would apply to pending cases upon a judge's finding that it would be "inequitable" not to do so.

The arguments against this provision regarding retroactive application of S. 995 are compelling.

As a matter of constitutional principle and congressional policy, retroactive legislation has been consistently disfavored.

Attorney Philip A. Lacovara addressed the constitutional and historical objections to retroactive laws at great length during the Judiciary Committee's consideration of S. 300 in the 96th Congress, he stated:

> Chief Justice John Marshall made this policy manifest in our judicial system. As early as 1801 in *United States* v. *Schooner Peggy*, 5 U.S. (1 Cranch) 103, 110, (1801), he warned courts adjudicating rights between private individuals to "struggle hard against a construction (of a statute) which will, by a retrospective operation, affect the rights of parties . . ." As the Court later put it, the rule of prospectivity is "one of obvious justice" because it "prevents the assigning of a quality or effect to acts or conduct which they did not have or did not contemplate when they were performed," *Union Pacific R.R.* v. *Laramie Stock Yards Co.*, 231 U.S. 190, 199 (1913).
>
> This aversion toward legislation that applies retrospectively is well founded, for a person should be able to assess his conduct with reasonable knowledge of its legal consequences. He should also be able to expect stability in the rights or liabilities that attach to his conduct or to the acts of others. In a lawful society each of us plans his future with the expectation that the legal status of arrangements entered into today will not be upset tomorrow by a change in the law that applies to past conduct. Indeed, it is no understatement to say that the ability to plan for the future depends upon respect for stability of past legislative arrangements. . . .
>
> In fact, the Supreme Court recently noted that "(t)he earliest instances of nonretroactivity in the decisions of this Court—more than a century ago—came in cases of nonconstitutional, noncriminal state law . . And, in the last few decades, we have recognized the doctrine of nonretroactivity outside the criminal area many times, in both constitutional and nonconstitutional cases." *Chevron Oil Co.* v. *Huson*, 404 U.S. 97, 106 (1971) (citations omitted) . . . .
>
> The direct restraint upon the Federal Government's power to enact retroactive civil legislation lies in the due process clause of the fifth amendment. Legislation that, considering its retroactivity, is arbitrary or unreasonable or harsh and oppressive, constitutes a denial of due process. *Railroad Retirement Board* v. *Alton Railroad*, 295, U.S. 330 (1935); see also *United States Trust Co.* v. *New Jersey*. 431 U.S. 1 (1977); *Usery* v. *Turner Elkhorn Mining Co.*, 428 U.S. 1 (1976). Antitrust Enforcement Act of 1979, S. 300; Hearings Before the Senate Committee on Judiciary, 96th Congress, 1st Session 214-15 (1979).

The reasons for the policy against retroactive legislation are clear. Prof. Ernest Gellhorn of the University of Virginia Law School wrote to the Senate Judiciary Committee:

> Adherence to the usual rule of law that statutes should be applied only to future situations serves the interests of reform and reliance, economic efficiency, and fairness and equity.

Conversely, retroactive legislation upsets the legitimate expectations of those who have relied in good faith upon existing law. It changes the rules in the middle of the game, or even after the game has ended.

These considerations are particularly relevant to S. 995. Antitrust plaintiffs and defendants have predicated their actions on the current law which bars contribution and claim reduction. Decisions about whether to settle or contest, how much to settle for, and whether to cooperate with opposing parties were all made based on existing law. Similarly, judges have approved or disapproved settlements and juries reached verdicts based on existing law. As senior U.S. district judge, Hubert Will, wrote to the Senate Judiciary Committee:

> It is basically unfair for litigants to try to use Congress to upset results fairly reached in lawsuits tried under the existing rules when these rules were known to all the parties before they made their litigation or settlement decisions.

Under the retroactivity provision in the committee bill, plaintiffs who had settled would find that their settlements produced totally unexpected consequences. Under current law, they would expect that any moneys they received in settlement would be deducted from the damages they would receive from the remaining defendants, if they are successful at trial. The committee bill would change this by requiring that plaintiffs' damages be cut by the market share of the settling defendants, if claim reduction is applied.

This would mean that settlements entered into years earlier would reduce the value of judgments won years earlier by amounts far greater than the amounts plaintiffs received in settlement. In other words, retroactive application could save adjudged price fixers millions of dollars at the

expense of the very businessmen they cheated in the first place.

It is no wonder that this result would produce grave due process questions under the constitution as has been pointed out by noted constitutional scholar Charles Alan Wright of the University of Texas. According to Professors Gellhorn and Wright, these problems result from denying plaintiffs the complete recovery to which they were entitled under law at the time they entered into settlements.

As it is generally, retroactivity is the exception for antitrust law. When Congress in 1976 added the parens partriae provision to the law, it specifically barred application to injuries "sustained prior to the date of enactment." Similarly, when Congress gave the United States authority to sue for single antitrust damages under section 4A of the Clayton Act, it did so prospectively.

In those bills in which retroactive application was permitted, it was done so intentionally, in order to reverse "Surprise" court or FTC decisions which applied the antitrust laws in ways Congress never intended and the parties never expected. This was the rationale behind the retroactive effect of the Newspaper Preservation Act and the Soft Drink Interbrand Competition Act.

Mr. President, the bill before us involves no surprise court decision, and the law of contribution is well known and settled.

Retroactivity would create injustice in this instance rather than prevent it, and recognizing this, the American Bar Association section on antitrust law specifically rejected its application to pending cases because of, and to quote the ABA,

a great concern, first that such a rule would upset settlement calculations already in progress, and second that parties could be prejudiced who had already participated in the conduct of joint defense efforts on an assumption of no contribution.

While authorities may disagree about whether retroactive application would ultimately be upheld by the courts, there is no question that the serious constitutional issues raised by retroactivity would take years to resolve and could be answered differently in different cases, in addition, the vague and indefinite standard proposed by the committee to determine whether to apply claim reduction retroactivity—whether it would be "inequitable" not to do so—will lead to years of litigation in each case. Retroactive claim reduction will also encourage plaintiffs—newly barred from obtaining full recoveries from nonsettling defendants—to move to overturn settlements premised upon the current law which permits full recovery. While businesses, their attorney, and the courts struggle to resolve these questions, plaintiffs will be denied funds to which they are entitled, defendants will be denied a definitive determination of their liability, and settling parties will have no certainty as to the validity of their settlements. And, of course, defendants already found liable for price fixing will be able to avoid paying any judgment, retaining funds and earning interest, as plaintiffs are forced to litigate whether they will be able to keep damages they have already won.

Because the retroactivity provision of the committee bill is such a clear special interest effort, newsapapers around the Nation have been virtually unanimous in their condemnation.

I would like to commend to my colleagues for their perusal editorials which appeared in the Chattanooga Times, a distinguished morning newspaper in my State, and also the Memphis Press-Scimitar, an equally distinguished afternoon newspaper in my State of Tennessee. I ask unanimous consent that these editorials be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Chattanooga Times, Aug. 11, 1982]

AN ANTITRUST "BAILOUT"?

The Senate is expected to consider, perhaps today or Monday, a bill that is generally regarded as one of the most heavily lobbied pieces of legislation ever to emerge from its Judiciary committee. The bill (S. 995) is designed to correct what its supporters call "serious injustices" in federal antitrust laws. Opponents generally agree the laws need changing, but they oppose an amendment that, they contend, would give retroactive relief to defendants already convicted of price-fixing. Their arguments are persuasive.

The issues are complex. The main purpose of S. 995 is to change the 1914 Clayton Act so that defendants found liable for price-fixing can spread the cost of damages among all those involved according to their share of the price-fixing scheme. That process is known as "contribution." Currently, price fixers are each liable for all damages involved in a price-fixing scheme regardless of each defendant's level of participation. In May 1981 the Supreme Court ruled there was no right of "contribution," and held that it was up to Congress to create one if it wished.

The amendment that caused so much controversy—and so much lobbying—was offered by Sen. Strom Thurmond, R-S.C. It would make the claim-reduction provision applicable to pending cases. Among the chief corporate proponents of that retroactivity are the Mead Corp., Georgia-Pacific Corp., Weyerhaeuser Co., Milliken & Co., and Willamette Industries—each of them defendents in multimillion-dollar antitrust cases. They argue the current law is unfair.

But their opponents have the better case. Plaintiffs in those cases and other companies that have already settled argue that claim reduction should not be applied in pending cases. That bypasses the legal system and amounts to changing the rules in the middle of the game. It may also be unconstitutional.

A lawyer representing plaintiffs in the Mead case argued that the claim reduction "compromise" would "severely injure plaintiffs who agreed to out-of-court settlements with the expectation that they could seek damages due to the entire conspiracy from defendants who elected to stand trial." The Senate should not provide such a legal escape hatch.

Rejection of S. 995 as amended could expose companies already found liable of price-fixing to huge judgments if their appeals are unsuccessful. That's unfortunate. But then no one forced them to fix prices.

[From the Memphis Press-Scimitar, Aug. 31, 1982]

BAD BILL BEFORE SENATE

The U.S. Senate should give a unanimous "no" vote to a bill that would grant special relief privileges to five large firms which have been found liable in civil price-fixing federal trials.

The legislation, which is pushed by defendants in the price-fixing litigation, is scheduled for a vote in the Senate about the middle of September. If it should pass, defendant manufacturers in the plywood, corrugated container and textile machinery industries would be saved from paying an estimated $3 billion in court judgments.

What the defendants seek from the Congress is not only a change in the rules to protect them in the future from price-fixing charges but to make those rules retroactive so as to void or reduce the judgments rendered against them.

It would work to the detriment of the hundreds of plaintiff companies who sued and won judgments against the alleged price fixers. The U.S. Constitution's prohibition against ex post facto laws is limited to criminal penalties—and protects defendants against any law that imposes punishment for an act which was not punishable at the time it was committed. Even though these are civil cases, the ex post facto principle is the same, inasmuch as the proposed bill would excuse offenses previously committed.

Among the plaintiffs are 32 Memphis-area firms which could lose $2.3 million in damages if the bill were to pass; they were awarded judgments in trials concerning corrugated containers. Another 33 Memphis building material supply firms are involved in cases concerning plywood manufacturers. Many other Tennessee firms also stand to lose considerable sums in judgments if Congress permits this bill to become law.

Patently, this is bad legislation. Laws against price-fixing were enacted in the interests of fair competition and for the protection of consumers. Those who have been found guilty of violating those laws should not expect to be relieved of their penalties by the very body that sought to protect the public.

Mr. SASSER. Mr. President, I urge passage of the Baucus amendment to S. 995.

Mr. President, I yield to the distinguished Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. Mr. President, amid all the discussion of S. 995 and the provision permitting its application to pending cases, the impression has grown that the subject is extremely complex and best understood by

those who are experts in antitrust and constitutional law. This is not surprising given that the retroactivity fight has enlisted the efforts of at least four former Senators, two former Attorneys General, two former White House aides, and assorted judges, lawyers, and lobbyists. If that group cannot make an issue complex, no one can.

But I think that if we strip away the elaborate legal arguments and simply look at the effect of making the claim reduction provision of S. 995 available to defendents in pending cases, the issue comes quickly into focus and becomes quite clear.

The strongest proponents of retroactive claim reduction are several companies that have been found liable for price fixing. These companies face potentially massive liability, easily in the tens of millions of dollars, to the businesses who purchased price-fixed goods from them—plywood, corrugated paper, or textile machinery in the cases that have become best known to the Senate during this debate. Oh, there have been other companies involved, but the pressure and the hundreds of thousands of dollars in lobbyists' fees have come primarily companies looking in the face of signficant price-fixing verdicts. These companies want to cut the amount of damages they will have to pay after juries have already found them liable and their damages are being computed under prevailing rules of law.

How do they propose to accomplish this? This is where S. 995 comes in.

Under current law, if plaintiffs settle with one member of a price-fixing conspiracy for a certain amount of money, they can recover the remainder of their total damages from the rest of the members of the conspiracy. In this way the settling defendant avoids the expense of trial and the price of a potentially large verdict if he loses, and the plaintiffs can simplify their litigation while still getting the "one full recovery" to which they are entitled, if they can prove their case. In short, plaintiffs settle with some defendants knowing that if they win they can get the rest of their compensation from the rest of the defendants.

Similarly, those defendants who choose not to settle, but go to trial instead, do so in an effort to escape all liability, but with the understanding that if they lose they will have to pay a full measure of damages to the victorious plaintiff businesses who succeed in proving the defendants' unlawful price fixing.

The claim reduction provision of S. 995 would change this long established, well understood principle. It would provide that if plaintiffs settle with some defendants, the amount they may recover from the remaining defendants is reduced not by the actual amount they received in settlement, but by the market share of the settling defendants. Thus, if plaintiffs settle with defendants who represent 25 percent of the market in the affected product or service, they will lose 25 percent of their total potential recovery, even if the actual amount they receive in settlement is considerably less.

It might be argued that this is not an unreasonable principle, if all parties to the litigation know the rule of law at the beginning of the case. It might force plaintiffs to bargain a little harder, knowing that by their settlements they are giving up considerably more than under the previous law. And it might encourage defendants to litigate, for they know the chance that they will be forced to bear a damage judgment far greater than that resulting from their own market share is considerably diminished.

All of these consequences can be evaluated by the parties as they consider whether to settle or litigate, and how much to litigate for.

But what the advocates of retroactivity are seeking is to change the rule of law after the case is over. S. 995 would permit claim reduction to apply retroactively to cases in which some defendants have already settled and other defendants have been found liable by a jury for price fixing. The result in those cases is very different.

The plaintiffs, if S. 995 is passed, will find that settlements they entered into earlier, under the "old rules," have the totally unanticipated consequence of reducing the damages they can receive—damages they have already won—by millions of dollars more than the settlement amounts.

And who gets the benefit of this saving of millions of dollars? The defendants who illegally fixed prices, went to trial knowing the risks and were adjudged liable for their actions.

Note that the plaintiff victims have no chance to adapt their conduct to the law, to change their strategies to take into account changes in the law. For their decisions were made long before the law was changed, and they are locked into settlements and trial strategies all based upon a clear understanding of their right to full recovery.

Reduced to its essentials, therefore, retroactive application of S. 995 would amount to changing the rules after the game has been played in order to benefit adjudged price fixers at the expense of the business which they cheated in the first place. This result is absolutely unconscionable. As former Senator Joseph Tydings, an experienced antitrust litigator, testified to the Judiciary Committee:

> [I]t is difficult, if not impossible, to see how passage of a retroactive amendment in this situation comports with fundamental fairness and due process of law. The [retroactivity] amendments would be special interest legislation of the worst kind. Their proponents are corporate antitrust violators who, after repeatedly rejecting reasonable settlement offers from the plaintiffs (particularly in the light of damages adjudicated by the trial court), forced the plaintiffs into very costly and time-consuming litigation which ended in substantial judgments against them. Now, after having had their day in court, they unscrupulously seek to legislatively overturn those judgments and reduce the amount of plaintiff classes' judgment awards through retroactive application of the claim reduction provision. In other words, having played by the rules of the game and lost, they seek to use their economic power and influence to change the results.

Senator Tydings' point is that not only is retroactive claim reduction unjust, but it is so contrary to "fundamental fairness" that it may well be unconstitutional.

Of course, our constitutional system rejects retroactive laws. The Constitution specifically bars ex post facto laws in the criminal fora and bills of attainder. While not technically such a law, the retroactivity provision of S. 995 would have precisely the same result—to penalize parties, here the plaintiff victims—on the basis of actions they took—entering settlements—when they had no reason to believe that their actions would produce the outcome that resulted under the changed law.

Now, given the transparent injustice of this outcome, its proponents have tried to obscure the issue with a variety of arguments. One is that S. 995 does not mandate claim reduction, but only permits a court to apply it if it would be "inequitable" not to do so. In a sense, this is worse than simple retroactivity. First, its objective is to produce retroactive application, for if the advocates of this prohibition did not want to permit retroactivity, they would not have amended the bill in the first place.

Second, the provision will produce years of litigation over what constitutes "inequity." Of course, the convicted price fixers seeking a bailout, whom this provision is intended to aid, want years of litigation, for as long as they can keep the case in court, they do not have to pay up. They save their money and earn interest, while the plaintiffs' legal fees rise. And if they should succeed in the litigation, whatever they ultimately have to pay will be much less than the judgment they would have faced without claim reduction.

Another argument used to obscure the issue is that the defendants are not seeking to escape liability, but only to have their "day in court." These defendants have had their day in court; they have had hundreds of days in many courts. And the courts have told them they must pay up. Let us not delay that further.

Another claim made is that the legislation is not "retroactive" but only being "applied to pending cases." Retroactive legislation would only apply

to closed cases, they say. This argument is absurd, meaningless, and misleading. Regardless of what you call it, changing the outcome after the fact of decisions properly made in reliance on existing law is wrong and amounts to a retroactive change in the principles of law upon which parties have relied.

One agrument that sounds particularly appealing is that the hundreds of litigants in pending cases ought to have the benefit of S. 995 and that it does not make sense to create an artificial distinction between cases which have been filed and those not yet under way. This argument is likewise without weight as shown by the rejection by proponents of retroactivity of suggestions in the Judiciary Committee to apply the changes in S. 995 to all pending cases except those with settlements, jury verdicts or judgments. Moreover, the retroactivity provision in the committee bill does not achieve this result. The contribution principle, which is the heart of S. 995, is not available at all in pending cases under the committee bill. And since the great majority of pending cases are in their early stages with few or no settlements, the claim reduction provision, which may be available, is irrelevant. Finally, claim reduction is not made available in any simple, explicit fashion. Instead, defendants seeking its protection must go through years of costly and uncertain litigation.

The proponents of retroactivity, finally, claim that Congress normally applies "remedial" legislation to pending cases, and that this is such remedial legislation. In fact, in my experience, we are quite careful when we change the law to avoid disrupting pending cases unless there is a very good reason to do so. This is hardly remedial legislation. It profoundly changes the rights of the parties to pending legislation.

There is no justification for making plaintiffs relitigate damage judgments they have already won. There is no justification for taking up court time and the time of businesses and their attorneys. And most of all, there is no justice in changing the rules in the middle of the game in order to benefit a few adjudged price fixers. I urge my colleagues to reject this unjust, unfair, and probably unconstitutional provision.

Mr. President, I yield to the Senator from Missouri, Senator DANFORTH.

THE PRESIDING OFFICER. The Senator from Missouri is recognized.

Mr. DANFORTH. Mr. President, I wish to address several basic issues concerning S. 995, the Antitrust Equal Enforcement Act.

I support prospective application of this measure, which would establish the right of defendants in civil price-fixing cases to seek contribution from others involved in a price-fixing scheme and to proportionately limit their civil liability to their respective market shares of the damages.

To be sure, there are good arguments on both sides with respect to prospective applications of S. 995. Those who oppose this bill argue that it would make antitrust litigation more complex and difficult than it already is. They contend that it would make it easier for defendants to delay and seize control of cases, and that it would make plaintiffs and defendants less inclined to seek settlements.

I share some of these concerns. On balance, however, I believe that there are sufficient reasons to warrant support for prospective application of S. 995. This measure does not diminish the strong and necessary deterrent effect of plaintiff's right to seek treble damages in a civil price-fixing action. Moreover, S. 995 would provide more certainty that guilty parties actually pay their fair share of damages in price-fixing cases. In addition, it would relieve those named as defendants in such cases—especially those with small market shares—of their exposure to uncertain and open-ended liability that leaves them at the mercy of plaintiff attorneys' "whipsaw" tactics and under extreme pressure to settle instead of litigating their defense.

I cannot, however, support the so-called pending cases provision of S. 995, which would apply claim reduction retroactively.

This provision providing for claim reduction in pending cases is an inappropriate use of our legislative process. It is a bailout provision—special interest legislation that really benefits only a handful of defendants in price-fixing cases who have already been found guilty. It is retroactive legislation that would unfairly upset the expectations of settling plaintiffs and defendants in these cases, who have relied on the existing law.

This provision would apply to pending cases in which defendants have been found guilty but final judgment has not yet been entered. It would have the anomalous effect of allowing price fixers the opportunity to reduce their liability, while placing plaintiffs in a position in which they cannot collect full treble damages. It is fundamentally unfair to change the rules in this way and give nonsettling defendants the chance to reduce their liability, while plaintiffs face the possibility of being unable to collect full damages.

It has been the practice of Congress to enact such retroactive legislation only in extremely limited circumstances and when there was a strong public purpose for doing so—such as to overturn a judicial or administrative decision with respect to statutory interpretation that is clearly at odds with legislative intent. Congress has historically disfavored retroactive legislation because it upsets the expectations of those parties who have relied in good faith upon existing law and because it gives rise to constitutional due process questions.

These considerations apply here. The calculations and expectations of both settling plaintiffs and defendants could be upset unfairly by this retroactive change in the rules. Many settlements in pending cases have been expressly conditioned upon the plaintiffs' ability to recover fully from the nonsettling defendants, and it was on this basis that many of these settlements have been approved by the courts. It would be extremely unfair now to change the rules for those plaintiffs who entered into settlements with the expectation that they would be able to recover fully from nonsettling defendants, and who expected full recovery. Likewise, it would be unfair to settling defendants, who agreed to settlement on the basis of a different understanding of what their own exposure to liability would be, and who could now be required to participate in extensive litigation about their settlements and the amount of claim reduction.

Indeed while this retroactive provision may benefit a few defendants, it can only result in additional delay and complication, more litigation and uncertainty for all the parties in pending cases. Although claim reduction would be applied only when the court finds it would be inequitable not to do so, the legal standard to be utilized in making this determination would be the subject of considerable litigation, along with a number of other legal issues.

Both plaintiffs and defendants certainly would seek to overturn settlements if claim reduction is applied in pending cases. It is true that S. 995 purports to protect existing settlements, but this only exacerbates the unfairness for those who relied on the existing law, and, if noting else, there would be considerable litigation as to whether S. 995 can in fact protect existing settlements. Certainly the possibility that existing settlements might be unraveled and settling plaintiffs and defendants might be subjected to more litigation is grossly unfair and bad public policy, as well.

In sum, then, I oppose the retroactive pending cases provision of S. 995 and I support the efforts of my colleague from Montana (Mr. BAUCUS) to delete this provision from the bill, because it is unfair, special interest legislation that would upset the expectations of the parties in pending cases and create the prospect of prolonged, additional litigation.

Mr. President, I would like to add a few words, as well, about another issue related to S. 995. That is the so-called Illinois Brick amendment which I in-

troduced along with Senators GORTON, RUDMAN, and STAFFORD.

The purpose of this amendment is to improve the effectiveness of antitrust enforcement by Federal, State, and local officials. It is intended to assure that S. 995 provides equitable treatment for victims of price-fixing violations, as well as for defendants charged with price fixing. This amendment would provide fairness to consumers and taxpayers victimized by price fixers, just as prospective application of the underlying bill would provide greater fairness in the allocation of damages among defendants.

Our amendment would create no new right of action for individuals in such cases, but it removes a limitation on Government enforcement of the antitrust laws imposed by the Supreme Court's 1977 decision in *Illinois Brick Co.* v. *Illinois*, 431 U.S. 720. In this case, commonly known as the Illinois Brick decision, the Court held that only direct purchasers—those who deal directly with an antitrust violator—can recover damages for price fixing. On its own behalf, the State of Illinois had sued manufacturers of concrete blocks for price fixing; however, the Court held that, because the State had purchased the blocks from middlemen and not directly from the manufacturers, the State could not recover damages.

This holding precludes the Federal Government, as well as State governments, from recovering damages on their own behalf and on behalf of their taxpayers in price-fixing cases where goods have been purchased through an intermediary, and not directly from the price-fixing manufacturer. Moreover, the Illinois Brick decision brings into question the scope of title III of the Antitrust Improvement Act of 1976, which gives State attorneys general the authority to sue as parens patriae on behalf of citizens of their respective States, who have been injured by antitrust violations, including price fixing. Since many consumers are not direct purchasers, the Supreme Court's Illinois Brick ruling has been interpreted as severely limiting the authority of State attorneys general to seek recovery on behalf of consumers—allowing State parens patriae actions only in those few cases where the injured consumers have purchased the goods or services directly from the price-fixing manufacturer.

Our amendment would do away with this direct purchaser limitation on Government action to recover damages in price-fixing suits. It would allow Government actions to recover damages even when the goods or services have been purchased through an intermediary, and it would also clearly authorize State attorneys general to act as parens patriae and secure monetary relief on behalf of injured consumers who have not purchased goods or services directly from a defendant. Thus, our amendment would permit indirect purchasers their day in court, but, by limiting prosecution to a set group of law enforcement officers, it would dispel any fear that this partial reversal of Illinois Brick would open the floodgates of private litigation.

In addition, our amendment addresses the concern with multiple liability that prompted the Supreme Court's decision to preclude State action in the Illinois Brick case. The amendment would insure that defendants would not suffer such duplicative liability arising out of actions by both direct and indirect purchasers, because they would be allowed to prove as a partial or complete defense to any damage claims that the purchaser passed on the additional costs as higher prices to subsequent indirect purchasers. This would permit apportionment of any damage award to victims according to their actual losses. Moreover, this amendment also contains provisions which would give it only prospective application and which allow attorneys fees for prevailing defendants in cases of bad faith or vexatious prosecution.

I believe that this is a responsible approach to the problems arising out of the Illinois Brick decision. Unquestionably, it is unfair to indirect purchasers that they have no redress for damages attributable to price-fixing violations of the antitrust laws. Furthermore, we believe that it is vitally important to permit such actions—limited to Government-initiated lawsuits—in cases where the direct purchaser has passed on most of the illegal overcharges as increased prices for its customers, because in these situations, the only parties with an interest in seeking legal action are indirect purchasers.

Particularly in these difficult economic times, it is essential that we insure effective State action to fight antitrust violations which substantially increase the costs of goods and services—costs that must be borne by the taxpayers and consumers. If Congress is to consider granting the equitable relief which S. 995 would furnish to those charged with price-fixing violations, fairness dictates that we simultaneously provide some small measure of additional relief for the victims of price fixing.

However, in light of the understanding that has been reached with the Senator from South Carolina and outlined earlier today by Senator GORTON, I am in accord with the decision of the Senator from Washington not to go forward with the amendment at this time and to work toward swift enactment of Illinois Brick legislation as soon as possible in the 98th Congress.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER (Mr. COHEN). The Senator from South Carolina is recognized.

Mr. THURMOND. Mr. President, I rise in opposition to the amendment offered by the distinguished Senator from Montana because it would unravel a delicate and important compromise worked out by the members of the Judiciary Committee after much debate and negotiation. Moreover, this amendment could have the effect of preventing some of the worthwhile provisions of this legislation from being applied in many cases where it might be equitable to do so.

Mr. President, adoption of this amendment would mean that none of the provisions of this bill could be applied to price-fixing cases presently pending in the Federal courts. In contrast, S. 995, as reported by the committee, would permit the courts to apply the claim reduction principle to pending cases if the defendants proved that it would be inequitable not to apply claim reduction.

S. 995 does not mandate the application of claim reduction to pending cases. Rather, it allows the presiding judges, who are most familiar with the facts of each individual case, to assess the fairness of claim reduction to all parties concerned. Recent surveys of approximately two-thirds of the Federal district courts have shown that there are more than 900 defendants involved in antitrust price-fixing cases pending in those courts. In many of these cases, it may be entirely appropriate to apply claim reduction. In other cases, it may not be. In any event, the determination of whether claim reduction should apply to a particular pending case is not one that Congress is capable of making. For this reason, S. 995 appropriately places the responsibility for making the determination in the hands of the judges.

The amendment before us now would do away with this very sensible approach. By adopting the amendment, Congress would be making a judgment about the equities involved in hundreds of cases without the benefit of knowing any of the facts. If we conclude that claim reduction is a meritorious principle, which I sincerely believe it is, it would be ironic to decide, in the same breath, that this principle should not be available to the parties in these hundreds of cases.

I am aware, Mr. President, that some opponents of S. 995 argue that the pending cases provision amounts to retroactive legislation and, for that reason, is unconstitutional. Nothing could be further from the truth.

First of all, the use of the term "retroactive" to describe this provision is incorrect. A retroactive law has the effect of reopening a settled matter to modify the final result. On the other

hand, the application of a provision to a matter which has not been finally resolved cannot be termed a retroactive application within any legitimate interpretation of that term. For this reason, there is no basis for arguing that the pending cases provision of S. 995 is retroactive legislation that is constitutionally suspect.

The Judiciary Committee considered at great length the constitutional implications of applying portions of S. 995 to pending cases. No less a constitutional law scholar than the Honorable Sam Ervin, a distinguished Senator from North Carolina, testified that it is perfectly constitutional for Congress to apply the claims reduction principle of this bill to pending cases. According to Senator Ervin:

> Instead of violating the due process clause, applying S. 995 to pending cases will implement in a magnificent way the due process clause which is designed to promote fairness rather than unfairness. In the final analysis, it is simply the right and moral thing to do.

Opponents of S. 995 also assert that the pending cases provision is somehow a departure from the normal way that congressional statutes are applied. Once again, these arguments do not withstand analysis. As long ago as 1801, in the case of United States against Schooner Peggy, the Supreme Court articulated the principle that courts should apply the law that is in existence at the time a case is decided, even though the law changed while the case was pending. This principle has been followed through a long line of cases. In one of its most recent pronouncements on this very subject, the Supreme Court stated that "a court is to apply the law in effect at the time it renders its decision, unless doing so would result in manifest injustice or there is statutory direction or legislative history to the contrary." Thus, contrary to the arguments of some, applying S. 995 to pending cases would not be inconsistent with traditional practice.

Over the years, Congress has passed numerous statutes, including antitrust statutes, which have been applied to pending cases. For example, the Hart-Scott-Rodino Antitrust Improvements Act, the Newspaper Preservation Act, and the Soft Drink Interbrand Competition Act, all have been applied to cases pending at the time the laws were enacted. The applicability to pending cases has also been sanctioned in such diverse legislative areas as the black lung benefits program and prisoner parole. Thus, Mr. President, it simply is not true that Congress does not or cannot pass legislation and apply it to pending cases. Pending case applicability is the norm, and the compromise that is embodied in S. 995 clearly passes constitutional muster.

We also have heard the argument, Mr. President, that permitting the application of claim reduction to pending cases would upset the reliance that some antitrust plaintiffs placed on their ability to collect industrywide damages from one or a few defendants. A close examination of the facts, however, demonstrates that the plaintiffs had no justification for such reliance and, in fact, did not rely to their detriment at all. For at least the last 5 years, the possibility of contribution and claim reduction being adopted either legislatively or judicially has been apparent. Surely, the astute plaintiffs' counsel recognized that such an event could affect the settlement and recovery process. Moreover, due to the uncertainty of any litigation, plaintiffs have no recognizable right to expect recovery of a certain level of damages from any defendant. Therefore, any settlement agreement that a plaintiff reached with some defendants could not possibly have been grounded on a legitimate expectation of recovering full, industrywide damages from the remaining defendants.

Finally, Mr. President, despite the assertion of some opponents, the pending cases provision is not "special legislation" designed for the benefit of a few companies. As I have explained before, the Judiciary Committee has concluded that we have a crisis in antitrust law enforcement which demands a remedy through the adoption of contribution and claim reduction. Once this remedy is adopted, it makes little sense to continue to rely on an inequitable enforcement system until such time as all pending cases wind their way through the judicial system. The remedy is needed now, and it should be put to work as soon as it is available.

The ability to apply claim reduction to pending cases is not designed for a few defendants. Instead, under S. 995, claim reduction will be available to more than 900 defendants, subject to approval by the courts. Thus, every existing defendant has an equal opportunity to utilize the claim reduction principle, and every existing plaintiff has the opportunity to convince the court that the application of claim reduction to a particular case would be inequitable. The burden of proof, of course, is on the defendant seeking to utilize the claim reduction principle.

In conclusion, Mr. President, of this point, S. 995 recognizes that claim reduction is necessary to restore justice and equity to our system of antitrust law enforcement. Given this fact, it would be senseless to insist that any remedies approved by Congress not be applied in the hundreds of cases presently pending in our courts. Such a result would establish a dual system of justice that would operate for many years to come.

The compromise regarding the applicability of claim reduction presently embodied in S. 995 recognizes the legitimate interests of both plaintiffs and defendants. Because this principle has been utilized time and again by Congress and upheld repeatedly by the courts, there is no constitutional impediment to its adoption.

The pending cases provision of S. 995 does not mandate or deny application of claim reduction to any particular case. Indeed, for Congress to do so would be extremely unwise because, as a legislative body, we do not possess the information or the insight to know where the equities in all cases lie. S. 995 places the decision as to applicability exactly where it should be, in the hands of the judges who are familiar with the facts of their respective cases. Accordingly, I urge my colleagues to accept the important compromise that S. 995 contains and to reject this attempt to make Congress the final arbiter of all cases, regardless of the particular merits involved.

Mr. President, while I have the floor allow me to address several other arguments made by the opponents of S. 995.

As to deterrence, I must respectfully disagree with the arguments of my distinguished colleague who asserts that adoption of S. 995 will decrease the deterrent effect on would-be violators of our antitrust laws. In fact, the evidence demonstrates that the exact opposite is true—that is, that passage of S. 995 will improve deterrence by eliminating the ability of some defendants to buy their way out of antitrust suits at amounts far below the benefits they have reaped from their illegal conduct.

It has been argued, Mr. President, that because potential price-fixers know they could be held liable for treble the damages caused by their own misconduct as well as the damages due to the acts of their coconspirators, they will be slower to engage in price-fixing conspiracies.

Mr. President, there is absolutely no evidence that potential defendants engage in this type of risk calculation. This is confirmed by Mr. Robert Joffe, who testified before the Judiciary Committee on behalf of the trade regulation committee of the Association of the Bar of the City of New York. Mr. Joffe stated that his committee "knows of no empirical evidence that businessmen, including the most sophisticated, factor the possibility of liability for an entire industry's actions falling on one firm's shoulders into any decisionmaking process." It is far more logical that, because of the present law which does not allow contribution, potential wrongdoers face less deterrence since they know they have the opportunity to reap enormous profits from their activities and, if caught, settle for much less than the damages they caused and shift the

remainder of the liability to their coconspirators.

This ability under present law to shift liability to other defendants is a fact of life, Mr. President. A recent example is the settlement announced by Mead Corp. in the Corrugated Container litigation. While some of the larger defendants in that case settled for as little as $1 million per market share point, Mead's settlement amounted to almost $18 million per market share point. As my colleagues well know, Mead was forced to settle for this amount because it faced potential liability of $750 million, most of which came from liability shifted to it by earlier settling defendants.

Professor Sullivan, a noted antitrust expert, agrees with the conclusion that contribution will improve deterrence. According to Professor Sullivan, "contribution assures that a larger number of violators are ultimately subject to liability" and "thus maximizes the deterrence goal of certainty of punishment."

Thus, the evidence makes clear that the certainty of punishment which contribution provides, along with the existing criminal penalties and treble damage provisions of the antitrust laws, provide a better deterrence mechanism than the present situation which permits some wrongdoers to escape liability completely or to settle for amounts far below the profits they have earned from the antitrust violations.

Mr. President, let us turn to the issue of the effect on existing settlements. The opponents of S. 995 claim that the claim-reduction provision of the bill will undermine antitrust enforcement by discouraging settlements. It is argued that claim reduction does not preserve plaintiffs' right to litigate against all nonsettling defendants for the entire amount of plaintiffs' damages, on the basis of joint and several liability.

Mr. President, while that argument is correct, it is precisely the reason why claim reduction is needed to bring a much-needed element of fairness to antitrust damage litigation. Under the present state of the law, antitrust plaintiffs can, and often do, settle early with many defendants for much less than their share of damages inflicted on the plaintiff. Frankly, there is no reason not to settle early and cheaply. Under present law, if a defendant who would be liable for $100 million to the plaintiff settles with the plaintiff for $10 million, the other $90 million is shifted to the backs of the remaining nonsettling defendents. Cheap settlements are thus a no-lose proposition: What you do not collect from one defendant, you can collect from other defendants, even though they were not responsible for those particular damages. It does not matter that you settle most of your claims for a fraction of their real value, you can always collect from someone else.

Mr. President, the potential abuses of the present settlement system were clearly demonstrated in testimony received by the committee. On April 22, 1981, Mr. George Kress, chairman of the board of Green Bay Packaging; and Mr. Richard Johnson, chief executive officer of the Menasha Corp., vividly described the experience of the companies in the massive Corrugated Container litigation.

As defendants in the civil damages case, both Mr. Kress and Mr. Johnson found themselves facing a situation in which over 80 percent of the defendants settled early at a cost of approximately $250 million. While this is a large amount of money, both Green Bay and Menasha were nevertheless faced with liability they calculated to be over $1 billion, the vast majority of which was attributable to other defendants who had settled earlier. Both firms reluctantly concluded they had no choice but to settle, regardless of their belief they would be vindicated at the trial.

This is precisely the type of situation S. 995 is designed to address. Among named defendants in an antitrust damages case, the claim reduction provision of S. 995 would assure that, unlike the predicaments of Green Bay and Menasha, nonsettling defendants do not face liability for damages caused by settling defendants' damages left behind because of low settlement amounts.

As to inhibiting settlements, it is undoubtedly true that relatively low settlements may be discouraged, since they would reduce significantly the total liability of all defendants to the plaintiffs. We must ask ourselves, however, whether such low, "sweetheart" settlements would occur in a truly meritorious case.

Assistant Attorney General William Baxter, head of the Antitrust Division at the Justice Department, addressed this issue in testimony before the committee. While Mr. Baxter found that, all in all, claim reduction would be likely to inhibit settlements, he noted:

> A dampening effect on settlement is not entirely without its blessings; to the extent that diminished prospects for a quick settlement discourage the filing of totally nonmeritorious cases, so much the better.
>
> In fact, I suspect that damage cases with merit would continue to be brought under a claim reduction rule, notwithstanding the sorts of problems that we have been discussing.

In drafting S. 995, it was never our intention to impair in any way either the bringing of meritorious antitrust damage lawsuits or create roadblocks for the reasonable and speedy settlement of suits. Rather, claim reduction should guard against the coercion of defendants into unwarranted settlements. As a matter of policy, we must balance the desirability of terminating antitrust cases as rapidly as possible with the right of defendants to utilize the courts to assert their innocence. Antitrust defendants should not be denied the opportunity to present their case because of liability for damages caused by other defendants who have settled.

Mr. President, I suggest that S. 995 restores proper balance to the settlement process in antitrust cases and will have no significant deterrant effect.

As to the impact of S. 995 on small businesses and on antitrust trial complexity, I must respectfully disagree with the statements of my colleagues. I do not believe that it can seriously be maintained that passage of S. 995 will greatly complicate antitrust litigation or will work to the disadvantage of small businesses.

First, we have already seen that the present system creates intolerable burdens on small businesses. We have heard from such companies as Green Bay Packaging, Inc., which, having become involved in the Corrugated Container litigation, was forced to abandon its efforts to prove its innocence through trial and enter into a settlement agreement due, in large part, to the effect which the pending litigation was having on its efforts to obtain necessary financing. In the words of the company's chairman, "loss of borrowing power is the killing factor for a small, privately owned corporation in a capital intensive industry." Another company involved in the same litigation, U.S. Corrugated Fibre Box Co., was compelled to sell one of its plants, with the resulting loss of jobs, in order to pay a settlement of more than $3 million. Neither of these small companies had any alternative except to settle, since, due to the lack of contribution, they faced potential liability in the hundreds of millions of dollars, far more than damages their own alleged wrongdoing could have caused.

We have also heard the argument that S. 995 will harm small business plaintiffs by increasing the complexity of antitrust litigation, thus making small potential plaintiffs more reluctant to seek recovery for their damages.

Mr. President, adoption of S. 995 will not increase the complexity of the litigation or take control of the case away from the plaintiffs. The bill specifically recognizes the continued viability of the concept of joint and several liability. Thus, plaintiffs still will be able to sue only one or a few defendants for their entire damages. Although the defendants may seek to bring their coconspirators into the case, the Federal district judges, through judicious application of rule 42(b) of the Federal Rules of Civil Procedure, may defer the contribution issue to a separate

trial. Thus, plaintiffs will be able to collect their damages from a few defendants and leave the determination of the amount of contribution among the codefendants to a separate trial involving only the codefendants themselves.

Simply stated, Mr. President, the existing system is placing an intolerable burden on small business defendants who are being forced to settle in order to save their businesses from bankruptcy. S. 995 will put a stop to this situation by insuring that no business will face liability for more than three times the amount of damages actually attributable to its own misconduct. And, by maintaining the principle of joint and several liability, and the ability of the courts to order separate trials on contribution issues, S. 995 avoids placing any undue burdens or complications on plaintiffs who sue to enforce their rights under the antitrust laws. On balance, Mr. President, S. 995 is a net benefit to the thousands of small businesses in our society.

Finally, Mr. President, let me spend a few moments to answer the argument that the claim reduction formula is too complicated to work.

Mr. President, I disagree with those of my distinguished colleagues who suggest that the claim reduction formula specified in subsection (b) of S. 995 will be difficult to apply or will lead to additional litigation.

S. 995 provides for claim reduction by the greatest of first, any amount stipulated in a settlement agreement; second, any consideration paid for the settlement agreement; or third, treble the actual damages attributable to the settling persons' sales or purchases of goods or services. Obviously, the first two amounts are simple to ascertain. They can be determined by reference to any settlement agreement that a plaintiff enters into. The third amount, while not specified in any document, is nonetheless quite simple to ascertain. All that is required is to determine a plaintiff's total damages, which a court would have to do anyway, and the percentage of purchases or sales that the plaintiff transacted with a particular defendant during the price-fixing conspiracy. These are concepts with which the Federal courts are very familiar and should have no difficulty ascertaining.

As an alternative to the formula specified in S. 995, some have suggested that we measure claim reduction by some degree of culpability. Under this theory, claim reduction would be less when a plaintiff settled with a less culpable defendant than when he settled with a more guilty one.

Clearly, Mr. President, this approach would be improper and impossible to administer. First, the Supreme Court has held that, regardless of whether a defendant participates in a price-fixing conspiracy actively or passively, the damages to the plaintiff are the same. Moreover, any attempt to weigh relative culpability among defendants would lead the courts into such murky water as scienter, instigation of, and promotion of the conspiracy, and would require judgments which would certainly spawn more litigation and appeals. The far better approach is the one contained in S. 995. The formula is simple, it treats each defendant equally and it follows the holding of the Supreme Court recognizing the equality of active and passive participation in a price-fixing conspiracy.

For these reasons, Mr. President, I urge my colleagues to resist any efforts to change the simple and straightforward claim reduction formula set forth in S. 995.

Mr. President, I would like to take a few minutes to explain in more detail how the committee envisioned its pending case amendment would operate.

During the committee's debate on whether to apply S. 995 to pending cases, two major points became obvious. The first point is that there are numerous pending cases in which S. 995 could be applied. The second fact is that it is impossible to assure a just result in each of these cases by arbitrarily applying or denying S. 995 across the board.

Even though the committee did receive substantial information about several very large pending cases, much more information would be needed to make an informed judgment about even one case, let alone the hundreds of pending cases. Therefore, it was the judgment of the committee to place the decision of whether to apply S. 995 to a pending case in the hands of the trial judge in charge of the case.

Sections (f)(1) and (f)(2) of S. 995 as reported by the committee are the heart of the pending case amendment. As I envision the operation of these sections, they allow a nonsettling defendant to press for claim reduction at the earliest possible point in the litigation process.

For instance, if at the time S. 995 becomes law a particular case has just been filed and no discovery complete or settlements made, the defendants may want to move immediately for a ruling by the court that claim reduction will apply in the case. Such an early ruling would certainly help both plaintiffs and defendants in deciding whether to settle or go to trial, since the degree of exposure faced by various defendants would then be known.

In cases far more advanced, such as those which have already gone to trial, the procedure for the court to follow would be the same even though the factors to consider may be greatly different, given the advanced stage of the litigation.

No matter what the stage of the litigation, it will be up to the nonsettling defendant to convince the court of the fairness in granting claim reduction to that defendant. The plaintiff will, of course, be doing its best to establish the unfairness of granting claim reduction. No one is better equipped to sort out competing claims of fairness and unfairness than the trial judge, who has been in charge of the case since the day it was filed.

In discussing the operation of sections (f)(1) and (f)(2), it is important to note that the committee mandated that settlements already reached in pending cases may not be overturned or disturbed in any way. A settling defendant may not be forced back into further litigation over the adequacy of its settlement or any other related issue, and is fully protected from further liability.

Finally, it is important to note that section (f)(1) requires the court to make special findings of fact when ruling on whether to apply claim reduction in any particular pending case. The committee recognized the great importance of due diligence by the court in making a claim reduction decision under this bill. We therefore required that all the facts and conclusions underlying a decision be set forth in great detail. If a claim reduction ruling is appealed to a higher court, the record must be absolutely clear as to why claim reduction was or was not granted.

Mr. President, I hope this serves to further explain the operation of the committee's amendment to S. 995 regarding pending cases.

Mr. President, the claim reduction portion of the bill is very short and I think that it would be helpful if I would take that up just for a moment. So many of the Senators who have expressed themselves today favor S. 995, they say, in future cases.

Now all we do in applying it to present cases is this, and it is a very short paragraph on page 5 and I would like to take that up because I think it is important.

> The claim reduction principle of subsection (b) of this section shall also apply to actions alleging an agreement to fix, maintain, or stabilize prices under section 4, 4A, or 4C of this Act which are pending on the date of enactment of this section, if upon proof by any party subject to liability for damages in such an action, the court determines

I want to emphasize that—

> the court determines that it would be inequitable, in light of all the circumstances and notwithstanding subsection (f)(2), not to apply the principle in that action.

In other words, Mr. President, the court would only apply claim reduction if it determined that it would be inequitable not to apply it. And who is in a better position to determine that than the trial judge who heard the

case? We in the Congress cannot determine that.

There has been a good deal said here about retroactivity. There is nothing retroactive here. The rules have not been changed. The bill applies to future cases and it provides that in any cases that have not been finally completed, the judge in his discretion can apply claim reduction to those cases if it would be inequitable not to apply it. That is the only way the judge could apply it. In other words, if it promotes justice to apply claim reduction to a case that has not been completed then the judge could do so. And if he did not, in his judgment, see fit to apply it, he would not have to do so. This is left entirely to the judge. And, as I say, who is in a better position to make that determination than the trial judge?

That is all we do. There is no retroactive part of this bill. It is not retroactive, I repeat. It only allows a judge, in cases that have not been completed, to use his good judgment to determine where honesty lies and, after having heard the evidence and heard the case, to determine if it would be inequitable not to apply claim reduction. If he finds that it would be inequitable not to apply it, he can apply it; otherwise, he would not. It is just that simple.

Now, a lot of talk has been going on here about this matter, but what has been said has misunderstood or misconstrued the facts. So I just wanted to make it clear that this is not retroactive. It does not reopen any cases. It does not disturb any settlements that have been reached. We specifically provide in the next paragraph that any settlements are completed and will not be disturbed in any way.

In fact, the next paragraph reads:

> No agreement to settle, compromise, or release a claim under section 4, 4A, or 4C of this act which has been signed by the parties prior to the date of enactment of this section may be rescinded, disapproved, reformed, or modified by the parties or by the court because of the application of the claim reduction principle, except upon the written consent of all the parties thereto.

In other words, settlements cannot be disturbed.

I repeat, this bill is not retroactive. It only applies to cases that have not been completed, and then only when the trial judge feels it would be inequitable not to apply this principle.

Mr. President, the Committee on the Judiciary considered this matter carefully. A lot of work has been done on it to try to see what is just and fair. It is not a bailout for any one company. It is not a bailout for any several companies. There are 900 cases, I believe, which are pending. If it is fair to pass this bill for the future, why is it not fair to apply it to present cases if the judge says that it would be inequitable if he did not do so? That is all this bill does.

We have worked on this wording for a long time, trying to arrive at something that would be just, honest, and fair to all of these people. We feel we have come up with a principle embodied in the committee amendment which we think is fair and just. We hope the Senate will see fit to adopt this amendment.

Mr. METZENBAUM. Mr. President, I send an amendment to the desk to the Judiciary Committee amendment.

The PRESIDING OFFICER. The amendment will be received and printed.

Mr. METZENBAUM. Mr. President, I yield to the junior Senator from Massachusetts.

Mr. TSONGAS. Mr. President, I urge my colleagues to oppose the retroactive provision of S. 995. This provison would bail out a handful of companies that the courts have found guilty of major price-fixing violations. It is special interest legislation of the rankest sort.

S. 995 would change the antitrust laws in two ways. First, it would create a right of contribution to permit defendants found guilty of price fixing to spread the cost of damages among other parties in proportion to their part in the conspiracy. Under current law a price fixer is liable for all damages arising from a price-fixing conspiracy regardless of his level of participation. In 1981, the Supreme Court ruled that there was no right of contribution in existing antitrust laws and that it was up to Congress to create such a right if it wished.

Second, S. 995 would create a statutory right of claim reduction, which would require a judge to subtract from the total damages awarded a plaintiff where he has settled part of his claim with another defendant.

The bill was originally conceived as a remedy for inadequacies in the method of apportioning damages among antitrust defendants.

As originally introduced, the bill applies only to newly filed cases. But during Senate Judiciary Committee consideration of S. 995, the legislation was amended to apply to pending cases. The pressure for this retroactive effect has been coming from a few companies that have violated the antitrust laws. They are now seeking to reduce substantially the verdicts and judgments against them by retroactive application of the new rules S. 995 would establish.

For example, three big plywood manufacturers—Georgia-Pacific, Weyerhauser, and Willamette Industries—seek a 25-percent reduction in damages, which could exceed $1.8 billion. Milliken & Co., held liable for $21 million in a texitle machinery leasing conspiracy, wants a $13 million reduction. The Mead Corp., facing a potential liability of $1 billion for bilking purchasers of shipping boxes, just settled its case for $45 million.

If these companies win in Congress, they will have steamrolled their way to outrageous special interest legislation that can only hurt consumers. Why should the Senate of the United States bail out a few companies that have conspired to fix prices to the detriment of the public? The answer is obvious. It should not.

A basic principle is at stake. It is unfair and inequitable to alter exisitng antitrust laws and apply them retroactively, particularly after the parties and courts have relied upon existing laws. Enactment of S. 995 in its present form will upset existing settlements and impose heavy litigation costs on plaintiffs who have prevailed on the merits under existing law.

The bill is also unsound public policy. It is, in effect, ex post facto legislation contrary to the constitutional bias against retroactive applications of new laws.

The effect of this retroactive provision would be to change the rules in the middle of the game—or even after the game has ended.

It allows parties who lost in court to trun for further relief to a legislative judge—the U.S. Senate. I urge my colleagues to strike the retroactivity provision from this bill.

I would also say, Mr. President, that it should come as no surprise to any of the parties in this issue that there would be Members of the Senate who would stand up and do what they could to make sure that this particular travesty would not occur. I commend the Senator from Montana and the Senator from Ohio for taking the leadership on this issue.

I realize that we are coming upon the Christmas season, today being December 1, but I would hope that Santa Claus, in the body of 100 Members of the Senate, would not see fit to be that expansive in his generosity. If indeed something like this goes through, I have a lot of companies back home that would like an equivalent contribution to their Christmas fund and perhaps we could discuss it, if indeed the bill as presently written were to be enacted.

Mr. BAUCUS. Mr. President, I want to thank the junior Senator from Massachusetts for his forthright remarks on this bill. I appreciate his aid in our behalf.

● Mr. INOUYE. Mr. President, I state my deep objections to the effort to apply S. 995 retroactively to pending cases.

When the predecessor bill to S. 995 was introduced in the 96th Congress, S. 1468, it was introduced and favorably reported by the Senate Judiciary Committee to apply only prospectively. It affected only actions "com-

menced after the date of enactment of this section."

S. 1468 did not come before the full Senate for passage and was reintroduced as S. 995 in the 97th Congress. Again, as with S. 1468, it was made expressly applicable only to actions "commenced after the date of enactment of this section."

The issue of retroactivity has arisen only as a result of the extensive lobbying efforts by a few defendants who have lost jury verdicts in three antitrust cases: the Corrugated Container case; the Plywood case; and the Textile Machinery case involving Burlington Industries against the Milliken Corp.

If we were to adopt this retroactivity provision, Congress would be acting to benefit the few corporations which have been found liable by juries for the most grievous violation of the antitrust laws, namely, price fixing—at the expense of plaintiff businesses which suffered the burden of the price-fixing conspiracy in which these defendants engaged.

Put simply, it would be unfair for the Congress to pass this retroactivity amendment. It would be unfair to those parties, in particular the innocent plaintiff businesses, who have relied on the prevailing law in first, deciding whether or not to settle and how much to settle for; second, determining whether or not to go to trial; and third, obtaining jury verdicts for which they now expect to recover some part of the damages they sustained as a result of the price-fixing conspiracy.

It is simply not right to permit those already found liable of price fixing by juries to force the innocent plaintiff businesses to go back into court to defend jury verdicts which they have already won.

The objections which Congress has generally had to retroactive legislation are as old as our Nation itself. In the Federalist Papers James Madison stated that objection to retroactive legislation was among the most important principles which should be embodied by our new nation. He stated that retroactive legislation is—

> Contary to the first principles of the social compact and to every principle of social legislation * * *. The sober people of America are weary of the fluctuating policy which has directed the public councils. They have seen with regret and indignation that sudden changes in legislative interferences in cases affecting personal rights, become jobs in the hands of enterprising and influential spectators and snares to the more industrious and less informed part of the community. (The Federalist No. 44).

The Supreme Court likewise early in our Nation's history voiced its disinclination toward retroactivity as early as 1801 in *United States* v. *Schooner Peggy,* 5 U.S. (1 Cranch) 103. In *Union Pacific Railroad* v. *Laramie Stockyards Company,* 231 U.S. 190, 199 (1913), the Supreme Court spoke affirmatively of the importance of prospectivity as being a rule of "obvious justice" because it "prevents the assigning of a quality or effect to acts or conduct which they did not have or did not contemplate when they were performed."

In drafting the Constitution, the Founding Fathers incorporated the aversion to retroactive legislation in a number of clauses. For example, article 1, section 9, clause 3, prohibits the Congress from passing any "ex post facto law." The Contract Clause, article 1, section 10, clause 1, forbids States from passing a "law impairing the obligation of contracts." The U.S. Government is prevented from enacting retroactive civil legislation which violates due process by the fifth amendment.

Congress has long been reluctant to apply changes in the antitrust laws retroactively so as to affect pending cases because the parties to those pending cases have guided their actions in accordance with the prevailing law at the time. That is certainly true with respect to the law in the area with which S. 995 deals. The law has long been that a plaintiff business is entitled to a recovery against any defendant for price fixing for the full damage caused by the conspiracy of which that defendant was a part, trebled, less only the dollar amount of any settlement by the settling defendants. In addition, the current law does not permit a defendant named in a price-fixing suit to bring in new defendants not named by the plaintiff for any damages that he may have to pay to the plaintiff.

In most bills amending the antitrust laws, Congress makes it explicitly applicable only to future cases so as not to disturb the rights of parties to pending cases.

The only times in which Congress amends the antitrust laws and makes them retroactive are in the very limited and unusual situations, such as the soft drink bottlers bill and the Newspaper Preservation Act, when Congress is acting to correct and cure a misinterpretation of congressional intent by the court or the Federal Trade Commission. When Congress is surprised by an erroneous interpretation by the court or the FTC, it wants to make sure that no parties, even in pending cases, suffer under the misinterpretation.

However, no one on any side of the argument regarding the contribution bill argues that the purpose of S. 995 is to correct a misinterpretation of congressional intent. Indeed, there is no congressional statute dealing with the issues involving S. 995 which could have been misinterpreted. Quite the contrary. What the few companies who want retroactive application are saying is that the law simply should be changed. This is no attempt to cure a misinterpretation of congressional intent.

Prof. Charles Alan Wright, one of the Nation's most distinguished constitutional experts and a professor of law at the University of Texas, has stated that if S. 995 is enacted retroactively "the public interest that the bill is generally thought to serve would be weakened to the point of nonexistence."

I agree with this assessment. It is for this reason that I am so opposed to retroactive application, for it takes what would otherwise be a sound statute and converts it to a potential windfall for those who have been adjudged by juries to be guilty of price-fixing. It is a perversion of the antitrust laws that those whom the antitrust laws are designed to punish, in order to compensate the businesses whom the price fixers have damaged by their price-fixing scheme, would under the retroactivity amendment be the potential beneficiaries of congressional action. Retroactivity thus amounts to a substantial weakening of laws which I believe are very important to assure that the marketplace is kept free and open for genuine competition.

For the Senate of the United States to permit a "second bite at the apple" to those found guilty of price fixing, would put a cloud over a recovery by an innocent plaintiff business after a jury trial and would turn the whole antitrust law on its head. Professor Wright cites an example to show how unfair retroactive application is with regard to S. 995. Permit me to briefly cite his example:

> Suppose that a class of plaintiffs, P, has suffered $30 million in damages from an arguably illegal price-fixing conspiracy between SD (settling defendant) and NS (nonsettling defendant). SD has two-thirds of the market and NS has one-third. Neither defendant believes it has violated the law. SD, however, settles with P for $25 million preferring to pay that amount rather than being subjected to possible liability for all of P's damages trebled on $90 million. NS chooses to take its chances with a jury, and is found to be liable.
>
> Under existing law, the judgment against NS would be for $90 million less the $25 million he has received in settlement, or $65 million. The result would be strikingly different if, at this point in the litigation, a claim reduction bill should be adopted and should be made applicable to pending suits. It would limit the judgment against NS to $30 million (this is because the $90 million recovery would be reduced not by the $25 million amount SD paid in settlement but by SD's two-thirds marketshare, meaning it would be reduced by $60 million).
>
> The manifest injustice of this is apparent. P has been damaged in the amount of $30 million. A cornerstone of Federal antitrust policy is that an injured person shall recover "three-fold the damages by him sustained". 15 U.S.C. Section 15. Yet P will have obtained only $55 million, $30 million in the judgment against NS and $25 million in the settlement with SD. The purpose of

S. 995 is to change the process by which the allocation of antitrust damages is determined. The bills are not intended to reduce the recovery by those who are victims of an unlawful conspiracy.

This will be a scant comfort to P who has ended up with $35 million less than it otherwise would have had . . . To amend the bill to apply to pending suits such as the one hypothesized is contrary to the public interest in that it gives a $35 million windfall to the convicted price-fixer, NS, at the expense of P, the victim of the conspiracy. The public interest that the bill generally serves is weakened to the point of non-existence, and the result is extremely unfair to P who has relied on the existing law in settling with SD . . . The amount for which P would settle with SD would be greatly different if P could have known that a change of law would defeat this right to collect the balance of his trebled damages from NS.

As the example shows, the result of applying S. 995 to spending suits would be to give $35 million to NS at the expense either of P or, if the settlement would be reopened and SD held liable, of SD.

Mr. President, this example dramatically shows the problem with retroactive application of S. 995.

Applying S. 995 retroactively would not simply be contrary to the whole spirit of our jurisprudence and would not only risk an unconstitutional declaration of due process for innocent plaintiff businesses who had relied on the existing law, but it also would create a horror story for courts.

There are approximately 2,800 antitrust cases pending in the Federal courts. Hundreds of them, involving some 90 defendants, concern price fixing and would thus be directly affected by retroactive application of S. 995. The standard on which a court is to decide claim reduction would have to be determined separately in each case. The retroactive amendment is an invitation for any dissatisfied price fixer to attempt to reduce his damages. The amount of litigation which would be imposed on an already overwhelmed judicial system is staggering. Courts around the country would interpret the retroactive statute differently and ultimately many troublesome issues would have to be decided by the U.S. Supreme Court. In the meantime, years of additional litigation would ensue, all the while leaving innocent plaintiff businesses in the position of not being able to collect on verdicts which they had justly won.

One such case involves 500 beef producers who are alleging price fixing by 24 retailers and 4 meat packers in the purchase of beef. In other similar suits throughout the West and Southwest, hundreds of farmers have made similar claims. The cases have been pending since 1977. It is alleged that farmers lost as much as 10 cents a pound because of the practices of the defendants. The plaintiffs have entered into settlements in those cases relying on the fact that they could recover the balance of their damages, less only the dollar amount of the settlements, from any remaining defendants. That expectation will be completely undercut by application of S. 995 retroactively to pending cases.

In closing, I think it is important for the Senate to understand how unique retroactive application is in instances like this. The leading Law Review article on the issue states, and I quote, "Retroactive statutes have traditionally been regarded as undesirable." Hochman, "The Supreme Court and the Constitutionality of Retroactive Legislation," 73 Harv. L. Rev. 692, (1960).

The very same reason some used in arguing against applying the Illinois Brick legislation retroactively in the 96th Congress applies here. In summarizing those arguments, Philip A. Lacovara argued against retroactive application of the antitrust legislation in words which deserve repetition here:

Congress historic disinclination to amend antitrust legislation retroactively is rooted in considerations of fairness and a sound regard for the disruption that retroactivity causes. This historic course of prudent legislation ought not to be abandoned now.

I agree, Mr. President, with these sentiments. Retroactivity is simply not fair in this instance. It is not fair to change the legitimate expectations of the parties to pending cases. They have a right to rely on what the law was at the time they brought their suits, settled cases, or got jury verdicts and judgments. In the spirit of fairness, I urge the U.S. Senate to reject the retroactive application of S. 995 and pass it as it was originally introduced, namely, applicable only to cases filed after the enactment of the act.●

(Mrs. HAWKINS assumed the chair.)

Mr. STEVENS. Madam President, I inquire whether there is any disposition of any Member to speak further tonight on this subject.

Mr. METZENBAUM. To the best of my knowledge, the answer is no.

TWO-YEAR BUDGET

Mr. FORD. Madam President, in these, the final days of the 97th Congress, we have several important pieces of unfinished business with which to deal. Most notable are the 10 appropriations bills which have yet to be passed, even though the 1983 fiscal year began October 1.

For several years, Congress has failed to complete action on all appropriations bills. We have, consequently, been forced to resort to one continuing resolution after another, simply to keep Government running.

Obviously, something is wrong. Obviously, something must be done to correct this situation. Stopgap funding is not the answer. We simply cannot continue to operate Government with hastily conceived Band-Aid resolutions.

Clearly, there is no way to insure against congressional procrastination, but I do believe that changing to a 2-year budget cycle would substantially reduce the likelihood of delay. The problem in recent years has been that properly covering all of the complex issues that arise in budgeting and appropriating for 12 months takes more time than an annual cycle affords, even if Congress does not procrastinate.

The idea I am suggesting is not a new one.

As I am sure Senators know, Kentucky and 20 other States are already on a 2-year budget cycle, which seems to work quite well for those States and local government. The system will not solve all of our budget problems, but it will give us a more realistic timetable in which to try to deal with those problems.

In the past, when our country was smaller and our problems were fewer and simpler, we succeeded in making all the necessary budget decisions in both the executive and legislative branches of Government on an annual basis. For some time now that has not been possible, and we have had to live with hastily considered annual appropriations bills. All too often, continuing resolutions are passed with virtually no time for careful and thoughtful consideration.

Madam President, in the first session of the 97th Congress I introduced legislation which would switch the Federal Government to a 2-year budget cycle. I have noted with satisfaction that the biennial budget proposal is receiving greater attention in Congress these days. Momentum in support of a 2-year budget is growing. I believe it is because my colleagues and those students of the budgetary process can see the benefits of this proposal. A 2-year budget would—

Enlarge the timetable for consideration of regular budget resolutions and appropriations measures, avoiding the consequences of rushed-through continuing resolutions;

Allow additional time for Congress to conduct more meaningful and effective oversight;

Reduce the uncertainties which confront State and local governments annually over the future of federally funded programs;

Enable more long-range planning for Congress and Federal agencies and reduce the potential misuse of tax dollars by year-end spending sprees; and

Cut in half the budget tasks, saving valuable time, effort, and money.

It has been my experience that our present budget process has become increasingly unrealistic. The annual appropriations process was not working prior to the enactment of the Congressional Budget Act of 1974, and the additional requirements established by

that act have made things worse. Deluding ourselves that it does work has cost us dearly in time, money, and effort, but the greatest cost may be incalculable—the cost of poor decisions, made in haste, with inadequate consideration of the need or the consequences. The time has come for us to accept the realities that in our complex modern society, Government economic planning, budgeting, and appropriations simply cannot be constructively done in a 12-month period.

Madam President, I strongly believe both Congress and the executive branch can do a better job of budgeting by eliminating the pressures and haste of the annual appropriations process.

As has happened so many times in the past, we are several months into a new fiscal year without finishing acting on the various appropriations bills. This year, in fact, 10 of the 13 separate appropriations bills have not become law. Consequently, the Government is forced to operate day to day under a continuing resolution rather than legislative appropriations. This is a sad commentary on the budget process.

MX AND CSB

Mr. CRANSTON. Madam President, today I am cosponsoring Senator HOLLING's amendment to the Department of Defense appropriations bill for fiscal year 1983 which would eliminate all moneys for the production of the MX missile.

I am firmly opposed to any more spending on the MX.

There is no point in proceeding with production of the MX missile now since we have not identified a suitable basing mode for it. The Reagan administration's proposal for a closely spaced basing (CSB) mode will not lessen the vulnerability of our land-based ICBM force—which was a principal rationale for developing a new missile. Putting the highly accurate and lethal MX in a small concentrated area will create an extremely dangerous and tempting target for the Soviets. And the entire CSB scheme relies on extreme extrapolations of untested assumptions. The Pentagon's premises of missile fratricide, nuclear blast effects and silo hardening capabilities involve enormous uncertainties.

Even the administration tacitly acknowledges that its CSB scheme will not make our land-based ICBM force more survivable. President Reagan no longer speaks of closing the "window of vulnerability" which is probably a good thing since many of us never believed that such a window existed. Rather the President and his military advisers, paradoxically, now justify MX in CSB as an important bargaining chip for arms control negotiations. This is a mistake. Either we need a weapon system because it will help defend our national interests or we do not need it.

It is senseless and wrong to spend billions and billions of dollars to produce a weapon on the grounds that we need it to negotiate away at a bargaining table. We have more than enough chips already. Time and again history has shown that the weapons nations produce as bargaining chips are inevitably deployed—like the MIRV missile.

Another major justification the President's military advisers are advancing for the MX/CSB scheme is that the missile is needed to give the United States a hard-target-kill capability against Soviet command and control centers. But this will not improve deterrence; it will move both the United States and the Soviet Union perilously close to adopting a launch-on-warning policy. With the CSB proposal, the Reagan administration is proposing a radical re-definition of deterrence theory to now require the deployment of large numbers of destabilizing first strike weapons.

We do not need the MX to convince the Soviets that we are serious about defending our interests in the world. And we do not need this scheme to convince the Soviets that we are serious about arms control. In fact, the MX based in CSB will not promote arms control efforts. Instead, it will seriously undermine—if not destroy—two decades of work compiled through the SALT, ABM, and other arms control agreements.

The only way to verify the many, many assumptions on which CSB is based would be to resume atmospheric testing on a massive scale—an action that would violate the Limited Test Ban Treaty of 1963.

Leading military and diplomatic experts have stated they believe that MX in CSB would violate the ban in the SALT agreement on any new fixed-site missile launchers. Given the administration's request for funding for vast increases on ballistic missile defense R&D—$2.5 billion over the next 5 years—it is clear that the administration is eager to deploy a new antiballistic missile system. Any ABM system with a hope of even marginal effectiveness would violate the ABM Treaty.

Madam President, we have spent a decade trying to find a place to put this behemoth of a missile. We have put our best engineers in the civilian and military sectors to work on the problem. We have spent billions of dollars. We have gone through more than 30 basing schemes for MX. Each one is a bigger Edsel than the last. We have exhausted every reasonable alternative.

We have reached the point where we must decide whether to proceed with MX at all. We do not have time in this lameduck session to go into the detail that this question requires. But a missile without a basing mode is worse than useless because it drains precious defense resources.

I support the bipartisan effort to stop any further MX production because it is the most sensible step to take now. I hope that early in the next session of Congress we will come to grips with the fact that without a mission, a rationale, or a secure basing scheme, we are better off without MX.

DEPLORABLE CHEMICAL WEAPONS USED BY SOVIETS IN AFGHANISTAN AND IN LAOS AND KAMPUCHEA

Mr. PERCY. Madam President, my colleagues have by now read the press reports on the new evidence accumulated by the Department of State that lethal chemical weapons including mycotoxins are being used by the Soviets in Afghanistan and by Vietnamese and Laotian troops in Kampuchea and in Laos. The newest evidence includes Soviet gas masks from Afghanistan which bore traces of the toxins, and photographs of a 15-year-old Hmong boy who suffered severe effects from a yellow rain attack earlier this year. Mr. President, the evidence is compelling and the Department of State is to be commended for its determined pursuit of the facts in this matter.

Madam President, in the past year, the Wall Street Journal has contributed actively to the effort to bring attention to this issue and to convince skeptics through reports and editorials. Also, the Washington Post concluded today in an editorial that "Soviet chemical warfare goes on." I will ask that this editorial appear in the RECORD.

Deep humanitarian concern leads relief workers in the refugee camps to risk their own health and safety so close to the borders of Afghanistan, Laos, and Kampuchea. One of them, Dr. Amos Townsend, has collected information for the U.S. Embassy in Bangkok while employed by the International Rescue Committee. He recently reported to the United Nations team which spent 2½ weeks investigating the evidence of use of chemical weapons. Because of his long-time familiarity with Khmer, Hmong, and Thai and his medical expertise, I believe Dr. Townsend's report deserves wider coverage and I will ask unanimous consent that his remarks appear in the RECORD at the conclusion of my statement.

Dr. Townsend is convinced that chemical and toxin weapons have been in use in Laos since 1975 and in Kampuchea since 1979. He states that:

> Either the user or the supplier in Laos are using the Hmong to improve their knowledge and techniques of chemical weapons use and delivery.

Further, he predicts that the Vietnamese will attempt to close the Thai-Kampuchean border and "the least expensive mode of accomplishing this would be to use the long acting and more lethal chemical weapons agents that have been used at times in both Afghanistan and Laos." As a result, Dr. Townsend concludes that:

There is increased danger to the refugees and voluntary agency personnel working along the border in this coming dry season.

Dr. Townsend states that there is at present only "minimal concern" in the world about the use of chemical weapons in Southeast Asia and that this provides an "open invitation" to the Hanoi leadership. Therefore, while all nations must deplore the continuing inhuman use of chemical weapons in Southeast Asia and Afghanistan, we must continue to make strenuous efforts to bring attention to these atrocities. Those governments which have additional information on these weapons and their use should take every opportunity to keep the world's attention focused on this continuing tragedy so that soon the use of chemical weapons will cease.

Madam President, I ask that the articles to which I referred be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 1, 1982]

SOVIET CHEMICAL WAR GOES ON

It has been a long uphill climb for the United States, over two administrations, to draw attention to the Soviet Union's responsibility for chemical warfare violations—in Southeast Asia and in Afghanistan. The interesting question is why the general response has been so slow.

One reason has been the difficulty of assembling evidence to meet the standards required to sustain such charges. The scenes were remote, the victims simple people for whom "yellow rain" was but one of many travails. In the world at large, many people found it hard to believe the Soviet Union would sponsor and practice a barbarous form of warfare it had vowed in two treaties to forgo. Did people dismiss the threat on such disreputable grounds as that it mainly concerned more primitive folk or raised too many disturbing questions about the Soviet Union's worthiness as an American negotiating partner? Governments shied away from lending support to a charge that might be thought to arise from an American Cold War campaign. Nor did this administration help its case, always a difficult one to prove, by the manner in which it initially presented it.

It seems to us now, however, that the administration has proven out the Soviet pattern by a standard that reasonable people would accept. There are the blood and urine samples, there is the anecdotal evidence of refugees and survivors and—the latest—the receipt of toxin-contaminated Soviet gas masks from Afghanistan. As recently as six weeks ago, the State Department reports, Soviet forces were using lethal chemical weapons there. An international public that could weep for Lebanon surely can mourn the evident thousands of victims of Soviet chemicals in Afghanistan, Laos and Cambodia.

Soviet conduct has already had its impact in reinforcing American suspicions of the Kremlin. The impact elsewhere is less evident, notwithstanding the administration's efforts to make the issue more universally acceptable by avoiding presentation of it in stark East-West terms. Still, last Friday the United Nations did agree by a large margin to convene the parties to one of the international treaties Moscow has evidently broken, the biological weapons convention of 1972. Just this week, the General Assembly, acting after a Soviet undersecretary had stymied one investigation, set up another experts' panel that will report directly to the secretary general. The cause needs help. Soviet chemical warfare goes on.

STATEMENT FOR THE UN COMMISSION INVESTIGATING CW ALLEGATIONS

(By Dr. Amos Townsend)

Whereas my initial involvement had been very sporadic with 2½ months of information gathering and physical examinations among the Hmong in Loei and Nong Khai Provinces and a brief foray into Kampuchea to examine alleged CW victims among the Khmer Rouge soldiery (at the permission of my then boss, the Executive Secretary of the CCSDPT, Robert af Klinteberg of Sweden, I have been on full time loan to the US Embassy of Bangkok full time since January 1, 1982. This position has been with the concurrence and permission of IRC authorities. My financial support originates with Ambassador (for Refugees) Douglass and reaches me via IRC. My reporting channel is to both IRC and my two contacts in the Embassy, Lt. Col. Lane and Mr. Don Coleman, the latter replacing Mr. Ed McWilliams this past July 1982.

Since September 1 1982, Mrs. Andrea Crossland, a British Midwife with much experience with both the Hmong and the Khmer, has been working with me thus enabling me to cover more territory with greater facility. With Mrs. Crossland's assistance, it is hoped that not only will we be able to move fresh specimens quicker but we will at last be able to begin studies of an epidemiologic nature on possible chronic long term effects of the various CW agents that are now believed to be in use in SEA, particularly among the Hmong. It is also possible that others may join the effort to expand this work into the area of chronic pathophysiologic effects of these CW agents.

Since 1 January 1982, I have made many visits to the northern camps and to those along the Thai-Kampuchean border, interviewing and examining patients and, when appropriate, obtaining blood, urine and tissue specimens. These specimens are brought to the US Embassy for prompt movement to both USG and private laboratories in the USA. With the inclusion of earth, vegetation and "scraped" specimens as well, there must be well over 100 specimens now within the USA. I do not know the exact number for they also appear there from other sources including from private citizens as well as government employees. Although many of the specimens thus far tested have not shown any positive results, others have to a greater extent than I had ever anticipated. Once they began to look beyond the more traditional agents known up to last year by the USG, we found that a virtual Pandora's Box of information had been opened.

I do not think that it is useful to cover each case worked on by me over the past year, the useful results of which are released by the USG in due time whenever the authorities are fully confident of the results. Therefore, I shall give you my current impressions which you may wish to compare to our preliminary efforts up to November of 1981.

Thus far my impressions include the following:

1. CW agents of lethal and non-lethal varieties have been in use in SEA since at least 1975 in Laos and at least since 1979 in Kampuchea.

2. These CW agents are of a wide variety in effects elicited and lethality with patterns of use that vary with place and time. The level of general health and nutrition further widen the effects of the CW agents used on different peoples.

3. Since 1979, the pattern has been one of aircraft use in a variety of aircraft throughout both the wet and dry seasons. Many villages that are being hit are among those visited routinely by either Pathet Lao or PAVN troops, ie, villages under a degree of Pathet Lao control. Assessments of CW agents effects within those villages is not unusual in the days following their use. It is impossible to escape the impression that, at least in part, the use of CW agents against the Hmong is in the form of basic field experimentation using the "human laboratory animal" in his natural setting.

4. The variety of aircraft used in Laos to drop CW agents and the variety of symptoms described would indicate also or, in the very least, suggest that either the user or the supplier of CW weapons in Laos are using the Hmong to improve their knowledge and techniques of CW use and delivery. Since 1979 the use of aircraft for CW agent delivery has been almost the only form of delivery. Then Hmong are separated from PL or PAVN by distance, as is the case almost exclusively in Laos in contrast to Kampuchea, aircraft delivery provides little danger for the occupying forces.

5. The reports of VietNamese affected by their own CW agents has occurred almost exclusively in Kampuchea where even artillery has been used in a jungle setting where the troops of Khmer and VietNamese are in close proximity to each other. This would also suggest that the PAVN are not overly concerned with the loss of largely South VietNamese conscripts in Kampuchea.

6. With the economic disaster that is VietNam now and with the UN backing for the Coalition government of Kampuchea, as fragile as it might be, it is still obvious that VietNam still is willing to sacrifice their own people to retain ultimate control of Laos and Kampuchea. However, it is quite possible, even probable, that the Hanoi leaders will decide to close off the Thai-Kampuchean border to movement of all Khmer, civilian, refugee or merchant, and the resisting Khmer forces. The least expensive mode of accomplishing this would be to use the long acting and more lethal CW agents that have been used at times in both Afghanistan and Laos. I believe that there is increased danger, therefore, to the refugees and Volag personnel working along the border in this coming dry season.

7. CW agents will continue to be used in profusion in both countries and 'accidentally' in Thailand as well. The present minimal concern about CW use in SEA in the rest of the world is an open invitation to the Hanoi leadership. Even if the UN Commission presently investigating this problem were to conclude that lethal agents were indeed being used, I am quite convinced that the

same agents would still be used. Apathy seems to reign specifically along that segment of the world that most often suffers from CW use over the past 30 years.

8. Only the ability and will to retaliate in kind would stop any potential aggressor considering the use of lethal CW agents.

9. It is my impression that the CW agents used include those riot control and incapacitants . . . and possibly defoliants . . . left behind by the US forces as well as lethal chemicals supplied by the USSR. Whereas it is quite possible that some 'left over' Chinese CW weapon might be still used, I have heard of nothing like that. Some Chinese protective equipment of a ten year vintage has been noted, however.

10. Although Hanoi has more recently described 'normally occurring' episodes of 'yellow rain' like substances that have bothered them 'for centuries', I have yet to find any story, factual or mythological, among the Lao, Hmong, Khmer, Thai or even Viet-Namese from the North or South. It is also interesting to note that over the past 7 years the Hmong have been treated to a variety of explanations by the PL and PAVN. Initially they were told that it was 'only their imagination'. Later this was changed to 'it is the Americans who are dumping the material and trying to discredit the PL regime' . . . even with no 'US' planes being shot down. Later this was changed to the 'natural phenomenom' story over the past 1½ yrs. Most recently some Hmong reported that they were threatened with being shot on the spot if they attempted to pick up any of the CW agent that had been spread over their particular village. It is interesting that the PAVN has not tried to convince the opposing Khmer that the use of CW in Kampuchea was just a natural phenomenon.

11. I am convinced that more lethal CW weapons will soon be used in Kampuchea.

12. Recent pronouncements that have come from Hanoi refer to the placement of Thai troops more in an offensive pattern rather than defensive. This sounds similar to the old Hitler complaint that Polish troops were threatening the German border in 1939. One must wonder if this is also intended as a self-invitation for the invasion of Thailand . . . and not just an attempt to rid the Thai-Kampuchean border of all resisting Khmer.

13. There seems to be a concerted move in segments of the world press as well as from some capitols that would attempt to equate the non-lethal chemicals used prior to 1975 by the Americans with the obviously lethal ones in use now in SEA and Afghanistan. The world public is not very discerning about such matters until they are on the receiving end.

14. I believe that a Soviet made CW weapon containing lethal agent(s) will be obtained within the next 12 months.

WORKFARE—BENEFICIAL TO BOTH RECIPIENTS AND TAXPAYERS

Mr. HELMS. Madam President, I call to the attention of Senators that on November 8 a new program was begun in the food stamp program which I believe has the potential to improve dramatically the program's integrity.

Local governments and States may now begin operating a work-for-benefit program—popularly known as workfare—for able bodied food stamp recipients. Under the program, recipients work in public service jobs in exchange for their food stamps.

This local option workfare was added to the food stamp program as a result of legislation passed last year in the Food Stamp and Commodity Distribution Amendments of 1981 and earlier this year in the Omnibus Budget Reconciliation Act of 1982.

Madam President, I would have preferred to see the workfare program made a national requirement in the food stamp program, but that failing I am pleased to have been the author of the compromise providing for the local option which was enacted last year. It is a positive step in restoring the work ethic in our welfare programs.

Workfare is an excellent concept which benefits both the recipients and the taxpayers. Local governments and private nonprofit organizations receive the value of the public service work performed by workfare participants. The value of this work can be quite considerable to local or State governments and private nonprofit organizations.

The following article from the Wall Street Journal also notes that recipients of public assistance often experience a renewed sense of self-esteem when they participate in workfare programs inasmuch as they are then "earning" their assistance. This has been a common experience reported by many jurisdictions which have operated workfare programs in various public assistance programs. Workfare thereby fosters increased responsibility and self-motivation and an end to the "dependency" philosophy which has pervaded such programs in the past.

Nowhere can we do the able-bodied poor a greater service than to provide incentives for them to be integrated into the working mainstream of American society.

Another beneficial result is that exemplary workfare employees are often hired in full-time work by their employers. Indeed, the exposure to the work environment afforded by workfare can itself be useful preparation for such additional work responsibilities—initiated by the individual.

Many recipients who must work in a workfare system decide to seek full-time employment which they had previously avoided. Workfare's ultimate objective must be to encourage food stamp recipients to find employment. And those able-bodied recipients who refuse to work are removed from the food stamp program.

The Committee on Agriculture, Nutrition, and Forestry has recently published a summary of the new workfare program within the food stamp program that I would be glad to furnish to anyone interested in it.

I ask unanimous consent that the article from the October 28, 1982, Wall Street Journal, entitled "Many Welfare Clients Don't Seem to Mind Being Forced to Work," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EARNING THE DOLE: MANY WELFARE CLIENTS DON'T SEEM TO MIND BEING FORCED TO WORK

(By Doron P. Levin)

CHARLESTON, W. VA.— Ten months ago, Otis Martin was summoned to an office of West Virginia's Department of Welfare. He was told that his welfare payments would be cut off if he didn't accept a six-day-a-month job at the publicly supported Charleston Animal Hospital—without pay.

So the 40-year-old Mr. Martin, who was laid off three years ago from the local Pontiac dealership, showed up at the animal hospital as ordered. In return for $240 a month in welfare payments, $200 a month in food stamps and Medicaid for himself, his wife of 20 years and two children. Mr. Martin cleans animal cages, pulls weeds and waits on people who come for sick or lost pets.

The job "isn't the kind of work I'd care to do if I had a choice," he says, adding, "I can't see a future in working here." He still hasn't given up hope of once again repairing and painting auto bodies. However, he expresses gratitude that at the animal hospital "they treat me like a regular employee" and not like someone to be despised because he is on the dole. "I'm working right now as hard as I ever worked. I'm doing the best that I can," he says. The hospital's director agrees; he prasies Mr. Martin's work and says he would hire him full time if he could.

UNLIKELY ADVOCATE

Some people say a policy of forcing able-bodied unemployed to do menial jobs in return for public assistance seems cruel. but Mr. Martin himself approves of workfare—labor traded for welfare—because he doesn't like people living off handouts and doesn't want anyone to believe that he lives that way. Workforce, he says without a trace of irony in his voice, "is going to make those people who lie around all day go out and work."

To a surprising extent, workfare is well received by many other welfare clients, too. Other areas of the country also are trying the idea, and it seems to be growing more respectable among social scientists, welfare workers and others who once condemned it as an atavistic, heartless response to poverty.

"A program like this helps people to maintain their work skills without stereotyping them as shirkers or loafers, and it gets some useful things done for the community," says Leon Ginsburg, West Virginia's commissioner of welfare.

Nevertheless, the programs raise some unanswered questions: Does workfare save money by shrinking the welfare rolls or does it cost extra money to run? Are labor unions correct in contending that workfare takes jobs away from their members and depresses wages? Can work requirements be fairly applied to the great majority of those on welfare—single mothers and their children?

EXPANDING PROGRAM

Whatever the answers, West Virginia's welfare department is pushing ahead. Since last January, it has put about 4,000 people to work in about 2,000 different jobs around

the state in government departments or in nonprofit agencies. The workers came from able-bodied, two-parent families receiving federal and state aid, of which there are more than 5,000 cases statewide. (A much larger category, single-parent families with children, accounts for about 20,000 cases. In West Virginia, destitute single people or childless couples can't qualify for welfare.)

West Virginia welfare officials say they have tried to pick the healthiest and most willing welfare clients from those who are eligible, under the assumption that they have the best chance of landing permanent jobs at workfare sites or moving into private industry.

Armed with three years of college, Edward Burgess fit into this category. The 26-year-old Mr. Burgess was laid off from his draftsman's job and applied for public assistance for himself, his wife and young child when he couldn't find another job. For two months, the Burgesses received $164 a month from the state, $184 in food stamps, and Medicaid benefits; in return, Mr. Burgess performed clerical tasks several days a month for the local chapter of the Multiple Sclerosis Foundation.

MEDICAL PROBLEMS

Articulate and tidily dressed, Mr. Burgess concedes that he probably could have found a minimum-wage job—grilling fast food, perhaps—that would pay at least $575 a month before taxes. That still would have left his family below the official poverty level, but he would have made more than his welfare check. He rejected that course, however, because his wife is expecting twins and their Medicaid benefits, which they need for the huge medical bills that are looming, would be withdrawn if he went off welfare.

"Look, I hate the welfare system," Mr. Burgess said, "Using food stamps is a very humbling experience, but... I can't afford to give up my Medicaid card." On nonworkfare days, he continued his search for a job "that pays at least $5 an hour."

Recently, the welfare department required Mr. Burgess to go to an interview for an opening at a shoe store. The store offered him a job at $138 a week plus some medical benefits, a welfare official says. If Mr. Burgess had refused the interview or the job offer, the official adds, he might have lost his public-assistance benefits for up to three months. Mr. Burgess took the job.

Many people on workfare cite its psychological benefits. "I love it," asserts 22-year-old William Lusher as he sorts through a truckload of discarded paper, glass and aluminum cans that belongs to the Citizens' Recycling Council of South Charleston. Mr. Lusher lost his job as a church maintenance man and now supports his wife and three children on $252 monthly from the welfare department and $260 in food stamps.

"Before I got this job, I didn't even want to cash my welfare check. Now that I'm working, I know I earned the money; I can go anywhere, and it doesn't bother me that I'm on welfare," Mr. Lusher says.

Welfare Supervisor Yvonne Stamper explains that "the typical West Virginian's mountain work ethic" and hatred of accepting charity are two important reasons most welfare recipients have been pleased to be assigned workfare.

Requiring work in return for public assistance is a complicated public policy with a long history of problems aside from the issue of whether participants like it. In 19th-century England and later in this country, the destitute sometimes were forced to toil in workhouses, often under abominable conditions, so that public assistance wouldn't seem too attractive. During the 1930s, the New Deal's Works Progress Administration gave the unemployed jobs in public projects, but President Roosevelt's opponents charged that the work being done wasn't necessary and that the wages weren't low enough to keep WPA jobs undesirable.

Except for scattered experiments, most workfare in the U.S. was precluded by law from federal assistance programs until the Budget Reconciliation Act of 1981, which permits states to impose workfare as long as the jobs don't displace workers already on payrolls. Labor unions continue to contend, however, that workfare does supplant their members, especially in government jobs, and drives down wages. In New York, District 37 of the American Federation of State, County and Municipal Employees has sued to get workfare recipients out of city departments.

BUNCH OF 'SCABS'?

"We want to get these people out of our jobs," says Karen Smith, the union's assistant general counsel. "It's a scab labor force, and it's becoming totally entrenched."

But city officials deny that workfare workers are replacing full-time employees, even though budget cutting has reduced the city's payroll at a time when 10,000 workfare recipients work for the city. "If (workfare) went away tomorrow, we wouldn't hire one more extra person to do their work," says Irwin Brooks, a commissioner in the Human Resources Administration.

Joining the public-employee union in its fight against New York's 11-year-old program is the Welfare Grant Increase Coalition, a group that explains legal rights to welfare recipients and lobbies to broaden their benefits. Coalition workers call workfare "institutionalized slavery" and say people forced into the program are being misled because they accept work in the belief that eventually they will be hired full time.

Shirley Portee is one New York aid recipient who considers workfare a failure because it hasn't led to a full-time job. In return for a $90 assistance check every two weeks and $70 a month in food stamps, the 46-year-old Mrs. Portee has to do 22 hours a month of clerical work at a Brooklyn welfare center. She says she prefers workfare to siting at home. "I love working," she says. "The people are very nice." However, she complains about the way job applications are handled. She failed the civil-service test once and will take it again, she says, but she believes that what she has learned on the job—such as operating a computer—should be considered in her efforts to get full-time work.

JOBS USUALLY BRIEF

Welfare officials in New York City say they are willing to hire when they can, and Martin Levine, who oversees workfare assignments, says several hundred nonuninformed employees have moved from workfare to full-time jobs. For the vast majority, though, a workfare assignment doesn't last more than several months. And if a person gets involved in a work-related dispute or refuses undesirable work, the department may cut off assistance, pending a "fair hearing" appeal.

Such disputes aren't unusual, Mrs. Levine says, "especially considering the nature of the population." He adds:

"We process alcoholics, people with drug problems if they aren't currently using, ex-convicts, transvestites. . . . The agencies we send these people to don't have to accept them, and if they're been rejected four or five times, we put them into a holding category so they can keep getting their checks."

Besides teaching job skills "and keeping people sharp," New York's Mr. Brooks says, workfare may save money by stimulating welfare recipients to find full-time jobs while helping the city. "We've never done a dollars-and-cents analysis, although I would guess there's some financial benefit from the cases we are able to close," he says. Other officials in New York hesitate to say whether there is a net gain or loss.

West Virginia's Mr. Ginsburg agrees that workfare is worthwhile, but he is convinced that it costs extra money. The West Virginia department, for example, must pay carfare and lunch money for each worker, which may cost about $25 a month, and employers must pay workmen's-compensation insurance premiums, which can run $400 a year. "Our program costs the state about $60,000—excluding the administrative expenses—and we'd like to add more jobs except we're limited by our budget," Mr. Ginsburg says.

The Reagan administration has proposed a mandatory, state-run workfare system applying to every able-bodied person receiving federal money. But so far, Mr. Reagan has won congressional approval only for changes in the law that allow optional programs. The 33 states with some kind of workfare legislation generally are moving cautiously with test programs covering only limited areas and types of welfare clients. Besides the ideological challenge from groups that view workfare as unjust, some social scientists have doubts about the program's value.

In response to this criticism, the Ford Foundation has just contributed $2 million to Manpower Demonstration Research Corp. to study workfare programs in 10 to 12 locations, including West Virginia, for three years.

An important aspect of the study, says Barbara Blum, Manpower's president, will be to see whether workfare helps "in the era when most women work." Because 80% of the 10.5 million people on welfare are dependent children and their abandoned or divorced mothers, any workfare program should offer child care and take into account the fact that "women want training and skills, too," Mrs. Blum says.

THE MARTYRDOM OF FATHER KOLBE

Mr. PROXMIRE. Madam President, last month a man who sacrificed his life so another could live was proclaimed a Saint of the Roman Catholic Church. Father Kolbe, a Polish priest, founded a monastery near Warsaw which became a haven for refugees during the Second World War. Suspected of being an enemy of the Third Reich, he was imprisoned at Auschwitz with a group of other Poles in 1941. A few months later, a member of the group escaped. Furious, the Nazis chose 10 men at random to die in retribution for their countryman's escape.

One of the men chosen was a 40-year-old peasant, with a wife and children. Father Kolbe stepped forward

and offered to die in place of the peasant, because, he said, the man had a family, and he was single and elderly. He said this despite the fact he was only 6 years older than the man.

Father Kolbe and nine others were condemned to a "hunger bunker," an underground cell where they were to stay until they perished of starvation. Throughout the long days and nights, he led the group in singing and prayer. He consoled the men facing their death with words of encouragement and hope. After 10 days, he and three others remained alive. Because the Nazis wanted to put a new batch of victims in the cell, Father Kolbe and the others were removed and injected with poison.

Pope John II called Father Kolbe "perhaps the brightest and most glittering figure to emerge from the darkness and degradation of the Nazi epoch." Father Kolbe's heroism is indeed remarkable, but he was not alone. Millions endured the same agony that he did during World War II. Pope John Paul urged those attending the ceremony to honor not only Father Kolbe, but all the other victims of hatred and genocide in this century.

Father Kolbe lives on today as a shining symbol of the triumph of the human spirit over horrible circumstances. But how can we insure that others will not endure a similar fate? The first step is to take a solid stand against its cause: genocide. The worst genocide in history occurred only 40 years ago, and this is a scar on our civilization, our century, our conscience. We can begin to heal that scar by ratifying the Genocide Convention, a treaty which makes genocide a crime under international law. In the name of Father Kolbe and the millions who died in a like fashion, I call upon the Senate to ratify the Genocide Convention.

TRENDS IN CONVENTIONAL ARMS TRANSFER TO THE THIRD WORLD BY MAJOR SUPPLIERS 1974-1981

Mr. PROXMIRE. Madam President, recently I discussed part I of a Congressional Research Service study on Trends in Conventional Arms Transfers to the Third World by Richard F. Grimmett. In his introductory remarks, Mr. Grimmett provided a thorough justification of what data should be included in any assessment of arms sales, transfers, and deliveries. He noted that for the purpose of his study, commercial sales and deliveries had been excluded since most of this went to Europe or other developed countries and in view of the lack of accuracy in the statistical base for commercial sales.

Construction sales and deliveries were included, however, since they play an important role in the Middle East—particularly Saudi Arabia. Similarly, military training was deemed important to include since it has a direct relationship to the sale of military hardware.

Today, in part II of this study, Mr. Grimmett examines the actual trends in sales and deliveries during the period of 1974-81. The trends show that U.S. sales agreements remained fairly constant over time while Soviet sales and deliveries indicated an upward growth in the later years. From 1974 to 1981 all the major Western European suppliers made real gains in their share of the conventional arms marketplace, with the French being particularly aggressive.

The growth of the French, British, West Germans, and Italians as major arms shippers signals the international flavor of this problem. Unilateral restraint no longer is the answer to the mushrooming arms sales business. We must have multilateral cooperation if the world is to halt this mammoth growth in arms shipments.

Madam President, I ask unanimous consent that part II of the CRS study be printed in the RECORD along with certain appropriate tables.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TRENDS 1974-81

Table 1 shows the annual current dollar values of arms transfer agreements with Third World countries by major suppliers from 1974 through 1981. As these data indicate, the value of U.S. arms sales agreements in nominal terms remained fairly level throughout this period until the uniquely low year of 1981. In constant dollar terms, taking inflation into account, the sales values actually declined over the eight years. This is true even if the MASF account (Military Assistance Service Fund that supported Asian forces in the South East Asian War Zone) is included for the pertinent years. The inclusion of terminated Iranian contracts also would not alter the validity of this basic generalization.

Tables 1A and 1B indicate that the nominal value of U.S. arms transfers from 1978-1981 averaged about $1.73 billion less than the value for the period from 1974-1977. Factoring inflation into these figures shows that the real value of these U.S. agreements declined.

The trends shown in Tables 1, 1A, and 1B for the Soviet Union indicate that in nominal (unadjusted for inflation) terms it averaged slightly more than $1.8 billion in sales agreements in 1978-1981 period compared to the 1974-1977 period. Even taking inflation into account, the Soviet Union made real market share gains in the eight year period from 1974-1981. However, comparing the U.S. and USSR during the entire 1974-1981 period, the United States made Third World sales in nominal terms that exceeded those of the USSR by about $9.1 billion. Yet in the more recent period, from 1978-1981, the Soviet Union sold about 2.5 billion more to the Third World than the United States did. The extraordinary nature of the Third World sales levels for all major suppliers in 1980 and 1981 suggest that the U.S. and the Soviet Union are probably close in nominal terms in Third World arms sales and that the 1982 data, when available, may very well prove this to be the case.

During the period from 1974-1981, the major Western European suppliers all made nominal and real gains in their shares of the conventional arms market in the Third World. Tables 1, 1A, and 1B show that French arms sales agreements averaged over $1.8 billion more in the 1978-1981 period compared to the 1974-1977 period. Of course, the extraordinary 1980 sales year skews the French totals higher. Nonetheless, the data clearly indicate that France is the major conventional arms seller after the United States and the Soviet Union. The United Kingdom, West Germany and Italy follow the French in descending rank order of sales agreements values in both the 1974-1977, and 1978-1981 periods. But it is clear that as individual sellers (and as an aggregate group) the British, West Germans, and Italians have played an important role in the conventional arms traffic during the years from 1974-1981. While their performance from year to year has not been as consistently high as the French, even taking inflation into account their net share of the arms market has grown in real terms compared to the United States.

TABLE 1—ARMS TRANSFER AGREEMENTS WITH THE THIRD WORLD, BY SUPPLIER [1]

[In millions of current U.S. dollars]

[1] U.S. data are for fiscal year given (and cover the period from July 1, 1973 through September 30, 1981). Foreign data are for the calendar year given. Statistics shown for foreign countries are based upon estimated selling prices. All prices given include the values of weapons, spare parts, construction, all associated services, military assistance and training programs. U.S. commercial sales contract values are excluded, as are values of the Military Assistance Service Funded account (MASF) which provided grant funding for South Vietnam, Laos, Philippines, Thailand, and South Korea. MASF for FY 1974 was $840,000,000; for FY 1975 $544,000,000. Related grant transfers to South Korea and Thailand, also excluded, were $11,000,000 in FY 1979; $132,000,000 in FY 1980; and $100,000,000 for FY 1981. All data are current as of January 1, 1982, and reflect termination of all sales contracts. The value of Iranian contracts canceled but not included in the U.S. data above are as follows: FY 1974 ($390,000,000); FY 1975 ($1,157,000,000); FY 1976 and transitional quarter ($236,000,000; FY 1977 ($2,953,000,000); FY 1978 ($1,673,000,000); FY 1979 ($6,000,000); FY 1980 ($0). FY 1981 ($0). Third World category excludes Warsaw Pact nations, NATO nations, Europe, Japan, Australia, New Zealand.

[2] U.S. data for FY 1976 includes the transitional quarter (FY 197T).

THE CIVIL SERVICE RETIREMENT SYSTEM

Mr. STEVENS. Madam President, Tom Diaz, a columnist with the Washington Times newspaper, recently wrote a five-part series on reforming the civil service retirement system. Not only does he write in a very colorful fashion, but the substance of what he is saying should not go unnoticed. He takes on the very volatile issues of social security, unfunded liabilities and the adequacy of Federal retirement benefits. He also discusses the legislation I introduced to try and remedy some of these problems. I hope these articles will serve to educate us all on these important topics.

I ask unanimous consent that these articles be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington times, Sept. 28, 1982]

FEDERAL RETIREMENTS AND ALL THAT ANGER

(By Tom Diaz)

If you think this column is barely civil, read what L.J. (Lud) Andolsek, president of the National Association of Retired Federal Employees (NARFE) has said publicly about folks who want to tamper with the civil-service retirement system.

Taxpayer movements advocating civil-service retirement reform are "jackals of the forest" who are "feeding editorial writers all sorts of mischief and exaggerations and deceptions," Andolsek told the National Association of Postal Supervisors at their convention in August. (Andolsek characterized this "mischief" as "garbage" at a meeting of the Federal Business Association in Philadelphia last week).

Then we have "the sickening situation in which some editorial writers and some syndicated columnists are lapping up the above mischief and running with it as the gospel truth." The situation is "sickening," Andolsek told the Philadelphia meeting, because he remembers the day when reporters were "skeptical enough to ask themselves: Would you buy a used car from this guy?"

Should I blush and pull at my tie on that one? Do I suffer from tired skepticism? Have I bought any used cars lately?

Andolsek also lashes out regularly at that all-purpose demon of left liberal America, "Big Business," charging—no doubt correctly—that "corporate executives in every board room from Wall Street to San Francisco live in mortal fear of the day when they might have to negotiate cost-of-living adjustment in company pension plans which equal the federal plan . . ."

I purr like a pussy cat compared to Andolsek's snarl. The guy sounds like the ugly in a Sanka Brand Decaffeinated Coffee commerical, (These are merely Andolsek's public utterances. I was his guest at lunch two weeks ago, and in private he is . . . well, a bit saltier.

What has Andolsek and the half million members of NARFE worked up is not too much coffee, but the fact that Congress is going to take on the volatile chore of reforming the civil-service retirement system, perhaps as soon as the lame duck session after the November elections.

The vehicle of reform will be legislation which Republican Senator Ted Stevens, of Alaska has introduced. In a greatly simplified nutshell, that bill will put future civil servants into a three-tier retirement plan, and "grandfather" present employees into the existing plan.

The three tiers of the Stevens plan are a base of Social Security coverage, a second tier in the form of a fully funded government "defined contribution" plan, and an optional "thrift plan" at the third tier.

Andolsek has been pounding the lectern from Las Vegas to the city of Brotherly Love, urging active and retired civil servants to "take off the silken gloves of restraint . . . put on the boxing gloves and fight back."

Well, fill it to the rim with grim, because the next sound you hear will be this running dog of the jackals of the forest lapping up garbage and mischief. I've looked over the used car of the civil-service retirement system, and I think it's time to trade it in on the new one that Stevens is selling.

But don't let my unabashedly biased opinion be the last word. (If it were up to me, there wouldn't be any problem—the civil service would be so small we could fund its retirement system out of the interest on Teddy Kennedy's teeny-teniest trust fund.)

In the best spirit of used car journalism (after all, what if some cretin over at the FTC reads my columns and gets worked up into a lather about balancing the information marketplace). I'm going to park these

two vehicles side by side in the next several columns. Walk around, kick the tires, check the valve pressure and decide for yourself.

The first thing you need to know is that this subject is about as simple as the score to Mahler's Fifth Symphony transcribed for simultaneous play on 12 electronic synthesizers. What follows in these columns is a primer; I will list in the last column on the subject the names and addresses of sources of further information.

Do not call me to argue whether they key shifts to C major or to F sharp in the third measure of the first movement. I will be short tempered and rude with you. Instead, write or call the "expert." I am but a mere running dog.

Let it be sufficient unto today to lay out the basic arguments of the two sides of this epic struggle.

The jackals of the forest say that the civil-service and military retirement systems are bankrupting the country because of massive debt they are piling up, that federal workers' benefit are too rich compared to private workers, that the present system benefits only a few civil servants at the expense of many, and that integrating civil-service retirement into the Social Security system will make both systems more sound.

NARFE, federal unions, and various front groups they have organized say that these arguments are buncombe. They argue that the debt is overstated, retirement benefits are modest compensation for an inadequate pay structure, merging civil service with Social Security would cost more and wreck an essential recruiting inducement, and—besides all that—the government would be breaking its promise to federal workers if it changes the terms of the deal under which they signed up.

Next column: A walk in the forest of these issues. Wear high button leathers. Not only are there jackals out there in the boonies. There may be a few snakes in the grass too.

[From the Washington Times, Sept. 30, 1982]

UNFUNDED LIABILITY . . . A SHELL GAME

(By Tom Diaz)

Gather round the campfire, girls and boys, while your kindly Uncle Tom tosses on another log of truth. The dark night of the taxpayer revolt is closing in around Washington, and the woods are full of jackals, the grass undulating with the massed hiss of snakes.

As promised in my last column, we're out here in the dismal forest to look at the issues involved in the coming fight over reforming the civil service retirement system. For those who missed that column, here is a summary of the arguments being made as Congress prepares to consider Republican Sen. Ted Stevens' reform bill.

Those shining eyes out in the woods on the right side of the fire are various taxpayer organizations—called "jackals" by hizzoner Lud Andolsek, president of the National Association of Retired Federal Employees—who say that the federal civil service and military retirement systems are bankrupting the country because of the massive debt they are piling up.

The gospel according to the jackals is that federal retirement benefits are too rich, the system benefits only a few at the expense of many, costs too much, and integrating it with the Social Security system will make both systems more sound.

The hostile eyes on the other side of the trees are Andolsek's NARFE, federal unions, and their front groups. (For the sake of balance in the animal kingdom, let's call them "teddies.") The teddies get downright nasty abut the "garbage" the jackals are feeding us suckers in the press.

The truth according to the teddies is that the debt is overstated, retirement benefits are modest compensation for a poor pay scale, merging civil service retirement with Social Security would wreck both systems and kill the best recruiting point the government has, and the government would be breaking its promise to federal workers if it changes the deal now.

Don't you just love a good jungle story? Doesn't it make the short hairs on the back of your neck tingle?

Let's venture out beyond the fire.

The jackals say that the present debt, or "unfunded liability" of the civil service retirement system, is more than $450 billion. (The military system is about the same, for a total close to $1 trillion.)

The teddies say 'taint so, citing the system's board of actuaries who put the unfunded liability at "only" $166 billion. If there is any doubt which number is correct, they sniff, the government pays interest on the board of actuaries figure.

What is "unfunded liability?" you're groaning, and who cares? Watch closely, because this is just like the old pea under the shell game.

The first part is fairly easy. As time passes, workers earn rights under a retirement system— the system owes them benefits. But no one can know for certain how much the system owes in advance of any given year's actual experience, because some workers die, quit or become disabled. Also pay scales (upon which annuities are based) and benefits linked to inflation change in more or less unpredictable ways.

Any pension plan's administrators must therefore estimate how much the system owes its present and past employees—the system's liability. When what the retirement fund has on hand and what it expects to take in are less than the estimated liability, the liability is said to be "unfunded."

(Private plans are required by law to "fund," or put aside money, to meet that liability. At the other extreme is the military retirement plan, which is a "pay-as-you-go" system, meaning that it has no funded reserve—the taxpayers just kick in whatever is needed every year to meet the pension payroll.)

Everyone agrees the civil service system has a large unfunded liability. But, how much? Here is where the shells come in.

Actuaries can figure the liability on either a "static" or "dynamic" basis. Static calculations do not consider future pay increases or inflation-linked cost-of-living adjustments. Dynamic calculations do.

The jackals use the dynamic basis, and come up with $450 billion. The teddies whip a quick shell over that number and point out that the official board of actuaries for the civil service system uses a static basis, resulting in the lower figure.

What the teddies don't tell you is that when you lift the third shell, you find that the board uses static assumptions only because it is required to by law. It has urged Congress in its official reports to change over to the dynamic basis, because the static basis results in "an artificially low level of funding."

Static or dynamic, take your pick. You don't have to be bitten by a jackal or a snake in the grass to figure out for yourself which basis is more realistic.

But no matter how you figure it, the unfunded liability has grown by leaps and bounds in recent years, largely because of inflation's impact on COLAs. (The teddies also point out that it was big to begin with because the government did not kick in its share at all in the system's early days).

Why should anyone care about this unfunded liability? Because someone has to come up with the money to meet the liability, and that someone is John Q. Taxpayer.

John Q. cares. John Q. cares a whole lot.

[From the Washington Times, Oct. 5, 1982]

TARZAN TAKES TRIP IN PENSION JUNGLE

(By Tom Diaz)

Last week I began a series on the coming battle over reform of the civil service retirement system, of which this is the third column.

Now I know why Tarzan preferred life on the mountain top, among the Great Apes. Biting, nagging beasties slither and crawl through the underbrush of this subject. Diabolical traps spring down on any statement the commentator with a point of view dares make. Beautiful flowers sting. Vines wiggle to life, and firm ground turns to quicksand.

A more cold-hearted scribe would simply call in a strike of intellectual napalm, go home and pop open a 12-ounce tranquilizer. But the first thing they taught me in chimpanzee school was: "Never let go of the vine while swinging between trees."

So, hang on, Jane. Here we go again.

Is the present civil-service retirement system too generous? That depends on what one compares with what.

For example, one can analyze the question in terms of the dollar amount of civil-service annuities. But which civil-service annuities shall we compare with which private-sector annuities? The tiny taco of the short-service pensioner who retired at a low grade, or the big enchilada of a longer-service and higher-graded retiree?

At one extreme, former Rep. Hastings Keith—co-chairman of the National Committee on Public Employee Pension Systems, a reform action group—waves his combined civil service, Social Security and military pensions of more than $65,000 a year to illustrate his point that the system is too generous.

But this punch lands below the navel. The average annuitant gets nothing like $65,000 a year. According to figures given me by the Office of Personnel Management in August, the average annuity paid retirees in fiscal 1981 was $962 per month. (Some other sources put the figure at $1,036. Take your pick.)

On the other hand, the average civil-service pension is clearly vastly higher than the lowest common denominator of the private sector, Social Security, which awarded an average monthly benefit during 1981 of $386. This is especially so when one considers that most civil-service annuitants arrange to work long enough in the private sector to qualify for Social Security pensions on top of their government annuities.

Even so, only hard-core bureaucrat-bashers argue that the government ought to provide less for its servants' retired years than do reasonably enlightened corporations, which stack a corporate plan on top of the Social Security base. Which brings us to a more cogent comparison: How does the civil-service pension plan stack up next to a good corporate plan?

Too well, say its critics.

They hammer on two points that they say make the government's system too rich: Civil servants may retire at age 55 after 30

years of service, without reduction in their annuities. (Unlike their private sector counterparts, who must give up significant reductions even when allowed to retire so young.) And civil-service annuitants over age 62 enjoy cost-of-living adjustments that are fully indexed to the rate of inflation. (Almost no private plans provide this feature, and Social Security—which does—is in big financial trouble because of it.)

Opponents of reform argue that civil servants cannot really retire with full benefits at age 55. (According to a NARFE fact sheet, an age 55 annuity is figured at 56.25 of the highest three years average salary. It takes 41 years and 10 months of service to qualify for the maximum annuity of 80 percent of salary).

NARFE and others also argue that the "real enemy" is inflation, not the costly COLA's, which inflation triggers.

These are not frivolous points. But it is simply beyond reasonable argument that retirement at age 55 and indexed COLA's have enormous effects on the cost of the system, which the taxpayer ultimately has to bear.

And that leads to Thursday's topic: the taxpayer revolt, Social Security reform and all that.

[From the Washington Times, Oct. 7, 1982]

LION LURKS BEHIND PENSION REFORM

(By Tom Diaz)

For those who just joined the safari, this is the fourth in a series of columns exploring the jungle of issues involved in the fight over reform of the civil-service retirement system.

If you care about these things, you know that pressure has been building to change dramatically the government's pension system. (If you don't care, have patience, friend. I can see the snows of Kilimanjaro through the fringes of my next column, which will be the last on this subject for a while.)

Senate Republican Whip Ted Stevens has introduced legislation that would blanket present government employees into the old system and put new employees under a three-tiered system consisting of basic Social Security coverage, a government-funded "Defined contribution" plan on top of that, and an optional "thrift" plan for those who care enough to save the very most.

But Stevens' plan is a lamb next to the lion that is licking its chops off in the tall grass. That lion is universal Social Security coverage. Now, For all federal employees, present and future. Under terms that might be much harsher than those offered by Alaska's finest.

Civil servants are entitled to scratch their heads and ask, why us, O Lord? In search of the answer to that question let us navigate the swollen waters of that great river of taxes, which courses from the headwaters of John Q. Public's pockets through Babylon-on-Potomac.

That river has two great branches for purposes of today's lesson. The first is general-revenue funding of the civil-service retirement system.

An astonishing number of federal workers believe their retirement system is self-supporting, funded by their contributions and the matching contributions made by their agencies. The rude fact is that it is not. The system is pumped up by large taxpayer contributions out of general revenues.

Proponents and opponents of reform throw fiscal grenades at each other on the exact amount of what should be counted as taxpayer subsidy, as opposed to legitimate employer contributions. It is one of those things that depend on how much you count under which category.

Putting aside the argument over how to label the dollars, the amounts are instructive on their own merits. In 1981—quoting NARFE figures—employees paid $4 billion into the system, the government $18 billion and $6 billion more came into the system in interest payments.

Let us also put aside the equity argument (was it Uncle Sam's fault that we got to this state in the first place, and is it fair to change the rules now?). The point is that this $18 billion payment out of general tax revenues is the source of much of the reform pressure, especially since the share it represents has grown dramatically over the last 20 years, and is projected to rise even more in future years.

The other branch of the river of taxes is the Social Security system. In spite of popular misconception to the contrary, the Social Security system is not funded by some massive and prudently invested trust set aside for workers' golden years. It is for all practical purposes a pay-as-you-go system, which means present workers' payroll taxes come in one door, kiss the books of account and skip out the other door in the form of benefits payments.

The combination of inflation and chronic unemployment has kicked those benefits to such levels (Social Security has inflation-linked COLAs like the civil-service system) that something has to give soon—either changes in benefits (read, "reductions") or tax increases.

A blue-ribbon commission is studying what to do about that unpleasant reality, which brings us to the point at which the two rivers flow together. The temptation to bring government workers into the system will be overwhelming. According to a Senate aide, covering all government workers now would pump $60 billion into Social Security by 1990.

Thus, the lion licking its chops.

[From the Washington Times, Oct. 12, 1982]

THE MAIN EVENT—A DILLY OF A BATTLE

(By Tom Diaz)

Forget Dempsey and Firpo. Don't even mention Ali (nee Clay) and Frazier. The Thrilla' in Manila was a waltz compared with the duke fest coming up over reform of the federal pension system.

This is the last in a series of columns that have previewed the coming year's main event. Today we look over Sen. Ted Stevens' Civil Service Pension Reform Act of 1982. Does it fill the bill?

I say it does. But let me first dispose of one bit of cleverness associated with the Stevens bill. That is the advice being circulated now that the senator will not bring his bill to the floor until he has gained the support of federal employees for his reform.

Come on, Sen. Ted. You and I both know that it's either your bill or nothing for federal workers.

The chances are 999 out of 1,000 that the Social Security Reform Commission will recommend "universal coverage"—that is, bringing federal workers into the Social Security system—when it reports this winter. Not only has every other reform panel made that recommendation—in the past, but universal coverage may well be the only major short-term fix that can get through the Congress.

There is just no way that bringing civil servants into the Social Security system will not be seriously considered when Congress takes up Social Security reform, whether it be in the lame-duck session or in an early session in January.

When the hard bargaining begins, federal workers will either have the Stevens bill on the table or nothing, since their advocates have dug in their heels and failed to come up with anything better (or even different) to offer.

Which is the first point in favor of the Stevens legislation. Senate sources (outside of Stevens office and close to the Social Security reform issue) say that they have never seen a time when it seemed more likely that the Congress will bring civil servants under Social Security. The Stevens plan accepts that fact, uses it as a base and, then builds a total pension plan on top of it.

But there is much more than that pragmatic point to be said for the Stevens bill.

It allows all presently employed civil servants to stay in the old system if they choose, thus preserving the equity of past promises. It also allows them to switch, and some experts I have talked to say that they would expect most workers 45 and under to switch to the Stevens plan because—it is a better investment than the present system for workers in that age range.

Stevens' plan also cuts short the blank check on the Treasury, which the mounting unfunded liability represents, by replacing the present system's uncontrolled cost with a fully funded "defined contribution" plan. This means that the amount the government puts in is defined in advance. The amount of the annuity depends on the return on that investment.

Two more points strongly in favor of the Stevens plan: It will put a substantial part of the government's defined contribution to work in the nation's capital market, instead of simply soaking up capital through taxes. And the three out of four workers who leave the government before retirement age can now take the fully funded portion with them, which will be a healthy chunk of change.

I promised to list sources for further information. Space permits only two. They are as far apart on the issues as you can get: National Association of Retired Federal Employees, 1533 New Hampshire Ave. N.W., Washington, D.C. 20036 and Taxpayers for Federal Pension Reform, P.O. Box 7755, Philadelphia, Pa. 19101.

SENATE CONCURRENT RESOLUTION 128—RELATING TO MONETARY POLICY

COSPONSORS

Mr. ROBERT C. BYRD. Madam President, during yesterday's session I introduced Senate Concurrent Resolution 128, relating to this Nation's monetary policy, for myself and 40 of my colleagues. The names of those cosponsors were inadvertently omitted from the CONGRESSIONAL RECORD and I would now like to include the names of those Senators who have cosponsored this resolution with me: Senators BAUCUS, BENTSEN, BIDEN, BOREN, BRADLEY, BUMPERS, BURDICK, CANNON, CHILES, CRANSTON, DECONCINI, DIXON, DODD, EAGLETON, EXON, FORD, GLENN, HART, HEFLIN, HOLLINGS, HUDDLESTON,

INOUYE, JACKSON, JOHNSTON, KENNEDY, LEAHY, LEVIN, MATSUNAGA, MELCHER, METZENBAUM, MITCHELL, MOYNIHAN, PELL, PRYOR, RANDOLPH, RIEGLE, SARBANES, SASSER, STENNIS, and TSONGAS.

ROUTINE MORNING BUSINESS

(During the day, routine morning business was transacted and additional statements were submitted, as follows:)

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

FILLING THE STRATEGIC PETROLEUM RESERVE—MESSAGE FROM THE PRESIDENT—PM 197

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States; which was referred to the Committee on Energy and Natural Resources:

To the Congress of the United States:

This is to advise the Congress that pursuant to Section 160(c)(1)(B) of the Energy Policy and Conservation Act (Public Law 94-163) as amended by Section 4(a) of the Energy Emergency Preparedness Act of 1982 (Public Law 97-229), I find it would not be in the national interest to fill the Strategic Petroleum Reserve at the rate of 300,000 barrels per day during Fiscal Year 1983.

When my Administration took office 22 months ago, one of my first actions was to direct a rapid acceleration of the pace of oil acquisition for the Strategic Petroleum Reserve. As a result, the fill rate during Fiscal Year 1981 averaged over 290 thousand barrels per day. The fill rate for Fiscal Year 1982 averaged 215 thousand barrels per day. This contrasts sharply with the average fill rate of less than 77 thousand barrels per day achieved during the four years of the prior Administration. Of the 288 million barrels now in the Strategic Petroleum Reserve, 178 million barrels, or 61 percent, were added during my Administration.

This Administration has also entered into long-term purchase commitments that will give greater assurance of maintaining our fill rate objectives over the coming year while lowering the cost of building the reserve.

Another major policy action instituted at the start of this Administration—immediate decontrol of the domestic oil market—has also contributed greatly to our energy security by reducing oil imports and stimulating domestic production. In the 22 months of my Administration, oil imports have declined dramatically. Our dependence on imports from OPEC sources is now only 51 percent of the 1980 level.

As a result of rapidly implementing these policy actions to enhance our energy security, the oil on hand today in the Strategic Petroleum Reserve would provide 130 days of complete replacement for OPEC imports in the event of an embargo. That is nearly six times the level of protection our nation averaged in 1980.

The commitment of this Administration to building and maintaining an adequate Strategic Petroleum Reserve is clearly demonstrated by the record of accomplishment. But we are equally committed to carrying out this program in the most efficient, cost-effective manner. The fill rate at which we plan to operate during 1983 reflects a careful balance between these two objectives. To operate at the 300,000 barrel per day rate would require extensive use of temporary storage facilities, which would significantly increase the cost of the program for very limited incremental benefit.

I must also note that increasing our fill rate objective to 300,000 barrels per day in fiscal year 1983 would force additional expenditures of over $1 billion. In the current economic climate, I believe that this additional expenditure would be harmful to growth and job creation because of the increased Treasury borrowing it would necessitate. Compliance with the increased fill rate would thus be inappropriate due to economic conditions affecting the general welfare.

RONALD REAGAN.

THE WHITE HOUSE, *December 1, 1982.*

STRATEGIC PETROLEUM RESERVE DRAWDOWN PLAN MESSAGE FROM THE PRESIDENT—PM-198

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Energy and Natural Resources:

To the Congress of the United States:

In accordance with Sections 4(c) and 6(b) of the Energy Emergency Preparedness Act of 1982 (EEPA) (P.L. 97-229), I hereby transmit the Strategic Petroleum Reserve (SPR) Drawdown Plan, Amendment No. 4, and the Strategic Petroleum Reserve Drawdown and Distribution Report.

The purpose of the SPR Plan is to provide new procedures for the drawdown, sale and distribution of SPR oil in the event of a severe energy supply disruption, or to fulfill obligations of the United States under the International Energy Program. The SPR Report focuses on the basic procedures and policies governing the use of the SPR, as required by the EEPA.

RONALD REAGAN

THE WHITE HOUSE, *December 1, 1982.*

MESSAGE FROM THE HOUSE

At 4:34 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the bill (S. 3002) to increase the authorization of appropriations for the Allen J. Ellender fellowship program, and for other purposes, with amendments; it insists upon its amendments to the bill, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. PERKINS, Mr. FORD of Michigan, Mr. ANDREWS, Mr. MILLER of California, Mr. CORRADA, Mr. KILDEE, Mr. WILLIAMS of Montana, Mr. HAWKINS, Mr. BIAGGI, Mr. RATCHFORD, Mr. WASHINGTON, Mr. SMITH of Iowa, Mr. GOODLING, Mr. JEFFORDS, Mr. COLEMAN, Mr. ERDAHL, Mr. PETRI, Mrs. ROUKEMA, Mr. DENARDIS, Mr. CRAIG, Mr. ERLENBORN, and Mrs. FENWICK as managers of the conference on the part of the House.

The message also announced that the House disagrees to the amendment of the Senate to the bill (H.R. 5447) to extend the Commodity Exchange Act, and for other purposes; asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and that the following be the managers of the conference on the part of the House: Mr. DE LA GARZA, Mr. JONES of Tennessee, Mr. BEDELL, Mr. GLICKMAN, Mr. DASCHLE, Mr. DORGAN, Mr. HARKIN, Mr. ENGLISH, Mr. PANETTA, Mr. WAMPLER, Mr. JEFFORDS, Mr. COLEMAN, Mr. ROBERTS of Kansas, Mr. SKEEN, Mr. GUNDERSON, and Mr. EVANS of Iowa. Mr. DINGELL, Mr. WIRTH, and Mr. BROYHILL, as additional conferees, for consideration of title I and section 237 of H.R. 5447 as passed by the House, and section 3 of the Senate amendment.

The message further announced that the House has passed the following bill, in which it requests the concurrence of the Senate.

H.R. 7158. An act making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain Independent Agencies for the fiscal year ending September 30, 1983, and for other purposes.

HOUSE BILL PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 7158. An act making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain Independent Agencies for the fiscal year ending September 30, 1983, and for other purposes.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-1243. A resolution adopted by the City Council of Berkeley, Calif., supporting the retention and maintenance of the Western Regional Research Center located in Albany, Calif.; to the Committee on Agriculture, Nutrition, and Forestry.

POM-1244. A resolution adopted by the Cuban American Party supporting the endorsement of Mr. Julio Garceran for admission to West Point; to the Committee on Armed Services.

POM-1245. A petition from a citizen of Bandera, Texas urging Congress to make our dollar "good as gold" by supporting Senate bill 6 to return America's currency to the gold standard; to the Committee on Banking, Housing, and Urban Affairs.

POM-1246. A resolution adopted by the Board of Governors of the National Association of Housing and Redevelopment Officials expressing their growing concern over the deteriorated financial circumstances with which their respective agencies are presently confronted; to the Committee on Banking, Housing, and Urban Affairs.

POM-1247. A resolution adopted by the American Association of Port Authorities relating to Federal permitting procedures for port projects; to the Committee on Commerce, Science, and Transportation.

POM-1248. A resolution adopted by the American Association of Port Authorities regarding continuing independence from Government control of port and terminal use and development; to the Committee on Commerce, Science, and Transportation.

POM-1249. A resolution adopted by the 16th Guam Legislature; to the Committee on Energy and Natural Resources.

"RESOLUTION No. 244

"Be it resolved by the Legislature of the Territory of Guam

"Whereas, Section 9-A, Subsection (c), of the Organic Act of Guam, as amended, provides that the Federal Comptroller shall bring to the attention of the Secretary of the Interior and the Governor of Guam all failures to collect amounts due and the use of property and expenditure of funds which are irregular; and

"Whereas, the audit reports submitted by Ben T. Fukutome, U.S. Government Comptroller for Guam, the Trust Territory of the Pacific Islands and the Commonwealth of the Northern Mariana Islands, have all been aimed at improving the efficiency of the government of Guam; and

"Whereas, Fukutome has presented objective, unbiased reports to the officials of the government of Guam; and

"Whereas, a few of the reports submitted by Fukutome are:

"(1) Annual audits of the government of Guam.

"(2) Government of Guam's payroll system (Report No. RG81). This audit stated that the government of Guam's system for time and attendance recording and reporting was not adequate to assure that employees have either worked or are on leave status for the hours reflected on their paychecks. This audit concluded that large sums of money are regularly paid outside the regular biweekly payroll as supplemental special payments without sufficient documentation as to the reason for payment or with proper approval.

"(3) Department of Revenue and Taxation (Report No. RG79-5). The Federal Comptroller's review of the Department of Revenue and Taxation (DRT) operations indicated that improvements were most needed in the management and administration of general taxes and property taxes. Particular attention was directed to tax collection, auditing of tax returns, contrary and safeguarding of tax return information, and assessing property taxes. This audit report revealed that delinquent income and business taxes had increased to over $1.5 Million as of June 30, 1978. The audit concluded that lack of time collection resulted in substantial revenue loss because: (i) businesses became bankrupt; (ii) taxpayers left the island; and (iii) taxes become uncollectible when the status of limitations expired; and

"Whereas, during his recent visit to Guam, Pedro San Juan promised the members of the Sixteenth Guam Legislature that he would be an advocate for the needs and interests of the people of Guam; and

"Whereas, the fuel oil contract between the Guam Power Authority and Coastal/Bermuda Limited is controversial in nature and of questionable validity; and

"Whereas, the members of the Sixteenth Guam Legislature believe that further investigation into the Coastal/Bermuda Limited contract may prove that significant savings could be realized by the people of the territory of Guam who now pay nearly three times the national average for electricity; and

"Whereas, the Governor requested the Government Comptroller to conduct an audit of the fuel oil contract entered into between Guam Power Authority and Coastal/Bermuda Limited, and pursuant to that request, the Government Comptroller instituted such an authority and

"Whereas, while the audit was in progress, Fukutome was personally directed by Pedro San Juan to cease his work on the matter; and

"Whereas, the members of the Sixteenth Guam Legislature has been pleased with Federal Comptroller Fukutome's previous work and the members of the Guam Legislature believe that Fukutome should be authorized to complete the investigation into the Coastal/Bermuda Limited contract; now, therefore, be it

"Resolved, That the members of the Sixteenth Guam Legislature request that Secretary Watt direct Assistant Secretary San Juan to direct Fukutome to complete his investigation on the Coastal-Bermuda Limited fuel oil contract with the Guam Power Authority; and be it further

"Resolved, That the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the President of the United States; to Mr. James G. Watt, Secretary of Interior; to Congressman A. B. Won Pat; to Mr. Pedro San Juan, Assistant Secretary of Interior; to the Comptroller General, General Accounting Office, Washington, D.C.; to the Chairman, Senate Committee on Energy and Natural Resources; to the Chairman, House Committee on Interior and Insular Affairs; to the Chairman of the Board of Directors, Guam Power Authority; and to the Governor of Guam."

Duly and regularly adopted on the 19th day of March 1982.

THOMAS C. CRISOSTOMO,
Legislative Secretary.
THOMAS V. C. TANAKA,
Speaker.

POM-1250. A resolution adopted by the 16th Guam Legislature; to the Committee on Energy and Natural Resources:

"RESOLUTION No. 349

"Be it resolved by the Legislature of the Territory of Guam:

"Whereas, serious questions have been raised about a possible cover-up in the Department of the Interior involving Assistant Secretary for Territorial and International Affairs Pedro Sanjuan and the Governor of Guam; and

"Whereas, Assistant Secretary Sanjuan, who last year pledged to work in the best interest of Guam, has interferred with the affairs of the government of Guam by removing the Government Comptroller during an investigation; and

"Whereas, the Government Comptroller, Ben T. Fukutome, was acting well within the duties of his assignment by investigating allegations that votes for the Primary Election had been "bought" with government funds by employing over 1,000 provisional employees—and Assistant Secretary Sanjuan's recall of Fukutome has clouded the credibility of Guam's electoral process; and

"Whereas, the Executive Branch is still hiring provisional employees; and

"Whereas, it is the sense of the Sixteenth Guam Legislature that it would be in the best interest of the people of Guam, as well as the taxpayers of America, if the Department of Justice were requested to probe this relationship and answer the questions that are being raised; and

"Whereas, it was only six months ago that the Guam Legislature adopted Resolution 244, a copy of which is attached, "Expressing the Guam Legislature's support for Ben T. Fukutome for his objective examination of the fuel oil supply contract between Guam Power Authority and Coastal/Bermuda Limited"; and

"Whereas, the Sixteenth Guam Legislature adopted Resolution 244 as a result of Sanjuan's recall of Fukutome, and his arbitrary assignment of a retired federal comptroller from American Samoa to complete the audit commenced by Fukutome; and

"Whereas, the audit vindicated Fukutome and the Sixteenth Guam Legislature; now, therefore, be it

"Resolved, that Assistant Secretary Sanjuan's latest recall of Fukutome over the provisional hirees, and his withholding of the Supply Management Division audit impels the Sixteenth Guam Legislature to request the President of the United States to direct the Federal Bureau of Investigation to investigate a possible cover-up by Assistant Secretary Sanjuan and the Governor of Guam and the former's involvement in the internal affairs of the government of Guam during an election year; and be it further

"Resolved, that it is the sense of the Sixteenth Guam Legislature for the justice to prevail the federal comptroller must be free to objectively analyze the expenditures of

Guam's public funds, in a timely manner so that honest public servants need not fear the results of audit; and be it further

"Resolved, that the members of the Sixteenth Guam Legislature request that the President of the United States direct the Secretary of the Interior to have the Government Comptroller for Guam immediately complete the audit concerning the provisional hirees; and be it further

"Resolved, that the Sixteenth Guam Legislature, on behalf of the people of Guam, does hereby express support for Fukutome's continuance as the Government Comptroller for Guam; and be it further

"Resolved, that the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the President of the United States; to the Vice President of the United States; to the President Pro tem of the United States Senate; to the Speaker of the United States House of Representatives; to the Secretary of the Interior; to the United States Attorney General; to the Comptroller General, General Accounting Office; to Guam's Delegate to the United States Congress; to the Chairman of the United States Senate Committee on Energy and Natural Resources; to the Chairman of the House Committee on Interior and Insular Affairs; and to the Governor of Guam."

POM-1251. A resolution adopted by the Miller Citizens Corp. of Gary, Ind., concerning a memorial for the late Adam Benjamin, Jr.; to the Committee on Energy and Natural Resources.

POM-1252. A resolution adopted by the city council of Berkeley, Calif., calling for a 1-year moratorium in connection with the Hardin Flat power project; to the Committee on Energy and Natural Resources.

POM-1253. A resolution adopted by the city council of the city of Raleigh, N.C., relating to the Environmental Protection Agency's proposed amendment to "Regulation of Fuels and Fuel Additives"; to the Committee on Environment and Public Works.

POM-1254. A resolution adopted by the Conference of State Sanitary Engineers urging Congress to amend the Clean Water Act (Public Law 92-500) to eliminate the requirements of a national pollutant discharge elimination system permit for water releases from reservoirs; to the Committee on Environment and Public Works.

POM-1255. A resolution adopted by the executive board of the Los Angeles City Council on Aging supporting the resolution on social security which was adopted by the California Senior Legislature at its 1982 session; to the Committee on Finance.

POM-1256. A resolution adopted by the city council of the city of Berkeley, Calif., urging that Federal and California State Legislatures enact enabling legislation which will make the cost of repairs or replacement of building sewer laterals fully deductible from Federal and California income taxes when these repairs or replacement are required by a sewering agency as part of an Environmental Protection Agency-certified infiltration/inflow correction program; to the Committee on Finance.

POM-1257. A resolution adopted by the city council of the city of Monroe, Mich., supporting the general revenue sharing program and urging the present administration and our congressional leaders to reauthorize this act; to the Committee on Finance.

POM-1258. A resolution adopted by the commission of the town of Lake Park, Fla. supporting the reauthorization of the general revenue sharing program after its expiration date; to the Committee on Finance.

POM-1259. A resolution adopted by the municipal council of the city of Paterson. N.J. urging the Congress of the United States of America to immediately initiate and enter into a mutual nuclear weapons freeze with the Soviet Union; to the Committee on Foreign Relations.

POM-1260. A resolution adopted by the Allegheny County Board of Commissioners of Pittsburgh, Pa., urging Congress to propose to the Soviet Union that both Governments immediately agree to a mutually verifiable freeze of all further development, testing, production, and deployment of nuclear warheads, missiles, and delivery systems; to the Committee on Foreign Relations.

POM-1261. A resolution adopted by the voters of the State of Wisconsin urging the Congress to negotiate a mutual nuclear weapons moratorium and reduction, with appropriate verification, with the Soviet Union and other nations; to the Committee on Foreign Relations.

POM-1262. A resolution adopted by a majority vote of the city of Kearney, Nebr., urging the U.S. Congress and the Soviet Union to agree to immediately halt the testing, production, and further deployment of all nuclear weapons, missiles, and delivery systems in a manner that could be checked and verified by both countries; to the Committee on Foreign Relations.

POM-1263. A petition from a citizen of Thousand Oaks, Calif., urging Congress to reject "the Gay Bill of Rights" and reaffirm traditional God-given morality; to the Committee on the Judiciary.

POM-1264. A concurrent resolution adopted by the Legislature of the State of Texas; to the Committee on Labor and Human Resources:

"HOUSE CONCURRENT RESOLUTION

"Whereas, the number of elderly persons in Texas is growing rapidly; the 1980 census reflects more than 1.9 million Texans age 60 and older, and the total is projected to increase to more than 3 million by the year 2000; and

"Whereas, the quality of life of senior citizens is very important, and insofar as possible, the aging should be able to enjoy within their own families and communities a life of fulfillment, health, security, and contentment and should be appreciated as an integral part of society; and

"Whereas, the great majority of these persons are able to live full and useful lives. For some, however, advancing age brings increasing dependence on their families, communities, and governments. Older people in this society should be able to participate in the full continuum of community life in order to enhance their physical and mental health; and

"Whereas, complex issues require a working partnership among individuals, families, communities, volunteers, private enterprise and government to plan for the most efficient and effective use of resources from every sector to meet the needs of our elderly population; and

"Whereas, being party of the work force is conducive to better mental and physical health, and appropriate opportunities for obtaining financial stability, through employment, public, private subsidies, or other forms of assistance pension should be fostered for the elderly; and

"Whereas, senior citizens in Texas have undertaken to help themselves by means of a statewide network of area agencies on aging sponsored by regional councils, local governments, and private nonprofit organizations through programs administered and supported by the Texas Department of Aging; and

"Whereas, improper nutrition is recognized as an acute problem among the elderly, with many older persons being unable to afford quality food for well-balanced diets or lacking mobility or incentive to prepare nutritious meals; and

"Whereas, proper nutrition is an essential component of good health and is essential for people to live productive, meaningful, and independent lives; now, therefore, be it

"Resolved by the Texas House of Representatives, the Senate concurring, That the 67th Legislature, 3rd Called Session, commend all components of the Texas State Aging Network for their outstanding efforts on behalf of the elderly; and, be it further

"Resolved, That the 67th Legislature recommend that meeting the needs of older persons be a continuing legislative commitment; and, be it further

"Resolved, That the Texas Legislature hereby respectfully memorialize the Congress of the United States to give priority consideration to providing adequate funding to maintain and strengthen comprehensive and coordinated services for the elderly citizens of our nation, particularly those services providing adequate and proper nutrition; and, be it further

"Resolved, That a copy of this resolution be prepared and forwarded to the President of the United States, the President of the Senate and the Speaker of the House of Representatives of the United States Congress, and all members of the Texas delegation to the Congress with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, with an amendment in the nature of a substitute:

S. 2631. A bill to regulate interstate commerce by providing for a uniform product liability law, and for other purposes (Rept. No. 97-670).

S. 2204. A bill to promote interstate commerce by prohibiting discrimination in the writing and selling of insurance contracts, and for other purposes (with minority views) (Rept. No. 97-671).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. SPECTER:

S. 3055. A bill to authorize improved flood protection on the mainstem of the Susquehanna River in Luzerne County, Pa., and environs; to the Committee on Environment and Public Works.

S. 3056. A bill to authorize improved flood protection on portions of the west branch of the Susquehanna River in Lock Haven, Pa., and environs; to the Committee on Environment and Public Works.

S. 3057. A bill to authorize improved flood protection on the mainstem of the Susquehanna River in Harrisburg, Pa., and environs; to the Committee on Environment and Public Works.

S. 3058. A bill to authorize funds for beach erosion at Presque Isle Peninsula, Pa.; to the Committee on Environment and Public Works.

By Mr. HEINZ:

S. 3059. A bill to effectuate the congressional directive that accounts established under section 327 of the Garn-St Germain Depository Institutions Act of 1982 be directly equivalent and competitive with money market mutual funds; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HATFIELD (for himself, Mr. PACKWOOD, Mr. HART, Mr. KASTEN, Mr. HAYAKAWA, Mr. TSONGAS, Mr. LUGAR, Mr. CRANSTON, Mr. BUMPERS, Mr. HEINZ, Mr. PROXMIRE, AND MR. DURENBERGER):

S. 3060. A bill to amend section 7(b) of the Wild and Scenic Rivers Act; to the Committee on Energy and Natural Resources.

By Mr. MOYNIHAN (for himself, Mr. RANDOLPH, Mr. ROBERT C. BYRD, Mr. CRANSTON, Mr. INOUYE, Mr. KENNEDY, Mr. EAGLETON, Mr. RIEGLE, Mr. MATSUNAGA, Mr. MELCHER, Mr. BRADLEY, Mr. DIXON, Mr. HART, Mr. BAUCUS, Mr. LEVIN, Mr. JACKSON, AND MR. TSONGAS):

S. 3061. A bill to repair and rehabilitate Amercia's highways, roads, bridges, mass transit sytems, sewers, and water supply systems; to put Americans back to work carrying out needed public works repairs; and to develop a long-term national public works investment plan; to the Committee on Environment and Public Works.

By Mr. D'AMATO:

S.J. Res. 269. Joint resolution to designate December 11, 1982, as "Fiorello H. La Guardia Day."; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MOYNIHAN (for himself, Mr. STAFFORD and Mr. RANDOLPH):

S. Res. 498. A resolution prohibiting the sale of the U.S. Custom House at Bowling Green in New York City; to the Committee on Environment and Public Works.

By Mr. SPECTER:

S. Con. Res. 129. A concurrent resolution to express the sense of the Congress concerning the legal minimum age for drinking and purchasing alcohol; to the Committee on the Judiciary.

By Mr. SCHMITT (for himself and Mr. NUNN):

S. Con. Res. 130. A concurrent resolution expressing the sense of the Congress that the advancement of science and technology in the communications and electronics industry is vital to the needs of America; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. SPECTER:

S. 3055. A bill to authorize improved flood protection on the mainstream of the Susquehanna River in Luzerne County, Pa., and environs; to the Committee on Environment and Public Works.

S. 3056. A bill to authorize improved flood protection on portions of the West Branch of the Susquehanna River in Lock Haven, Pa., and environs; to the Committee on Environment and Public Works.

S. 3057. A bill to authorize improved flood protection on the mainstream of the Susquehanna River in Harrisburg, Pa., and environs; to the Committee on Environment and Public Works.

S. 3058. A bill to authorize funds for beach erosion control at Presque Isle Peninsula, Pa.; to the Committee on Environment and Public Works.

(The remarks of Mr. SPECTER on the legislation appear earlier in today's RECORD.)

By Mr. HEINZ:

S. 3059. A bill to effectuate the Congressional directive that accounts established under section 327 of the Garn-St Germain Depository Institutions Act of 1982 be directly equivalent and competitive with money market mutual funds; to the Committee on Banking, Housing, and Urban Affairs.

LEGISLATION TO ALLOW BANKS TO COMPETE WITH MONEY MARKET FUNDS

● Mr. HEINZ. Mr. President, today I am introducing a bill that is essential to the ability of banks to be able to compete on an equal footing with money market mutual funds. For the past half century America's capital markets have led the world yet until the passage of the Garn-St Germain depository institutions amendments of 1982, the banking sector of these markets has struggled to keep afloat. Banks were shackled by outdated Government regulations that denied them the right to offer interest rates that could compete in today's markets.

Even under the new law banks that offer accounts that compete with money market funds must hold a portion of their customers money as noninterest bearing reserves at the Federal Reserve Banks. This legislation would provide that the Federal Reserve would pay interest to the depository institutions on those reserves. The result is that the money that a customer has in the new accounts that banks will offer beginning December 14 this year will be fully invested in interest bearing assets just as it is with money market mutual funds.

In the depository institutions amendments of 1982, Congress directed the Depository Institutions Deregulation Committee to authorize a deposit account that banks and thrifts could offer that would be "directly equivalent to and competitive with" money market mutual funds. Congress understood that without the ability to truly compete the bank depository base which is essential to homeownership, business prosperity, community development and monetary policy would continue to erode.

Although we have eliminated the shackles of interest ceilings, we will not have accomplished our goal of placing depository institutions on an equal footing with money market funds if we do not provide for the payment of interest on reserves held at the Federal Reserve Banks against the competitive account.

If a bank is to be required by the Federal Reserve Board to hold reserves against these accounts then funds on deposit at a bank when invested in securities identical to those a money market fund uses will result in a lesser rate of return to the customer. For example, if the Federal Reserve requires that a bank place 12 percent of the funds deposited in the competitive account in non-interest-bearing reserves, then the bank can only invest the remaining 88 percent. That will reduce the interest that a bank can earn for its depositors by more than 1¼ percent under current market conditions.

I commend this bill to my colleagues. We intended to set banks free to compete when we passed the Garn-St Germain depository institutions amendments. In keeping with the foresight of that policy I urge its swift approval.●

By Mr. HATFIELD (for himself, Mr. PACKWOOD, Mr. HART, Mr. KASTEN, Mr. HAYAKAWA, Mr. TSONGAS, Mr. LUGAR, Mr. CRANSTON, Mr. BUMPERS, Mr. HEINZ, Mr. PROXMIRE, and Mr. DURENBERGER):

S. 3060. A bill to amend section 7(b) of the Wild and Scenic Rivers Act; to the Committee on Energy and Natural Resources.

AMENDMENT OF WILD AND SCENIC RIVERS ACT

● Mr. HATFIELD. Mr. President, I am introducing today legislation to extend protection on 11 wild and scenic study rivers.

A recent article in American Forests magazine reminded me once again of the plight of our Nation's rivers and, most particularly, our recent inactivity under the National Wild and Scenic Rivers Act. The article states:

. . . expansion of the system has slowed down just as the economy has slowed. Studies have gone begging for funds; land acquisitions have been dropped; management plans for existing rivers in the system have not been developed or implemented; and the mechanisms for adding rivers to the system have been largely ignored.

Back in 1968 this Congress created under law a bold new policy:

That the established national policy of dams and other construction at appropriate sections of the rivers of the United States needs to be complemented by a policy that would preserve other selected rivers or sections thereof in their free-flowing condition to protect the water quality of such rivers

and to fulfill other vital national conservation purposes.

We began with great enthusiasm and considerable success. During the first 12 years of the act, 61 rivers totaling almost 7,000 miles were added to the Wild and Scenic Rivers System; another 88 rivers were designated for study for possible inclusion in the system.

Since 1980, however, we have been at a standstill. River studies have been completed and submitted to Congress, but we have taken no action. Two unique rivers in my home State—the Illinois and the Owyhee—have been recommended as additions to the national system. Their preservation as a part of our national river heritage is important to me, to the citizens of Oregon, and to the whole Nation—and I will work toward this goal.

This legislation takes a first step toward preservation of 11 worthy rivers, by extending the Federal protections that they enjoy as wild and scenic study rivers until Congress has given them full consideration through the hearings process. On those which have been recommended for State preservation, our action will simply allow State and local conservation efforts to progress without threat of Federal projects. The Upper Mississippi in Minnesota stands out as an example where a preservation strategy that involves local governments and citizens would receive a great boost from this bill.

Mr. President, this initiative will help breathe new life into the National Wild and Scenic Rivers System. It will keep the door open for saving the 11 rivers listed below and pave the way for the preservation of one of our great national treasures: Free-flowing rivers. Illinois (OR), Pine Creek (PA), Youghiogheny (PA), Encampment (CO), Housatonic (CT), Wisconsin (WI), Owyhee (OR), Shepaug (CT), Tuolumne (CA), Upper Mississippi (MN), and Kettle (MN).

I am pleased that Senators PACKWOOD, HART, KASTEN, HAYAKAWA, TSONGAS, LUGAR, CRANSTON, BUMPERS, HEINZ, PROXMIRE, and DURENBERGER are joining me in this effort.●

By Mr. MOYNIHAN (for himself, Mr. RANDOLPH, Mr. ROBERT C. BYRD, Mr. CRANSTON, Mr. INOUYE, Mr. KENNEDY, Mr. EAGLETON, Mr. RIEGLE, Mr. MATSUNAGA, Mr. MELCHER, Mr. BRADLEY, Mr. DIXON, Mr. HART, Mr. BAUCUS, Mr. LEVIN, Mr. JACKSON, and Mr. TSONGAS):

S. 3061. A bill to repair and rehabilitate America's highways, roads, bridges, mass transit systems, sewers, and water supply systems; to put Americans back to work carrying out needed public works repairs; and to develop a long-term national public works investment plan; to the Committee on Environment and Public Works.

PUBLIC IMPROVEMENTS REPAIR ACT OF 1982

● Mr. MOYNIHAN. Mr. President, I rise to introduce a bill to put Americans back to work repairing and rehabilitating our highways, bridges, mass transit systems, sewers, and water supply facilities. The bill also requires a long-term national public works investment plan. It is my pleasure to have as cosponsors of this measure so many of my Democratic colleagues. We anticipate that the Senate Democratic Caucus will agree on a package of job-creating public works proposals and other measures to mitigate our tragic unemployment problem. This bill will be one of its principal components, though we are still open to suggested improvements or refinements.

Our bill differs from what we understand the administration and Senate Republicans have thus far proposed. First, spending will be directed to repair and rehabilitation projects, as against new construction. Repair work puts people back on the job faster than new construction. If we spend $6 billion for the accelerated public works repair and rehabilitation effort I propose, we will create an estimated 350,000 to 500,000 jobs, both on-site and off.

The second important difference is that projects to rehabilitate water supply distribution systems and sewer lines are included in the package I propose along with highway, bridge, and mass transit projects. Water systems are critical components of the infrastructure. We neglect them at our peril. Moreover, including water systems in the infrastructure proposal I have set forth addresses what is, perhaps, the largest disagreement of consequence in the encouragingly bipartisan work on a public works proposal. Directing money toward water system repair will both fund those projects of greatest merit and target money to areas of highest unemployment. Deteriorating water systems are, in the main, located in older urban areas that coincide with concentrations of unemployed persons.

In but several weeks, the subject of public works has risen from relative obscurity to an acknowledged first step toward putting some of the Nation's 11.6 million jobless persons back to work; 10 percent of those unemployed work in the construction trades. Accelerating existing programs for repair of essential public facilities is an expeditious and efficient means of providing short-term employment. Employment, we should note, that is neither dead-end nor make-work.

Yet, we will have failed to make a distinctive contribution to the jobs bill now being developed if we fail to bring rationality and long-term planning to public works investment. The need is dramatized, surely, by the fact that during the 1970's, we were disinvesting in our highways, roads, bridges, mass transit, water and sewer networks—and nobody even knew.

Between 1968 and 1977, public works investment in constant dollars declined at an average annual rate of 3.7 percent. By 1980, total public works investment by all levels of government dropped to $26 billion, as against the 1970 level of $38 billion. Though these facts are not in dispute, neither were they contained in any of the budget information provided to Congress. Nowhere are the data on infrastructure investment assembled in a fashion that makes such analysis accessible.

For this reason, I propose a national inventory of our civilian public works needs, and a means of budgeting for these needs over the long term. Most States and municipalities have what are known as "capital budgets" that are set apart from their annual operating budgets; the differences being that the capital budgets are typically financed by borrowing, that is, bonds. That is not our purpose.

What we propose, instead, is that the existing unified budget have a portion that is simply identified as consisting of capital projects. In that way, we can keep track of capital outlays and assemble the budget information and formats that accurately express the level of receipts, expenditures, and investment in our capital goods. In effect, if you will, a capital investment program.

The essentials of this program and the inventory of our needs will be drawn by a national commission staffed by the Army Corps of Engineers and financed from existing Government resources. The commission will address issues related to public works investment as well as coordinating the plan for such investment. We need to understand better, for example, how the Tax Code influences public investment. (One begins to suspect that the huge tax advantages recently given to private investment are going to put public investment at a comparative disadvantage.)

To sum, we should have a proposal that addresses an immediate need—jobs for the unemployed—with a solution of both temporary and long-term benefit—repairing deteriorating public works now and settling the question of how we should do so in the future.

I ask that a copy of the bill, a summary of the bill, and two tables demonstrating the funding provisions be printed in the RECORD following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3061

Be it enacted by the Senate and House of Representatives of the United States of

America in Congress assembled, That the Congress hereby finds and declares that—

(1) America's highways, roads, bridges, mass transit systems, and sewer and water supply systems are in a state of disrepair or deterioration so serious as to impede drastically the nation's economic well-being and capacity for growth;

(2) the nation's unemployment rate is exceptionally and unacceptably high and that among those unemployed are large numbers of workers capable of repairing or rebuilding the deteriorated public improvements impairing the nation's economic well-being;

(3) a program of Federal support for repairing and rebuilding deteriorated public improvements can put Americans back to work rapidly, performing work that is critically needed;

(4) long-term planning must begin now to halt further disinvestment in public improvements, to rebuild seriously deteriorated public improvements, and to lay the foundation for sound future investment in public improvements.

TITLE I—PUBLIC IMPROVEMENTS REPAIR ACT

TITLE

SEC. 101. This Title shall be cited as the "Public Improvements Repair Act of 1982."

GENERAL AUTHORITIES AND ELIGIBILITY CRITERIA

SEC. 102. (a) Funds authorized under this Title are in addition to any funds heretofore or otherwise authorized for fiscal year 1983 under any enactment or resolution of the Congress.

(b) A project to repair, rehabilitate, or replace existing Interstate highways, primary, secondary, or urban roads, bridges, mass transit systems, and sewer and water supply lines, shall be eligible for funding pursuant to this Title, provided: that it meets all requirements of the legal authorities cited herein under which funds are provided, except such provisions of law or regulation as are specifically exempted by the provisions of this Title, and, in addition, that the State, city or other unit of local government applying for funding certifies to the appropriate Federal agency, that—

(1) any required non-Federal share of project funding will be made available prior to the start of actual repair or rebuilding work;

(2) actual repair or rebuilding work will begin within 120 days of notification that Federal funds will be made available for the project; and

(3) the repair or rebuilding work can and will be accomplished within two years of its initiation, barring unforeseeable difficulties.

(c) Federal agencies administering funding pursuant to this Title shall have authority to withdraw funding at any time that they determine that the provisions of this section, or of other applicable Federal authorities, are being violated.

INTERSTATE HIGHWAY REHABILITATION

SEC. 103.(a) The Secretary of Transportation is authorized to make grants to the States for projects for resurfacing, restoring, rehabilitating or reconstructing the Interstate System in accordance with 23 U.S.C. 119. Projects approved under this section shall be limited to those which meet all eligibility criteria set forth in Section 102 of this Act.

(b) Funds authorized by subsection (c) of this section shall be apportioned in accordance with the formula provided in section 104(b) (B) of 23 U.S.C.

(c) There is hereby authorized to be appropriated out of the Highway Trust Fund in addition to any other funds authorized for Interstate System Rehabilitation, not to exceed $1,000,000,000 for the fiscal year ending September 30, 1983 for projects approved by the Secretary of Transportation pursuant to subsection (a) of this section.

(d) Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under Chapter 1 of Title 23 U.S.C.

PRIMARY, SECONDARY OR URBAN ROAD REHABILITATION

SEC. 104. (a) The Secretary of Transportation is authorized to make grants to the States for projects for repair, resurfacing or rehabilitation of routes on the Federal-aid primary, secondary or urban systems. Projects approved under this section shall be limited to those which meet all the eligibility criteria set forth in Section 102 of this Act.

(b) Funds authorized by subsection (c) of this section shall be apportioned in accordance with the following formula:

one-half in accordance with the formula provided in section 104(b)(1) of Title 23 U.S.C.;

one-fourth in accordance with the formula provided in section 104(b)(2) of Title 23 U.S.C.;

one-fourth in accordance with the formula provided in section 104(b)(6) of Title 23.

(c) There is authorized to be appropriated out of the Highway Trust Fund, not to exceed $2,000,000,000 for the fiscal year ending September 30, 1983 for projects approved by the Secretary of Transportation pursuant to subsection (a) of this section. Funds authorized by this section shall be in addition to those regularly authorized by Federal-aid highway acts for the designated systems.

(d) Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under Chapter 1 of Title 23 U.S.C.

BRIDGE REHABILITATION

SEC. 106. (a) The Secretary of Transportation is authorized to make grants to the States for replacement or rehabilitation of structurally deficient bridges on the Federal-aid system as provided in 23 U.S.C. 144. Projects approved under this section shall be limited to those which meet all the eligibility criteria set forth in Section 102 of this Act.

(b) Funds authorized by subsection (c) of this section shall be apportioned to the States in accordance with revised Table 1 of Committee Print 95-49 of the Committee on Public Works and Transportation of the House of Representatives.

(c) There is authorized to be appropriated out of the Highway Trust Fund, not to exceed $1,000,000,000 for the fiscal year ending September 30, 1983, for the projects approved by the Secretary of Transportation pursuant to subsection (a) of this section. Funds authorized by this section shall be in addition to those regularly authorized for bridge repair or replacement under Federal-aid highway acts.

(d) Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under Chapter 1 of Title 23 U.S.C.

MASS TRANSIT REPAIR AND REHABILITATION

SEC. 106. (a) The Secretary of Transportation is authorized to make grants to urbanized areas or parts thereof for mass transit systems pursuant to the provisions of the Urban Mass Transportation Act of 1964, as amended.

(b) There is authorized to be appropriated out of the Highway Trust Fund an amount not to exceed $1,000,000,000 for the fiscal year ending September 30, 1983, to carry out the purpose of subsection (a) of this section.

REHABILITATION OF SEWERS AND WATER MAINS

SEC. 107. (a)(1) The Administrator of the Environmental Protection Agency is authorized to make grants to any municipality, State, or interstate agency for (A) major sewer system rehabilitation or (B) major repair or rehabilitation of municipal water supply delivery systems. All such grants shall be made in accordance with the eligibility criteria set forth in section 102 for this Act.

(2) Any grant for major sewer system rehabilitation shall be made in accordance with the provisions of title II of the Federal Water Pollution Control Act, for a project eligible under that title but not expected to be funded under that title during the fiscal year in which this Act is enacted.

(3) Any grant for major repair or rehabilitation of a municipal water supply delivery system shall be deemed awarded, unless the Administrator, within 60 days of the receipt of an application for such grant adequately describing the proposed project and on the basis of regulations governing such grants issued with 45 days after the enactment of this Act, determines that such grant is not in accordance with this section or section 102 of this Act, or that insufficient money is available for such project and other projects for which timely applications have been received.

(b)(1) There are authorized to be appropriated not to exceed $1,000,000,000 for the fiscal year ending September 30, 1983, to carry out this section.

(2) All sums appropriated under this section shall be allotted pursuant to the provisions of section 106 of the Housing and Community Development Act of 1974.

(c) As used in this section the terms "municipality", "State", and "interstate agency" shall have the meaning given in section 502 of the Federal Water Pollution Control Act, and the term "major sewer system rehabilitation" shall have the meaning as used in title II of the Federal Water Pollution Control Act.

TITLE II—REBUILDING OF AMERICA ACT

SEC. 201. This title shall be cited as the "Rebuilding of America Act of 1982."

FINDINGS

SEC. 202. The Congress finds and declares that—

(a) highways, roads, bridges, mass transit systems and water supply and sewer systems are public improvements vital to national development and prosperity;

(b) public works investment in the United States has declined at an alarming rate over the last decade and has resulted in the poor condition of much of our public improvements;

(c) the national costs of deteriorated public improvements are significantly higher than the costs of repairing, rehabilitating, improving or replacing existing facilities;

(d) the Federal Government is responsible for one-half of all public works investment

in the United States through grants in aid and direct investment;

(e) the Federal Government has no institutional means of formulating a comprehensive national public improvements plan and ordering national priorities; and

(f) direct Federal public works investment has been spread unevenly throughout the regions of the Nation.

POLICY

SEC. 203. It is the policy of the Congress that—

(a) States and local governments shall retain their traditional primacy in decisions affecting the use of land and water within their jurisdictions;

(b) the Federal Government shall adopt practices and procedures that will lead to regionally balanced economic development;

(c) prior Federal involvement in a national public improvement shall be a primary consideration but not a sole determinant in establishing future national priorities; and

(d) disincentives for maintaining, repairing, rehabilitating, and replacing deteriorating national public improvements that now exist in Federal laws and regulations shall be corrected to encourage the most economically efficient pattern of investment in public improvements by the Federal Government.

NATIONAL INVENTORY OF PUBLIC IMPROVEMENTS

SEC. 204. The National Commission on the Rebuilding of America, established pursuant to section 208 and hereinafter referred to as the "Commission", shall conduct an inventory of existing major public improvements by region, State, and major metropolitan area of the United States and by type of facility, surveying especially—

(i) age and condition of the facility;

(ii) trends in the condition of the facility over the last twenty years and the relation of those trends to usage and maintenance schedules;

(iii) means of financing the maintenance, repair, rehabilitation, replacement, and new construction of facilities;

(iv) comparison of condition of public improvements within a region, State, or major metropolitan area and the pattern of economic development over the last twenty years; and

(v) trends in public expenditures for maintenance, repair, rehabilitation, replacement, and new construction of public improvements by region, State, and major metropolitan area and by level of government.

DEVELOPMENT OF A NATIONAL PUBLIC IMPROVEMENTS PLAN

SEC. 205. (a) The Commission shall develop a National Public Improvements Plan, hereinafter referred to as the "Plan," listing in priority order, needed maintenance, repair, rehabilitation, or replacement of public improvements in each region, for the next ten and twenty years, or such other time periods as the Commission may deem appropriate, to sustain regionally balanced national economic development. Priorities shall be listed by type of facility for the Nation as a whole and for each region, and shall further consider the relative priorities among the various types of facilities. The Plan shall include recommended means of financing the needed maintenance, repair, rehabilitation and replacement, taking into account the least-cost life-cycle costs of developing and maintaining national public improvements and the appropriate mix of Federal, State, and local resources to implement the Plan. The Commission shall consider prior Federal involvement, level of prior maintenance, and regional equity in its recommendations on financing the Plan.

(b) As an integral part of the Plan, the Commission shall suggest specific revisions in Federal laws, regulations, and policies and further suggest alterations in the current responsibilities of Federal, State, and local governments that may be necessary to reverse the pattern of disinvestment in national public improvements and sustain economic development. The Commission shall include analyses and recommendations in accordance with policies set forth in section 203 concerning—

(i) the report of the Comptroller General to the Congress, submitted pursuant to section 206 of this Act, on identifying Federal civilian capital investment outlays in the unified Federal budget;

(ii) changes in the imposition or allocation of excise taxes, user fees, other sources of public revenue, and borrowing authorities;

(iii) statutory or regulatory revisions in grants-in-aid, direct construction, or subsidy programs that would eliminate corruption, waste, and delay; that would encourage consideration of least-cost life-cycle costs in developing and maintaining facilities; and that would correct regional imbalances and disincentives for maintenance of facilities in Federal programs; and

(iv) the desirability and feasibility of scheduling public improvements construction and major renovation work in a manner counter to national or regional economic cycles in order to reduce the cost of such work and to dampen economic fluctuations.

REPORT ON IDENTIFYING CIVILIAN CAPITAL INVESTMENT IN THE FEDERAL BUDGET

SEC. 206. (a) Within six months of enactment of this Act, the Comptroller General shall submit to the Committee on Environment and Public Works and the Committee on the Budget of the Senate and to the Committee on Public Works and Transportation and the Committee on the Budget of the House of Representatives, model unified budgets, for the fiscal year in which this Act is enacted and for the immediately preceding fiscal year, that distinguish Federal civilian capital investment outlays from other Federal outlays.

(b) Along with the model unified budgets, the Comptroller General shall submit a report including—

(1) a description of how the model budgets differ from existing Federal budget documents;

(2) an analysis of the usefulness of the model budgets in identifying investment and disinvestment in needed public improvements;

(3) an analysis of the usefulness of the model budgets in identifying appropriate programs and amounts of Federal fiscal support in building, maintaining, and repairing needed public improvements; and

(4) an analysis comparing the usefulness of a separate capital budget with the model unified budgets for the purposes of identifying investment and disinvestment in, and appropriate Federal programs and amounts of Federal fiscal support for needed public improvements.

PROCEDURES

SEC. 207. (a) The Commission shall submit to Congress and the President, not later than one year from the date of enactment of this Act, the national inventory of public improvements required pursuant to section 204.

(b) Not later than eighteen months after enactment of this Act, the Commission shall submit to Congress and the President a draft Plan required pursuant to section 205. For purposes of soliciting and considering public comment, the Commission shall further distribute the draft Plan to affected Federal agencies, all Members of Congress, major public interest groups, the Governors of the States, local officials, and make the report generally available to the public. All affected Federal agencies shall submit written comments to the Commission within thirty days.

(c) Not later than twenty-four months after the enactment of this Act, the Commission shall submit to the Congress and the President the final version of the Plan pursuant to section 205.

(d) Unless the Congress enacts a joint resolution of disapproval of that portion of the Plan required pursuant to subsection 205(a) within one hundred and twenty calendar days of receipt of the final Plan, that portion of the Plan shall be deemed to be approved by the Congress and shall be the policy of the Federal Government: *Provided, however,* That no statute or regulation of the Federal Government, of a State or political subdivision thereof shall be in any way altered by congressional approval of that portion of the Plan pursuant to subsection 205(a).

(e) The Senate Environment and Public Works Committee and House Public Works and Transportation Committee shall hold hearings on the proposed changes in existing law pursuant to section 205 and shall report legislative proposals to the Senate and House of Representatives regarding such changes within one hundred and eighty days of receipt of the Plan to permit full Federal implementation of the Plan.

ESTABLISHMENT OF THE COMMISSION

SEC. 208. (a) There is hereby established a National Commission on the Rebuilding of America which shall assess the condition of the national public works infrastructure, analyse causes of disinvestment in the national public works infrastructure, and evaluate the need to repair, maintain, replace, and expand the national public works infrastructure to support balanced development of the national economy.

(b) The Commission shall be composed of—

(1) the Secretary of the Army, the Secretary of Transportation, and the Secretary of Commerce; in the event the Secretary is unable to attend a meeting of the Commission, he may designate a representative but in no case may the designee be of a rank lower than assistant secretary;

(2) representatives of each of the following organizations: the National Governors Association, the National Conference of State Legislatures, the National League of Cities, United States Conference of Mayors, and the National Association of Counties; and

(3) five individuals from the private sector selected by the President who among them have experience in and knowledge of public investment financing, civil engineering, State and local budgeting practices, and regional planning.

(c) The President shall designate one of the five individuals as Chairman of the Commission. The Chairman shall be an individual of national recognition with experience in both public affairs and private enterprise. The Chairman shall be confirmed by the Senate.

(d) The Secretary of Housing and Urban Development, the Secretary of Labor, the

Secretary of Agriculture, the Secretary of the Interior, and the Administrator of the Environmental Protection Agency or their designees shall attend the meetings of the Commission as nonvoting members.

(e) The Commission shall be convened within thirty days of enactment of this Act.

DEFINITIONS

SEC. 209. For the purposes of this Act—

(a) the term "national public improvement" means the Nation's systems of highways, roads, bridges, mass transit, main water supply and distribution systems, and sewer systems;

(b) the term "facility" means any physical structure such as a highway, road, bridge, transit line, or structure related to a mass transit system, water supply storage, treatment, and distribution system or sewage treatment and collection system which is owned and operated by the Federal Government, a State, municipality, or other public agency or authority organized pursuant to State or local law;

(c) the term "maintenance" means routine and regularly scheduled activities intended to keep the facility operating at its designed specifications;

(d) the term "repair" means the correction of a structural flaw in the facility without adding significantly to the design life of such a facility;

(e) the term "rehabilitation" means the correction of structural flaws in a facility so as to extend the engineered design life of such a facility;

(f) the term "replacement" means the reconstruction of an existing facility;

(g) the term "life-cycle cost" means the total cost of constructing, operating, and maintaining a facility, including the interest on any borrowed funds, over the design engineered life of the facility;

(h) the term "State" means any State of the United States, the District of Columbia, Puerto Rico, Guam, American Samoa, the Northern Marianas Trust Territories, or the Virgin Islands; and

(i) the term "region" means one of the nine geographical groups of States defined by the Bureau of the Census in the Statistical Abstract of the United States.

AUTHORIZATION OF APPROPRIATIONS

SEC. 210. (a) There shall be a staff for the Commission consisting of no more than thirty full-time employees of the Federal Government, who shall be detailed by the various agencies upon request of the Chairman of the Commission: Provided, That nothing in this section shall be construed to permit an increase in the level of total Federal employment.

(b) The Secretary of the Army shall assign an employee of the Army Corps of Engineers as staff director for the Commission, with the concurrence of the Chairman of the Commission, and shall also provide office space, supplies, equipment, and necessary contracting and other support services to the Commission and its staff.

(c) The heads of all Federal agencies are directed to cooperate with the Commission to the maximum extent possible, and to provide, on a timely basis, such information as the Commission may request.

(d) There is hereby authorized to be transferred or reprogramed from appropriations otherwise available to the Army Corps of Engineers, the Department of Transportation, and the Department of Commerce, the total of $5,000,000 to carry out the duties of the Commission during its tenure, said sum to be exclusive of salaries for staff.

(e) The private members of the Commission shall be compensated for their time engaged on Commission business at the daily rate established for employees at grade 18 of the General Schedule.

SUMMARY OF THE PUBLIC IMPROVEMENTS REPAIR ACT OF 1982

Title I authorizes $6 billion for the repair and rehabilitation of Interstate highways; Federal-aid primary, secondary, and urban roads; bridges; mass transit systems; sewers; and water supply facilities. The funds would be distributed to States and cities through existing Federal allocation formulas and programs. The formulas are based primarily on assessments of maintenance and repair needs but, in many cases, they will also direct the additional funds to economically distressed areas.

The use of well-established programs will help speed the distribution of funds and permits the program to get underway immediately, without creating a new Federal bureaucracy or additional red tape. The proposed program would establish only two new limitations on the use of the additional funds:

(1) Construction work on the projects supported with the funds would have to be underway within 120 days of receipt of the funds, and

(2) Construction work on the projects would have to be completed within two years.

These requirements are designed to insure that the program has an immediate, counter-cyclical impact on unemployment and that its funds are not diverted to long-term projects.

The bill would allow States and cities to determine repair priorities and to manage the repair work, just as they do under the pre-existing Federal programs.

The bill allocates the $6 billion as follows:

Highways and Bridges: Through existing formulas administered by the Department of Transportation, $3 billion is provided for the so-called "4R" program (resurfacing, restoring, rehabilitating, or reconstruction) on Interstate and other Federal-aid highways. An additional $1 billion is provided for the replacement or rehabilitation of structurally deficient bridges on the Federal-aid highway system.

Mass Transit: Through existing programs administered by the Department of Transportation, $1 billion is provided for urban mass transit systems.

Sewers and Water supply facilities: Under the auspices of the Environmental Protection Agency, and allocating funds through the Community Development Block Grant formula, $1 billion is provided for the major rehabilitation of sewers, water supply distribution lines, and pumping stations.

THE REBUILDING OF AMERICA ACT OF 1982

Title II establishes a National Commission of Rebuilding American which would:

(1) Conduct an inventory of national public improvements by region, state, and metropolitan area and by type of facility, with attention to the condition of the facilities, their sufficiency to support economic growth, and recent patterns of investment and deterioration, and

(2) Develop a national public improvements plan, setting priorities and detailing the means of financing needed public improvements over the next ten and twenty years and further recommending changes in Federal laws, regulations, and policies that would permanently insure adequate investment, and clarifying the relationship among Federal, state, and local responsibilities for development and maintenance of public improvements.

The 13-member Commission would be composed of five private sector representatives conversant with public improvements needs, one of whom would be Commission chairman, the Secretaries of the Army, Transportation, and Commerce, and representatives of the five major organizations of state and local elected officials.

The Commission would have two years and a budget of five million dollars to complete its work. The $5 million would be drawn from existing appropriations. The Army Corps of Engineers, which spearheaded the development of the Nation's public improvements in the 19th and early 20th centuries, would provide principal administrative support to the Commission. The Commission would be restricted to no more than thirty full-time employees, drawn from and paid by various Federal agencies. No new Federal employees would be hired.

The Commission's recommendations regarding investment priorities would become binding unless disapproved by the Congress within 120 days of their submission. However, no laws or regulations would be altered through this process.

Finally, the bill requires the U.S. General Accounting Office to report to the Congress on the value of revising the annual Federal budget to distinguish capital investment outlays from other Federal expenditures. Capital investment outlays are not separately identified in the Federal budget as it is presently organized.

FUNDING FORMULAS

Bill section	Program	Formula	Amount (millions)
102	Interstate highway rehabilitation (4–R).	Existing law; 23 U.S.C. 104(b)(5)(B).	$1,000
103	Consolidated primary roads.	Existing law; 23 U.S.C. 104(b)(1).	1,000
	Rural secondary roads	Existing law; 23 U.S.C. 104(b)(2).	500
	Urban road system	Existing law; 23 U.S.C. 104(b)(6).	500
104	Highway bridge replacement and rehabilitation.	Existing law; table 1, House Public Works Committee print No. 95–49.	1,000
105	Urban mass transit rehabilitation.	Existing law; section 5 of Urban Mass Transportation Act of 1974, as amended.	1,000
106	Water supply and sewer rehabilitation through EPA construction grant program.	Existing law; community development block grant formula; 42 U.S.C. 5306(a)–(d).	1,000

Total		5.6	6	10.6

● Mr. RANDOLPH. Mr. President, I join in the introduction of legislation which funnels additional funds into the repair and rehabilitation of our Nation's highways and other major public works. This bill is designed to meet one of America's pressing problems, unemployment, while at the same time facilitating the repair of our Nation's highways.

Under the measure $4 billion, presumably from the proposed gasoline tax increase, will be available for work on our Interstate System, our primary, secondary, and urban systems and for bridge rehabilitation.

For more than 2 years I have been urging the Congress and the President to consider an increase in the Federal gasoline tax to fund the continuation of our ongoing Federal-aid highway program and to meet growing needs to rehabilitate older segments of the system. During hearings on the nomination of Secretary Lewis, I recommended consideration of increases in revenue for the highway trust fund. President Reagan has now endorsed a proposal to increase highway user charges by the equivalent of a 5 cent gasoline tax. This proposal is long overdue. Highway taxes have not been increased since 1959, while the highway construction industry has experienced a cost increase of over 200 percent.

The public works infrastructure of this country is in serious need of substantial repair. Highways, both Federal-aid and local, have deteriorated in the past 5 years to the point where they are no longer able to meet service levels for which they were designed. Americans are unemployed in both the construction and manufacturing industries in large numbers. If the Government were to fund a jobs program which could begin the necessary rehabilitation of this important segment of our Nation's public works, many unemployed Americans could be put back to work.

I am therefore pleased to join with Senator MOYNIHAN in introducing a measure which uses $4 billion of the money derived from the proposed gasoline tax increase to fund a program to rehabilitate our highways, streets, and bridges. Under this proposal these funds would be targeted to those types of projects which could be obligated in 90 to 120 days and would provide approximately 300,000 direct and indirect jobs.

Increased attention to the highway network is an essential part of the economic recovery that must be stimulated in the United States. Highways are the backbone of our transportation system. The poor condition of our roads has many of our constituents up in arms. I believe that overwhelming support for a program of this nature will be forthcoming from the American citizenry.

I also commend the provisions of the bill which we are introducing today with respect to funding for mass transit capital costs—particularly rehabilitation of transit systems. And the proposal to fund sewer and water system repairs is a necessary part of addressing our deteriorating infrastructure.

The quality of life in this country to a large degree is dependent on our public physical underpinnings. Projects of a public works character are not just make-work projects but are investments in the quality and quantity of life in this Nation.

Americans are unemployed in large numbers and our highways are no longer at the standard which we have every reason to expect. This bill is the first step in rectifying these two unfortunate situations.

Mr. President, I commend this measure to my colleagues and recommend its careful consideration.●

● Mr. HART. Mr. President, I am pleased to join the distinguished Senator from New York in introducing this vital legislation. As we meet for the special session, we face the highest unemployment in 40 years and a seriously deteriorated infrastructure that may severely impede national economic recovery.

Mr. President, simply stated, America is crumbling around us. Streets are cracking, dams are breaking, bridges are collapsing, sewers are overflowing, and water mains are leaking. America's infrastructure—the public stock of roads, bridges, sewers, and water systems that underpins our economy—is deteriorating faster than we can replace it. Many experts estimate we will have to spend between $2.5 and $3 trillion just to maintain our infrastructure in its current condition. The additional improvements necessary will cost billions more. Yet, in real dollars, the Federal Government is investing 35 percent less in public facilities today than it did in 1965. We should not underestimate the enormity of the task before us:

One-fifth of the Nation's bridges require major rehabilitation or reconstruction. The Department of Transportation recently classified 45 percent of them as deficient or obsolete;

The Interstate Highway System requires reconstruction at a rate of nearly 2,000 miles annually;

A Commerce Department survey of 6,870 communities found that 3,000 or 46 percent had wastewater facilities operating at over 80 percent of capacity and thus could not accommodate further industrial expansion;

The Nation's 756 urban areas with populations over 50,000 will need between $75 and $110 billion to maintain their water systems over the next 20 years;

A large number of the Nation's 43,500 dams require additional investment to eliminate hazardous deficiencies. The Army Corps of Engineers found unsafe nearly 3,000 dams in highly populated areas.

Title I of the bill we are introducing today will finance the most urgently needed repair and rehabilitation projects around the country, including roads, highways, bridges, sewer, and water delivery lines. It will enable us to repair public facilities that are costing untold amounts of money in delays, injuries, and loss of potable water. These are projects we can undertake immediately without further design and contracting delays.

Mr. President, this bill will also reduce unemployment around the country. The short-term, high-priority projects funded under title I will insure rapid employment for workers in the construction industry—an industry now reeling from an unemployment rate of nearly 23 percent.

Because those areas with the most seriously deteriorated infrastructure also tend to have high unemployment, this bill should help relieve unemployment in the hardest hit regions of the country. Moreover, as Dr. Alice Rivlin, Director of the Congressional Budget Office testified, a program to rebuild our aging, crumbling infrastructure will promote long-term economic growth and prosperity and, consequently, increase employment in every State and industry in the Nation.

Mr. President, this bill will cost an estimated $6 billion. It assumes enactment of a 5 cent increase in the Federal gasoline tax will provide $5 billion. While I am pleased the Congress appears willing to approve this long overdue increase, this alone will not solve the problem of financing needed repairs to our infrastructure. First, the Federal highway trust fund, which will receive the revenues from the tax, can only spend them on the Nation's roads, highways, and bridges. Yet, other parts of the infrastructure need repair. Consequently, this bill will also finance the repair and rehabilitation of water and sewer systems in communities throughout the country. Continued neglect of these repairs risks the health of communities and their residents.

Second, the Federal gas tax revenues will finance only a small fraction of the $2.5 to $3 trillion in repairs needed simply to maintain our infrastructure in its current condition over the next 10 years.

Because the problem of a deteriorating infrastructure looms so large, we

must look beyond the short-term solution in title I to a national strategy for guiding long-term investments in our public capital. A national investment strategy will insure that we spend taxpayers' money on the most urgently needed projects. Title II of this bill establishes the framework necessary to conduct an inventory of the Nation's public works, set spending priorities, and establish mechanisms to fund public investments.

In September, Senator MOYNIHAN and I introduced this title as a separate bill.

Title II will set the stage for adoption of a Federal capital budget that will begin to reverse years of failed "pork barrel" politics and ad hoc decisionmaking on public works investment. The Federal budget does not currently contain a cross-cutting analysis of public works expenditures or long-term estimates of associated construction, rehabilitation, operating, and maintenance requirements. A Federal capital budget will provide the information necessary for the executive branch and the Congress to allocate scarce resources to capital investments that will yield the greatest benefits for the public.

Capital budgeting is a standard accounting practice. Virtually all major corporations, two-thirds of the States, and most local governments use capital budgets as a basic administrative and policy tool. By placing Federal capital investments on a "pay as you use" basis, a capital budget would add needed rationality to the budget process. We urgently need a Federal capital budget to set our public investment priorities.

I urge the Senate to pass this vital legislation that addresses two of our most serious economic problems, historic unemployment and a decaying national infrastructure.

I commend the distinguished Senator from New York for introducing this bill and setting in motion the forces necessary for long-term economic health and prosperity.●

SENATE RESOLUTION 498—RESOLUTION RELATING TO THE RENOVATION OF THE U.S. CUSTOMS HOUSE AT BOWLING GREEN, N.Y.

Mr. MOYNIHAN submitted the following resolution; which was referred to the Committee on Environment and Public Works:

S. RES. 498

Whereas, the U.S. Custom House at Bowling Green in lower Manhattan in New York City, completed in 1907 to the plans of the noted American architect Cass Gilbert, is one of the most beautiful and significant Beaux-Arts public buildings in the nation, and

Whereas, in 1979, the Senate Committee on Environment and Public Works and the House Committee on Public Works and Transportation approved, pursuant to the Public Buildings Act of 1959, the renovation by the U.S. General Services Administration of the Custom House at a cost of $29,274,000, and

Whereas, the renovation of the Custom House is to provide office space for 800 Federal employees currently housed in more expensive leased office space, and

Whereas, the U.S. General Services Administration has procrastinated and failed to date to begin actual renovation work on the project, and

Whereas, because of this inaction, some Federal officials have proposed declaring the Custom House "surplus" to the needs of the Government and offering it for sale to private interests, and

Whereas, to acquiesce in this or any similar action by the Executive Branch would vitiate Congressional authority under the Public Buildings Act to manage the inventory of public buildings, now, therefore, be it

Resolved, That it is the sense of the Senate that the U.S. Custom House at Bowling Green in New York City and every other public building managed by the General Services Administration shall remain the property of the United States, unless and until such time as the Committee on Environment and Public Works by majority vote, should accede to its transfer or sale, and be it further

Resolved, That until such time as the renovation of the U.S. Custom House at Bowling Green is completed, the General Services Administration shall submit a progress report on the renovation to the Committee on Environment and Public Works every thirty days.

● Mr. MOYNIHAN. Mr. President, I was shocked and appalled to learn yesterday that there is a proposal afoot in the executive branch to declare as surplus the U.S. Custom House on Bowling Green in New York City—and to sell it to private interests. The Custom House on Bowling Green is one of the great architectural landmarks of New York City. It was described by the architecture critic of the New York Times as a "subject of awe."

In 1979, the Congress authorized a $29 million renovation of the building. Unfortunatley, the General Services Administration has not been able in all this time, to get the renovation work underway. That is unconscionable and disgraceful. However, it in no way justifies abandoning a project ordered by the Congress.

I have this day written the Administrator of the General Services Administration to express my dismay and to describe the actions I plan to take both to forestall the sale of the building and to expedite the renovation. I ask unanimous consent that a copy of the letter be printed in the RECORD following my statement.

I am submitting a Senate resolution to prohibit the sale of the custom house and to require periodic progress reports on its renovation. I am privileged to be joined in this resolution by the distinguished chairman of the Committee on Environment and Public Works (Mr. STAFFORD) and our beloved ranking minority member (Mr. RANDOLPH). I trust that the administration, and particularly its Property Review Board, which has concocted the idea of relinquishing one of the Government's architectural treasures, will notice.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., December 1, 1982.

Hon. GERALD P. CARMEN,
Administrator, U.S. General Services Administration, Washington, D.C.

DEAR MR. ADMINISTRATOR: It has come to my attention that the Property Review Board established by President Reagan is considering declaring surplus and offering for sale the historic U.S. Custom House at Bowling Green in Lower Manhattan. I urge you to use every means at your disposal to prevent this from happening.

In the summer of 1979, the Senate and House Public Works Committees approved a prospectus for a $29 million renovation of the Custom House, which is not only an architectural landmark, but has space for 800 Federal employees. Because of GSA incompetence, the project has yet to get underway, and the building remains vacant. In December of 1980, in a statement on the floor of the Senate, I decried the GSA's unconscionable delay to that point in hiring a renovation architect. It took the GSA more than a year after that to secure architectural plans.

Now the executive director of the Property Review Board absurdly suggests that one reason the building is considered susceptible to sale is that it has remained vacant for so long. Another reason he cited is a "surplus" of office space for Federal employees in the New York area.

You and I have agreed that it is cheaper in the long run to house Federal employees in Government-owned rather than leased space. I fail to understand, then, why the GSA would continue to request that the Public Works Committees approve lease arrangements in New York, if there is, indeed a surplus of Government office space in the area.

Since I know you agree with me that it would be cheaper to house 800 Federal employees in the Government-owned Custom House than in leased space, I know you will agree with me also that no new leasing should be undertaken in the New York area while the Government-owned space in the Custom House is vacant. I shall see to it that no lease prospectuses for the New York region are approved by the Committee on Environment and Public Works until renovation of the Custom House is complete, and the 800 Federal employees to move into it are identified.

In addition, I am this day introducing a Senate Resolution forbidding any sale or transfer of the Custom House or any other Federal building from Government possesion without the express approval of the Senate.

Sincerely,

DANIEL PATRICK MOYNIHAN.●

ADDITIONAL COSPONSORS

S. 2585

At the request of Mr. CRANSTON, the name of the Senator from Illinois (Mr. PERCY) was added as a cosponsor of S. 2585, a bill to provide that the Armed Forces shall pay benefits to surviving spouses and dependent children of certain members of the Armed Forces who die from service-connected disabilities in the amounts that would have been provided under the Social Security Act for amendments made by the Omnibus Budget Reconciliation Act of 1981.

S. 2737

At the request of Mr. GLENN, the name of the Senator from Arizona (Mr. GOLDWATER) was added as a cosponsor of S. 2737, a bill to authorize an educational assistance program which will provide low cost loans to college students who pursue mathematics and science baccalaureate degrees and enter the precollege mathematics and science teaching profession, and for other purposes.

S. 2738

At the request of Mr. GLENN, the names of the Senator from Rhode Island (Mr. PELL), and the Senator from Arizona (Mr. GOLDWATER) were added as cosponsors of S. 2738, a bill to amend the Internal Revenue Code of 1954 to allow a credit to certain employers for compensation paid to employees with precollege mathematics or science teaching certificates who are employed for the summer months by such employers or who are employees who teach a limited number of hours.

S. 2919

At the request of Mr. LUGAR, the name of the Senator from Illinois (Mr. PERCY) was added as a cosponsor of S. 2919, a bill to help insure the Nation's independent factual knowledge of Soviet bloc countries, to help maintain the national capability for advanced research and training on which that knowledge depends, and to provide partial financial support for national programs to serve both purposes.

S. 2942

At the request of Mr. COHEN, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 2942, a bill to provide that disability benefits under title II of the Social Security Act shall continue to be paid through the end of the administrative appeals process, and that periodic reviews of disability cases shall be carried out only to the extent determined to be appropriate.

S. 3043

At the request of Mr. PRESSLER, his name was added as a cosponsor of S. 3043, a bill to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes.

SENATE JOINT RESOLUTION 213

At the request of Mr. TSONGAS, the name of the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of Senate Joint Resolution 213, a joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for women.

SENATE JOINT RESOLUTION 216

At the request of Mr. KENNEDY, the names of the Senator from Hawaii (Mr. INOUYE), the Senator from Ohio (Mr. METZENBAUM), the Senator from Maryland (Mr. SARBANES), and the Senator from Massachusetts (Mr. TSONGAS) were added as cosponsors of Senate Joint Resolution 216, a joint resolution prohibiting the Secretary of the Interior from implementing the 5-year Outer Continental Shelf oil and gas leasing plan until the Secretary has taken certain actions to conform the plan to the purposes and requirements of applicable law.

SENATE JOINT RESOLUTION 260

At the request of Mr. HEINZ, the names of the Senator from Illinois (Mr. PERCY), the Senator from Nebraska (Mr. EXON), the Senator from Oklahoma (Mr. BOREN), and the Senator from New Jersey (Mr. BRADLEY) were added as cosponsors of Senate Joint Resolution 260, a joint resolution to designate the period commencing January 1, 1983, and ending December 31, 1983, as the "Tricentennial Anniversary Year of German Settlement in America."

SENATE JOINT RESOLUTION 264

At the request of Mr. HEINZ, the names of the Senator from North Carolina (Mr. HELMS), the Senator from Indiana (Mr. LUGAR), the Senator from Oregon (Mr. HATFIELD), the Senator from Arizona (Mr. GOLDWATER), the Senator from Ohio (Mr. GLENN), the Senator from New York (Mr. MOYNIHAN), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from New Mexico (Mr. DOMENICI) were added as cosponsors of Senate Joint Resolution 264, a joint resolution to designate the week of March 13, 1983, through March 19, 1983, as "National Children and Television Week."

SENATE JOINT RESOLUTION 265

At the request of Mr. DENTON, the name of the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of Senate Joint Resolution 265, a joint resolution to authorize and request the President to proclaim 1983 as the "National Year of Voluntarism."

SENATE CONCURRENT RESOLUTION 121

At the request of Mr. DOLE, the names of the Senator from Connecticut (Mr. DODD), the Senator from Illinois (Mr. PERCY), and the Senator from Tennessee (Mr. SASSER) were added as cosponsors of Senate Concurrent Resolution 121, a concurrent resolution expressing the sense of the Congress that the United States should maintain Federal involvement in, and support for, the child nutrition programs, and for other purposes.

SENATE CONCURRENT RESOLUTION 128

At the request of Mr. ROBERT C. BYRD, the names of the Senator from Montana (Mr. BAUCUS), the Senator from Texas (Mr. BENTSEN), the Senator from Delaware (Mr. BIDEN), the Senator from Oklahoma (Mr. BOREN), the Senator from New Jersey (Mr. BRADLEY), the Senator from Arkansas (Mr. BUMPERS), the Senator from Nevada (Mr. CANNON), the Senator from Florida (Mr. CHILES), the Senator from California (Mr. CRANSTON), the Senator from Arizona (Mr. DECONCINI), the Senator from Illinois (Mr. DIXON), the Senator from Connecticut (Mr. DODD), the Senator from Missouri (Mr. EAGLETON), the Senator from Nebraska (Mr. EXON), the Senator from Kentucky (Mr. FORD), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from Alabama (Mr. HEFLIN), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Hawaii (Mr. INOUYE), the Senator from Washington (Mr. JACKSON), the Senator from Louisiana (Mr. JOHNSTON) the Senator from Massachusetts (Mr. KENNEDY), the Senator from Vermont (Mr. LEAHY), the Senator from Michigan (Mr. LEVIN), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Montana (Mr. MELCHER), the Senator from Ohio (Mr. METZENBAUM), the Senator from Maine (Mr. MITCHELL), the Senator from New York (Mr. MOYNIHAN), the Senator from Rhode Island (Mr. PELL), the Senator from Arkansas (Mr. PRYOR), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Michigan (Mr RIEGLE), the Senator from Maryland (Mr. SARBANES), the Senator from Tennessee (Mr. SASSER), the Senator from Mississippi (Mr. STENNIS), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of Senate Concurrent Resolution 128, a concurrent resolution relating to monetary policy.

AMENDMENTS SUBMITTED FOR PRINTING

ANTITRUST EQUAL ENFORCEMENT

AMENDMENT NOS. 3640 AND 3641

(Ordered to be printed and to lie on the table.)

Mr. SPECTER submitted two amendments intended to be proposed by him to the bill (S. 995) to provide for contribution of damages attributable to an agreement by two or more

persons to fix, maintain, or stabilize prices under section 4, 4A, or 4C of the Clayton Act.

AMENDMENT NOS. 3642 AND 3643

(Ordered to be printed and to lie on the table.)

Mr. SPECTER submitted two amendments intended to be proposed by him to the committee amendment to the bill S. 995, supra.

AMENDMENT NO. 3644

(Ordered to be printed and to lie on the table.)

Mr. THURMOND submitted an amendment intended to be proposed by him to the bill S. 995, supra.

AMENDMENT NOS. 3645 THROUGH 4031

(Ordered to be printed and to lie on the table.)

Mr. METZENBAUM submitted 386 amendments intended to be proposed by him to the bill S. 995, supra.

AMENDMENT NOS. 4032 THROUGH 4240

(Ordered to be printed and to lie on the table.)

Mr. BAUCUS submitted 209 amendments intended to be proposed by him to the bill S. 995, supra.

AMENDMENT NOS. 4241 THROUGH 4600

(Ordered to be printed and to lie on the table.)

Mr. METZENBAUM submitted 344 amendments intended to be proposed by him to the committee amendment to the bill S. 995, supra.

NOTICES OF HEARINGS

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, as chairman of the Senate Committee on Agriculture, Nutrition, and Forestry, I wish to announce that a hearing has been scheduled to review the results of the Ministerial Conference of the General Agreement on Tariffs and Trade (GATT). Along with Senator MATTINGLY and other members of the U.S. delegation, I will brief Agriculture Committee members on our meetings at the Conference.

The hearing will be held on Thursday, December 2, beginning at 2 p.m. in room 324, Russell Senate Office Building.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, December 1, in order to receive testimony concerning the following nominations:

Mr. Lawrence S. Margolis, of Maryland, to be a judge of the U.S. Claims Court;

Mr. Reginald W. Gibson, of Illinois, to be a judge of the U.S. Claims Court; and

Mr. Haldane Robert Mayer, of Virginia, to be a judge of the U.S. Claims Court.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON VETERANS' AFFAIRS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Veterans Affairs be authorized to meet during the session of the Senate on Wednesday, December 8, 1982, at 3 p.m., to hold a confirmation hearing on the nomination of Harry Walters to be Administrator of Veterans' Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

STATUS REPORT ON THE BUDGET FOR FISCAL YEAR 1983

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate a status report on the budget for fiscal year 1983 pursuant to section 311 of the Congressional Budget Act. This is the first such report for fiscal year 1983 and reflects action through November 29, 1982.

The report follows:

REPORT TO THE PRESIDENT OF THE U.S. SENATE FROM THE COMMITTEE ON THE BUDGET

STATUS OF THE FISCAL YEAR 1983 CONGRESSIONAL BUDGET ADOPTED IN SENATE CONCURRENT RESOLUTION 92

Report No. 83-1

REFLECTING COMPLETED ACTION AS OF NOVEMBER 29, 1982

[In millions of dollars]

	Budget authority	Outlays	Revenues
Second budget resolution level [1]	822,390	769,818	665,900
Current level	806,948	775,026	663,635
Amount remaining	15,442	0	0

[1] Pursuant to section 7 of Senate Concurrent Resolution 92, the first budget resolution for fiscal year 1983 became the second budget resolution on Oct. 1, 1982.

Budget Authority

Any measure providing budget or entitlement authority which is not included in the current level estimate and which exceeds $15,442 million for fiscal year 1983, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in S. Con. Res. 92 to be exceeded.

Outlays

Any measure providing budget or entitlement authority which is not included in the current level estimate and which would result in outlays exceeding $0 million for fiscal year 1983, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in S. Con. Res. 92 to be exceeded.

Revenues

Any measure that would result in revenue loss exceeding $0 million for fiscal year 1983, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in S. Con. Res. 92.

SOCIAL SECURITY DISABILITY PROGRAM TERMINATIONS

● Mr. LEVIN. Mr. President, yesterday during a special order, I presented to my colleagues a number of articles describing individual cases of hardship and loss resulting from unjust terminations in the title II social security disability program. Today, I insert another article—one that appeared recently in the Traverse City Michigan Record Eagle—to be printed in full in the RECORD.

The article follows:

[From the Traverse City (Michigan) Record Eagle, Nov. 20, 1982]

TC WOMEN VICTIMS OF AID "CRACKDOWN"

(By Loraine Anderson)

TRAVERSE CITY.—Eve Swanson, a 31-year-old Traverse City amputee, says she is "irked."

It took the federal government just three weeks to decide that she no longer qualified for Social Security disability payments of $525 a month. That was late last year.

Since then, Swanson has required two brain surgeries that impaired her motor abilities and caused a number of other debilitating problems.

But it has taken two appeals, a hearing and 10 months to get her disability benefits back. And it'll be another month or two before she actually begins receiving checks.

In the meantime, Swanson has been living on $145 a month in state General Assistance payments and $75 a month in food stamps while she tries to recuperate and attend college part-time. Her rent is $125 a month, she says, and she takes an anti-depressant medication that costs her $22 a month because it is not covered by Medicaid insurance.

"The reason I'm going to college is that I want to be a useful member of society," she said. "I don't want to be on disability the rest of my life."

Swanson is one small statistic in an ongoing, 18-month attempt by the federal government to review cases and reduce the number of people nationwide who receive Social Security disability payments.

The review program—although it is said to be necessary—has been rife with problems and has met severe criticism from U.S. Sen. Carl Levin of Michigan and other members of Congress for the way the program is being handled.

According to Levin, benefits were discontinued in more than 40 percent of the cases reviewed between March, 1981, and April, 1982. But more than two-thirds of the claimants who appealed were reinstated to the program after hearings before administrative law judges. That leads Levin and other senators to conclude that the benefits never should have been terminated in the first place.

"The real tragedy is the unnecessary and unjustified suffering of severely disabled people and their families whose benefits were stopped for months," Levin said.

Levin said the decisions to terminate benefits often were made with inadequate evidence—for instance, brief medical examinations and no direct contact or interview with the beneficiary.

Swanson agrees with those criticisms of the review program. The decision to terminate her benefits, she said, was based on a five-minute physical check-up by a local

doctor who didn't even look at her amputation scars.

She said she was sent to the doctor by the Disability Determination Office in Traverse City last August, and three weeks later she received notice that her benefits would be stopped in January.

Swanson said what really "irks" her is not the original decision to cut her benefits, but rather the amount of time and trouble it took to get the benefits reinstated after her brain surgery.

A part-time college student working slowly on an art-education degree, Swanson went to the Bureau of Rehabilitation after her benefits were terminated. With the help of rehabilitation counselors, she landed a CETA (Comprehensive Employment and Training Act) job last January at the Good Samaritan Emergency Lodge.

But soon after her checks stopped, she suffered the first of two brain aneurysms (a balloon-like swelling of an artery). She required surgery twice—in January, and May. The operations impaired her motor skills, caused temporary epilepsy, and led to vision problems and depression. She can do many things for herself, but is not expected to live alone.

Swanson, the oldest of six children, said she asked her parents for financial assistance but they were unable to help her. A former typist and clerk at a Chicago stock brokerage, Swanson lost her left arm to cancer at the age of 21. She has lived in Traverse City since 1976.

A Social Security administrative law judge reinstated Swanson's benefits—retroactive to January—following an Oct. 7 hearing, but told her she probably would have to wait 60 to 90 days to get her checks. Swanson said she is happy to be reinstated, but still thinks the "federal government's shenanigans" in the review program should be exposed because she believes thousands of disabled people have been hurt.

"This is one of those cases you honestly cannot believe," said Punky Idema, Traverse City aid for Congressman Donald Albosta, who became involved in Swanson's fight for reinstatement.

"It's a real study in frustration," she said. "Sure, there are some people on disability who shouldn't be, but there are others who are really disabled, and to cut them off, saying, 'You may be able to do some kind of work,' is cruel. And in Eve's case, she was going to college and trying to get off disability."

Bob Warner, financial aid director at Northwestern Michigan College, said he questions whether Swanson's benefits ever should have been dropped in the first place. He described her as determined, friendly and enthusiastic in her desire to become an art therapy teacher in a rehabilitation center.

"She wasn't just sitting there collecting disability," he said. "She was trying to improve herself and she lost her benefits right in the middle of it. It made it very hard for her to continue."

Norman Britten, a Bureau of Rehabilitation counselor, said that what happened to Swanson wasn't as serious as some other cases he has seen.

He said the original benefit termination in Swanson's case was probably correct. The amount of time it took to win back her benefits was unfortunate, he said, but was not an "inordinately long" period of time when compared to other cases.

Britten said another Traverse City case underlines the failure of the review program even more dramatically than Swanson's. In that case, the disability benefits for 27-year-old Nanci Woodcock were terminated following a psychological examination. According to Britten, the woman was slightly retarded, but suffered severe emotional problems. Her retardation showed up in her psychological examination, but not her emotional problems. Britten said Woodcock's benefits were terminated by disability examiners who did not check with the woman's parents or the Bureau of Rehabilitation, which had conducted several tests that showed her emotional problems.

That case also went to the administrative law judge who listened to testimony from Britten and Woodcock's parents. He reversed the decision and reinstated her benefits of $192 a month.

"I feel sorry for someone who doesn't have anybody to go to bat for them," said Woodcock's mother, Arla Woodcock. "Our daughter . . . had her father, me and Mr. Britten."●

ACID RAIN CONTROLS—SUPPORT GROWS

● Mr. STAFFORD. Mr. President, for several years this Senator and a few others have attempted to awaken our colleagues to the extraordinary threat posed to this Nation by acid rain. The task, while not arduous, has been difficult. Those who oppose acid rain control have attempted to confuse the issue with pseudoscientific studies purporting to show that the phenomenon is not real or that its causes are not known or that the costs are out of proportion to the benefits.

The simple and uncontrovertible truth of the matter is that acid rain has already damaged large numbers of lakes and streams in this country and that thousands of lakes, thousands of stream miles, and millions of acres are being threatened by acid rain. It is also a fact that acid rain is caused by pollutants from the smokestacks of powerplants and the tailpipes of automobiles. The vast majority of this pollution originates in the Midwest.

In the past 3 years, the Committee on Environment and Public Works has held 11 days of hearings on the subject of acid rain. Following these hearings, the committee voted 15 to 1 to start a program to control acid rain. Yet even after this overwhelming vote, the polluting industries insist that we should study and study and study, not act. They, and at least a few of my colleagues, remain unconvinced.

But if the committee's educational effort—and that of the many others involved—has failed to persuade some elected officials, the message is reaching the voters. And these are not just the voters of Vermont or other immediately affected States, but voters elsewhere.

Tlhe most recent evidence of this is a poll just released by the National Wildlife Federation of North Carolina citizens. Frankly, the results surprise even me, for they indicate that the public support for acid raid control is both deeper and broader than previously suspected.

What this poll shows is that nearly two-thirds of those surveyed had heard of acid rain and, of this number, more than two-thirds considered it to be a serious or very serious problem.

This indicates support for a control program which is growing rapidly, with a citizenry that is increasingly knowledgeable and sophisticated. I had always thought that eventually the public would become educated to the problem and that pressure for a responsible and stringent control program would grow. But these survey results are surprising and encouraging, for they leave no doubt that time is on the side of those of us who favor tough controls.

Mr. President, if there is no objection I ask that the text of the survey be printed in the RECORD.

The survey follows:

TABLE I.—EVALUATION OF EASTERN STATES' VULNERABILITY TO EFFECTS OF ACID RAIN

State	Average pH of rainfall [1]	Fisheries	Soil	Crop foliage	Masonry (marble, limestone)	Overall ranking
Alabama	4.6	M	M	V	M	M
Connecticut	4.4	E	E	V	M	E
Delaware	4.4	M	M	V	M	M
Florida	4.7	S	S	NV	S	S
Georgia	4.6	M	M	NV	S	M
Illinois	4.3	S	S	V	M	M
Indiana	4.3	S	M	V	M	M
Kentucky	4.4	M	E	V	M	E
Louisiana	4.6	XX	M	XX	S	XX
Maine	4.4	E	E	V	M	E
Maryland	4.3	M	M	V	M	M
Massachusetts	4.1	E	E	V	M	E
Michigan	4.4	E	E	V	M	E

TABLE I.—EVALUATION OF EASTERN STATES' VULNERABILITY TO EFFECTS OF ACID RAIN—Continued

State	Average pH of rainfall [1]	Fisheries	Soil	Crop foliage	Masonry (marble, limestone)	Overall ranking
Mississippi	4.6	M	M	NV	S	M
New Hampshire	4.3	E	E	V	M	E
New Jersey	4.3	E	M	V	M	E
New York	4.2	E	E	V	M	E
North Carolina	4.4	E	E	V	M	E

Pennsylvania	4.2	E	E	V	M	E
Rhode Island	4.4	E	E	V	M	E
South Carolina	4.6	E	M	V	M	E
Tennessee	4.4	M	M	V	M	M
Vermont	4.3	E	E	V	M	E
Virginia	4.4	M	M	V	M	M
West Virginia	4.3	M	E	V	M	E
Wisconsin	4.5	E	E	V	M	E

[1] The pH is a numerical value used to describe the strength of an acid. On the pH scale, which ranges from a numerical value of 0 to 14, the lower the pH number the greater the acidity. A value of pH 1 is very acid (battery acid), 2.0 is equal to lemon juice, and 3.0 to vinegar. "Pure" rain has a pH of 5.6, pH 7 is neutral (distilled water) and pH 13 is very alkaline (lye). Most fish species die in water with a pH of 4.5 to 5.0.

Note.—E.—Extremely vulnerable to acid rain effects; M.—Moderately vulnerable to acid rain effects; S.—Slightly vulnerable to acid rain effects; V.—Vulnerable to acid rain effects; NV.—Not vulnerable to acid rain effects; and XX.—Insufficient data.

TABLE II.—TOTAL LAKE RESOURCES AND FIRST—AND SECOND—ORDER STREAM RESOURCES AT RISK IN THE ACID-SENSITIVE REGIONS OF THE EASTERN UNITED STATES

Region	Percentage of lakes < 200 ueq/alpha [1] (±10—20 percent)	Calculated Number lakes at risk (±20 percent)	Percentage of stream (±10 percent) 200 ueq/l	Calculated total miles (±20 percent) of

APPENDIX: THE NATIONAL WILDLIFE FEDERATION IN BRIEF

The National Wildlife Federation is the nation's largest nonprofit citizen's conservation organization with over 4 million members and supporters. It was founded in 1936, the result of the first North American Wildlife Conference called by the President of the United States to stimulate public interest in proper management of wildlife and other natural resources.

The conservation policies of NWF are set by local leaders elected as delegates to the Federation's annual convention. These delegates represent affiliate organizations in all 50 states as well as Guam, Puerto Rico, and the Virgin Islands. They also elect the volunteer officers of the Federation.

Oversight responsibility for the Federation's budget and administrative operations rests with the elected officers and board members who represent 13 geographical regions in the United States with another 12 members at large.

The Federation's conservation policies are carried out by a Washington staff working with grassroots volunteers through a field staff consisting of 12 regional executives, four regional natural resource centers, and two special wetlands centers in the southeast. Conservation policy is implemented through coordination with other environmental organizations and government agencies, lobbying, dissemination of educational materials, teacher training, wildlife research, and, as a last resort, litigation.

The organization's chief regular publications are the magazines National Wildlife, International Wildlife, and Ranger Rick; a monthly newspaper for affiliate leaders; and Conservation Report. Each state affiliate also produces their own monthly publication.

The Federation's conservation policies represent these guiding principles:

1. Scientific and professional management of wildlife and other natural resources. This includes husbanding scarce natural resources and wise use of those with harvestable surpluses.

2. Preservation of wildlife habitat by preventing indiscriminate destruction.

3. Maintaining optimum numbers and variety of wildlife by designation of suitable areas as wildlife refuges, parks, wild and scenic rivers, trails, and seashores.

4. National and international air quality standards that insure clean air, urban and rural.

5. National and international water quality standards that will insure clean streams, lakes, bays and oceans.

6. Preservation of high quality wilderness and natural areas.

7. Protection of endangered wildlife.

8. Management of toxic wastes to protect human health.

9. Recycling and reuse of natural resources.

10. Developing a national energy strategy aimed at reducing energy growth to the lowest practical level and meeting energy requirements with means which are most efficient and economical and least harmful to the environment.

THE NORTH CAROLINA WILDLIFE FEDERATION

The North Carolina Wildlife Federation was organized in 1945 and is the largest nongovernment conservation and wildlife organization in the State. With a total membership of 21,000, including affiliate club members, sustaining members, patrons and other affiliated organizations, the NCWF has strong ties with most single objective resource agencies in North Carolina. As an affiliate of the National Wildlife Federation, the NCWF is an active part of the over 4 million members whose support we value and many of whose programs are incorporated into our statewide activities at the grass-roots level.

The membership of NCWF is predominantly hunters and fishermen, but successful efforts to broaden our environmental and natural resource policies and interests have altered the balance, permitting a broader and more responsive attitude and an increase in membership while presenting the image of multiple interests and broader educational objectives.

The NCWF has undertaken a strong initiative concerning acid rain by carrying features on the cause and effects in our publications and in mailings to our members.

With a new eight and a half by eleven format, better quality and improved appearance and variety of content, Friend-'O-Wildlife Magazine is meeting our objectives more positively than was previously possible.

Improvement of operations under current management has increased the objectivity of staff and officers and improved communications throughout the State, facilitating direct personal contact with potential affiliate groups and assignments of new duties to area directors.

The last year and a half has seen important wildlife and environmental legislative successes and improved relations with legislators, other state agencies and the officers of other nongovernment organizations.

Cooperative programs with other state, federal and private agencies have increased. A week-long camp program for 1983 will provide 100-plus youths with housing, meals, and intensive training in all aspects of wildlife conservation, hunter-safety certification, hunter ethics, gun use, archery, boating, endangered species and other related outdoor subjects. The agencies involved are NCWF, National Hunters Association, and the 4-H Program.

Officers of NCWF sit on numerous commissions and boards, providing our membership with representation in important decisions, programs and legislation affecting wildlife, land and water, dredge and fill activities and related environmental programs.

Through close cooperation with other sportsmen's groups, the Wildlife Resources Commission and the legislature, a new badly needed fox law for North Carolina and recodification of the hand gun permitting law, providing uniformity in procedures for purchasing hand guns in all counties throughout the State have become law.

Currently, a state-wide essay contest for junior high school students, using the 1983 Wildlife Week theme is being carried on by the NCWF and the Telepohone Pioneers of America.

North Carolina Wildlife Federation policies parallel those of the National Wildlife Federation, adapted to the problems and needs of North Carolinians.

ABOUT THE POLL

The acid rain poll was carried out as part of the Carolina Poll, a twice yearly telephone survey of a representative sample of 500-800 persons of voting age (18 and over) residing in telephone households in North Carolina. The Fall 1982 poll was conducted between October 1-6, 1982 (after pretesting the questionnaire the week before with 100 people to make sure that the questions were understandable) and had a sample size of 584.

Sampling method

Randon digit dialing was used to give every residential telephone in North Carolina an approximately equal chance of being dialed. The number of working residential telephones for each three-digit prefix was estimated by the research department of Knight Publishing Company, Charlotte, North Carolina, on the basis of data supplied by each telephone company operating in the state. Strings of four random digits, confined to working banks where known, were generated by computer to complete the list of random telephone numbers.

Replacement numbers were drawn to substitute for all numbers identified in the interviewing process as either non-working or not belonging to residences. Free replacement was also allowed for eligible respondents who refused to participate. When phones were not answered, two callbacks were made, at least four hours apart, except during the last four hours of the interviewing periods. Replacement numbers were used when callbacks failed to produce willing and eligible respondents.

The sample is a probability sample only at the residential level. Within residences, a loose age and sex quota was set with interviewers instructed to speak to the youngest available adult male, if any, in the household as necessary to obtain an equal number of male and female interviews. This quota is designed to compensate for the difficulty of finding young males at home.

Sampling error

On 95 out of 100 such samples, the results should differ by no more than 4.1 percentage points from what would have been obtained if every telephone number in the state had been dialed.

External validity

The sample matches the 1980 census within predicted margins of error for most combinations of age, race, and sex. Exceptions include a few categories, primarily young black males, who are marginally underrepresented.

Timing

Interviews were conducted from 5:30 to 9:30 p.m. October 1-6 and from 1:30 to 4:30 p.m. on Sunday, October 5.

Interviewers

The Carolina Poll serves as an exercise in precision journalism for students in public affairs reporting classes and as a practical exercise in research design and execution for students in communications research methods classes at the University of North Carolina School of Journalism, Chapel Hill, North Carolina. Graduate and advanced undergraduate students, working under the direction of Professor Jane Delano Brown, handled all phases of the poll design, execution and analysis.

Minimization of bias

The Carolina Poll is a non-profit enterprise. The questions on acid rain represented 5 questions in a 45-question poll (the other questions dealt with a wide variety of social and political issues) and no reference was made to the sponsorship of these questions by the National Wildlife Federation and the North Carolina Wildlife Federation. Interviewees, therefore, can be assumed to be expressing their own opinions uninfluenced by assumptions about the positions of the sponsoring organizations.

NORTH CAROLINA ACID RAIN POLL: PRINCIPAL FINDINGS

1. Although acid rain has not been the dominant issue in the Southeast that it has in the Northeast (particularly New England), public awareness of the problem is widespread among North Carolinians—with nearly 2 out of 3 people familiar with the issue.

2. By a 4-to-1 margin, North Carolinians who said they have heard of the acid rain issue regard acid rain as a serious of very serious problem. This basic pattern varies little with demographics (i.e., holds firm among all segments of society).

3. North Carolinians who consider the acid rain problem serious or very serious are nearly unanimous (by a margin of 26-to-1) in their support for tighter controls on power plant emissions which cause acid rain in the eastern U.S. This pattern also holds among all segments of society.

4. The overwhelming majority (83.3 percent; a margin of better than 7-to-1) of those who support tighter controls on acid raincausing power plant emissions continue to support such controls on power plants that are big polluters even at the cost of a modest increase in their utility bills. This was true even more strongly among registered than non-registered voters, and among Republicans than among Democrats.

5. Of those who said they had heard of acid rain (and had an opinion on how it might influence their vote), fully half of the North Carolina respondents indicated that this issue was important enough to them that it might cause them to vote for or against a congressional candidate. This sentiment was similar among Republicans, Democrats, and Independents.

ROLL RESULTS

Between October 1 and 6, 1982, the Carolina Foll asked a cross section of 584 adults throughout North Carolina by telephone:

HEARD OF ACID RAIN

[1. "Have you ever heard of acid rain?"]

	Yes		No		Don't know

ANALYSIS OF POLL RESULTS

1. AWARENESS OF ACID RAIN PROBLEM

Nearly two-thirds of the North Carolinians surveyed (60.2 percent) said they had heard of acid rain, with awareness of the issue being greater among registered voters (63.7 percent) than among non-registered voters (49.0 percent), and about the same among Republicans (63.3 percent), Democrats (58.4 percent), and Independent (66.0 percent).

Demographically, the better educated respondents were more likely to have heard of acid rain, with those having a college education more than twice as likely (79.4 percent) to have heard of the phenomenon than those with only a grade school education

(35.7 percent). White-collar workers—professional-technical (84.1 percent) and manager-proprietors (67.9 percent)—and students (88.2 percent) were significantly more likely to have heard of acid rain than unemployed or retired persons (50 percent each), house spouse (59.3 percent), and blue-collar and other workers (53.5 percent).

Whites (65.7 percent), Males (69.3 percent), those aged 18–53 (63 percent), and those earning $15,000 or more (66.3 percent and 72.9 percent) were more likely to have heard of acid rain than Blacks and other minorities likely to have heard of acid rain than Blacks and other minorities (33.3 percent), Females (52.1 percent), those 54 and older (54.5 percent), and those earning less than $15,000 (41.0 percent 47.7 percent.

2. SERIOUSNESS OF ACID RAIN PROBLEM

Of those who said they had heard of acid rain, 68.6 percent regarded the problem as serious or very serious, as against only 17.4 percent who thought the problem was not very serious—a nearly 4 to 1 margin. (Considering the population of North Carolina as a whole—including those who had not heard of acid rain—two people out of every five regard acid rain as a serious or very serious problem).

Among those knowledgeable of the problem, few demographic differences were apparent, particularly in the voter registration, income, sex, and age categories. The only significant differences were that those with a college education (75.8 percent), professional-technical workers (81.4 percent) and house spouses (77.1 percent), and knowledgeable Blacks (77.4 percent) all showed a somewhat enhanced view of the seriousness of the problem in relation to those less well-educated (64 percent and 61.2 percent) (but, surprisingly, only 53.3 percent of the Students surveyed regarded the problem as serious or very serious), and informed Whites (67.2 percent). Curiously, although more Republicans than Democrats had heard of the problem, informed Democrats were more likely (74.0 percent) than informed Republicans (58.4 percent) to regard the problem as serious or very serious.

3. SUPPORT FOR MORE CONTROLS ON POWER PLANT EMISSIONS

Those who consider the acid rain problem serious or very serious overwhelmingly support—by more than 26 to 1—tighter controls on power plant emissions which cause acid rain in the eastern United States. (This still represents nearly 36 percent of all North Carolinians—whether or not they had heard of acid rain, and whether or not they regard the problem as serious.)

The pattern was the same regardless of party affiliation, age, income level, or other demographic factors.

4. SUPPORT FOR MORE CONTROLS ON POWER PLANT EMISSIONS EVEN WITH INCREASED UTILITY RATES

The overwhelming majority (83.3 percent) of those who support tighter controls on acid rain-causing power plant emissions continue to support such controls on power plants that are big polluters even at the cost of a modest increase in their utility bills. Only 11.4 percent were deterred in their support for tighter emission controls by the prospect of higher utility rates.

Perhaps not surprisingly, the largest number of defections from the ranks of emission control supporters because of utility costs were among retired (20.8 percent), and unemployed (27.3 percent) people, those earning $10,000 or less (27.3 percent), Blacks (21.7 percent), and those 54 and older (20.3 percent). However, even if these categories, support for increased controls outweighed opposition by 3- or 4-to-1.

Strongest support for controls notwithstanding cost came from those with college educations (92.4 percent; a 20:1 margin), professional-technical workers (94.8 percent; a 28:1 margin), and students (100 percent).

Interestingly, registered voters showed stronger support for controls notwithstanding costs (94.4 percent; an 8.5:1 margin) than non-registered voters (78.8 percent; a 4.5:1 margin). So did Republicans (86.3 percent; an 11:1 margin) in relation to Democrats (79.8 percent; a nearly 6:1 margin).

5. EFFECT ON VOTE FOR CONGRESSIONAL CANDIDATES

Slightly more than half of those who said they had heard of acid rain and had an opinion (44.3 percent versus 39.1 percent) said that a congressional candidate's position on acid rain control was important enough to them that it might cause them to vote for or against that candidate. (This represents 27 percent—better than one-quarter—of the population.) (This ratio was slightly higher among non-registered voters than among registered voters.) This sentiment was similar among Republicans, Democrats, and Independents.

The categories most inclined to base their vote on a candidate's acid rain position (but also reflecting among the highest levels of uncertainty) were the unemployed (56.3 percent vs. 18.8 percent), those earning less than $10,000 (54.3 percent vs. 17.4 percent), and those 54 and older (52.6 percent vs. 19.7 percent).

ABOUT ACID RAIN

In theory, "pure" rain is mildly acidic with a pH of 5.6 to 5.7. Atmospheric carbon dioxide forms carbonic acid as it achieves an equilibrium with precipitation. This mild acid is easily assimilated by the environment and beneficial in effect; it dissolves and releases nutrients essential to plant and animal life.

In reality, both natural and man-made substances tend to increase or decrease the acidity of rainfall. Samples of glaciers and continental ice sheets, taken as indicators of unpolluted precipitation, have revealed pH values both more and less than the theoretical value for unpolluted rain. Natural influences such as sea salts, earthen and volcanic dusts, ammonia and sulfur compounds from the bacterial decomposition of plant and animal matter, among other things, can all either raise or lower pre-existing rainfall pH values.

Over the last several decades, the burning of fossil fuels by man has significantly increased the acidity of rainfall through emissions of sulfur dioxide (SO_x) and nitrogen oxides (NO_x) to the atmosphere. High in the atmosphere, these chemical agents are transformed into sulfuric and nitric acids, which then fall to the earth as acid rain, snow, fog, and dew, or in a dry particulate form of equal acidifying potential. In excessive amounts, this acidity may cause extensive damage to aquatic life, lakes, forests, crops, building materials, and, potentially, human health.

SOURCES OF ACIDITY

In the eastern United States, man-made SO_2 emissions account for 90 percent of the total atomospheric sulfur input. Twenty-to twenty-five-million tons of SO_2 are emitted by man-made sources each year. About 70 percent of this total originates from utility power plants; industrial boilers and commercial and residential furnaces emit most of the rest. Natural sources contribute only 5 percent or less of the eastern sulfur dioxide emissions. Eastern NO_x emissions total about 16-million tons each year and are on the upswing. Automobiles contribute 40 percent of this pollutant, power plants contribute 30 percent, and industrial boilers contribute most of the remainder.

In the East, SO_2 is responsible for 65 percent of the excess acidity in rainfall, and NO_x is responsible for most of the remaining 35 percent. Because power plants release most of the East's sulfur dioxide emissions, and because these facilities often have tall stacks (which facilitate the long-range transport and conversion of SO_2 into sulfuric acid), power plants have been the target of most proposed acid rain control measures.

In the West, the approximately 7-million tons of NO_x emitted each year play a larger role than in the East as precursors of acid rain. Cars and trucks emit the largest share of this pollutant, but utility power plants and non-ferrous smelters are also major contributors. Western polluters emit about 4-million tons of SO_2 each year. The 14 nonferrous smelters in the West emit at least 1-million of these tons. The remaining 3-million tons of SO_2 are released primarily by power plants in combination with thousands of smaller sources.

EFFECTS

Acid rain threatens a growing number of our lakes and streams. A recent survey found that one-fifth of the waters in the East may be susceptible to the effects of acid rain.

The most productive lakes and streams have pH values that range from about 6.5 to 8.0. They support a rich and diverse community of algae and zooplankton, insects, shrimp, crayfish, salamanders, and fish. But some of these waters have a limited capacity to neutralize (or buffer) acid. The continued onslaught of acid rain and snow, year after year, gradually depletes the buffering ability of these sensitive waters. Then their pH drops dramatically.

When the pH of a body of water falls below 5.8 to 6.0, shrimp, crayfish and salamanders die. At pH 5.5 algae, the base of the food web, are affected, some aquatic insects begin to disappear, and sensitive fish species (smallmouth bass, walleye and turbot) stop reproducing. Below pH 5.5, lake trout reproduction ceases. By the time the pH of a lake or stream falls below 5.0, nearly the entire ecosystem will have been substantially affected. Already, hundreds of lakes and streams in sensitive areas are unproductive and devoid of native life forms (e.g., important game species). Restoring these acidified waters to a productive status on any significant scale is nearly impossible.

Acid rain is believed to threaten long-term forest productivity. Acid rain leaches nutrients from sensitive soils and may increase a tree's susceptibility to insects, drought, and fungal attack. The impact of acid rain on agricultural crops at current average acidity levels is not clear, as agricultural soils are routinely limed—or buffered. But highly acidic rain, which can occur in individual storm events, may damage lettuce and other leafy vegetables, tomatoes, and some root crops.

Currently, acid rain falls on at least 2.5-million acres of farmland and 2-million acres of forests and woodlands in the eastern United States. Maps based on soil chemistry and other parameters show that 26

states in the East and 11 states in the West contain high-sensitivity soils (in the latter, particularly at the high elevations).

Acid rain and its precursors, SO_2 and NO_x, also affect man-made structures such as buildings, automobiles, bridges, and statuary. Concrete, stone, paint, steel, and other building and monument materials are suffering accelerated corrosion and weathering. General Motors owner manuals now carry a warning that paint finishes damaged by fallout of atmospheric pollutants are not covered by warranty. The U.S. Capitol Building and the Statue of Liberty are among the national monuments showing acid rain damage. Scientists estimate that acid rain's damage to materials costs billions of dollars each year.

Acid rain has potentially harmful effects on human health. There is danger that toxic metals, mobilized by the action of acid rain in water bodies and soils, will contaminate water supplies and accumulate in food (e.g., mercury in fish). Acid rain can leach toxic metals from copper pipes and lead solder joints in plumbing systems to contaminate drinking water. Many raw drinking water supplies in New England have little or no capacity to neutralize acid and already exceed the U.S. drinking water standard for acidity. In addition, breathing sulfate pollution, a component of acid rain, has been associated with excess deaths and illness due to heart and circulatory failure.

Overall, according to the National Academy of Sciences, the most readily quantifiable effects of acid rain have been estimated to cause damage to the Nation on the order of $5-billion each year.

VULNERABILITY OF NORTH CAROLINA AND OTHER EASTERN STATES TO ACID RAIN DAMAGE

A National Wildlife Federation study, released last Fall, found that 15 of the 26 states east of the Mississippi River, including North and South Carolina, are "extremely vulnerable" to the harmful effects of acid rain. Another ten states are "moderately vulnerable," according to the study, and one—Florida (viewed overall)—is only "slightly vulnerable" (although parts of the state are highly vulnerable).

The ratings are based on each state's rainfall acidity, geology, soils, and water chemistry, which provided measures of the potential for acid rain damage to fisheries, soils, crop foliage, and marble and limestone structures. The results of the NWF study are summarized in Table I.

Among the study's more striking findings: both the fisheries resources and the soil of eleven states—Connecticut, Maine, Massachusetts, Michigan, New Hampshire, New York, North Carolina, Pennsylvania, Rhode Island, Vermont, and Wisconsin—were found to be extremely vulnerable to acid rain's effects.

Calculations by High/Low Research indicate that the 13 states with "extremely vulnerable" fisheries had 6.8 million paid fishing license holders in 1980 or 24.3 percent of the U.S. total. The 9 states with "moderately vulnerable" fisheries accounted for another 3.9 million license holders or 13.9 percent—for a combined total of 38.2 percent of all fishing license holders in the U.S.

According to an assessment prepared for the congressional Office of Technology Assessment, nearly 23,000 miles of streams and 3,000 lakes in the eastern U.S. are acid-altered. Another 37,000-odd stream miles and 6,400 lakes are at risk. A National Academy of Sciences Report indicates that at current emission rates, the number of acidified streams in the eastern U.S. will more than double by 1990.

The number and percentage of lakes and streams "at risk" from acid rain in 14 sensitive areas of the United States are portrayed in Table II.

GENERAL REVENUE SHARING

● Mr. DURENBERGER. Mr. President, on September 30, 1983, the general revenue sharing program will expire unless it is reauthorized by Congress. I am confident that we will pass some form of revenue sharing before that time, but if the experience of the last reauthorization teaches us anything, we can expect to be here right up until September 29 before getting agreement on the final version. While most would agree that some improvements could be made in the program, negotiating a consensus among all of the affected interests is an arduous process.

This does not mean we should shrink from the effort to improve the program. Indeed, revenue sharing may provide a solid foundation for a broader New Federalism proposal. We should explore this possibility in detail in the coming year. However, any more comprehensive New Federalism proposal will crystallize only after considerable deliberation and negotiation. Taking action on such a major change in the intergovernmental system will be a slow process, not likely to occur within the next 6 months.

Local officials cannot wait 6 months or more to know the fate of general revenue sharing; they must have some certainty regarding the Federal assistance that they can expect in the coming year as they prepare their budgets. It is neither fair nor wise to make them wait until September 29 to know whether they can count on revenue sharing dollars.

Therefore, Mr. President, on the first day of the 98th Congress I intend to introduce a simple reauthorization of general revenue sharing. I hope and expect that such a bill will include a substantial number of my Senate colleagues as cosponsors to demonstrate our staunch support of the revenue sharing concept. It is important to send this message to the White House now as the President prepares his budget for fiscal year 1984.

To this end, I am today circulating a "Dear Colleague" letter on behalf of myself and Senators BAKER, DOMENICI, ROTH, SASSER, and BRADLEY asking for cosponsors and explaining the reasons for supporting such a measure. I hope to gather as many cosponsors as possible over this short session so that on its closing day we can announce a majority of the Senate backing the concept of revenue sharing.

I ask that the "Dear Colleague" letter be printed in the RECORD, along with a recent Washington Post article on the importance of general revenue sharing to our Nation's local government.

The material follows:

UNITED STATES SENATE,
COMMITTEE ON GOVERNMENTAL AFFAIRS,
Washington, D.C., November 29, 1982.

DEAR COLLEAGUE: The General Revenue Sharing Program expires on September 30, 1983. Twice reauthorized by Congress since its inception in 1972, Revenue Sharing has provided valuable general purpose fiscal assistance to State and local governments. Although a relatively small component of the overall grant-in-aid system (comprising about 5.5 percent in FY 1981), General Revenue Sharing is very important to many local governments.

Over forty percent of all small cities, for example, receive no other Federal aid. According to a recent survey of cities across the nation, 80 percent of those surveyed said they would be forced to cut services next year if the program were reduced or eliminated, and 50 percent felt they would be forced to raise taxes.

On the first day of the 98th Congress we will introduce a bill to reauthorize the General Revenue Sharing Program. It will be a simple reauthorization for three years at the current funding level of $4.6 billion and will employ the same allocation formulas as the present program. The purpose of doing this is simple. A clean reauthorization bill with wide bipartisan support in the Senate would be a signal to both the House and the Administration that the Senate will, at the very least, continue the present program.

As we all know, the existing General Revenue Sharing Program is flawed in some respects. We expect many of the cosponsors of this bill to introduce their own bills making changes in the areas of concern to them or even revamping the program entirely. It is important, though, to find a vehicle early in the next Congress to demonstrate strong Senate support for the concept of revenue sharing. With strong support, this bill will make the point emphatically that the current program, flawed as it is, will be the minimally acceptable alternative to the Senate—a starting place for possible improvement or broadening into a more comprehensive New Federalism program.

We encourage you to join us in cosponsoring a simple reauthorization at this time as a show of support for the concept of general purpose fiscal assistance. If you would like to do so, please have a member of your staff contact Mr. Larry Hunter at 224-4718.

Sincerely,

JIM SASSER.
DAVE DURENBERGER.
PETE V. DOMENICI.
HOWARD H. BAKER, JR.
WILLIAM V. ROTH, JR.
BILL BRADLEY.

CITIES WARN ON REVENUE-SHARING LOSS

(By Howard Kurtz)

Officials from eight of 10 cities say they would have to cut services if federal revenue sharing were reduced next year, and abut half say they would also have to raise taxes, according to a survey released today by the National League of Cities.

Nearly one-third of the cities surveyed also said they would have to lay off municipal workers if revenue-sharing funds were cut. No one relies more on the program than small cities—41 percent of towns with populations between 10,000 and 50,000 said revenue sharing is the only federal aid they receive.

The survey marks the beginning of a lobbying offensive by the league to protect the $4.6 billion program, which must be reauthorized by Congress next year. The league is to focus on the program at its annual meeting this week in Los Angeles.

Most mayors are enthusiastic about the program, which makes up 5 to 10 percent of their city budgets, because they can spend the money any way they want.

Administration budget-cutters have not suggested that the program is a target, and plans to phase it out under President Reagan's "New Federalism" apparently have been dropped. "I know of no plans to reduce general revenue sharing," a spokesman for the Office of Management and Budget said.

The league reported that "revenue sharing has become in many ways the glue that holds the precarious fiscal situation of many cities together."

The program, which began as the Nixon administration's version of New Federalism, is used for everything from downtown revitalization to Meals on Wheels for senior citizens. New Orleans uses its money for street cleaning, Birmingham for storm sewers and Frankfort, Ind., for the town library.

More than half the big cities reported they spend funds on such basic items as police, health care or social services. Albuquerque, N.M., uses the money to pay 80 percent of its firemen. Washington spends its $17 million payment on a crime prevention unit, three fire companies, welfare payments and street lighting.

In Baltimore, officials use most of their $24 million allotment to run the fire department and ambulance service. Another $5 million goes for playgrounds and recreation centers, with $1 million earmarked for trash collection.

"Most of that money would have to be replaced," said Sandy Jordan, a Baltimore budget analyst. "There's no way you cannot fund the fire department. We've already pared all these services back the last few years."

Jordan said Baltimore would have to raise the property tax rate by 60 cents to compensate for the cuts, an increase he termed politically impractical. "We already have a property tax that's twice as high as any other subdivision in Maryland," he said. "If you want to keep your middle- and upper-income taxpayers, you can't tax them out of your jurisdiction."

In similar fashion, the smallest cities in the survey said they would have to raise property taxes 45 percent to make up the difference, while the largest cities predicted increases of 15 percent.●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive prior notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulated that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notifications which have been received. The classified annexes referred to in several of the covering letters are available to Senators in the office of the Foreign Relations Comittee, room 4229, Dirksen Building.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 29, 1982.
In reply refer to I-03816/82ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-09 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Navy's proposed Letter of Offer to the United Kingdom for defense articles and services estimated to cost $900 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

PHILIP C. GAST,
Director.

TRANSMITTAL NO. 183-09

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: United Kingdom.

(ii) Total estimated value:

	Millions
Major defense equipment [1]	$670
Other	230
Total	900

[1] As defined in section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: Purchase of up to 2,000 AGM-88 High Speed Anti-Radiation Missiles, spare parts, launchers, and the use of United States missile test ranges.

(iv) Military Department: Navy (LCX).

(v) Sales commission, Fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See Annex under separate cover.

(vii) Section 28 report: Case not included in section 28 report.

(viii) Date report delivered to Congress: November 29, 1982.

POLICY JUSTIFICATION

UNITED KINGDOM—AGM-88 HIGH SPEED ANTI-RADIATION MISSILES

The Government of the United Kingdom has requested the purchase of up to 2,000 High Speed Anti-Radiation Missiles (HARM), spare parts, launchers, and the use of United States missile test ranges at an estimated cost of $900 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of the United Kingdom; furthering NATO rationalization, standardization, and interoperability; and enhancing the defense of the Western Alliance.

The United Kingdom's Royal Air Force has a requirement for a defense suppression weapon to combat the missile threat faced by Tornado aircraft. HARM will assist the Royal Air Force in achieving air superiority by enabling Tornado aircraft to reach enemy airfields, accomplish their tactical mission, and survive.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Texas Instruments Corporation of Dallas, Texas.

Implementation of this sale will not require the assignment of any additional U.S. Government personnel to the United Kingdom. Approximately 20 U.S. contractor representatives will be required for one year in the United Kingdom to train their United Kingdom counterparts and four U.S. contractor representatives will be required in the United Kingdom to provide logistic and technical post design support for the life of the program (1983-1996).

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 29, 1982.
In reply refer to I-03926/82ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-03 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Navy's proposed Letter of Offer to Colombia for defense articles and services estimated to cost $50 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

PHILIP C. GAST,
Director.

TRANSMITTAL NO. 83-03

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Colombia.

(ii) Total estimated value:

	Millions
Major defense equipment [1]	$46
Other	4
Total	50

[1] As defined in section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: Two hundred forty AIM-7F SPARROW missiles with support.

(iv) Military Department: Navy (ACU).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See Annex under separate cover.

(vii) Section 28 report: Included in report for quarter ending September 30, 1982.

(viii) Date report delivered to Congress: November 29, 1982.

POLICY JUSTIFICATION

COLOMBIA—AIM-7F SPARROW MISSILES

The Government of Colombia has requested the purchase of 240 AIM-7F SPARROW missiles with support at an estimated cost of $50 million.

This sale is consistent with the U.S. policy of assisting other nations to provide for their own defense and security by the transfer of reasonable amounts and types of mili-

tary equipment. As an ally under the Rio Pact, Colombia is important to the United States in maintaining stability in the approaches to the Panama Canal.

Colombia wishes to arm its SKYGUARD air defense system with AIM-7F missiles. The sale would be a major step in modernizing and strengthening the Colombian Army's air defense capability and will contribute toward its ability to meet national defense objectives.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be either the Raytheon Corporation of Lowell, Massachusetts, or the General Dynamics Corporation of Pomona, California.

Implementation of this sale will not require the assignment of any U.S. Government personnel. Contractor representatives will be required to provide approximately three months of training and technical services for approximately two years.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C. November 29, 1982.
In reply refer to I—03816/82ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-01 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter of Offer to Lebanon for defense articles and services estimated to cost $32 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

PHILIP C. GAST,
Director.

TRANSMITTAL NO. 83-01

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective Purchaser: Lebanon

(ii) Total Estimated Value:

Major defense equipment[1]	*Millions*
	$24
Other	8
Total	32

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of Articles or Services Offered: Thirty-four M48A5 tanks with related ammunition, spare parts, ancillary equipment, and training.

(iv) Military Department: Army (URW, URH, URY, URG, and OAU).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Case not included in Section 28 report.

(viii) Date Report Delivered to Congress: 30 Nov. 1982.

POLICY JUSTIFICATION

LEBANON—M48A5 TANKS

The Government of Lebanon has requested the purchase of 34 M48A5 tanks with related ammunition, spare parts, ancillary equipment, and training at an estimated cost of $32 million.

This sale will contribute to the foreign policy objectives of the United States by enabling Lebanon to increase its capability to provide for its own security and defense. As the Lebanese Government reasserts itself in the wake of recent hostilities, well equipped and trained armed forces are essential to assuring the nation's sovereignty.

These tanks will be used to equip one battalion of the Lebanese Army. The sale of this equipment and support will not affect the basic military balance in the region.

The M48A5 tanks will come from U.S. Army stocks.

Implementation of this sale will require the assignment of a Mobile Training Team of 12 U.S. Government personnel in-country for 179 days after arrival of the first increment of tanks. No contractor representatives will be required.

There will be minimal impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-02 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter of Offer to Pakistan for defense articles and services estimated to cost $40 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

PHILIP C. GAST,
Director.

TRANSMITTAL NO. 83-02

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective Purchaser: Pakistan.

(ii) Total Estimated Value:

	Millions
Major Defense Equipment[1]	$29
Other	11
Total	40

[1] As defined in Section 47(6) of the Arms Control Act.

(iii) Description of Articles or Services Offered: Ten AN/TPQ-36 radar systems with spares, support equipment, technical assistance, and training.

(iv) Military Department: Army (VCK).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Case not included in Section 28 report.

(viii) Date Report Delivered to Congress: Nov. 30, 1982.

POLICY JUSTIFICATION

PAKISTAN—AN/TPQ-36 RADAR SYSTEMS

The Government of Pakistan has requested the purchase of ten AN/TPQ-31 radar systems with spares, support equipment, technical assistance, and training at an estimated cost of $40 million.

This sale will contribute to the foreign policy objectives of the United States by enabling Pakistan to increase its capability to provide for its own security and defense, particularly in view of the increased threat resulting from the Soviet invasion of Afghanistan.

The Government of Pakistan requires these weapon locating radar systems as a primary means of countering hostile mortar fire. This sale is a part of Pakistan's overall force modernization plan.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Hughes Aircraft Corporation of Fullerton, California.

Implementation of this sale will require the assignment of five additional U.S. Government personnel and one contractor representative to Pakistan for four months.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 30, 1982.
In reply refer to: I-04697/82.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-07, concerning the American Institute in Taiwan's proposed Letter of Offer to the Coordination Council for North American Affairs for defense articles and services estimated to cost $97 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

PHILIP C. GAST,
Director.

TRANSMITTAL No. 83-07

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective Purchaser: Coordination Council for North American Affairs (CCNAA), pursuant to P.L. 96-8.

(ii) Total Estimated Value:

	Millions
Major Defense Equipment[1]	$76
Other	21
Total	97

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of Articles or Services Offered: One hundred sixty-four M113A2 armored personnel carriers (to include 24 ambulances), 90 M106A2 mortar carriers, 72M125A2 mortar carriers, and 31 command post vehicles. Ancillary support items are to be provided for all of the vehicles.

(iv) Military Department: Army (XXO).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.

(vii) Section 28 Report: Case not included in Section 28 report.

(viii) Date Report Delivered to Congress: 30 November 1982.

POLICY JUSTIFICATION

COORDINATION COUNCIL FOR NORTH AMERICAN AFFAIRS (CCNAA)—ARMORED PERSONNEL CARRIERS, MORTAR CARRIERS, AND COMMAND POST VEHICLES

This proposed Letter of Offer and Acceptance provides for the sale of 164 M113A2 armored personnel carriers (to include 24 ambulances), 90 M106A2 mortar carriers, 72 M125A2 mortar carriers, and 31 command post vehicles. Ancillary support items are to be provided for all of the vehicles. The estimated cost of this sale is $97 million.

The proposed sale of these vehicles is consistent with United States law and policy, as expressed in Public Law 96-8.

These vehicles will be used by Taiwan to equip armored units. Taiwan is experienced in operating and maintaining these vehicles.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the FMC of San Jose, California.

It is anticipated that implementation of this sale will require the assignment of four additional contractor representatives to Taiwan for one month.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 29, 1982.
In reply refer to: I-03926/82ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-03 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Navy's proposed Letter of Offer to Colombia for defense articles and services estimated to cost $50 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

PHILIP C. GAST,
Director.

TRANSMITTAL No. 83-03

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective Purchaser: Colombia.

(ii) Total Estimated Value:

	Millions
Major Defense Equipment[1]	$46
Other	4
Total	50

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of Articles or Services Offered: Two hundred forty AIM-7F SPARROW missiles with support.

(iv) Military Department: Navy (ACU).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Included in report for quarter ending 30 September 1982.

(viii) Date Report Delivered to Congress: 29 November 1982.

POLICY JUSTIFICATION

COLOMBIA—AIM-7F SPARROW MISSILES

The Government of Colombia has requested the purchase of 240 AIM-7F SPARROW missiles with support at an estimated cost of $50 million.

This sale is consistent with the U.S. policy of assisting other nations to provide for their own defense and security by the transfer of reasonable amounts and types of military equipment. As an ally under the Rio Pact, Colombia is important to the United States in maintaining stability in the approaches to the Panama Canal.

Colombia wishes to arm its SKYGUARD air defense system with AIM-7F missiles. The sale would be a major step in modernizing and strengthening the Colombian Army's air defense capability and will contribute toward its ability to meet national defense objectives.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be either the Raytheon Corporation of Lowell, Massachusetts, or the General Dynamics Corporation of Pomona, California.

Implementation of this sale will not require the assignment of any U.S. Government personnel. Contractor representatives will be required to provide approximately three months of training and technical services for approximately two years.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 29, 1982.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-05, concerning the Department of the Navy's proposed Letter of Offer to Saudi Arabia for defense articles and services estimated to cost $408 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

PHILIP C. GAST,
Director.

TRANSMITTAL No. 83-05

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective Purchaser: Saudi Arabia.

(ii) Total Estimated Value:

	Millions
Major defense equipment[1]	$0
Other	408
Total	408

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of Articles or Services Offered: This case amendment is for the purchase of services, equipment, and materials associated with the software design, development, installation, test, and check-out of a Command, Control, and Communications (C^3) system and related communications system upgrade for the Royal Saudi Naval Forces.

(iv) Military Department: Navy (LAH, Amendment 6).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.

(vii) Section 28 Report: Case not included in Section 28 report.

(viii) Date Report Delivered to Congress: November 29, 1982.

POLICY JUSTIFICATION

SAUDI ARABIA—COMMAND, CONTROL, AND COMMUNICATIONS SYSTEM

The Government of Saudi Arabia has requested amendment of an existing Foreign Military Sales (FMS) agreement for the purchase of services, equipment, and materials associated with the software design, development, installation, test, and check-out of a Command, Control, and Communications (C^3) system and related communications system upgrade for the Royal Saudi Naval Forces at an estimated cost of $408 million. Approval of this request will increase the cost of sales agreements pertaining to communications system equipment and C^3 integration systems to $606 million.

This sale is consistent with the stated U.S. policy of assisting friendly nations to provide for their own defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continuing willingness of the United States to support the Saudi Arabian effort to improve the security of the country through modernization of its naval forces. In a regional context, enhancement of the defensive capabilities of Saudi Arabia will also contribute to overall Middle East security.

Saudi Arabia is in the process of enlarging and improving its naval forces through the Saudi Naval Expansion Program (SNEP) with the United States. The SNEP includes the purchase of 29 ships and craft, shore facilities, equipment, logistical support, and training. This FMS case through Amendment 5 has provided a shore-based naval communications system with communications stations at Jidda, Jubail, and Riyadh; two transportable secondary communications and operational control units; vehicular radio communication systems; and design of a command. This sale, amendment 6, will provide for the shore-based communications system and the U.S.-designed C^3 system which are essential for the effective operations and control of Saudi naval forces. This sale will not introduce a new military capability into the region since neighboring countries have C^3 systems with similar capabilities.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be Science Applications, Incorporated of McLean, Virginia.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Saudi Arabia.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 29, 1982.

In reply refer to: I-03940/82ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-04, concerning the Department of the Air Force's proposed Letter of Offer to Saudi Arabia for defense articles and services estimated to cost $113 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

PHILIP C. GAST,
Director.

TRANSMITTAL NO. 83-04

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective Purchaser: Saudi Arabia.

(ii) Total Estimated Value:

	Millions
Major defense equipment	$0
Other	113
Total	113

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of Articles or Services Offered: Cooperative logistics supply support arrangement consisting of a blanket order requisition (FMSO II) case for follow-on spares and supplies to support aircraft and other systems and subsystems of U.S. origin being operated by the Saudi armed forces.

(iv) Military Department: Air Force (KBR).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.

(vii) Section 28 Report: Case not included in Section 28 report.

(viii) Date Report Delivered to Congress: 29 November 1982.

POLICY JUSTIFICATION

SAUDI ARABIA—COOPERATIVE LOGISTICS SUPPORT ARRANGEMENT

The Government of Saudi Arabia has requested the purchase of a cooperative logistics supply support arrangement consisting of a blanket order requisition (FMSO II) case for follow-on spares and supplies to support aircraft and other systems and subsystems of U.S. origin from 1 March 1983 through 28 February 1984 at an estimated cost of $113 million.

This sale is consistent with the stated U.S policy of assisting other nations to provide for their own defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continuing willingness of the U.S. to support Saudi Arabia which is an important force for moderation in the region.

This cooperative logistics supply support arrangement FMSO II case is necessary to ensure an uninterrupted flow of spare parts to support the Saudi F-5, F-15, and C-130 aircraft and other air force systems and subsystems of U.S. origin. Saudi Arabia will have no difficulty in absorbing the articles.

The sale of this equipment support will not affect the basic military balance in the region.

Procurement of these items will be from the many contractors providing similar items to the U.S. forces.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Saudi Arabia.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 29, 1982.

(ii) Total Estimated Value:

	Millions
Major defense equipment[1]	$54
Other	5
Total	59

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of Articles or Services Offered: Forty-two amphibious vehicles (41 LVTP-7A1 and one LVTC-7A1) with initial provisioning.

(iv) Military Department: Navy (SBJ).

(v) Sales Commission, Free, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.

(vii) Section 28 Report: Included in report for quarter ending September 30, 1982.

(viii) Date Report Delivered to Congress: November 29, 1982.

POLICY JUSTIFICATION

KOREA—AMPHIBIOUS VEHICLES

The Government of Korea has requested the purchase of 42 amphibious vehicles (41 LVTP-7A1 and one LVTC-7A1) with initial provisioning at an estimated cost of $59 million.

This sale will contribute to the foreign policy objectives of the United States by helping to improve the security of a friendly country which has been and continues to be an important force for modernization and progress in eastern Asia. The sale of this equipment and support will enhance deterrence and contribute to the preservation of peace and stability on the Korean peninsula.

This sale will assist in the modernization and strengthening of the Republic of Korea Navy Marine Force and will contribute toward its capability of meeting its national defense objectives. A modern, well equipped Republic of Korea Navy Marine Force contributes to regional stability in an area of

significant strategic interest for the United States.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be FMC of Chicago, Illinois.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Korea.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 29, 1982.
In reply refer to: I-03444/82ct.

Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-06, concerning the Department of the Army's proposed Letter of Offer to Saudi Arabia for design and construction services estimated to cost $700 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

PHILIP C. GAST,
Director.

TRANSMITTAL NO. 83-06

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective Purchaser: Saudi Arabia.

(ii) Total Estimated Value: $700 million.

(iii) Description of Articles or Services Offered: This case is for design and construction services for an airfield to include facilities and furnishings required to provide logistical support to the King Khalid Military City and to support up to one squadron of Royal Saudi Air Force tactical aircraft.

(iv) Military Department: Army (HDS).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.

(vii) Section 28 Report: Case not included in Section 28 report.

(viii) Date Report Delivered to Congress: 29 November 1982.

POLICY JUSTIFICATION

SAUDI ARABIA—AIRFIELD CONSTRUCTION

This case is for design and construction services for an airfield to include facilities and furnishings required to provide logistical support to the King Khalid Military City and to support up to one squadron of Royal Saudi Air Force (RSAF) tactical aircraft at an estimated cost of $700 million.

This effort is a part of the continuing Engineering Assistance Agreement Program by which the U.S. Government, through the U.S. Army Corps of Engineers, is providing advice and assistance in the construction of certain facilities for the Saudi Arabian Ministry of Defense and Aviation.

The primary purpose of the airfield is to facilitate support of King Khalid Military City. A secondary purpose relates to dispersal of RSAF aircraft in the event of heightened military tensions in the area. All maintenance facilities are programmed in the project. They include maintenance facilities to support the aircraft and those required in support of the airfield infrastructure. It is estimated that 100 trained non-U.S. Government sponsored personnel will be employed to provide the required maintenance of the airfield facilities. The Saudi Arabian Government will provide the operations and maintenance support with U.S. Army Corps of Engineers advisory assistance.

The sale of these services will not affect the basic military balance in the region.

There will be no prime contractor for this sale.

It is estimated that one officer and seventy-eight Department of the Army civilian (DAC) employees will be required for on-site construction supervision. This staffing is an average over a three year period. In addition, there will be an equivalent of ten DAC employees that will be required on the U.S. Army Corps of Engineers staff in Saudi Arabia and the U.S. to administer the project. The estimated number of construction contractor personnel required in Saudi Arabia to perform the construction work is 2,500, primarily third country nationals.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

DEATH OF ROBERT SHORT

● Mr. DURENBERGER. Mr. President, 2 weeks ago the people of Minnesota lost a very special friend. After a prolonged illness, Robert Short died of lung cancer on November 20.

Bob was known by many people for many things all around the country. Bob Short was not always liked—just ask any baseball fan in Washington, D.C.—but he was always respected. He set his goals, then marched full steam ahead to accomplish his objectives. Whether the pursuit was sports teams, hotels, trucking, or politics, Bob went in head first with a vitality and love of life that were unmatched.

There were really two Bob Shorts. The public's Bob Short was a hard-driving businessman who was sometimes gruff, often strident, and always ambitious. The public's Bob Short was the person who started with nothing and through his own hard work, ability, and creativity, built a business empire that enabled him and his family to live comfortably.

But there was another Bob Short who was seen by only a handful of people. Yet, it was this second Bob Short who will long be remembered with affection. This second Bob Short is the person who never forgot his debt to his community, to his church and to his fellow person. The stories of Bob's generosity to those less fortunate than he are legion, yet they only touch the surface of the number of people he helped. Mostly, his contributions were private matters: The helping hand to a family or employee in need; the generous gifts to private colleges without any expectation of public thanks; the soft touch for a person in trouble.

Jim Klobuchar, writing in the Minneapolis Star and Tribune, summed it up this way:

(Bob Short) was large enough in spirit, and sure enough in who and what he was not to seek public approval for those gifts . . .

Life was big and combative and rewarding for him. He lived it at or near full throttle most of the time. Yet he learned something that has eluded others more endeared by the public, that whatever the excitements of life from 8 to 5, none of them mean much in any enduring way beside the trust of those you bring into the world.

Both the public and the private Bob Short made their marks on the world. Bob will be remembered in different ways by different people. He was a good friend. He was a tough opponent in business and in politics. He was a faithful defender of his beliefs. He was a loving father and husband.

But most of all Bob Short was a good and decent man who used his talents to bless those around him. Bob Short will be missed.●

JOINT VENTURE FOR AFFORDABLE HOUSING

● Mr. LUGAR. Mr. President, for some months now, I have been watching a promising new program develop out of the Department of Housing and Urban Development called the Joint Venture for Affordable Housing. The joint venture represents a new level of public/private cooperation to reduce housing costs, and although it is less than a year old, it is already having some positive effects.

The joint venture is the product of a Task Force on Affordable Housing established by Secretary Pierce and chaired by Under Secretary Donald Hovde. The two major conclusions of the task force were that because there is no single cause of high housing costs, there is no single solution; and promoting affordable housing at the local level is primarily an issue of deregulation and streamlining processing.

The specific activities of the joint venture are focused on three things over which State and local officials have almost total control, and which previous HUD demonstrations suggest can reduce the cost of a new house by as much as 25 percent. These three things are: regulations that are not necessary for health and safety; processing procedures that are too long and complex; and the failure to use innovative site design and construction techniques that can save thousands of dollars per house.

The joint venture has already produced some striking success stories. For example, as a result of the affordable housing demonstration program with the National Association of Home Builders (NAHB), local governments in about 30 communities across the country are working closely with builders and developers to construct affordable subdivisions. The first homes were recently sold in Lincoln, Nebr., for $40,000—approximately

$10,000 less than the price of comparable homes in the area. In Grand Junction, Colo., some 17 homes have been sold in the $39,000 to $47,000 price range, approximately $5,000 under the appraised value set by the lending institutions.

The savings in these projects are replicable because they come from changes that result almost entirely from improved communications between local governments, builders, and developers. The HUD role is that of catalyst—to encourage local partnerships, to provide technical assistance, and to document the process. The real innovators are the builders with ideas of how to cut costs, and the local officials willing to make the necessary changes so that these ideas can be used.

I have had some personal experience with the joint venture through Elkhart County in my home State of Indiana. Elkhart won a nationwide competition sponsored by the National Association of Counties (NACo) and HUD to be the site of a countywide affordable housing workshop. The purpose was to bring together the local people who have a stake in housing—elected officials, State and local government representatives, planners, bankers, developers, builders, and citizens—to develop an affordable housing action plan for Elkhart County. I presented the keynote address for this workshop which took place September 2-3. As a result of the meeting, several groups decided on specific follow up activities. For example, a group of local builders has been meeting to develop a strategy for local action to make specific regulatory changes.

The stimulating effects of such a program can be seen in what else has happened in Elkhart County since the workshop. The community became so excited about the possibilities of creating more affordable housing, while at the same time helping to stimulate the local manufactured housing industry, that it succeeded in being selected as a demonstration site in the affordable housing demonstration program. In addition, the community decided on its own to put on a "National Symposium on Affordable Housing" to promote its concept of "The New American Neighborhood."

Elkhart County has received national recognition for these two projects. President Reagan sent a congratulatory letter to the county on the occasion of the opening of the affordable housing demonstration sites, and the Under Secretary of HUD gave the keynote address at the national symposium, November 8-9. Over 400 people—more than twice the number expected—attended the symposium, and toured the just-opened demonstration sites. Through these projects, Elkhart County has demonstrated that housing costs can be reduced without Federal subsidies when local governments cooperate to change subdivision regulations, zoning ordinances, and building codes; and that manufactured housing is compatible with and can be as attractive as custom-built housing, while at the same time retaining the advantages that go with in-plant manufacturing.

The stimulus, information, and assistance provided by the joint venture are helping communities like Elkhart County to use their own powers and ingenuity to solve local problems with local resources. Currently, the joint venture has projects in 26 States. In addition to NAHB and NACo, a number of other national organizations are engaged in specific projects and activities to gather information about affordable housing activities that work, and to share this information widely with their members to make them more aware of the specific role each plays in the housing construction process. They include: the International City Management Association (ICMA); the National Governors' Association (NGA); the National Conference of State Legislatures (NCSL); the Council of State Community Affairs Agencies (COSCAA); and the American Planning Association (APA).

I believe the Joint Venture for Affordable Housing represents an important new direction in Federal support for housing. I encourage you to find out more about the joint venture, and to help stimulate other joint venture projects around the country.

To find out more about the joint venture and to subscribe to it's information bulletin "Affordable Housing Progress" contact: Ms. Cindy Weakland, Rm. 8106, U.S. Department of Housing and Urban Development, Washington, D.C. 20410, 202/755-5544.●

ORDER OF BUSINESS

Mr. STEVENS. Madam President, it is the intention of the leadership to do the routine business that is before the Senate and then to recess the Senate until 12 noon tomorrow, for the information of those who might leave the floor in the meanwhile.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HAWKINS). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF COMMODITY EXCHANGE

Mr. STEVENS. Madam President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 5447.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House disagree to the amendment of the Senate to the bill (H.R. 5447) entitled "An Act to extend the Commodity Exchange Act, and for other purposes", and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered. That the following be the managers of the conference on the part of the Houses: Mr. de la Garza, Mr. Jones of Tennessee, Mr. Bedell, Mr. Glickman, Mr. Daschle, Mr. Dorgan, Mr. Harkin, Mr. English, Mr. Panetta, Mr. Wampler, Mr. Jeffords, Mr. Coleman, Mr. Roberts of Kansas, Mr. Skeen, Mr. Gunderson, and Mr. Evans of Iowa. Mr. Dingell, Mr. Wirth, and Mr. Broyhill, as additional conferees, for consideration of title I and section 237 of H.R. 5447 as passed by the House, and section 3 of the Senate amendment.

Mr. STEVENS. Madam President, I move that the Senate insist on its amendment and agree to a conference requested by the House on the disagreeing votes of the two Houses, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Chair appointed Messrs. HELMS, DOLE, HAWAKAWA, LUGAR, COCHRAN, HUDDLESTON, PRYOR, BOREN, and HEFLIN conferees on the part of the Senate.

MEMBERSHIP IN UNITED NATIONS GENERAL ASSEMBLY

Mr. STEVENS. Madam President, I ask unanimous consent that the Committee on Foreign Relations be discharged from further consideration of House Concurrent Resolution 322, dealing with membership in the United Nations General Assembly, and I ask for its immediate consideration.

The PRESIDING OFFICER. The concurrent resolution will be stated by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 322) regarding membership in the United Nations General Assembly.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

Mr. FORD. I have no objection.

There being no objection, the concurrent resolution was considered and agreed to.

Mr. STEVENS. Madam President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. FORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ADVANCEMENT OF SCIENCE AND TECHNOLOGY—SENATE CONCURRENT RESOLUTION 130

Mr. STEVENS. Madam President, on behalf of Senator SCHMITT and Senator NUNN, I send to the desk a concurrent resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The concurrent resolution will be stated by title.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 130) expressing the sense of Congress at the advancement of science and technology in the communications and electronics industry is vital to the needs of the needs of the United States.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. SCHMITT. Madam President, I am introducting today, on behalf of Senator NUNN and myself, a resolution expressing support for a national Science Center for Communications and Electronics.

In many ways, the national security and the economic and social well-being of the United States will rest on the ability of our country to remain in the forefront of the expanding frontiers of science and technology. Communications and electronics represents one of the most dynamic, expanding, and competitive areas of all the scientific and engineering disciplines and technologies. This Nation is now confronted with a national crises of significant voids and shortages of scientists, engineers, and technicians in communications and electronics. The National Science Center for Communications and Electronics represents a unique response of the long-established teamwork between science, industry, and the military to meet this challenge.

As currently envisioned, the center will utilize new techniques of graphics and electronic media arts, advanced instructional technology and all forms of new computer and communications systems to fulfull its mission. In addition to 33,000 military students annually from the United States and allied nations, the center will be available on a daily basis to young people from elementary school to postgraduate age, as well as the visiting general public.

Financing of this center will be accomplished by private donations. A nonprofit foundation was created in 1980 by leaders of the communications and electronics industry to raise the needed $18 million for construction of the center. It is expected that construction of the center could begin in January 1983, and be completed in December 1987. The Department of the Army has agreed to donate 43 acres of land on Fort Gordon, Ga., to house the center. Upon completion of the center, maintenance and operation of the facility would become the responsibility of the Army which will use the facility for training purposes.

Mr. NUNN. Madam President, I am pleased to be associated with this resolution calling for a National Science Center for Communications and Electronics. Since I first introduced a resolution to this effect early in this Congress, I have been closely following the efforts of the National Science Center Foundation to see this dream become a reality. In addition, I am also a member of the Council of Advisers of the National Science Center.

In many ways the national security and the economic and social well-being of the United States will rest on the ability of our country to remain in the forefront of the expanding frontiers of science and technology. Communications and electronics represents one of the most dynamic, expanding, and competitive areas of all the scientific and engineering disciplines and technologies. This Nation is now confronted with a national crisis of significant voids and shortages of scientists, engineers, and technicians in communications and electronics. The National Science Center for Communications and Electronics represents a unique response of the long-established teamwork between science, industry, and the military to meet this challenge.

As currently envisioned, the Center will utilize new techniques of graphics and electronic media arts, advanced instructional technology, and all forms of new computer and communications systems to fulfill its mission. In addition to 33,000 military students annually from the United States and allied nations, the Center will be available on a daily basis to young people from elementary school to postgraduate age, as well as the visiting general public.

Financing of this Center will be accomplished by private donations. A nonprofit foundation was created in 1980 by leaders of the communications and electronics industry to raise the needed $18 million for construction of the Center. It is expected that construction on the Center could begin in January 1983, and could be completed in December 1987. The Department of the Army has agreed to donate 43 acres of land on Fort Gordon, Ga., to house the Center. Upon completion of the Center, maintenance and operation of the facility would become the responsibility of the Army, which will use the facility for training purposes.

I was greatly pleased when the distinguished Senator from New Mexico, Senator SCHMITT, expressed an interest in this area and led the effort to design an agreeable resolution expressing the strong support of the Senate for these important efforts. This resolution reflects his wise counsel, and I am deeply grateful for his fine efforts.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to.

The preamble was agreed to.

The concurrent resolution, with its preamble, reads as follows:

S. CON. RES. 130

Whereas the Committee on Commerce, Science, and Transportation of the Senate, the Committee on Energy and Commerce of the House of Representatives, the Federal Communications Commission, and the Congress have long recognized the importance of scientific and technological developments in the United States in meeting its defense, industrial, and other needs;

Whereas such scientific and technological developments in the communications and electronics industry are of particular importance to the United States in meeting its defense, industrial, and other needs;

Whereas the traditional technological superiority enjoyed by the United States in the area of communications and electronics is dwindling due to the disparity in the commitment;

Whereas it is in the best interest of the United States to reverse the trend of declining United States technological superiority and to continue to lead in all areas of communications and electronics;

Whereas it is in the best interest of the United States to support the establishment of a national center dedicated to the advancement of science and technology in communications and electronics; and

Whereas such a national center would promote the interest of the public at large in such advancements in communications and electronics; tie the corporate and governmental worlds together to reach a common goal: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress shall take an active and leading role in making the public, and the corporate and governmental worlds aware of the importance of assuring and maintaining the scientific and technological superiority of the United States in the area of electronics and communications, and to encourage the establishment within the United States of a national center dedicated to communications and electronics.

Mr. STEVENS. Madam President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. FORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR RECOGNITION OF CERTAIN SENATORS ON TOMORROW

Mr. STEVENS. Madam President, I ask unanimous consent that special orders be entered for the following Senators on Thursday, December 2, for not to exceed 15 minutes each: The Senator from Virginia (Mr. HARRY F. BYRD, JR.), the Senator from Arkansas

(Mr. PRYOR), and the Senator from Maryland (Mr. MATHIAS).

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. STEVENS. Madam President, it is my intention to ask that the Senate stand in recess until 12 noon tomorrow. It is my understanding that a cloture vote is scheduled for tomorrow, to occur automatically after the ascertainment of a quorum, 1 hour past the convening hour. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Is there any further business to come before the Senate?

Mr. METZENBAUM. I have an inquiry.

Mr. STEVENS. I yield to the Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. METZENBAUM. Madam President, in view of the fact that there are three special orders, as I understand it, at 12 o'clock when we convene, will the Chair be good enough to advise the Senator from Ohio by what time must amendments be offered tomorrow if they are to be offered?

The PRESIDING OFFICER. The amendments must be offered 1 hour prior to the cloture vote which will occur after the quorum call which will begin at 1 p.m., so the precise time will be ascertained depending upon the time it takes to get a quorum.

Mr. METZENBAUM. Madam President, is the Senator from Ohio correct that if the amendments are offered prior to 12:15 p.m. or even possibly later than that the amendments will be timely?

The PRESIDING OFFICER. If the amendments are brought to the desk prior to that hour, they will be eligible.

Mr. METZENBAUM. I thank the Chair.

I thank the acting majority leader.

Mr. STEVENS. I thank the Senator from Ohio for his questions. I assume that the question of the Senator from Ohio is based on the assumption that the quorum call will take 15 minutes. I think, roughly, the answer is correct.

It is my understanding that the convening hour of 12 noon will automatically cause that quorum to be commenced at 1 p.m. tomorrow. Am I correct?

THE PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Once again I ask if there is any further business to come before the Senate?

PROGRAM

Mr. STEVENS. Madam President, on behalf of the majority leader, I state to the Senate that tomorrow, Thursday, is the usual late night. There is a possibility that the Senate will remain in session late tomorrow evening. The Senate will also be in session on Friday. There is no contemplation of a Saturday session this week.

It is the hope of the leadership to be able to complete at least one of the appropriation bills that will be available, either the Transportation bill or the District of Columbia bill, before recessing on Friday.

RECESS

Mr. STEVENS. Madam President, if there be no further business to come before the Senate, I ask unanimous consent that the Senate stand in recess until tomorrow at 12 noon.

There being no objection, the Senate, at 6:21 p.m., recessed until Thursday, December 2, 1982, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate December 1, 1982:

FEDERAL LABOR RELATIONS AUTHORITY

John Carl Miller, of Ohio, to be General Counsel of the Federal Labor Relations Authority for a term of 5 years, vice H. Stephan Gordon, resigned.

IN THE NAVY

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Rear Adm. Thomas R. Kinnebrew, 254-44-6391/1110, U.S. Navy.

MATERIAL SUBMITTED FOR MR. ARMSTRONG'S SPECIAL ORDER ON SOCIAL SECURITY REFORM

[The material referred to earlier in the Record follows:]

There being no objection, the material except for certain charts and graphs which are not reproducible in the RECORD, was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., November 23, 1982.

DEAR COLLEAGUE: A few days ago, the National Commission on Social Security Reform reached unanimous consensus on the need to close the gap between projected benefit payments and tax revenues in the OASDI system . . . approximately $150-200 billion in the 1983-89 period and a long-term deficit of 1.82 percent of payroll, about $1.6 trillion.

This agreement is a very important benchmark. As one newspaper summed up: "The first step toward solving any political problem is to get people to admit the problem exists. The National Commission on Social Security Reform, meeting this week in Washington, has already made a hugh contribution by getting its members of different political persuasions to agree that Social Security's problems are real, urgent and—within reason—measurable."

But now the Commission, and shortly Congress itself, must turn to the even more sensitive task of closing the gap and, in addition, devising a "fail safe" or self-correcting device to keep the trust fund on a sound basis and maintaining public confidence in the event demographic and economic forecasts, which we believe to be reasonable, turn out to be off target. Before the next Commission meeting, I want to report to you and to seek your counsel about possible approaches to the Social Security solvency question.

I hope you and your staff will review the material enclosed that includes various reform options with actuarial cost estimates. But my main purpose is to solicit your comments and suggestions of what would constitute an acceptable legislative package. There are several issues that need to be considered:

1. Legislative Strategy.—Should the Commission recommend one comprehensive solution to the long- and short-range problem? Or should it merely spell out the deficits and a range of options for Congress to consider? My own belief is that we ought to try for a package solution if, but only if, we can put something together that is pre-cleared with the President and Speaker, as well as Senators and other key people. Without their support, any proposal advanced by the Commission would be quickly scuttled, thereby making the ultimate task all the more difficult.

2. General Revenue Financing.—Should we finance the trust fund deficits out of the general fund? I am personally skeptical of this idea for several reasons, not least of which is the awesome size of already projected budget deficits. What do you think?

3. Tax Increases.—How about a payroll tax increase or pushing the scheduled 1990 tax increase forward to 1984? Although vigorously opposed by most business groups and by the American Association of Retired Persons, this idea is surfacing again. I am opposed to telescoping or increasing tax rates because of the probable effect on employment. At a time when unemployment exceeds 10 percent, I see little justification for a measure which economists say would cost between two and four million job years.

4. Universal Coverage.—The Commission is moving toward a recommendation to include all federal, state and local government workers. I agree that federal employees should be covered (starting with new hires or in some other proper manner protecting the interest of persons already working for the federal government), but both the letter and spirit of the Constitution seem to forbid mandatory inclusion of state and local government personnel.

5. COLA Adjustments.—From 1970 to 1981, pre-tax wages went up 122 percent; the CPI increased 136 percent; Social Security benefits rose 205 percent. Obviously, this trend raises serious questions of fairness as well as financial practicality. There seems to be a growing sense that part of the short-term solution should and will result from COLA savings. One formula that appeals to me is a rolling two-month delay which would phase in a six-month COLA delay over a three-year period. This approach would save $40-60 billion between now and 1989. A dozen other formulae are spelled out in the enclosures.

6. Retirement Age.—For the long-term, most advisory panels and experts advocate a gradual increase in retirement age. Several specific options are included in the material attached. I favor Option F-12 which would

increase the "normal" retirement age to 66 in the year 2002, beginning phase-in in 1995, and thereafter, adjusting the age according to changes in longevity. This one change, which is neither abrupt nor drastic, would make up virtually all of the long-term deficit in the OASDI system, according to the actuaries.

Enclosed are numerous other options developed by the National Commission, as well as a substantial amount of background information, charts and clippings prepared by my staff. I hope you will find this material of interest and that you will get back to me with your thoughts as soon as possible.

Sincerely,

WILLIAM L. ARMSTRONG.

P.S. One thing I want to stress—the main issue is shoring up the OASDI funds and restoring public confidence. Although I have certain preferences about how best to do so, I intend to remain as flexible as possible and to go the extra mile in trying to work out a compromise with all Senators and our colleagues in the House and, for that matter, with the interest groups and others who are affected. And I want to urge everyone involved to approach this task in the same manner . . . with a spirit of accommodation. It will be a great disservice if we permit this issue to become further politicized or if we were to fail to enact the needed legislation at the earliest possible time. That's why I am particularly interested in seeking your comments and active participation in the process of working out a bill.

SOCIAL SECURITY . . . OPTIONS FOR REFORM

OVERVIEW

Yes, Congress can guarantee Social Security checks will be paid on time, in full both now and in the future. To do so requires honest appraisal of Social Security . . . to face facts, not fears. Then Congress must enact the gradual changes necessary for a national commitment to a financially secure Social Security.

According to the Congressional Budget Office, Treasury Department and Social Security actuaries, Social Security cash benefit reserves will be depleted by the mid-1980's because total outlays will exceed income. Social Security is in financial trouble. Without change, Social Security will either have to delay checks, or reduce them in proportion to money on hand. Longer term, the situation is as serious, though less definite. Based on current economic projections (intermediate assumption), the present value of the unfunded liability is $1.6 trillion . . . in other words, the amount which would have to be deposited today, at interest, in order to meet the projected shortfall, is $1.6 trillion. These projections were unanimously confirmed by the bipartisan National Commission on Social Security Reform.

No one believes Social Security will go broke. Congress can, and must, enact fair, reasonable changes necessary to insure solvency.

Each tax and benefit component and the sum of all components must be analyzed for their effect on current and future workers and beneficiaries, as well as total national economic policy. Economic, political, and demographic developments that have occurred since each conponent was created must also be considered. Only then can Congress enact reasonable changes in a system on which so many Americans rely for retirement income.

What are the final goals Congress must achieve? Seven basic goals with which no one should disagree:

1. Not a single penny of the current basic level of benefits on which Americans honorably rely should be touched.
2. Permanent solvency must be achieved. Total outgo must not exceed income, and a safe emergency reserve level must be established.
3. The political terrorism—the politics of fear—that has surrounded past Social Security decision-making must end.
4. American confidence in Social Security must be restored.
5. Enacted changes must be gradual, not disruptive.
6. Changes should be rooted in common sense, supported by economic, political and demographic developments.
7. Economic projections should hope for the best, but plan for the worst.

SOCIAL SECURITY

In the beginning

Social Security was created in 1935 to partially replace earnings lost through retirement or death. Initially, only commerce and industry workers (about five out of 10 jobs in America) over age 65 were eligible for benefits.

Benefits were supplemental income . . . about 29 percent of pre-retirement income (known as the "replacement rate" . . . the percent of working income replaced by retirement income).

Payroll taxes financed these benefits on a pay-as-you-go basis. Initial taxes were also small . . . $60 per worker maximum (cost split between employer and employee). In 1980 dollars, this tax equalled $360.

Program expansion

Congress and Presidents dramatically expanded the program through 13 expansionary laws and seven automatic benefit increases (although twice Congress slightly reduced benefits). Today, three separate trust funds pay benefits and collect taxes. Two trust funds—Old Age and Survivors (OASI) and Disability (DI)—pay cash benefits directly to recipients. The third—Hospitalization (HI)—pays costs to medical care provided to the elderly and disabled.

Nine out of 10 jobs in America are included in Social Security. The program now pays retirement, early retirement, widow, children, parent, disability and hospitalization benefits to 35.4 million. Basic benefit rules were expanded, and later made inflation-proof through automatic cost-of-living increases. Generally, eligibility has been liberalized. Cash benefits—not counting the value of hospital care—as a percent of pre-retirement income has increased to 49.3 percent.

Consequently, the tax rate, tax base and number of taxpayers have also increased. Today, the combined employee-employer maximum tax is $4,340. One hundred ten million workers pay taxes; 11 million (mostly government employees) do not. While the number of taxpayers has increased, the worker/recipient ratio has not. In 1940, there were 16 workers supporting each recipient. Today, the ratio is only 3 to 1, and declining.

As part of the Federal budget

Total Social Security outlays comprise about one-quarter of the budget. Including all programs, 27.7 percent of the federal budget is devoted to elderly needs. By 1985, pensions, national defense and interest payments will comprise 75 percent of the U.S. budget. Total Social Security and other senior citizen federal outlays amount to $15,000 per elderly couple.

As part of the national economy

Benefits comprise about 5 percent of the real gross national product, and it's rising. If no changes are made, and if government spending were to be maintained at 20 percent of GNP, then by 1985 other government spending must be cut 13.1 percent.

Since Social Security is a major component of the economy, it is particularly sensitive to economic fluctuation. Each 1 percent of inflation increases costs $1.5 billion annually. Each 1 percent of unemployment reduces revenues by $2 billion. Each 1 percent increase in Social Security taxes increases unemployment by 500,000 workers.

Economic and demographic developments

Since Social Security began, significant changes have reshaped America. Once an economy dominated by manufacturing and agriculture, America is quickly becoming a service based economy. Once men dominated the work force; now half of all jobs are held by women. In 1935, a third of all elderly Americans were impoverished; today less than 15 percent have incomes below the poverty threshold. Forty years ago, less than three marriages in 10 ended in divorce; today six of 10 marriages end in divorce. Family size has declined.

Americans are living longer; on average, men live 15 years past retirement, and women 19 years . . . a lifespan increase of 20 percent over 40 years. Even so, more Americans are opting for early retirement before age 65. Today 90 percent of Americans who retire opt for retirement before age 65.

As part of the lives of recipients

Social Security is a financial lifeline to most recipients. Fifty percent of benefits are paid to elderly single members of households for whom Social Security is their principal income. Median income for all those over 65 is $5,771. Average median income for a retired couple receiving Social Security is $14,300.

Newly eligible retirees—80 percent of whom opt for early retirement—generally are improved financially. Median retirement income is $14,259, of which 42 percent is Social Security. Gross family assets—including personal residences or automobiles—exceed $48,000. Seventy percent of new retirees either outright own their home, or pay less than $200 in monthly mortgage or rent. The average value of a new retiree's home is $54,000.

Most Social Security recipients today will receive far more in benefits than they contributed in taxes . . . by a ratio of 5 to 1. This ratio will decline for future recipients. Social Security benefits are progressive . . . meaning that low-income receive relatively higher benefits than middle- or high-income.

As part of the lives of workers

The maximum Social Security tax a worker and his employer could have paid from 1937 to 1982 is $16,932. This will nearly triple by 1990 when the maximum tax possible rises to $44,600.

For 51 percent of all families—and practically all low-income families—they pay more Social Security taxes than federal income tax. This is also true for employers, particularly the marginally profitable.

Benefits

About $1 trillion will be spent from the Social Security trust funds in the next four years (1983 to 1986), an amount roughly

equal to that spent from 1935 to 1981. Four-year spending and income by trust funds:

[Dollars in billions]

	Outlays	Income
Old age and survivors (OASI)	$705	$617
Disability (DI)	80	128
Hospitalization (HI)	193	200
Total	978	945

Congressional Budget Office,
September 1982.

Monthly Social Security costs exceed $17.9 billion.

Of trust fund outlays, 67 percent go to retirees, their spouses, children or survivors; 9 percent go to the disabled, their spouses, children or survivors; 22 percent pay medical costs.

Cash benefits paid from the OASI and DI trust funds:

	Millions	Average annual benefit
Retired workers	20.3	$4,686
Their spouses	3.0	2,350
Their Children	.5	1,841
Total	23.8	
Survivors:		
Widowed parents	.5	3,372
Widowed spouses	4.4	4,210
Children	.2	3,278
Disabled, widowed spouses	.1	2,760
Parents	.01	3,732
Total	5.21	
Disabled workers:	4.1	4,944
Their spouses	.4	1,452
Their children	1.0	1,428
Total	5.5	
Special Age 72	.1	

The maximum possible benefit for a retired couple with children under 18 is $14,748 annually.

These benefits do not include the value of medical benefits provided through Medicare. Since all benefits are tax free, current benefits are about 60% of after-tax, pre-retirement income.

Taxes

About $1 trillion in taxes has been raised since 1935. If a worker contributed the maximum taxes from 1937 to 1982, he would have contributed $17,000 (an amount matched by his employer). By 1990, this will nearly triple to $44,600.

Today, the total Social Security tax is 13.4% of up to $32,400 of income. This rate will increase to 15.3%, and the base up to $45,600 of income by 1990.

The average tax paid by a worker and his employer annually is about $2,000.

Individual equity and social adequacy

Social Security emphasizes social adequacy, not individual equity. The social adequacy basis is evident through the provision of relatively high minimum benefits, paying proportionately higher benefits to low average wage earners, the imposition of maximum benefits regardless of past earnings, and the payment of derivative benefits at no additional cost to the worker. While there are some elements of individual equity—benefits in relation to earnings—Social Security, over the years, has moved away from individual equity and more toward social adequacy.

As it affects women

Social Security was created when men dominated the work force. Since then, a number of economic and demographic changes involving women affect Social Security and its future. More women work today, are living longer, and the divorce rate is increasing. Since these changes were not contemplated at the time Social Security was created, retirement benefit adequacy for women is a significant concern because a high percentage of the elderly poor are widowed, divorced or were never married. It is also a concern since the current labor force—once male dominated—has a high percent of women wokers who pay Social Security taxes, and expect to receive just benefits.

Problems in providing benefits to women exist in part because benefits are linked to an individual's earnings and work history. Working women frequently have interrupted work histories due to child rearing. Women also have had generally lower career earnings than men. As a result, a large proportion of women fail to qualify for Social Security benefits, qualify for benefits on their lower earnings, or they qualify based on their husband's benefits, and then receive half of these benefits. Some of these concerns have been addressed by changes made in the computatin of spouse benefits, but questions of equity continue to be raised with regard to women, particularly those who work. The National Commission on Social Security Reform identified 12 options that address the issue of making Social Security equitable for women.

And other Federal pension policies

Since Social Security was created, there have been significant developments in federal pension policy. Among them:

1. *Individual Retirement Accounts:* Most workers can contribute up to $2,000 annually tax free into Individual Retirement Accounts, the proceeds of which are invested, and then paid out as retirement income as early as age 59½. Workers with wives who do not work contribute up to $2,275 annually.

2. *Keogh retirement plans:* The self-employed can set aside $15,000 annually to help replace earnings lost through retirement.

3. *Employee Retirement Income Security Act:* Regulates company sponsored, tax-deferred pension plans.

Three out of four workers under age 30 are covered by retirement pensions other than Social Security.

Financial status

Social Security is going broke. High inflation, slow economic growth, rising numbers of beneficiaries, increased benefit levels and an eroding tax base have increased Social Security's costs, and depressed revenues. The retirement and survivors trust fund has run a deficit since the early 1970's. This deficit erased the once large cash reserves . . . to the point where Congress had to enact legislation permitting the OASI trust fund to borrow from the DI and HI trust fund to make full and timely benefits. By mid-1980, however, even these reserves will be exhausted. Technically, Social Security will have no choice but to either reduce all benefits by the amount of income then on hand, or delay checks until enough income is on hand to pay full benefits.

Thus, Congress must achieve two goals in the short-term: Enact legislation that eliminates the future deficits, and achieve adequate reserves so that enough money is on hand to pay two months of benefits.

The National Commission on Social Security Reform unanimously agreed that $150-200 billion is needed this decade to assure Social Security solvency. In addition, the Commission projects that Social Security needs to either increase revenues or reduce spending $1.9 trillion over the next 75 years to guarantee solvency.

SOCIAL SECURITY . . . EXPLAINED

To make changes necessary to insure solvency in Social Security first requires understanding its current benefit and tax structure.

A. *Coverage.*—Originally, Social Security only provided benefits to those age 65 and over working in commercial and industrial employment. Only five out of 10 jobs in America were covered.

Since then, Congress expanded Social Security to cover about nine out of every 10 jobs. Coverage was extended to most self-employed, hired farm and domestic workers, armed forces, and professionals. Optional coverage was provided clergymen. State and local governments and non-profit organizations can opt for Social Security coverage. Both state and local governments and non-profit organizations, if they elect Social Security coverage, can later elect to opt-out of Social Security.

For certain military personnel, the armed forces pays Social Security taxes up to a maximum of $1,200 (representing the cash value of non-taxable income). This contribution is not matched by the servicemen.

Work not covered by Social Security is federal civilian employment, non-covered state and local governments (30% are not covered), and non-covered, non-profit organizations (about 15% are not covered).

B. THE BENEFIT STRUCTURE—RETIREMENT AND SURVIVORS BENEFITS—OASI

Four principal components comprise the Social Security benefit structure . . . eligibility, computing initial benefits, annual benefit increases and types of benefits.

1. *Eligibility.*—To be eligible a worker must be "insured" through earning "quarters of coverage." Some explanation . . .

Becoming "fully insured" means working in a Social Security covered job (and thus paying Social Security taxes) and earning at least $340 in a calendar quarter. Doing so entitles a worker to a quarter of coverage. A worker receives one quarter for each $340 up to a maximum of four quarters. With 31 quarters—as little as eight years work—a worker and his family is entitled to full Social Security benefits based on his earnings. The number of quarters required will increase one quarter for each year until a maximum of 40 quarters is reached.

"Currently insured status" applies only to a worker dying before retirement. A worker becomes currently insured—and thus eligible for benefits—by attaining six quarters in the 13 quarters preceding death.

Of course, a worker does not automatically receive benefits when he becomes insured. A condition for receiving OASI benefits is reaching retirement age or death. Full benefits are paid at age 65; lesser benefits at age 62. Age eligibility varies for other OASI benefits . . . and are described in Part C.

2. *Calculating initial benefit levels.*—Benefit levels for retired and disabled workers, dependents and survivors are generally related to the past earnings of the covered worker, and more directly to a percent of the benefits that the covered worker will receive.

There are four basic steps used in most cases to compute a worker's Social Security benefit:

(a) *"Computation Years"* . . . That is, the years worked in Social Security employment between age 21 and the year of death, disability, or the attainment of age 62, then drop out the five lowest income years.

(b) *"Index Earnings"* . . . The earnings of each year are converted, or indexed, into more recent levels by increasing them to reflect changes in wage levels since the time they were actually earned.

Indexing creates an earnings record that reflects the value of the individual's earnings relative to national average earnings in the indexing year. The indexing year is the second year before the year in which the worker attains age 62 (in other words, age 60), becomes disabled or dies. Earnings after the indexing year are counted at their current value (not indexed).

Earnings are indexed by increasing the actual earnings in each year after 1950 by the percentage increase in national average wages between that year and the indexing year.

(c) *"Average Indexed Monthly Earnings"* (AIME) . . . These indexed earnings are then averaged to a monthly amount . . . known as the AIME. Simply divide total indexed earnings by the number of months in the computation years.

(d) *"Primary Insurance Amount"* (PIA) . . . A percentage formula is applied to the AIME to derive the primary insurance amount, or basic benefit level. The 1982 formula is: 90% of the first $230 of AIME, plus 32% of AIME over $230, but less than $1,388, plus 15% of AIME over $1,388.

An example follows: A worker retires at age 62 in 1982, and had earned $2,900 in 1960. The $2,900 would be multiplied by the ratio of average annual wages in 1980 ($12,513), and divided by average annual wages in 1960 ($4,077): $2,900 × $12,513 divided by $4,077 equals $9,056.

Although the worker's actual earnings for 1960 were $2,900 . . . his wage indexed earnings would be $9,056.

This calculation is applied to each year between 1951 and 1980 (the second year prior to his attaining age 62). Once total indexed earnings are obtained, they are divided by the number of months in the computation years. This monthly amount is the AIME.

Let's assume that after this worker's entire wage record is indexed, his AIME is $420. Let's run this through the PIA benefit formula:

90 percent of the first $230	$207.000
32 percent of amount above $230.	60.80
Total PIA	267.80

His PIA is $267.80. This is the amount he would receive at age 65. Since he opted for early retirement at age 62, he receives 80% of that total . . . or $214.00.

3. *Types of benefits.*—As already mentioned, benefit levels for retired and disabled workers, dependents and survivors are generally related to the past earnings of the covered worker, and more directly to a percent of the benefits—or the primary insurance amount—that the covered worker will receive. Below is a list of benefits provided through OASI, and the percent of PIA each receives:

1. Full retirement: 100% of PIA/eligible at age 65/eligible for reduced benefits at age 62.

2. Widowed spouses: 100% of PIA/eligible at age 65/eligible for reduced benefits at age 60.

3. Spouses: 50% of PIA/eligible at age 65, or younger if caring for a disabled child, or a child under age 16/eligible for reduced benefits at age 62.

4. Divorced spouses: 50% of PIA/same eligibility for spouses, but must have been married at least 10 years.

5. Children: 50% of PIA/eligible until 18 if child of a retired or deceased insured worker, or until 19 if still in high school. College benefits to age 21 will be phased out by 1985.

6. Surviving children: 75% of PIA/eligibility same as 5.

7. Parents: 75% of PIA/eligible if surviving spouse caring for a child under 16 at the time of death.

8. Maximum Family Benefits: 188% of PIA (175% of PIA for high income earners) if total benefits to a family exceed 188% of PIA (or 175%) then all benefits for family members is reduced by an amount to bring all benefits under the 188/175% caps.

9. Lump Sum Death Benefit: Not a percent of PIA . . . just a $255 payment on the death of a worker. Paid to survivors.

10. Transitionally insured benefits: Not a percent of PIA . . . is paid to those over age 65 with insufficient quarters of coverage.

11. Special age 72: Not a percent of PIA . . . paid to those over 82 with insufficient quarters of coverage to qualify for a retired worker benefit and who do not receive public assistance.

12. Special minimum: Not a percent of PIA . . . increases benefits for workers with low average earnings.

13. Retroactive: For persons over age 65, retroactive benefits can be paid up to six months. For disabled beneficiaries, benefits can be paid retroactively up to 12 months.

14. Currently Insured: OASDI benefits paid to survivors of workers not fully insured but who worked at least six of the 13 quarters preceding death.

4. *Annual Cost-of-Living Adjustments.*—All benefit levels are increased each year when the Consumer Price Index exceeds 3 percent increase each year, and when it does, the full CPI increase—not just the amount above 3 percent—is applied to benefit levels automatically without action by Congress.

5. *The Retirement Test.*—Under current law, all benefits are reduced when a beneficiary's earnings record exceeds certain levels. This is called the earnings test, or retirement test, and applies to beneficiaries until they reach age 72 (in 1983 and later, the retirement test will not apply after age 70). The amount of annual earnings permitted in 1982 without causing a benefit reduction is $4,440 for persons under age 65, $6,000 for persons age 65-72. Each $2 of earnings in excess of these amounts reduces annual benefits by $1.

6. *Policy Summary.*—These five sections summarize the mechanics of the benefit and eligibility rules. But what is the overall effect of this formula, and what are the policy implications? Several aspects should be mentioned:

First, only minimum requirements are imposed to become eligible for Social Security. The fact that eligibility is so easy to attain is the reason why there are so many who receive more than one federal pension . . . the so-called "double-dippers" who receive "windfall" benefits.

Second, the entire benefit structure heavily favors those with low average earnings. This does not necessarily mean the low income . . . it means those with sporadic work histories, those who often shift between covered and non-covered Social Security employment, go through periods of unemployment. It achieves this effect through three ways . . . the low minimum eligibility requirements, dropping out of the computation years the five lowest income producing years, and heavily weighting the PIA formula to the low-income.

Third, wage indexing provides retirees with a significant though usually not noticed added benefit: By basing retirement benefits on real wage increases, it permits retirees to share in retirement the overall productivity growth achieved by workers.

Fourth, wage indexing, coupled with dropout years and automatic cost-of-living increases for all benefits, is achieving a remarkable effect. This formula increases real benefits paid to new beneficiaries each year. For example, those who retire in the year 2040 will receive double the current value of benefits paid to those retiring this year.

Fifth, replacement rates—the percent of working income replaced by retirement income—have increased sharply. When Social Security began, the average replacement rate was about 29%. Today, the average is 49% for all beneficiaries. That is for pre-tax income. The replacement rate today for after-tax income is closer to 60% . . . meaning that in retirement a worker will receive 60% of his pre-retirement income. Incredible though it may seem, a worker with low average earnings in his lifetime who retired in 1981 will in retirement earn more in Social Security benefits than he earned while working.

Because of legislation enacted in 1977, these high replacement rates will gradually decline somewhat.

Replacement rates have increased primarily because of legislative and automatic benefit increases. Cost of living increases the past decade have been generous. From 1970 to 1981, pre-tax wages went up 122%; the CPI increased 136%; Social Security benefits have increased 205%.

7. *Program Growth Since Social Security Began.*—Although the number of benefits has vastly increased and the requirements determining insured status have been liberalized, the basic notion of insured status has not changed since Social Security began. In 1940, three requirements had to be met before a worker or his family received benefits: The worker had to be industrially or commercially employed, earning at least $50 ($568 in 1982 dollars) in at least six calendar quarters, and be over age 65.

Since then, almost all age requirements for benefit eligibility have been reduced, types of benefits expanded. Benefits are now increased automatically each year.

C. Benefit Structure—Disability Insurance (DI).

Social Security disability began in 1956, and operates on the same insured status concept used by OASI.

To be eligible for disability, a worker must be both fully insured under OASI, as described in Section II-A, and disability insured. To be disability insured, the worker must have 20 quarters of coverage in the 40 quarters immediately preceding disability. Generally, disability is defined as the inability to engage in gainful activity by reason of any medically determinable physical or mental impairment that can be expected to result in death, or last at least 12 continuous months. Before benefits can be paid, a waiting period must lapse of at least one month, benefits are paid up to age 65, and then regular full retirement benefits are

paid, and benefits can be paid retroactively up to 12 months.

A worker disabled in the line of work need not file for worker's compensation. Disability benefits are offset by all other disability benefits, with the exception of veterans disability benefits. Currently, Social Security and the states are reviewing all disability cases, and terminating benefits to those who never were or no longer are eligible. Benefits are being denied in about 50% of all cases, but are restored on appeal to administrative law judges about 64% of the time. Appeal takes six months or longer, and benefits are paid for only 60 days during that time.

Five types of benefits are paid:

1. Disabled worker: 100% of PIA/eligible 5 months after disability.

2. Disabled surviving spouse: 100% of PIA/eligible at age 60/eligible for reduced benefits at age 50.

3. Disabled child: 50% of PIA/eligiblity begins at age 18.

4. Disabled surviving child: 75% of PIA/eligibility begins at 18.

5. Retroactive: up to 12 months.

Only benefits for disabled workers (and their dependents) are paid out of the DI trust fund. Benefits #2-#4 are simply the dependents and survivors benefits paid out of the OASI trust fund.

D. The Benefit Structure—Hospitalization Insurance/Medicare (HI).

Created in 1965, Medicare is a national health insurance program for the aged and certain disabled persons. Almost all citizens over age 65 are automatically entitled to Medicare coverage. If they are not, they can purchase the coverage for an annual premium of $1,360.

Medicare has two parts: Part A, hospital insurance, pays hospital, post-hospital and home health services. This program is financed through Social Security payroll taxes. Part B, supplementary medical insurance, is a voluntary program, financed through individual medical premiums, and through general revenues. Elderly beneficiaries pay one-quarter of the costs (about $150 a year with a $75 deductible), the disabled pay one-seventh, and the federal government pays the difference. Services and fees vary between the two programs.

Part A:

During each benefit period—whenever a patient has not been in a hospital for 60 consecutive days, Medicare Part A pays for the following services:

Inpatient Hospital Care: Ninety days of coverage. For the first 60 days, all costs are paid, except for the first $304 deductible. For the last 30 days, Medicare pays for all but $76/daily in covered costs. After that, patients can draw upon a lifetime reserve of 60 hospital days. For reserve days, all costs after the first $152 each day are paid.

Nursing Facility Care: One hundred days of coverage are paid for. The first 20 days of care are free for the patient. After that, all patients pay $38 each day, and the rest of the cost is paid by Medicare.

Home Health Care: Medically necessary home health care visits by nurses, therapists and other health workers are paid for by Medicare.

There is no limit to the number of benefit periods a patient can have.

Institutions are reimbursed for their reasonable costs incurred in providing services to Medicare patients. Reasonable costs are determined by law and regulation. Services and costs are reviewed by Professional Standards Review Organizations. Medicare is administered by the Health Care Financing Administration which, in turn, contracts much of the operational work to private sector intermediaries.

Part B:

During any calendar year, Part B pays 80% of reasonable charges for services rendered by doctors, osteopaths, chiropractors, psychiatrists, independent therapists. Most medical services and outpatient and laboratory services are covered.

E. Administration.

Administration costs in 1981 were $1.7 billion or 1.2% OASDI benefit payments or 1.3% of revenues.

Retirement and survivors insurance is largely administered by the federal government, with disability insurance administered by the states.

F. Taxes.

In 1982, the combined employer-employee tax rate is 13.40% on earnings up to $32,400. The maximum today is $4,342. Self-employed pay 150% of the employee's share of the tax.

In 1977, Congress enacted legislation that significantly increased taxes during the rest of this decade. By 1990, the tax rate will increase three times, to 15.3%, and the tax base seven times. The total maximum tax paid in 1990 will exceed $9,400. The 1977 law will pump another $437 billion in additional taxes into the Social Security Trust Fund.

Under current law, Social Security benefits are tax free.

Social Security only taxes payroll, and no other tax revenues flow into the Social Security trust funds.

G. Social Security Tax, Benefit, Trust Fund, Chronology, Charts, Tables and Graphs.

The following pages contain selected tables highlighting key aspects of Social Security.

IV. REFERENCES/RECOMMENDED READING

Sources: Social Security Administration, General Accounting Office, Congressional Budget Office, Office of Management and Budget, Congressional Research Service, House Ways and Means Committee, Senate Finance Committee, Senate Select Committee on Aging, selected books and publications.

For those interested in further reading, perhaps the four best references about the past, present and future of Social Security are:

Policymaking for Social Security: Martha Derthick, The Brookings Institute.

Developments in Aging: 1981: Volume 1: Senator John Heinz, Chairman, Senate Select Committee on Aging.

Social Security: Robert J. Myers, McCahan Foundation Book Series.

Major Federal Expenditures in Jurisdiction of the Senate Finance Committee: Senator Robert Dole, Chairman, Senate Finance Committee.

IV. SOCIAL SECURITY TRUST FUND STATUS, BENEFIT AND TAX TABLES

The following pages contain selected tables highlighting key aspects of Social Security.

ESTIMATED OPERATIONS OF THE OASI, DI, AND HI TRUST FUNDS UNDER THE PROGRAM AS MODIFIED BY THE TAX EQUITY AND FISCAL RESPONSIBILITY ACT OF 1982, ON THE BASIS OF THE 1982 TRUSTEES REPORT ALTERNATIVE II-B ASSUMPTIONS, CALENDAR YEARS 1981-91

Notes: 1. The income figures for 1982, and the end-of-year asset figures for 1982 and later, reflect the transfer of funds from the DI and HI Trust Funds to the OASI Trust Fund under the interfund borrowing authority provided by Public Law 97–123. Under this set of assumptions, a total of $11.6 billion would be transferred to OASI in 1982, $6.2 billion from DI and $5.5 billion from HI.

2. The estimated operations for OASI, OASDI, and OASDI and HI combined in 1983 and later are theoretical since, following the expiration of the present law interfund borrowing authority, the OASI Trust Fund would become depleted in July 1983 when assets would become insufficient to pay benefits when due. Similarly, the HI Trust Fund operations in 1991 are theoretical, since the fund would be depleted in 1991 under this set of assumptions.

OPERATIONS OF THE OASI AND DI TRUST FUNDS, COMBINED, DURING SELECTED CALENDAR YEARS 1960–81 AND ESTIMATED FUTURE OPERATIONS DURING CALENDAR YEARS 1982–86 UNDER THE INTERMEDIATE SETS OF ASSUMPTIONS

[1] Base year.

NEWLY ENTITLED RETIREE FAMILIES' MEAN AND MEDIAN INCOMES, BY SOURCE AND FAMILY TYPE (NOTE A)

	Total reported income		Social security retirement income		All other income (note b)	
	Mean	Median	Mean	Median	Mean	Median
All respondents	$14,259	$11,450	$4,777	$4,754	$9,482	$6,252
Early retirees	14,003	11,428	4,615	4,694	9,388	6,252
Regular retirees	16,411	31,303	6,134	6,681	10,277	6,350
Family type:						
Early retirees:						
Retiree only	13,442	10,548	4,121	4,407	9,321	6,075
Retiree and spouse	17,082	14,521	7,500	7,463	9,582	7,200
Retiree, spouse, and children	16,759	16,200	7,695	8,810	8,794	7,200
Retiree and children	17,652	15,358	6,267	6,242	11,385	8,200
Regular retirees:						
Retiree only	14,999	11,377	5,394	5,776	9,605	5,669
Retiree and spouse	21,165	18,322	8,850	9,008	12,315	8,680
Retiree, spouse, and children	26,884	24,588	10,859	12,181	16,025	13,025
Retiree and children	26,529	22,990	9,694	11,188	16,835	14,188

Table 23 shows: The median social security income ($4,754) accounts for 42 percent of the median total first year income ($11,450) of all retirees. The median first year income of regular retirees with a spouse and children who also received benefits was $24,588. Their median family income was about 50 percent higher than that of early retirees with a spouse and children.

Notes: 1. Children benefits include student benefits, which are scheduled for significant curtailment by 1985. 2. See note 2, Table 19.

a. See note a, Table 19.
b. Includes retiree families who reported no other income.

NEWLY ENTITLED RETIREE FAMILIES' INVESTMENTS AND TOTAL ASSETS, BY MEDIAN AMOUNTS AND FAMILY TYPE [1]

	Percent no response [2]	Investments		Total family assets	
		Median amount [3]	Percent reported no investments	Median amount [3]	Percent reported no assets
All respondents	22.0	$7,598.14	11.21	$48,499.06	4.9
Family type:					
Early retirees	21.5	7,581.52	1.1	48,126.45	4.8
Retiree only	20.8	7,565.21	10.5	45,800.00	5.2
Retiree and spouse	28.2	24,897.20	6.8	59,724.42	6.1
Retiree, spouse, and children	20.6	3,580.35	27.1	46,250.02	2.8
Retiree and children	8.8	3,635.41	25.8	44,350.00	6.6
Regular retirees	26.6	15,028.16	11.9	62,395.59	6.1

NEWLY ENTITLED RETIREE FAMILIES' INVESTMENTS AND TOTAL ASSETS, BY MEDIAN AMOUNTS AND FAMILY TYPE [1]—Continued

	Percent no response [2]	Investments		Total family assets	
		Median amount [3]	Percent reported no investments	Median amount [3]	Percent reported no assets
Retiree only	13.0	14,967.10	13.2	52,975.01	7.3
Retiree and spouse	8.4	25,076.55	7.1	85,012.93	1.6
Retiree, spouse, and children	18.4	25,020.83	7.5	93,000.00	1.8
Retiree and children	7.5	24,912.50	9.4	78,000.00	2.1

[1] Excludes personal residence and automobiles.
[2] No response indicates the percentage of questionnaire respondents who failed to provide complete answers to income-related questions.
[3] Includes our estimate of what the no response group would have reported had they provided complete answers to income-related questions.

Note.—Table 26 shows: For families consisting of a retiree, spouse, and children, the median investment and total assets for early retiree families was $3,580 and $46,250 compared with $25,020 and $93,000 for regular retiree families.

PAST AND FUTURE TAX RATES AND TAXABLE EARNINGS BASES FOR EMPLOYER AND EMPLOYEE COMBINED

Period	Taxable earnings base	Tax rate (percent)—			Maximum employee annual tax
		OASDI [1]	HI	Total	
1937–49	$3,000	2.0		2.0	$30.00

A SOCIAL SECURITY FACT SHEET

[Here, as supplied by the Social Security Administration, are some pertinent facts on social security's recipients, its taxpayers and its financial health.]

	Number of beneficiaries		
	1972	1977	April 1982
Old age and survivors trust fund	25,204,542	29,228,350	31,808,503
Disability trust fund	3,271,486	4,854,206	4,337,195

AVERAGE MONTHLY BENEFIT

	1972	1977	September 1982
Retired worker	$157	$237	$405
Retired worker and aged spouse	273	404	692
Widowed mother, 2 children	383	547	925
Disabled worker	175	266	429
Disabled worker and family	363	538	869

SOCIAL SECURITY PAYROLL TAXES

[The tax rate is for both employers and employees, and the increases shown are already scheduled; the wage base is indexed under the law, and increases assume moderate economic growth.]

	Tax rate (percent)	Wage base	Maximum contribution
1972	5.20	$9,000	$468
1977	5.85	16,500	965
1982	6.70	32,400	2,171
1983	6.70	35,100	2,352
1984	6.70	37,500	2,513
1985	7.05	40,500	2,855
1986	7.15	43,800	3,132
1987	7.15	46,800	3,346
1988	7.15	50,100	3,582
1989	7.15	53,400	3,818
1990	7.65	57,000	4,361

CASH OUTLAYS

[Calendar years, billion of dollars]

	1972	1977	1982 (estimate.)
Old age	38.5	75.3	141.9
Disability	4.7	11.9	18.1

TRUST FUND RESERVES

[Reserve (in billions) are shown for the old age and survivors, disability and hospital insurance funds; fund ratios—money on hand at the beginning of a year as a fraction of the amounts needed for the full year—are for old age and survivors combined with disability, and for all 3 funds combined.]

	Year-end reserves			Fund ratios (percent)	
	OASI	DI	HI	OASI	OASDHI
1972	$35.3	$7.5	.....	93	.....
1977	32.5	3.4	.....	.....	.....
1982	17.3	1.6	$15.8	15	22

[1] Beneficiaries in millions, dollars in billions.

MAJOR LEGISLATIVE CHANGES IN SOCIAL SECURITY

1935: A system of Federal old age benefits covering workers in commerce and industry is established. Benefits were to be based on cumulative wages and to be payable beginning in 1942 to qualified workers age 65 and over. A payroll tax of 1 percent on employer and employees, each imposed on a wage base of $3,000, was to be collected as of January 1937; the tax would rise to 3 percent by 1949.

1939: The starting date for benefits is advanced to 1940. Benefits for dependents of retired workers and for surviving dependents in case of a worker's death are authorized.

1952: Benefits are increased by 12.5 percent.

1954: Coverage is almost universal except for Federal government employees. The wage base is increased to $4,200, and benefits are increased by 13 percent.

1956: Disability insurance (DI) benefits are added payable at age 50. Women are permitted to retire at age 62 with actuarially reduced benefits.

1958: Benefits are added for dependents of DI recipients, and the DI eligibility standard is liberalized.

1960: The age 50 limitation for DI eligibility is eliminated.

1961: Men may retire at age 62 with an actuarial reduction.

1965: Medicare becomes part of social security. Cash benefits are increased by 7 percent.

1968: Cash benefits are increased by 13 percent. The tax rate is now 4.4 percent and the wage base $7,800.

1969: Cash benefits increased by 15 percent.

1972: Cash benefit increases, which had previously been made in an ad hoc fashion by the Congress, were made automatic as

was the increase in the wage base. The 20 percent benefit increase which occurred this year was made possible by a change in actuarial assumption from a level wage growth path to a dynamic one.

1977: An error in the 1972 automatic indexing at initial benefit determination produced a long-run deficit due to the high rates of inflation between 1972 and 1977. This error was corrected and the current method of wage-indexing both the earnings history and the bend points was decided upon. Automatic cost-of-living adjustments remained intact. The long-run deficit necessitated the largest increase in scheduled tax rates in the system's history, culminating at 7.65 percent on employee and employer in 1990.

1981: A short-run financing problem requires interfund borrowing and some benefit reductions near-term. The long-term actuarial and economic problems are worse. Even the large pending tax increases are inadequate to cover the large increases in real benefits being promised over time under OASDI. The system's grand promises are depressing the Nation's saving and growth rates, jeopardizing its own tax base. There is a burgeoning long-run deficit under HI which dwarfs the OASDI problem. Some politically acceptable alteration in benefit formulas must be found for the long run. This will inevitably involve indexing changes.

SOCIAL SECURITY REFORM

(By James M. Hildreth)

The first step toward solving any political problem is to get people to admit the problem exists. The National Commission on Social Security Reform, meeting this week in Washington, has already made a huge contribution by getting its members of different political persuasions to agree that Social Security's problems are real, urgent and—within reason—measurable.

As the commission sees it, Social Security faces three perils: a shortfall of revenues over the remainder of this decade; a longer-run deficit growing acute after the year 2020; and a continuing vulnerability to downturns in the economic cycle. There is also significant—but not unanimous—agreement among members on what a solution should look like: current beneficiaries should not suffer outright reductions in benefits; those nearing retirement should not face abrupt changes in potential benefits; the burden of putting Social Security on a sound basis should not fall entirely upon the working population.

The size of the long-term deficit is, of course, the most speculative element, depending as it does on assumptions about birthrates, longevity, immigration and economic conditions well into the next century. But enough is known about future population trends to know that trouble is coming. That means that in evaluating short-run measures, preference should be given to those that promise substantial savings in the long term as well.

For the short run, the commission agreed that if slow growth continues through the rest of the decade, the Social Security trust funds may need a boost of more than $150 billion during that period. A deficit that big can't be closed without raising payroll taxes. However, other options—such as covering new federal employees, delaying cost-of-living adjustments and taxing part of Social Security benefits received by the relatively well-to-do—should also be included, both to make the system fairer and to help out with the long-run deficit.

As Commission Chairman Alan Greenspan pointed out, Social Security also needs long-term "fail-safe" mechanisms. These would protect it against the combination of events that are the main source of its current difficulty—slow economic growth with wages lagging behind inflation. This can be done either by adding other taxes to the trust funds in bad times or by temporarily curtailing improvements in benefits.

Early in the next session, Congress must sift through the commission's proposals and reach a bipartisan consensus about which ones to put into law. That task wasn't made easier by the partisan bickering over Social Security during the election campaigns. House Ways and Means Committee Chairman Dan Rostenkowski, however, got the process of compromise off to a good start this week by sending a letter to all House members. "Keep your powder dry," the chairman urged in reminding his colleagues that, whatever sacrifices may be required, the main concern of the public is that the Social Security system be put on safe ground for the foreseeable future.

[From U.S. News & World Report, July 20, 1981]

THE BATTLE TO SAVE SOCIAL SECURITY

The nation's premier pension system is in danger of going broke, warns a bleak new report, spurring Congress to action affecting millions.

The government's multibillion-dollar race to rescue the venerable Social Security system is taking on new—and controversial—urgency.

If action doesn't come soon, Social Security trustees reported July 6, benefit checks for millions may not go out on time starting late next year.

The system, Health and Human Services Secretary Richard Schweiker said, is currently "hemorrhaging" with losses at the rate of $12,300 a minute and is "getting worse, daily." In addition, even bigger troubles are brewing after the turn of the century.

"Social Security is on the line, here and now," says Senator William Armstrong (R-Colo.), chairman of the Senate's Social Security Subcommittee. "Congress has promised benefits that simply cannot be delivered under the present ground rules."

As a result, the House and Senate are laying the foundation for passage this year of changes aimed at guaranteeing solvency of the 149-billion-dollar system. But the process could be rocky.

"Panic" tactics? Democrats already allege that the administration is using "panic" tactics in order to ram larger-than-necessary changes through Congress. Moreover, a coalition of interest groups representing senior citizens promises to turn out 10,000 people on July 21 for a rally on the Capitol steps. Their goal: No reduction in benefits because 9 million persons rely on them as a sole source of support.

New impetus to patch up Social Security was generated when three cabinet officers—the Secretaries of the Treasury, Labor, and Health and Human Services—acting as trustees for the system, issued their annual report.

Unless action is taken, the financial lifeblood of millions of retirees, their dependents and survivors is threatened in the next few years, the trustees said. The system's old-age-and-survivors trust fund will be "effectively bankrupt" by around Thanksgiving of 1982, says Social Security Commissioner John A. Svahn.

Social Security's trio of trust funds—one covering pensions for retirees and their survivors, another for disability benefits and a third for medicare payments—collect money from payroll taxes and make disbursements as necessary. In recent years, high inflation, persistent unemployment and a rising number of retirees have caused the balances in the funds to shrink. If no changes are made, the funds could run so low that they would have to delay mailing checks to retirees, their dependents and survivors, administration officials predict.

The combined old-age and disability funds, the trustees said, paid out 3.8 billion dollars more in benefits last year than they collected in payroll taxes from 115 million workers. The average monthly retirement benefit is now $374. Over the past six years, the cumulative red ink was 19.4 billion dollars. The balance of the two funds at the end of 1980 was 26.5 billion dollars. The trustees project that by the end of December, 1981, the balance will fall to 21.6 billion and head lower.

The third fund, hospital insurance, is on firmer ground. It recorded a 500-million-dollar surplus last year, building its balance to 13.7 billion dollars. However, the solvency of medicare will also be in jeopardy in the 1990s as costs of health care soar.

Officials are also concerned about another Social Security problem that could materialize after the year 2000.

Generation gap possible. As the population of the post-World War II baby boom reaches retirement age, vast numbers of the elderly would be supported by a dwindling work force—2 workers for each retiree, compared with a 16-to-1 ratio in 1950 and a 5-to-

1 ratio in 1960. By 2055, the number of Americans 65 and older will have risen to 69.3 million from 25.9 million in 1980, the trustees estimated. The projected upshot: A generation gap where younger workers would bitterly resent their retired elders because of the financial burden they would represent.

The trustees based their gloomy assessment on a series of assumptions about how the economy will behave in the future. Depending on economic performance, the short-term deficit could range from 10 billion dollars to 111 billion dollars in a six-year period, they said. The midrange series of assumptions would translate into a 50-billion-dollar deficit. If nothing is done, the shortfall could balloon to 1 trillion dollars over the next 75 years, even if the economy goes steadily upward.

A variety of potential remedies are under consideration, but only one has been ruled out by Republicans and Democrats alike: Boosting payroll taxes again. Levies have shot up by 2,011 percent, on average, since 1950, compared with a 490 percent rise in inflation-adjusted wages, according to Senator Armstrong. Social Security taxes will extract a maximum $1,975 per worker this year and are scheduled to take as much as $2,151 in 1982. Another rate increase would be "both unfair to current taxpayers . . . and a serious drag on the economy," says Schweiker.

Capitol Hill insiders expect that actions later this year will include a combination of these proposals:

Reducing the annual cost-of-living adjustment to benefits. Currently, benefits rise each year at the same pace as the government's consumer price index. In the future, the increase may be limited to only 85 percent of the price rises. Savings could be sizable. For the year beginning on Octoer 1, the boost that took effect with checks mailed in July will add 15.4 billion dollars to the Social Security tab.

The inflation adjustment may also be keyed to the annual increase in wages, instead of prices. Wages have advanced at a slower rate recently. In 1980, for example, wages rose 8.5 percent while prices went up 13.5 percent.

Temporary interfund borrowing may be allowed, enabling the largest and least stable of the three Social Security trust funds, old-age and survivors insurance, to receive transfusions from the disability-insurance and medicare funds.

Closer scrutiny over who receives benefits probably will be instituted. Congressional auditors say that the disability fund has a 20 percent "error rate," meaning that in 1 of every 5 cases, money is paid out to persons who should not receive it, at an annual cost to Uncle Sam of some 4 billion dollars.

Another possibility, championed by Representative J. J. Pickle (D-Tex.), chairman of the House Social Security Subcommittee, among others, is a gradual rise in the retirement age from 65 to 68. This move would have no impact on the immediate funding problems, because it would be phased in over a 10-year period, beginning in 1990, but could help cut costs after the turn of the century.

Pickle also proposes transferring money from the medicare trust fund to the combined OAS-DI funds. The general tax revenues would be used to reimburse the shifted health money.

The idea of using general tax dollars to shore up Social Security temporarily, if not for a longer period, has some strong pockets of support in Congress and is not being ruled out. But the administration is opposed. Any such move "would be like robbing Peter to pay Paul," contends Social Security Commissioner John Svahn.

White House plan. The Reagan administration has its own package of remedies: Chopping benefits to people who choose to retire before they turn 65 rather than staying on the job longer, tightening eligibility rules for future recipients of disability payments and altering the formula by which initial benefits are calculated constitute the main changes. Reagan's plan, says the White House, would save 46 billion dollars through 1986. Other trims, including scrapping student benefits for youths age 18 to 22 and elimination of the $122-a-month minimum benefit, already are in the works in Reagan's budget cuts.

The President's most controversial proposal—the lowering of benefits for early retirees—"would be a tragedy and calamity for millions of older and disabled persons [and] break the promise Congress and seven Presidents have made to the contributors," says Wilbur Cohen, a former Health, Education and Welfare Secretary. Administration officials now say they want to phase in those cuts over a number of years, rather than making them effective next January 1, as originally proposed.

Senator Daniel P. Moynihan of New York, the ranking Democrat on the Senate Social Security Subcommittee, sees other motives behind Reagan's package: The administration is practicing "political terrorism," he claims."They say the system is on the verge of going broke, and it is not."

Senator Bill Bradley (D-N.J.) claims the administration is utilizing "two sets of books" that are based on different economic assumptions; A pessimistic economic scenario is used to highlight Social Security woes; a rosier outlook is presented as support for Reagan's individual-income-tax cuts.

The Democrats allege that the administration is running up the warning flags so that it can cut billions in Social Security benefits as a step toward balancing the federal budget.

Despite such debate over the seriousness of Social Security's woes, indications are that Congress will move soon to try to stanch the system's losses, moves sure to affect millions.

[From the New York Times, Aug. 30, 1982]

SOCIAL SECURITY INEQUITY

(By Horace W. Brock)

MENLO PARK, CALIF.—Social Security reform has emerged as the thorniest issue on the domestic political agenda. Ballooning entitlement programs portend swelling Federal deficits, high interest rates and low economic growth for years to come. Yet the response thus far has been paralysis at every level of government—for reform means cuts in benefits, and there is no political will for cuts because most Americans think they would be unfair to the elderly.

Perceptions about equity lie at the heart of the matter and largely determine its politics. Yet precisely because this is so, there is hope. For moral philosophical analysis reveals our understanding of "fairness" to be curiously inverted. True justice calls for a significant reduction in Social Security benefits. And once this becomes appreciated, there should be a groundswell of support for reform.

What is required at the outset is a deeper understanding of what fairness means in the intergenerational context of national retirement planning.

First, our society must redefine "the elderly" to include not only today's retirees but tomorrow's as well. Second, a principle of intergenerational fairness is needed to indicate the proper balance between the needs of both these groups. Moral theory offers only one compelling principle in this regard: that of equal treatment or nondiscrimination between generations.

It is possible to measure how much Social Security discriminates between any two generations by constructing an intergenerational "inequity ratio" as follows: First, compute for each generation its payback or rate of return from Social Security by comparing total contributions with total benefits; next, simply form the ratio of the two resulting numbers.

In a study currently underway, my company has computed the inequity ratio relating the prospects of today's retirees and the "baby-boomers" who will retire after the year 2010. Using the Social Security Trustees' own demographic and economic assumptions, we found that the resulting ratio is 2.5 to 1 in favor of today's retirees—that is, today's elderly have a 250 percent better deal than today's young can expect when they retire.

This ratio, however, in fact understates matters, for it assumes that if baby-boomers are to receive their scheduled benefits, their progeny will bear 40 percent payroll taxes—triple today's 13.4 percent Social Security tax. But since such a tax rate would be politically unsupportable, America could expect to witness successive compromises that would reduce baby-boomers' benefits. For example, the retirement age would be bumped up to 72. When these political realities are factored in, the inequity ratio jumps up to an outrageous 4 to 1 or even 6 to 1 if the economy performs poorly.

These ratios have more meaning if they are translated into "payback period" language. A single worker reaching age 65 this year will receive back from Social Security his lifetime contributions and accrued interest in 3.25 years. If a 5-to-1 inequity ratio prevails, then it will take the equivalent baby-boomer some 16 years to recover his or her contribution. Of course, by this point statistically he or she will be dead.

How would Social Security have to be changed in order to pursue the idealized fairness of a 1-to-1 ratio?

Computations show that today's benefits would have to be slashed by 30 percent, and the entire program would have to be substantially de-indexed—that is, benefits would no longer escalate at the inflation rate.

Any politician proposing such reforms would be branded a moral monster who condemns many elderly people to a diet of cat food. Yet in fact it is today's status quo that will truly stimulate pet-food sales. It will see four baby-boom pensioners on cat food for every one retiree eating such fare today.

If the moral arithmetic adds up to immediate reform, what about the political arithmetic? The clout of some 26 million senior citizens is well known. Less well known is the existence of 81.5 million working Americans under the age of 50 whose interests are increasingly jeopardized by the retirement system. These citizens have been silent until now. But as the unfairness of the current Social Security program becomes recognized, this giant may awake from its political slumber.

Reform should justly be spearheaded by the young who are being so mistreated coming and going: coming, because the retirement system contributes to the high interest rates that diminish their prospects for jobs and homes when young; and going, because their terminal reward will be a postponed retirement in degradation. And all this will have been the legacy of today's politicians who dare to stymie reform in the name of "fairness."

[From U.S. News & World Report, Dec. 28, 1981]

WHAT'S IN THE WIND FOR SOCIAL SECURITY REFORM

(By James M. Hildreth)

Raising the retirement age is only one of the ticklish proposals under active study to shore up the money-losing national pension system.

The broad outlines for a major overhaul of the creaking Social Security system are now taking shape.

Though formal action is probably a year away, these changes in the 176-billion-dollar program are in the wind:

Gradually raising the age for full retirement benefits to older than the traditional 65 years.

Altering the method used to calculate annual cost-of-living hikes, so as to hold down increases.

Changing the formula used to determine initial retirement benefits.

Tightening further the eligibility requirements for enrollment in several auxiliary programs.

The idea throughout is to slow the explosion in Social Security costs and calm fears that the system could run short of money to pay benefits on time.

Even before anything has been accomplished, ideas for shoring up Social Security are generating loud debate, with more to come.

Democrats are blanketing the country with appeals for campaign funds the party says are needed to save Social Security from Republican threats to cut it back. Says House Speaker Thomas P. O'Neill, Jr.: Social Security "is not in the dire, disastrous circumstances the Reagan people would have you believe."

Republicans fire back that they are the ones trying to save people's pensions and have no intention of cutting back further on present benefits. "We can't play Russian roulette with this program any longer," declares Representative Bill Archer (R-Tex.).

Whoever is to blame, worry over the program is spreading among old and young alike. One of the hotest topics at the White House Conference on Aging in early December centered on concern that present or future benefits would be cut. Polls show a waning in confidence among younger workers that adequate pensions will be there when they retire decades from now. "If you can't believe in a long-range pension promise made by the federal government, what can you believe?" asks A. Haeworth Robertson, a former chief actuary of the Social Security Administration.

Behind the moves for overhaul lie official figures pointing up the rickety state of Social Security financing.

OASI IN TROUBLE

The main problem is with the part of the system handling pension payments to the elderly, their dependents and survivors—the Old Age and Survivors Insurance trust fund (OASI). It is running in the red. OASI is the biggest of three Social Security trust funds. The other two distribute disability benefits and the hospital-insurance portion of medicare. Payroll taxes for more than 115 million workers are paid into the trust funds, which send cash benefits to 36 million recipients.

The big danger is that the OASI fund will exhaust the reserves it has built up over the years if it continues to run a deficit much longer. In 1981 alone, the shortfall was an estimated 3.7 billion dollars, cutting reserves to 19.1 billion.

Outlays in 1982 for the three funds combined are now projected to climb to 196.5 billion dollars, a 143 percent increase since 1975. At the same time, the average benefit will surpass $400 a month, nearly double the $207 paid out as recently as 1975.

The ills of the economy make things worse. Steep inflation results in enlarged cost-of-living increases in benefits while rising joblessness translates into less revenues from payroll taxes.

Congress moved on December 16 to ease the short-term pinch by letting the OASI fund temporarily borrow from the other two, which are in better shape. That will stave off bankruptcy in the old-age fund until at least 1984, say authorities, unless the economy performs far worse than now anticipated.

But even greater headaches loom after the year 2000. When the baby-boom generation born in the wake of World War II begins to retire early in the 21st century, projections indicate that under present law benefits will far outrun Social Security tax receipts. In the year 2000 alone, well before the boom hits, the number of Americans 65 years and older is expected to total 35 million—10 million more than today. If reform does not come soon, warns Michael Boskin, a Stanford University economics professor, Social Security will "careen toward a crisis of unmitigated proportions."

CHANGES BY 1983?

In hopes of averting such a crisis, administration officials, members of Congress and other experts are studying a wide range of possible changes. President Reagan has impaneled a 15-member task force on Social Security reform, made up of Republicans and Democrats. It is to propose changes for Congress to act on in 1983.

Foremost among the alterations that are already being discussed behind the scenes: Boosting to beyond 65 the age at which retirees become eligible to collect full benefits. One such proposal given an inside track is championed by Representative J. J. Pickle (D-Tex.), chairman of the House Social Security Subcommittee. The plan would gradually increase the age for full benefits to 66 by the year 2000, the retirement age would rise by approximately one month a year, starting in 1990. Monthly pensions paid to retirees who work until 67 or 68 would be fatter, to discourage early retirement.

A different scenario, backed by the National Commission on Social Security, an independent, bipartisan panel of private citizens, would push the age to 68 by 2012.

Another change under consideration would alter the method used to determine cost-of-living increases. Since 1975, recipients have received yearly increases tied directly to the consumer price index. Critics contend that this measurement vastly overstates the effect of inflation on retirees' pocketbooks, costing Social Security billions of dollars. If the suggested revision is made, future boosts would be linked to either the annual increase in prices or wages, whichever is lower.

Big savings in future costs would come if a technical change is made in the way that the government computes initial benefits for future retirees. Involved is the formula used to adjust beginning pensions to take account of recent increases in wages in general. New retirees would wind up getting less than they would under the present formula, and Social Security would save billions.

Still more tightening of the requirements for enrollment in several smaller Social Security programs is also being discussed. A change in eligibility standards for disability benefits is one possibility. Any moves would be in addition to alterations already enacted. Congress, for example, voted on December 16 to deny the minimum Social Security benefit of $122 a month to anyone retiring after Jan. 1, 1982.

Another action sure to be debated would permit Social Security to borrow general revenues from the Treasury temporarily in case of an emergency. But tapping general revenues rankles many Americans who believe Social Security should remain self-sufficient. "It's like asking an alcoholic if he wants a drink," says Treasury Secretary Donald Regan. "Once you get started on it, you can never go straight again."

Any changes in Social Security would be considered under two significant guidelines, say advisers to the White House and to members of Congress.

First, every effort will be made to avoid touching basic benefits to current retirees. A recent public-opinion poll showed that 92 percent of Americans, young and old alike, oppose benefit reductions for those already receiving them. "Anything that's perceived as zapping somebody who's already retired or just about to will get blown out of the water," says Boskin.

Second, payroll taxes won't be boosted beyond those hikes already scheduled under current law. In 1982, the payroll-tax rate paid by employees and employers alike is 6.7 percent, up from 6.65 percent in 1981. Simultaneously, top earnings upon which taxes are paid rise to $32,400 in 1982 from $29,700. Thus, people earning at the wage base or above will pay $2,170.80. That's $195.75 higher than in 1981 and far above the $30-a-year ceiling paid when Social Security started collecting taxes in 1937. Under changes O.K.'d in 1977, the tax rate will keep rising in steps to 7.65 percent by 1990. The wage base goes up in line with wage inflation.

LESSON LEARNED

Despite pledges all around to avoid undercutting present basic benefits, it won't be easy to hold down future payouts. The administration found that out last May when Reagan hurried to Congress a plan for wide-ranging changes. The proposal was scrapped in the face of criticism.

Largely because of that experience, neither the White House nor Congress wants to repeat the process in 1982, an election year. "None of the members of Congress want to deal with Social Security during their primaries," says Social Security Commissioner John Svahn. Typical is Senator John Danforth (R-Mo.): "I'm running for re-election in 1982. I don't want to face this."

Nevertheless, many lawmakers doubt that Social Security's woes will go away. "It's a disgrace the way we have turned tail and run on Social Security," says Representative Barber Conable of New York, ranking Re-

publican on the House Ways and Means Committee.

"Change is inevitable," says Robertson, the former Social Security official. "It's just a matter of whether it will arise from a clearheaded appraisal of our current system or from the existing state of frustration and bewilderment."

[From Newsweek, Oct. 27, 1980]

HOW TO SAVE SOCIAL SECURITY

(By Victor R. Fuchs)

The social-security system is in trouble. Expenditures and receipts are in uneasy balance and the situation is likely to grow worse in the decades ahead. Young workers are understandably concerned because social-security taxes take a big bite out of their paychecks with no guarantee that the economy will be able to provide them with equivalent benefits when they retire. Retired persons fear that a sudden crisis in funding may force a rollback in their main source of support. The fears are justified, but I believe there is a way out.

The basic problem is that the system is not, and was never intended to be, a "save for retirement" insurance plan. It is a "pay as you go" system. The taxes paid by current employees (and their employers) are not invested in a fund to finance *their* retirement. Instead, current taxes are used to pay benefits to the workers of earlier generations who have already retired. When the number of retired persons is small relative to the number of workers, no problems arise. But when the number of retired persons grows much more rapidly than the number of workers, large increases in taxes and/or decreases in benefits are needed to keep the system in balance.

BIRTH AND DEATH

What is going wrong? In large part the system is the victim of demographic changes that it did not cause, but that it must respond to. Longer life expectancy and declining birthrates are the main factors undermining the financial foundations of the system. Since it was designed in the 1930s, there has been a significant increase in the proportion of the population that reaches retirement age. More recently death rates at post-retirement ages have also decreased appreciably. Between 1968 and 1977 life expectancy at 65 jumped from 12.8 to 13.9 years for men and from 16.3 to 18.3 years for women. Congressional action in 1956 and 1961 that created an early-retirement option at 62 has also increased the retiree-worker ratio. Currently, fewer than half of all workers wait until 65 to begin collecting benefits.

Until now the increasing number of retirees has been offset in part by the rapid growth of female-labor-force participation and by the massive influx of the baby-boom cohorts into the work force. These sources of additional labor will begin to dry up in the years ahead. Although the female-labor-force participation rate is likely to remain high, it is virtually impossible that it will *increase* as rapidly as it has in the past. Even more important, because of the decline in the birthrate, which began many years ago, the number of young people who reach working age during the 1990s will be approximately 7 million less than it was in the 1970s.

What can we do? Politicians are understandably reluctant to reduce benefits or to raise taxes, but unless some action is taken a crisis is likely to develop—one that would set generation against generation and would prove extremely disruptive to the society. Some experts would like to see a change to a fully funded "save for retirement" insurance system. While such a system has some advantages, it is not feasible to make such a radical change. In order to create a funded system while maintaining benefits to those who have already retired, the current generation of workers would have to bear an enormous increase in taxes. From both a political and an economic point of view, that is neither a viable nor necessarily a desirable option.

Fortunately, there is a simple and effective way to put the system back on a sound financial footing without raising taxes or reducing benefits to retired persons. Beginning soon *we should gradually and steadily raise the age at which workers become eligible for retirement benefits.* For instance, legislation passed next year could state that in 1983 the eligibility age for so-called early retirement would be 62 years and two months, eligibility for standard retirement would be 65 years and two months and that these ages would increase by two months every year for the following seventeen years. Thus, by the year 2000 the key eligibility ages would be 65 and 68. This simple gradual change would provide a large financial boost to the social-security system without causing significant disruption to workers, families or firms. In the long run the effect would be comparable to a major increase in social-security taxes because the ratio of workers to retired persons would be much larger than if we allow the eligibility ages to remain as they now are.

ADAPT

Would raising the age of eligibility change retirement patterns? There can be no doubt that it would. Opinions differ regarding exactly how retirement decisions are influenced by ill health, inflation, unemployment and other facts, but the timing of retirement clearly depends upon social-security eligibility. Withdrawal from work is much greater at 62 and 65 than in the years just before or just after those ages. Moreover, once Congress changes the social-security ages, most private-pension plans would probably adapt, thus reinforcing the effect. Mandatory retirement, it should be noted, has already been changed by Congress from 65 to 70.

There is nothing sacred or magical about reaching 62 or 65—Congress picked those ages, and Congress can change them. The use of 65 as a standard retirement age goes back to the nineteenth century when Bismarck chose it for the new German social-security system. This was at a time when most people began work before the age of 15 and most died before ever reaching 65. At present in the United States very few youngsters begin full-time work until finishing high school, and a substantial fraction do not begin until they are well into their 20s. Furthermore, given present trends in life expectancy at older ages, persons retiring at 68 in the year 2000 can probably expect to enjoy as many years in retirement as did the worker who retired at 65 in 1960.

The problem is clear. So is the solution. All that is required is the political courage to act before a crisis is actually upon us.

[From the Washington Times, Nov. 4, 1982]

HOW TO SAVE SOCIAL SECURITY

(By M. Stanton Evans)

The key to understanding the debate on Social Security is to realize that anyone who tries to save this bankrupt program will invariably be accused of trying to destroy it. Conversely, the people who talk the loudest about the integrity of the system and the need to treat its benefits as sacred are the major culprits in bringing about its ruin.

Once these points are grasped, the discussion begins to make a modicum of sense. Consider in this respect the case of Peter Ferrara, a youthful economist on the White House staff who has devised an eminently-sensible proposal for rescuing Social Security from impending doom while not only protecting but increasing benefit levels. Sure enough, for daring to think such constructive thoughts, he is charged with wanting to "dismantle" the program.

As just about everyone knows by now, Social Security is in a heap of trouble. It is running in the red on a daily basis, and over the long-term has roughly $6 trillion in unfunded liabilities. Maximum Social Security taxes have grown tremendously to pay the bills, ballooning up from $288 a year in 1960 to $4,341 today, with a scheduled increase to $8,690 by 1990—an increase of better than 3,500 percent in slightly more than a generation.

Because of the continued yawning deficits, still bigger tax hikes are probably in the offering. A long-term actuarial outlook tells us that Social Security taxes may rise to anywhere from one-quarter to one-half of taxable payrolls, depending on the assumptions used. The program currently costs more than $200 billion annually and this is only the beginning. By 1986, on current estimates, Social Security will absorb 55 percent of the domestic federal budget, and by 1995 will be up to 59 percent.

The reason for these mind-boggling numbers is that Social Security is constructed on a faulty financial premise. It is set up like a pyramid club, with benefits paid out of current taxes on the working population. When the program was launched, this seemed to be a good idea, since there were relatively few retirees compared to workers. Now, however, the balance is tipping the other way. As more and more retirees enter the system, the gigantic tax load simply keeps on growing.

As Ferrara notes in a study for the Heritage Foundation, private retirement systems operate in totally different fashion. They invest the money of their participants in stocks and bonds, where they earn a rate of return as part of the productive economy. Benefits are paid back from these investments and their earnings. Liabilities are fully funded, and the benefits provided are much greater than those paid out by Social Security.

Thus if an employee pays in his Social Security taxes at the average rate throughout his working lifetime, he will wind up with an annual retirement benefit of roughly $15,000. By making the same payments into a private system, he could compound his investment into an estate of almost half a million, or an annuity of roughly $45,000. The private benefit is three times the payout from Social Security—assuming that the latter will get paid at all.

Ferrara suggests that Social Security participants be given the option of switching over a percentage of their payments from the system to Individual Retirement Accounts, phasing in the changeover on a gradual basis. In 1986, wage earners would be allowed to deduct some 20 percent of their payroll taxes for IRA investments. In 1996, this would go up to 40 percent, and in 2004 to 66 percent. By 2014, 100 percent conversion would be permitted.

Such a transition would allow all wage earners covered by Social Security to obtain much higher benefits than they can presently count on, while pumping added billions into the productive economy. Under Ferrara's proposal, Social Security's short-term and transitional financing problems would be covered from general revenues, which would also finance the system's welfare functions.

All in all, one of the most ingenious and hopeful proposals for saving the Social Security system to come down the pike in many moons. So how was it headlined in the Washington Post? Right: "White House Adviser Recommends Dismantling Social Security."

[From Parade Magazine, Oct. 31, 1982]

HOW TO FIX SOCIAL SECURITY

(By Andrew Tobias)

There's a dirty little secret about Social Security, and it isn't that the system's going broke. Everybody knows that. The secret is that there are some simple, fair and relatively painless ways to solve the problem. Almost nobody knows *that*, because our elected representatives—who do know it—would rather make political hay than lead the nation. "Everything has been geared to the first Tuesday of November," House Speaker Tip O'Neill candidly told a reporter this summer.

THE PROBLEM

In 1949, there were 16.5 workers paying into Social Security for every retiree or surviving spouse drawing money out. The maximum tax on wages was $30 a year.

Today, there are just 3.2 workers supporting each retiree, and the maximum annual tax—$174 as recently as 1965—has risen to $2171. Employers pay an equal sum, which they then add to the price of their products. So we wind up paying that $2171, too.

And it gets worse: In 30 years, there may be barely two workers to support each retiree.

In large part, the problem—if you can call it a problem—is that people live longer than they used to. In 1940, a 20-year-old woman was expected to live to be 71; now she can expect to live to 80. That's wonderful, but look what it means: Instead of collecting Social Security for six years, say, she may now collect it for 15.

Longevity was expected to increase a mere six months during the 1970s. Instead, due largely to a decline in fatal heart disease and strokes, it increased 2.8 years! This is surely no one's "fault"—but it does require adjustments to the Social Security system.

The money we pay in Social Security tax is not invested for our retirement, even if some people were gently misled into thinking so. It is paid right back out to the elderly—our parents and grandparents. The young assist the old on the assumption that their young will do likewise. It is a contract between the generations.

The idea was never that this program would provide a full and comfortable retirement—that was the responsibility of the individual. Social Security was designed to assure the bare essentials. Yet, in the last dozen years, the benefits a worker gets upon retirement have jumped from 34 percent to 55 percent of his prior year's wages.

So not only are there far fewer workers to support each retiree—each retiree costs more to support!

People say they could do better saving for retirement themselves than paying into Social Security. Quite true. But who, then, would pay benefits to today's senior citizens? Should they be allowed to starve? Like it or not, we are paying into the system not for our own retirement (our children will do that) but for our elders. And at the rate things are going, the system is going to fall tens of billions of dollars short over the next few years and more than a trillion dollars short early in the next century.

THE SOLUTION

Conceptually, the situation couldn't be simpler. The Social Security system is paying out more than it's taking in. That's all. To fix it, we must either take in more (raise taxes) or pay out less (cut the growth of benefits).

Those who favor raising taxes will be delighted to know that increases are already on the way. The 13.4 percent bite we and our employers pay on wages up to $32,400 is slated to keep rising. But even with those hikes, mammoth deficits are projected. To raise taxes still further seems almost too much to bear. Instead, what most people agree must be done is to slow the growth in benefits. Not cut them, just slow their growth. These three changes would more than suffice:

(1) Raise the retirement age from 65 to 68—gradually, over the next 36 years. One month would be added to the retirement age each year. It would rise to 65-and-one-month in 1983, to 65-and-two-months in 1984, and so forth. Twelve years from now, it would reach 66. (Early retirement, likewise, would have risen by a full year from 62 to 63.) In 36 years, the retirement age would have climbed to 68.

Current recipients would not be affected one whit.

Naturally, it would be nice if we didn't have to do something like this. It would be nice, indeed, if we could lower the retirement age. And double benefits! But we can't afford to.

Indeed, as sacrifices go, perhaps this one—raising the retirement age for today's 30-year-olds, from 65 to 68—is not so great. But its impact on the system would be enormous. People would eventually be paying into the fund for three years longer and withdrawing from it three years less. This one change would go about two-thirds of the way toward solving the problem all by itself.

Yet when House Ways and Means Subcommittee Chairman J. J. Pickle was drafting such a bill, to begin phasing in about 1990, Tip O'Neill told him to stop. According to Time, O'Neill didn't want voters to think the Democrats were tinkering with Social Security.

(2) Subject benefits to federal (but not state or local) income tax. People say, "Now, wait just a damn minute. I paid into that system for 30 years (or my spouse did)—how dare you tamper with what's rightfully mine?!"

Nonsense. In the first place, that money is gone. It went, with at least the tacit consent of us voters, to support prior generations.

But even putting that aside, today's average retiree can expect to collect something like five times what he or she paid into the system (even taking into account the interest that money would have earned). The most anyone retiring in 1987 could possibly have paid into the system since 1937 is $16,937. On average, that will be paid back in just a year or two. The next 20 or 30 years are gravy.

If benefits were taxed, many recipients would have no tax due. Only those with outside income would pay any tax. And why not? Today's 20- and 30-year-olds can be expected to help the elderly who need help. But why should they be taxed to support the elderly who don't need help? If Social Security benefits were taxable, then those with less need would simply "return" some of the money by paying taxes on it. Crediting that money to Social Security would reduce the projected shortfalls dramatically.

Consider a widow whose husband contributed a total of $2,086 to the system over his lifetime. She has been receiving benefits—currently, $5,520 a year—for 25 years. She also has a trust fund and investments that pay her $16,000 a year. She is in no sense rich, but given the nation's economic condition, would it be cruel or unfair to tax her Social Security check? I hope not. She's my grandmother.

Still, to ease its impact, any such change could be applied only to future recipients and to current recipients with incomes in excess of, say, $30,000 a year.

(3) Suspend the automatic cost-of-living adjustment for one year (and one year only). Social Security recipients saw their untaxed benefits rise 40 percent over the last three years, while the wages of workers taxed to pay those benefits rose just 30 percent. A one-year moratorium on the cost-of-living adjustment would have only a small effect on current recipients but would do wonders for the financial health of the system.

Other steps could be taken as well. One would be to return to the fold those who have been exempted from participating in Social Security (government employees, for the most part—funny how well they manage to take care of themselves). But the three proposals above would solve the problem. Indeed, they would more than do the trick, confirms Robert J. Myers, 70, executive director of the National Commission on Social Security Reform (due to make its report to the President by the end of the year).

Yet, so vocal have our representatives been in politicizing the problem rather than dealing with it that two-thirds of Americans under 45 don't believe Social Security will exist when they retire. There's no reason why it shouldn't; benefits might just start a little later. (In the meantime, believers and nonbelievers alike would be smart to join the tens of million who already have set up Individual Retirement Accounts.)

Putting Social Security on firm ground would do something even more important. It would signal the financial markets that ours is a country that can cope with its future. Right now, there is considerable uncertainty among investors here and abroad of our ability to do so. (Or else why would long-term bonds that promise 12 or 14 percent interest go begging?) Uncertainty over the future, together with gargantuan projected deficits, translate into murderously high interest rates. And murderously high interest rates are killing the country.

Editorialized The Wall Street Journal: "The elderly are no different from anyone else in this democracy. They are willing to be fair if the issues are explained honestly. The longer the necessary Social Security decisions are postponed, the worse the problems will become and the more unpalatable the remedies. Everyone, young and old, understands this, except, of course, members of Congress."

If you want to have a real impact, rip out this article and send it to one of your elected representatives. Quick.

[From the Denver Post, Nov. 3, 1982]

THE BOILING MESS OF SOCIAL SECURITY

(By Otis Pike)

Every single minute of every hour of every day, the Social Security system pays out $17,000 more than it takes in . . . $17,000 a minute. In the lamentable campaign just past, none of the candidates was heard offering any solution to this time bomb ticking away in our society. The noble experiment of President Franklin D. Roosevelt's New Deal has fallen into such disarray that a recent poll found that more than two-thirds of U.S. citizens ages 18 to 44 simply don't believe the system will exist when they arrive at retirement age.

Politics created the system, got it into the mess it's in and prevents any rational solution. And when worst comes to worst, politics will save it.

There has been no salvation in the statements candidates have been uttering during recent campaign weeks. All over the U.S., Democrats have accused Republicans of trying to cut the benefits of Social Security recipients. "Balancing the budget on the backs of the elderly" is the most reasonable phrase used.

More rabid campaign oratory has included "insensitive," "cruel" and "despicable" to describe actions taken by the Republicans. Democratic campaign ads warned of unknown and unspeakable horrors the Republicans contemplated for our senior citizens after the election.

Republicans have responded as best they could. A GOP commercial had President Reagan taking credit as a kindly postman delivering a Social Security cost-of-living raise, which Reagan had opposed.

Individual Republican congressmen used ads and speeches expressing their undying love for and commitment to the elderly. The Republican Congressional Campaign Committee hastily withdrew a fund-raising letter that merely gave respondents the opportunity to vote for three options on bailing out the system—one of which was making the system voluntary. This particular option is bad economics, worse social policy (the people who need it most would be most likely to drop out)—and the fund-raising questionnaire was horrible politics. It gave the Democrats another opportunity to charge, in the final days of the campaign, that the Republicans were out to destroy Social Security.

Reagan warned of "demagogic" campaigning on the Social Security issue. The Democrats had a ball.

Now, the party is over, and it's hangover time—$17,000 more has been going out every single minute the party lasted. What do the Democrats propose to do about it? What do the Republicans propose to do about it? So far, it has been the ostrich approach—bury your head in the sand and pretend it isn't there.

There are three separate funds in the Social Security system. The big one is old age and survivors insurance. By July 1983, it will be unable to send checks to 32 million retirees or their survivors.

Hospital insurance pays Medicare for the elderly.

Disability insurance provides benefits for disabled workers.

Since 1980, the big one has been borrowing from the other two. In 1984, assuming Congress allows the borrowing to continue, all three will run out of money.

As always, there are only three options: (1) We can cut benefits. (2) We can raise taxes. (3) We can borrow and add it to the deficit.

There are many variations and details, but all possible solutions require one or more of the above. Every one of them is unpopular, so none of the candidates has advocated any of them.

It's time to pull our heads out of the political sands. All solutions are painful. We got in the mess because paying retirees more was popular and got votes.

The best thing to do is gradually increase the retirement age to adjust for our longer life expectancy. Cost-of-living increases should be geared to the lower of prices or wages.

The worst thing to do, fiscally, is to take the shortage out of general revenues. There are no surplus general revenues, only a very large deficit. This is the worst option fiscally, but probably the best politically. The worst politics would be not having the checks go out.

[From the Washington Post, Nov. 9, 1982]

SOCIAL SECURITY: WRIGHT AND WRONG

Representative Jim Wright of Texas, the House majority leader, offered a few suggestions last weekend for the rescue of Social Security. They illustrate the reasons why most people aren't taking the congressional Democrats' pronouncements on the subject very seriously.

It's true that Mr. Wright offered these thoughts while being interviewed on "Meet the Press," and it's difficult to discern from the context whether he had given any of them more than two minutes' previous thought. They have the air of spur-of-the-moment inspirations, and they would hardly be worth noting if they did not reflect so clearly the same message as much of the Democrats' current commentary on Social Security. The general idea is that a few painless adjustments here and there can set things right. As most Americans have come to realize by this time, it's not going to be quite so easy.

All of Mr. Wright's suggestions have one thing in common. They would mean using general funds—money from all the other tax sources—to supplement that payroll tax that is now insufficient to pay for the present Social Security benefits. One of Mr. Wright's proposals is to subsidize the incomes of people of retirement age, with tax credits up to $2,000 a year, to keep them working and off Social Security. Where does the $2,000 come from? The government is already running dramatically large deficits, and shifting inadequate funds around from one pocket to another is not terribly helpful.

Another (and worse) suggestion is to earmark the revenue from offshore oil leases for Social Security. Offshore revenues bounce up and down with the vicissitudes of the oil business; they are precisely the kind of unstable source that should never be used for pensions. As for new funds. Mr. Wright thought that the American taxpayer might tolerate another 50 cents a gallon on the liquor tax, to be permanently dedicated to the Social Security Trust Fund.

The Social Security shortfall has a simple explanation. Congress greatly increased the benefits in the late 1960s and early 1970s, on the assumption that the rapid economic growth of that period would continue steadily. But that assumption has failed, leaving the prospect of a rapidly widening gap between Social Security taxes coming in and benefits going out. That is the formidable reality with which the special commission headed by Alan Greenspan is now coming to terms. Whether its recommendations next month actually lead to useful legislation depends on the legislators, among whom Mr. Wright is a major figure, and whether they are willing to approach the subject seriously. A sincere smile and another 50 cents on a jug of whiskey won't quite be enough.

[From the Rocky Mountain News, Oct. 24, 1982]

SOCIAL SECURITY: POLITICIANS ARE PLAYING "DODGE BALL" WITH IT

(By Senator ROBERT DOLE)

Politicians are fond of claiming that the "other party" has turned Social Security into a political football and that's the reason why Congress has failed to confront the financing crisis.

I have a different view. I'd say politicians have been playing "dodge ball" with Social Security. The game has to stop.

There is no other government program that affects citizens, private industry and even the federal budget more significantly than Social Security. Spending $200 billion this year—about $1 out of every $4 spent by the federal government—the Social Security system now sends a check to one out of seven Americans. There is no other government program which so vitally influences the standard of living for millions of retirees. Yet, confidence in the survival of the system is at an all-time low.

For too long now, Congress has cold-shouldered the fact that Social Security is going broke. The retirement fund is spending $30,000 more each minute than it is taking in. At this rate, reserves would be completely depleted and benefits would not go out on time beginning in November—at least, that would have been the case if the program had to rely on its own resources.

But Congress took a "heroic" course of action last year which will allow the retirement fund to limp along for a few more months. Congress authorized the three Social Security trust funds—retirement, disability, and Medicare—to temporarily borrow from one another. Actuaries now expect that the retirement program will have to borrow up to $12 billion from the other funds just to keep checks going out on time for the next eight months. Without quick congressional action, however, that means that checks cannot go out on time past next July.

One bleak fact stands out: The Social Security system's income is not likely to cover outgo at any time between now and 1990. This is a staggering prospect when you realize that the Social Security payroll tax will, under current law, be increased in 1985, 1986, and 1990, and that the system will be bringing in some $2.5 trillion by the end of 1990. The Social Security Board of Trustees, the Congressional Budget Office and a wide variety of private actuaries and economists all report the same gloomy outlook—the system's trust funds will be dry in 1984, if not by the end of 1983.

Congress knows all of this and yet is politically paralyzed, especially in this election year. This case of election-year jitters is exactly why I've called for a special session of Congress. As I see it, there is a real opportunity for positive action following Nov. 2 and prior to convening of the new Congress. We will have just received the final report of the President's bipartisan National Commission on Social Security Reform. That report will be a good starting point for our work. Political pressures will be at a minimum and

we would not have lost valuable time waiting for the 98th Congress to be organized.

As an alternative, we could follow the suggestion of the majority leader, Sen. Howard Baker, and convene the 98th Congress early in January to deal only with Social Security. I'm agreeable to that idea as well

What's essential is to act promptly to shore up the system in the short-term and the long-term, and to do so before the fiscal year 1984 budget battles begin. There's no question that the 98th Congress will be faced with the need to enact major new deficit reduction measures. The charge will inevitably be made that Social Security is being manipulated to balance the federal budget. Unless we act before that time, immediately after the National Commission reports, effective reform may once again be impossible—as it was in 1981 and has been during 1982.

The longer Congress delays, the more trouble we can expect. The changes in benefits or taxes that are required to meet the near-term crisis will only become larger and more abrupt in their impact. As for delaying action for the long term, a recent poll indicated 75 percent of men and women between the ages of 18 and 29 doubt Social Security can meet its commitments after the turn of the century. Such attitudes reflect the growing pessimism of younger workers over the survival of the system.

Who can blame them? Imagine a tax rate double the current level of 6.7 percent just to finance Social Security benefits in the year 2035, when today's students are beginning to retire. Already, one-quarter of America's taxpaying households pay more in Social Security taxes than they do for income taxes, and Congress can't even guarantee they'll get any kind of return on their investment.

There will be no easy or painless solutions. But the right step is for Congress to get down to work. As a member of the Social Security Commission, I am confident there are many ways to trim the cost of Social Security and help shore up the system without risk to current benefits.

Social Security spending will amount to $3 trillion in the next 10 years, increasing by a whopping $20 billion or more a year. Not every dollar spent on Social Security goes to the elderly. One-third of all Social Security recipients are under 65. It is a complex system, with many elements that are not generally understood, and many areas for improvement. There is clearly room for belt-tightening without reducing current benefit levels. Repeat: I am not suggesting cutting present benefits.

We need to look at ways to slow the unchecked growth of the program. Eligibility can be tightened, the benefit formula can be modified to reflect more moderate increases, and the cost-of-living adjustments can be modified. However, time is running out and so are the Social Security trust funds.

[From the U.S. News & World Report, Nov. 1, 1982]

PRO AND CON: RAISE SOCIAL SECURITY TAXES NOW?

YES—"BENEFITS ARE WELL WORTH THE CONTRIBUTIONS THAT YOUNGER PEOPLE PAY"

(Interview With Wilbur J. Cohen, Former Secretary of Health, Education and Welfare, 1968-69)

Q. Mr. Cohen, do you favor boosting Social Security payroll-tax rates more quickly than now scheduled in order to meet the system's financial problems?

A. Yes. The most feasible, reasonable alternative for bringing more revenue into the system is to raise the rate to 7.5 percent, starting in 1984. While I prefer in the long run to provide more income from federal general revenues, I recognize that with today's large budget deficit, that's not possible, politically speaking.

Q. Maximum payroll taxes for workers and their employers approached $2,200 this year. Would it be fair to them to boost taxes still higher?

A. Yes, because workers get their money's worth. Let me explain. There are at least three kinds of protection that younger people receive from Social Security even before they retire.

One is that with basic Social Security benefits, they don't have to take care of their parents when they become old. Secondly, they don't have to spend additional general tax funds on welfare for older people. And third, younger people have the advantage of disability insurance if they become disabled, and death benefits for their widows and dependent children if they die prematurely. Moreover, some of their medical-care expenses will be paid by medicare.

In short, the benefits are well worth the contributions that younger people pay. You've got very difficult psychological and educational problems in persuading younger people to make an investment over 40 years for a wide range of human fallibilities.

Q. Wouldn't the tax increase pile extra costs on business, slow down the recovery and discourage firms from hiring?

A. I don't believe that is the primary problem in our economic situation. A slight increase in the Social Security tax wouldn't be a very significant factor in increasing unemployment. To the extent it is a factor, it's the least-worst option we have.

Q. As opposed to what?

A. As opposed to letting the Social Security system go bankrupt or, at this particular moment, increasing the deficit by having the money come out of general revenue. Or of reducing benefits: That is not only politically infeasible, it would be morally wrong.

Q. Another proposal receiving attention would allow the Social Security system to borrow from the general treasury—

A. I favor that for 1983 and 1984.

Q. When would the borrowed funds be repaid?

A. Sometime between 1985 and 1990, using money collected from the accelerated taxes. It would be paid back with full interest. Let me add that for the long run, I favor paying half of the cost of medicare out of general revenues.

Q. Why?

A. In my view, medicare is not a wage or earnings-related benefit. Already, general tax dollars pay some 75 percent of physicians' fees under medicare. I see no reason why half the cost of the hospitalization insurance could not be paid out of general revenues, too. Then more proceeds from the payroll tax could be shifted to the retirement program, which is the one in the most financial difficulty.

Q. Annual cost-of-living increases for retirees have sent benefit costs soaring over the past several years. Should these increases be cut back, as many advocate?

A. I don't see the need for that. Inflation is falling now, so it shouldn't have any big impact by 1984 or 1985. By then, the cost of living should be down below 6 or 5 percent.

Q. How much would it help to gradually increase the retirement age to 67 or 68?

A. That doesn't help the present situation. That's a problem for the year 2015.

Q. But doesn't the system face more-serious problems in the next century?

A. Yes. But we don't know what the solutions are to these problems. We do know that there will be more aged people, but there are also likely to be fewer children. We don't know what the productivity rate is going to be—and that's very important. So I don't see any great need to solve the problems of the year 2015 before we solve the problems of 1984.

You see, it is not desirable to mix up the short-run, intermediate and long-run solutions under the mistaken belief that we've got the knowledge today to solve everything all at once. I'm not that optimistic that we human beings have that capacity.

Another thing I think we ought to do to clear things up is to take Social Security out of the federal unified budget.

Q. Why is that important?

A. Young, middle-aged and older people alike become confused when the administration makes recommendations for changes in Social Security benefits and argues that they would reduce the deficit. People say, "What's the deficit got to do with what I contributed to Social Security?"

I feel we ought to restore the situation to what it was before 1969, when Social Security income and outgo were separate from general revenues. Then we wouldn't have the situation where cutting a dollar out of Social Security reduces the general-fund deficit. It has just resulted in misapprehensions and misunderstanding.

Q. You indicated that many younger people, among others, lack confidence in Social Security. Is there any practical way to shore up the system's credibility?

A. I would favor making it mandatory for members of Congress, their staffs and members of the cabinet to participate. It would have a tremendous psychological impact for the other 95 percent of the working force that contributes to know that these people in positions of power were paying their Social Security taxes, too. That would help answer the difficult question I get around the country: "Why are members of Congress and the cabinet excluded from Social Security? Do they know something that I don't know?"

NO—"INCREASING PAYROLL TAXES IS REALLY PLAYING WITH DYNAMITE"

(Interview with Senator WILLIAM ARMSTRONG, Republican of Colorado)

Q. Senator Armstrong, why do you oppose raising Social Security taxes faster than scheduled?

A. Because it makes absolutely no sense. A payroll-tax increase means more unemployment and might result in postponing the kind of reforms that are ultimately necessary to put the Social Security system on a sound financial footing.

Q. You mean it would be like applying a Band-Aid—

A. Exactly. Since Social Security has come into existence, the maximum payroll-tax payment has gone up 2,011 percent, taking into account higher tax rates as well as the higher wage base on which taxes are figured. In the last 10 years alone, it has quadrupled, and increases of another 196 percent are already scheduled by 1990. So when you start talking about telescoping that payroll-tax increase, you're talking about putting an enormous burden on individuals.

You're also talking about putting an enormous burden on companies that can ill afford it, since employers pay Social Security taxes matching those of their employes.

Even more important, you're putting an enormous drag on employment. Increasing payroll taxes is really playing with dynamite.

Q. What do you mean by that? How would higher payroll taxes injure firms?

A. It would impair their ability to compete, which means less employment. Take the automobile industry, for example. It is having a horrible time competing with overseas manufacturers. In the last five years, the U.S. automobile industry paid about 12.1 billion dollars in Social Security taxes—about twice the industry's five-year profit.

Q. Some advocates of tax increases contend that such a move would be fairer because it would spread the burden of covering Social Security's deficits across the board, instead of limiting benefits—

A. It is important to make this clear: There is absolutely no prospect that we're going to reduce the basic level of benefits now being paid to retirees. Frankly, there is a bunch of politicians in this country who are trying to stampede the elderly by yelling, "Look, they're trying to cut your benefits." Nobody's talking about that, and it shouldn't happen, and it's not going to happen.

Q. If the national commission studying the Social Security problem—of which you are a member—recommends a payroll-tax speedup, how would that fare in Congress?

A. They'd laugh it out of town. If anyone is thinking of that as a viable option, they ought to quit thinking about it, because it just isn't going to work.

Q. How would you get Social Security over its present cash shortage, then, if not by a tax increase—allow the system to borrow from the Treasury?

A. That's a preposterous idea. It's like suggesting that Amtrak, which is losing money, bail out Braniff airlines.

Q. Because of the high federal deficit?

A. Yes. Retirees aren't going to buy that approach for a minute. They know that the one thing that threatens their economic future more than anything else is inflation, caused by the deficits in the general federal budget. To say that we can borrow money from the general fund without having profound adverse economic conseqences is ridiculous.

Q. Then what can be done?

A. Well, a lot of things can be done in the short run that would have a big impact. One is to look into the General Accounting Office reports of fraudulent benefit payments. We're talking about saving billions of dollars. Second, there's the question of Social Security disability payments. Indications are that 2 billion dollars are being paid to people who never were disable or who are no longer disabled. There's also the question of upgrading the Social Security computer system in order to get deceased persons and prisoner off the rolls.

Q. There is talk of saving money by altering the formula by which increases in Social Security benefits are tied to rises in the cost of living. Would that be wise?

A. I'm skeptical of such notions. The essence of the bargain that we want to maintain with retirees is that when you retire we're going to protect your purchasing power. But there are a few changes in operation that could be made.

Q. For instance?

A. For one, there's the question of when the cost-of-living increase is computed. If you go on the Social Security rolls in December, for example, you nonetheless get a full year's cost-of-living increase, even though you were on the rolls for less than a month. Now that is unjust.

Another that's sometimes discussed is the possibility of simply delaying the date for increasing cost-of-living allowances, which is now the first check in July.

Q. For how long would you delay the increase?

A. A few months. That would save a huge amount of money because the system is so big that very minor changes have large dollar implications.

Q. Are there merits to raising the age for receiving full benefits to above 65, as some have suggested?

A. That makes a great deal of sense to me, but it must be done so gradually that nobody would be inconvenienced or threatened by it. One proposal that makes sense is to increase the retirement age one month per year for 36 years so that at the end of the phase-in period, people who are physically and mentally able to perform their jobs would have their normal retirements at 68 rather than 65.

Remember, though, that's a long-range remedy. There is this reality now: Benefits in the next few years simply can't go up as fast as they have in the last few years. I've talked with lots of retired people and others who are about to retire. They're apprehensive, but they also understand the problem. They're willing to bear their share of the burden. They know that there's no such thing as a free lunch.

[From the Washington Post, Dec. 23, 1981]

FOR 25 PERCENT OF PAYERS, SOCIAL SECURITY LEVY EXCEEDS INCOME TAX

(By Thomas B. Edsall and Spencer Rich)

A fourth of taxpaying U.S. households now pay more in Social Security than in income taxes, a new government study says.

Among black households 41 percent now pay more in Social Security than in income taxes; among female-headed households, 37 percent.

A second study shows that Social Security now provides nearly two-fifths of all the income of elderly people in this country, that it provides more than half the income of over two-thirds of the elderly and all the income of about a fourth.

Both studies were published in the most recent edition of the monthly Social Security Bulletin, which is put out by the Social Security Administration.

The figures do not deviate much from findings in previous reports. But they serve to underscore why Social Security has become so explosive a political issue in this era of austerity: an enormous part of the population is fundamentally affected by the giant system.

The tax figures take into account just the employe's half of the Social Security tax, which is paid half by employes, half by employers. Most economists assume that through a process of shifting, employees in effect pay both halves, in that employers look on their half as just another part of their total labor costs and subtract it from wages and benefits they might otherwise pay their employees.

Assume the employee ends up "paying" both halves and more than half of U.S. households pay more in Social Security than income taxes, the study says.

The Social Security tax looms larger for lower-income households than for higher. This is in part because it is a flat percentage, while the income tax is progressive, rising as income does; and in part because it applies on income only up to a specified cutoff point each year. For Social Security purposes, income over that point is tax-free.

In 1979, the study says, Social Security taxes tended to be higher than income taxes for families with incomes up to $9,000 to $10,000; above that point the income tax tended to retain its traditional position as the No. 1 tax.

The income study made these additional points:

Among elderly households in 1978, the year of the data, 90 percent received Social Security benefits. Thirteen percent received other public pensions and only 21 percent received private pension payments.

A fourth of these elderly households still had earning, while 62 percent had income from assets, which was mostly interest income.

On the other hand, this assets income accounted for only 19 percent of the total income of elderly people, indicating many had very little of it—and other studies indicate that most of this assets income goes to a relatively small percentage of the elderly who are the best off.

Earnings produced 23 percent of the income of elderly perople, pensions other than Social Security 16 percent and Social Security 38 percent.

POLL SHOWS AMERICANS LOSING FAITH IN FUTURE OF SOCIAL SECURITY SYSTEM

(By Warren Weaver, Jr.)

WASHINGTON, July 16—A majority of the American people, 54 percent, no longer believe that the Social Security system will have the money available to pay them the full benefits they would be entitled to at retirement, the latest New York Times/CBS News Poll shows.

An somewhat larger group, 57 percent, believes that the Government retirement fund will not have enough money available in the future to meet all its overall obligations.

This lack of confidence in Social Security also showed up, although to a lesser degree, among those who are already retired and receiving benefits. Of this group, 37 percent believe the system will not have enough money to cover its obligations generally and 26 percent believe their own benefits will not continue because of a fund shortage.

CONFLICT BETWEEN GENERATIONS

The figures from the quarterly poll, which was conducted in late June, lend some support to predictions of conflict between working and retired generations over the cost of Social Security. In the youngest group polled, those 18 to 29 years old, there was the greatest fear for the solvency of the system, with 70 percent saying they believed the system would probably fail; the older a respondent was, the more likely he was to have the faith in receiving benefits.

Experts in both Congress and the Administration agree that a lack of faith in the future of Social Security is widespread and that this situation tends to support President Reagan's campaign for a long-range multibillion-dollar reform of the retirement system.

The poll's picture of disillusion has been matched in recent reports by members of Congress on their constituents' views. Earlier this week, Senator Harrison Schmitt, Republican of New Mexico, said flatly that, in the eyes of younger voters, the present system "will not serve the needs of the country" into the next century.

Senator Steven D. Symms, Republican of Idaho, compared contributing to Social Se-

curity now to signing and circulating a chain letter. "If you live long enough to get your name at the top of the letter," he said, "you might get something out of it."

A NEW ISSUE IN POLLING

Opinion analysis have measured confidence in the Social Security system only in recent years. The questions in the Times/CBS Poll have not been asked before in the same form, so measuring the decline in faith against previous years is difficult.

Late in 1979, however, Peter D. Hart Research Associates obtained these results from asking how much confidence respondents had that Social Security would provide future benefits: complete confidence, 18 percent; a great deal of confidence, 24 percent; only a little, 31 percent, and none, 17 percent.

In August of 1978, Louis Harris and Associates found that 87 percent of those who were than employed expected to receive Social Security benefits when they retired. But when the pollsters asked how much confidence respondent had that further generations would be willing to pay higher Social Security taxes, the survey found only 12 percent with a great deal of confidence, 41 percent with some and 41 percent with hardly any.

REACTION TO MAJOR PROPOSALS

The Times/CBS Poll showed this reaction to some of the major Social Security proposals:

On the issue of changing the retirement age from 65 to 68 effective 20 years from now, 50 percent favored the move and 42 percent were opposed.

President Reagan's proposal that benefits be reduced for those who choose to retire at 62 was supported by 40 percent and opposed by 55 percent. Some analysts termed this support impressive, considering the widespread protests provoked by the Reagan program.

An even 50 percent of those questioned thought the present cost-of-living adjustment for Social Security benefits, geared to the Consumer Price Index, was "about right." Sixteen percent found it too high and 23 percent too low. The latest yearly adjustment, effective July 1, raised benefits 11.2 percent.

The Times/CBS Poll indicates that if some economy become necessary to preserve Social Security, more people would rather reduce benefits (46 percent). As President Reagan has proposed, than increase the payroll tax that supports the system (26 percent).

However, if a tax increase became "necessary to keep the Social Security system going," 66 percent said they would favor such action and 27 percent opposed it.

Commissioner John Svahn of the Social Security Administration said today that he agreed with these poll findings. He blamed that situation on "the institutions of Government, people in both the executive and legislative branch who have known what's going on but have ducked the issue."

Daniel Patrick Moynihan of New York, the ranking Democrat one the Senate's Social Security subcommittee, agreed that the public has lost confidence, saying he received a "very skeptical response" from constituents to his argument that the financial "crisis" had been exaggerated.

"It's almost impossible to get people to follow you," Senator Moynihan said. "When you talk about a 75-year projection and problems in the second quarter of the next century, their eyes begin to glaze over."

HOW THE POLL WAS CONDUCTED

The latest New York Times/CBS News Poll is based on telephone interviews conducted June 28-July 1 with 1,467 adults around the United States.

The sample of telephone exchanges called was selected by a computer from a complete list of exchanges in the country. The exchanges were chosen to insure that each region was represented in proportion to its population. For each exchange, the telephone numbers were formed by random digits, thus permitting access to both listed and unlisted residential numbers.

The results have been weighted to take account of household size and to adjust for variations in the sample relating to region, race, sex, age and education.

In theory, it can be said that in 95 cases out of 100 the results based on the entire sample differ by no more than 3 percentage points in either direction from what would have been obtained by interviewing all adult Americans. The error for smaller subgroups is larger, depending on the number of sample cases in the subgroup.

The theoretical errors do not take into account a margin of additional error resulting from the various practical difficulties in taking any survey of public opinion.

Assisting The Times in its 1981 survey coverage is Dr. Michael R. Kasay of Princeton University.

SOCIAL SECURITY: THE COMING CRASH

(Peter G. Peterson)

Social Security's troubles are fundamental. Its financial problems are not minor and temporary, as most politicians, at least in election years, feel compelled to insist. Unless the system is reorganized, these problems will become overwhelming. To put the matter bluntly, Social Security is heading for a crash. We cannot permit this to happen, because it would put the nation itself in very serious jeopardy. Though in effect for only two generations, Social Security has become the defining link between citizen and state in modern America. It has such uniform and reverential support that if the system crashes, so almost certainly will civic harmony and the economy itself. The prospects for Social Security and for general prosperity are now inseparable.

The Social Security system has become a high-risk gamble on economic progress and population growth—a bet by today's workers that their children and grandchildren will be rich and numerous enough to foot the bill for another round of generous retirement benefits. Should this hope go even mildly awry, today's workers will retire into a Social Security system running deficits larger than the total benefits it pays out today.

Meanwhile the system—which spent over $190 billion in fiscal 1982—has already grown so colossal as to shape the entire future of the economy. Social Security spending has moved from 1 percent of the entire federal budget in 1950 to 26 percent today. By far the biggest government social program in world history, the system now spends each year more than the combined net investment in plant, equipment, research, and development of all the private companies in the United States.

During the past few years, we have witnessed a revolt against both the burden of rising federal taxes and the binge of spending which has made those taxes necessary. In many ways, Social Security is the prime mover of both. A little-known, but important, fact is that between 1955 and 1980 Social Security taxes more than accounted for the increase in federal revenues as a percent of GNP. The growth in Social Security outlays is responsible for almost all of the increase in federal outlays as a percent of GNP. Thus, were it not for the growth of Social Security, federal revenues as a percent of GNP would have declined and federal outlays would have remained virtually unchanged.[1]

There is of course more to the Social Security puzzle than economics. It raises questions of ethics as well. Is a "contract" between generations fair when it gives today's older people a vastly higher return on their contributed taxes than their children and grandchildren can possibly hope to receive? Is a welfare program that gives almost 30 percent of its tax-free benefits to the 20 percent of the elderly population with highest incomes what we want? (Incidentally, that 20 percent of the elderly population has a family income of $30,000 per year or more, and those over sixty-five who are married to nonworking spouses can expect to receive tax-free benefits that will total about fifty times their lifetime payroll tax contributions.)

Still, if Social Security's financial problems cause the entire economy to fall into perpetual stagnation, robbing our children and grandchildren during their working and retirement years of their rudimentary economic security and indeed of even their Social Security, such ethical dilemmas of the Social Security system will become irrelevant. One of the highest moral obligations facing us is to give our offspring a decent chance at prosperity. If we fail there, the Social Security system itself, and much else, will disappear.

The U.S. economy is suffering from a progressive disease—a spreading paralysis of those activities that raise the standard of living. I am not referring to the current recession. In discussing Social Security and our economy, we must learn to think of decades and generations. Americans, ever impatient, are inclined to mistake short-term cycles for long-term trends. But the economy's worst problem is not in fact today's high unemployment or yesterday's soaring inflation. Rather, it is described in the following comparison:

ANNUAL PRODUCTIVITY GROWTH RATE[2]

1948-1967, 2.5 percent.
1967-1973, 1.6 percent.
1973-1981, 0.1 percent.

As these figures show, America's machinery for creating national wealth is slowing down. The ability of our workers to produce more each year is becoming weaker each year. This slump in the growth of productivity now has little visible effect on daily life. But the cumulative impact will be enormous. Consider the year 2020, when those who are now infants will be at their working prime. If productivity stays roughly the same—if the trend of recent years continues (but does not get worse)—the average worker in 2020 will produce $22,800 in goods and services, just about what he does today.[3] The country, for the first time in its

---

[1] Between 1955 and 1980, federal outlays rose from 18.0 to 22.4 percent of GNP while Social Security outlays grew from 1.2 to 5.3 percent of GNP. Social Security payroll taxes rose from 1.3 to 5.4 percent of GNP, more than accounting for the increase in federal revenues from 17.2 to 20.1 percent of GNP.

[2] "Productivity" refers to real domestic income per employed person.

[3] All sums are computed in constant 1980 dollars.

history, will have stood still for a span of forty years. (By contrast, the last forty years have seen real income produced per worker rise from $10,000 to $22,000, or about 120 percent.)

If, on the other hand, productivity were now to start growing again at the 2.5 percent rate which prevailed from 1948 to 1967, the average worker in 2020 would produce $57,700 in goods and services, an increase of about 160 percent. In that case, our grandchildren would look back on us as relative paupers, and would by 2020 be enjoying a buoyant prosperity and widening social opportunites in a nation that was a strong force in the world's economic and political affairs. But we are instead on a course leading to unprecedented stagnation, almost certain social strife, and steadily diminishing international influence.

Why are we heading toward the wrong future? Many managerial and cultural factors are responsible, and their relative importance remains a matter of dispute. But one factor seems prominent in virtually every study that has been made: the productivity of U.S. workers is stagnating largely because they are not being provided with an adequate flow of both new tools—modern plant and equipment, innovative techniques, improved methods of production—and new products.

New tools and ideas are provided by investment—by adding to the stock of capital, physical and intellectual, that will generate income in the future. We have been underinvesting in the future. A comparison with Japan during the Seventies is instructive, and sobering:

Japan invested nearly three times as much in new corporate plant and equipment (9.8 percent of GDP vs. 3.4 percent in the U.S.).[4]

Japan invested over seven times as much in public "infrastructure" such as roads and waterways (5.0 percent vs. 0.7 percent).

Japan invested 20 percent more in civilian research and development, exclusive of R & D for space and defense (1.9 percent vs. 1.6 percent).

The differences between Japanese investment in scientific education for the young and that of the U.S. are huge, if not as precisely measurable.

Instead of investing adequately in such productive activities, we have, to a dangerous extent, been creating huge debts for other purposes, notably private consumption, and particularly Social Security and public pensions. The true levels of national debt are different from what most people assume; the public believes that the federal debt consists of the loudly announced sum of $1 trillion. In fact, the Social Security system has an "unfunded" liability (i.e., the amount by which expected benefits to current participants exceed their scheduled future taxes) of over $6 trillion. The unfunded liabilities of the federal and military pension system approach another trillion dollars. Nothing could be more salutary for the prospects of long-term productive investment and indeed the global financial system than the news that these grotesquely large obligations to pay public retirement benefits were being reduced and brought under control.

Investment requires savings. One reason we are investing too little is that we are using up every year, in current and often imaginative consumption, far too much of the income we are producing. The national pool of savings available for investment is shallow. This is because the flow of personal and business savings into the pool has been inadequate and the federal government's burgeoning deficits have become an enormous drain on the pool. Compared to those of all other industrial countries savings from individuals and families in the U.S. have been a mere trickle. Between 1970 and 1979, for instance, the household sector of the economy saved on average only five cents of each dollar earned. The comparable figure for Japan was about fifteen cents of each dollar earned.

The chief explanation for this difference is very straightforward. The Japanese have consciously designed their entire system of economic incentives to reward savings and investment. We have largely rewarded borrowing and consumption. For example, no other major industrial country permits unlimited tax deductions for interest. In Japan, moreover, personal income derived from capital—i.e., from savings—is taxed either lightly or not at all. In the U.S., such "unearned income" suffered especially high taxes until recently, and still enjoys relatively small tax incentives.

In Japan, buying houses and durable consumer goods on credit is difficult and requires big down payments. In America, the tax laws and the banking system are heavily skewed toward financed consumption—i.e., toward keeping savings at the lowest possible level.

Pensions in Japan—both public and private—are meager, forcing workers to save for their retirement. Social Security in America now seeks to provide every eligible retired person, regardless of need, with a stipend sufficient to cover all or at least most of the basic necessities of life. The need to save is accordingly weakened. As for American corporations, while their flow of savings (so-called "retained earnings") has traditionally been considerable, a sustained binge of corporate borrowing has been dangerously eroding that tradition.[5]

We have thus become a nation of spendthrifts and Japan a nation of savers. But it is an illusion to think that we could quickly or simply change our laws, institutions, habits, and culture so that they will more closely resemble those of Japan. The recent changes in the tax structure to encourage more saving by households and businesses will prove helpful, but further changes in the tax system, though necessary, will require a long and hard effort, and the amount of additional savings they might provide remains uncertain.

Of necessity, we must turn to a surer and more direct strategy for enlarging the pool of savings available for investment: namely to stop the government from draining the savings pool. The government finances its deficits by using up—literally extinguishing—the savings generated by the country's citizens and corporations. This government "dissaving" has taken on new and frightening dimensions over the last several years, and the problem is getting worse.

The recent rhetoric about the evils of deficit spending and the debate over the balanced-budget amendment have partly hidden a distressing reality. The U.S. now faces federal deficits so large, so long-term, and so unprecedented that if or when an economic recovery occurs our shallow pool of savings would be substantially depleted. There would be little left to sustain the indispensable levels of investment we need to restore economic growth and international competitiveness.

In view of widely publicized efforts of the Reagan administration to reduce spending, this may seem surprising. In April 1981, the president stated his aim of reducing both spending and taxes to a bit over 19 percent of the Gross National Product by 1985—admirable goals, but only if they are achieved together. Regrettably, the goals have been pursued separately. Tax revenues have indeed been reduced to 19.1 percent of the GNP by the biggest, and I fear, gaudiest tax cut in history. But spending, meanwhile, is now projected to rise dramatically from 22.4 percent of the GNP in 1980 to an intolerable 24.6 percent of the GNP in 1985 unless something is done.[6] This would amount to a rise from $577 billion to $967 billion, the latter figure being $123 billion above the president's 1985 spending target.

The explanation for this increase is hardly surprising, as the table on this page makes clear. The unprecedented rise in military spending amounts to more than $150 billion. Increases in "non-need-related entitlements"—that is, those, such as Social Security and federal pensions, in which the income of recipients is not a significant factor in their payments—are rising at a rate much faster than tax revenues.

As the table also shows, federal grants to state and local governments and federal operations have actually been cut back. The budget cuts in 1981 and 1982 have reduced projected spending on "need-based" programs nearly twice as much as in the much larger non-need-related programs, which go mainly to middle- and upper-income groups. A lopsided example: projected food-stamp outlays for 1983 were cut by about 20 percent in the 1981 and 1982 Reconciliation Acts, while projected federal employee retirement benefits were reduced by less than 3 percent.

These facts are gradually being recognized. There is a growing if muted agreement in Congress that the projected budgets for defense and for Social Security and federal pensions should not be immune to cuts. But by how much must these deficits be reduced? We have first to define the largest deficit that would be consistent with the minimum net investment needs of the economy. Suppose we wish to have sufficient net savings available to match the rate of private investment—"capital formation"—that prevailed during the 1960's. That would, in my view, be a modest goal. But to achieve it, the deficit must, according to careful estimates,[7] be reduced to less than 1.5 percent

[4] GDP (Gross Domestic Product) differs from GNP only by attributing all production to the country where it is located (i.e., ignoring international income flows). All investment is measured net of depreciation.

[5] Some facts on debt-heavy corporate balance sheets are set forth with admirable clarity in an article by Felix Rohatyn in *"The New York Review of Books,"* November 4, 1982.

[6] The projected budget figures are based on the analysis in "The First Concurrent Resolution and the Budget Outlook," by James Capra, in the *Quarterly Review* of the Federal Reserve Bank of New York, Summer 1982. Some adjustments to reflect congressional action since the publication of the Capra article have been included in the budget estimates.

[7] Assume that the savings incentives in last year's tax bill make it possible for gross private savings (personal, business, and state and local pension fund savings) to rise to 19.3 percent of GNP. Depreciation, or capital consumption allowances, could be expected to absorb 10.5 percent. Assume state and local deficits and net foreign investments have offsetting effects. Thus 8.8 percent is left for financing the federal deficit, residential construction, and

of the GNP if sufficient capital is to be freed for investment. Such a deficit would be about 4 percent of GNP lower than the current projection of the deficit for 1985 and would amount to a reduction of the 1985 deficit by about $160 billion. That would mean cutting 16 percent from total projected government spending in 1985.

A reduction so huge may sound politically impossible. But a deficit of about $220 billion, which is now projected for 1985 if current policies continue unchanged, is simply unworkable. First, it would be more than three times the largest deficit we had before 1982 ($66 billion) and would equal a record 5.5 percent of GNP. Second, deficits would be rising steadily over the next three years. The projected deficits are "structural"—not the result of recession. They would occur at the same time that the economy is supposedly growing at 3 to 4 percent per year. Rising deficits during a prolonged economic recovery are without precedent in this country. (Of course, the financial imbalances that would result from such large deficits call into question whether the economy would in fact sustain 3 to 4 percent growth for the next few years. If the economy is instead flat, the deficits would be much larger.)

Thus we have created a fiscal Frankenstein monster. If and when a strong recovery occurs, that monster would be aroused to devour immense amounts of available savings. One can question whether a normal cyclical recovery from the current recession can occur in the face of this monster. What clearly cannot occur is the necessary revival of investment everyone concedes we need.

Simple arithmetic alone makes it obvious that only a few parts of the budget are, by themselves, large enough to yield the kinds of savings that will be required. I would also hope that a sense of simple equity would not lead us to put the "need-related" programs for the poor under the axe once again. Most federal operations are also unlikely targets: minimum levels of law enforcement, Treasury operations, and government statistical reporting are necessary if the government is to be run efficiently. Further reductions in agricultural subsidies, such as dairy price supports and tobacco and sugar subsidies, may well be desirable. But the amounts involved in these programs, totaling $2 billion, are small relative to the size of the problem. Cuts in grants to state and local governments could result in more decay of our public infrastructure—highways, mass transit, and the dredging of rivers and harbors, to name only a few possible casualties.

What is clear is that, along with net interest payments on government borrowing, defense (28 percent) and non-need-related benefits (39 percent) represent about 80 percent of the total budget. Social Security alone accounts for 26 percent. Most of the deficit reduction should come from these three expenditures.

Before we examine how this can be done, it is useful to look briefly at the question of tax increases. Raising taxes is clearly one way to lower projected deficits—but most emphatically, in my view, not the preferable way. Moreover, tax changes would need to be carefully drafted or they would be self-defeating. It would be irrational to propose the kinds of tax increases that directly or indirectly discourage the very investment that we are trying to promote to this grueling fiscal exercise. Thus consumption taxes in general and energy consumption taxes in particular, e.g., on gasoline, would head my list of any tax increases that might be required.

The case for significant cuts in the defense budget goes well beyond the question of whether we really can spend wisely such unprecedented real increases—nearly 9 percent yearly in overall spending between 1980 and 1985 and over 14 percent yearly for military hardware. Furthermore, the decline in the inflation rate means that we should be able to buy more with the dollars appropriated for defense than was thought possible when the original plan for the buildup was put together in early 1981.

My own negotiating experience with the Soviet Union taught me that they will be far more impressed with a sustained approach to building defenses than by what they will perceive as an approach alternating between feast and famine. The Soviet Union, in any case, can plausibly assume that neither our economy nor our politics can sustain the vast increases now planned—particularly at a time when big cuts are being made in our politically most sensitive programs and when our economy is weak. Indeed it will be politically impossible to obtain cuts in the even larger Social Security and federal pension programs unless defense cuts are a significant part of a balanced "package" to reduce the budget.

But however clear one may feel the rate for reduced military spending, the recent bipartisan budget effort of five former secretaries of the treasury and myself persuades me that it is unlikely that cuts much larger than $25 billion in 1985 can actually be achieved.

This brings us to our central concern—the non-need-related programs of which Social Security is by far the largest. Some experts have testified that the financial deficits facing Social Security during the next few years—$30 billion by 1985—may be only a temporary hurdle. Higher payroll tax rates for Social Security, they point out, have already been legislated for 1985 and 1990; these, along with the rising volume of wage payments to today's baby-boom generation, may push these funds into the black by the late 1980s and 1990s. Only after the boom generation begins to retire, and that's not until 2020 or so, can we be certain that the bottom will fall out of the Social Security system. Why worry today about what you may be able to put off until tomorrow?

The problem with such complacency is that Social Security funds may not be sufficient to meet the system's obligations. Each year the Social Security trustees publish three or four projections of the system's future income and outlays, the so-called "optimistic," "intermediate," and "pessimistic" scenarios. For the period before the year 2000 the variations between these projections depend primarily on assumptions regarding real economic growth. According to the "optimistic" estimate, the Social Security retirement and disability funds will be solvent by the late 1980s and thereafter. But this "optimism" (based in part on the administration's near and medium-term forecasts) assumes an unbelievable rate of sustained growth in productivity—about 3.1 percent to 3.3 percent per year from 1985 to 2005. This far surpasses any comparable period in U.S. history, even the boom years of the 1960s. The "pessimistic" scenario, on the other hand, will plunge our trust funds into deficits from which they will never recover—not in the 1980s, 1990s, or ever. The annual deficit of these two funds would exceed $100 billion by 2005; after which it would explode. And even this pessimistic estimate assumes that productivity will grow at a rate of 1.9 percent—a rate significantly higher than the 1.2 percent rate during the stagnant decade of the 1970s.

These calculations, moreover, consider only the retirement and disability trust funds. They exclude Hospital Insurance (HI, or "Part A" Medicare), the third and most rapidly growing component of the Social Security system. According to even the most favorable projections, HI will dive into the red permanently within the next two or three years. From 1990 on, HI's yearly deficit will deepen rapidly, perhaps drawing on and draining the other trust funds, should they still be solvent. If we add the problems of HI to the calculation, only the most "optimistic" projection can hope to keep Social Security in the black until the year 2000. The "pessimistic" projection—which is in fact plausible—yields a deficit projection for all three funds of a staggering $371 billion in the year 2000.

All of this may seem perplexing. Even though the members of the huge babyboom generation are still entering the labor force or are now moving to the crest of their earning potential, our economy still cannot hope to perform well enough even to keep payroll taxes (at higher rates) on a par with retirement benefits. And it is too late to hope for population growth to do the trick. The "baby bust" that followed the postwar baby boom has ensured that we cannot expect enough growth in the taxpaying labor force to sustain the system during the next twenty years.

Why is this so? The explanation lies in the rapid and relentless growth of benefit outlays. First, Congress raised the initial benefit levels for newly retired persons (as a share of preretirement income) by nearly 50 percent during the past fifteen years. As more workers continue to retire, the aggregate cost of the system must continue to mount as well. Second, Congress has indexed all benefits currently being paid to the overly bouyant Consumer Price Index—whose yearly increases routinely exceed the yearly real-wage increases of tax-paying workers. Third, Hospital Insurance costs are climbing wildly because of the hyperinflation of health-care prices. Fourth, elderly people are living longer. Average life expectancy at age sixty-five is today one third longer than it was when Social Security was first enacted (16.6 years as against 12.3 years) and it is still rising. Finally, and perhaps inevitably, the elderly are leaving the labor force and cashing in on Social Security in greater numbers as they do so. In 1950, 46 percent of all elderly men were part of the labor force; by 1980, this percentage had dropped to 19 percent.

Therefore even if we look ahead only ten years or so, the financial integrity of Social Security is in grave doubt. In fact, it's going broke right away—contrary to all the projections of just a few years ago—and it is facing multibillion-dollar deficits. Whether the system can pull itself into solvency by 1990 depends on a race between more workers and economic growth on the one hand, and climbing benefit costs on the other.

By 2030 or 2050, the situation will surely get worse—much worse. Shortly after the beginning of the next century, the members of the baby-boom generation will begin to

---

investment in plant, equipment and structures. If the federal government deficit were cut to 1.5 percent of GNP, the residual left for net new business investment and housing would be slightly large (0.3 percentage points) than the average for the 1960's.

retire, and all the demographic variables that once helped revenues will then come crashing down on the side of costs. Whereas the size of our work force will likely remain virtually stationary at about 140 million (or even decline) after the year 2000, the number of beneficiaries will rise from 43 to 48 million in 2000 to as many as 96 million by the year 2050. By the year 2030, the proportion of elderly in the entire U.S. population will match the current proportion of the elderly in Florida. Today, there are about thirty Social Security beneficiaries for every hundred taxpaying workers. By the year 2050, there may be as many as eighty.

Even the most "optimistic" long-run projection indicates Social Security deficits by the year 2025, a projection that assumes never-ending economic prosperity, a surge in the number of future new workers, and stagnant future life expectancies. The "pessimistic" long-run projection shows that the entire system, already sinking into deficit by the beginning of the century, will simply disappear from sight in a pool of red ink. By 2035, it predicts that the retirement and disability funds alone will need an 11.5 percentage-point boost in the tax rate—consuming 23.9 percent of the taxable payroll—just to break even. Including Hospital Insurance, the system will need to absorb fully 44 percent of each worker's taxable payroll just to break even. Without any tax increases, the annual deficit would be $16.3 trillion, or 10 percent of GNP. By the year 2050, the entire system will need to absorb over one half of each worker's taxable payroll—again, just to break even. If the size of the federal budget remains unchanged as a share of GNP, Social Security in 2050 will comprise over 70 percent of all federal spending.

As we consider long-term possibilities, much depends on demographic trends, which are notoriously hard to predict. Continued low fertility rates among women may achieve zero population growth in the U.S. by early next century (and therefore further reduce the number of taxable wage earners), or they may not. Dramatic advances in biogenetics and in nutrition may continue to extend life expectancies (and therefore increase the costs of the system) or they may not. Again, the long-run "pessimistic" projection is, in fact, a plausible one and could even turn out to underestimate the future crisis. It simply assumes that women will continue to have not many more children than they are having now and that life expectancies will continue to improve along the trend of the last decade or two. The long-term outlook is grim according to the best projections. According to the worst, it is truly dire.

The only alternative to reorganizing Social Security is to sit by while the system collapses, either through an ugly revolt of young taxpaying workers against their elders or through a catastrophic flood of deficits. Maintaining the status quo—which many politicians from both parties have pledged to do—is literally impossible, an utter fantasy. Necessity is a respectable motive for reform. But even if Social Security were able to survive indefinitely, the time would be ripe to re-examine its premises.

The system was the product of the Great Depression years when we feared that pervasive unemployment would be a permanent feature of the economy and that government accordingly had a duty to shrink the labor force by encouraging early retirement. In spite of today's recession, the prospect in the late 1980s and the 1990s is for slowing growth in the labor force and tightening labor markets. As the economy recovers, the nation will find itself needing the working skills and experience of older people.

During the Depression, welfare programs were few and skimpy; social insecurity was a fact of life for millions. In the two generations since, a great many programs have been set up for the poor, the disabled, the unemployed, the sick, and the homeless, of all ages.

During the Depression, the elderly population was 5.5 percent of the total population. In 1980, it was 11.2 percent and growing.

During the 1930s the average sixty-five-year-old had only twelve more years to live, and the retirement benefits seemed both appropriate and compassionate. As we have seen, today's sixty-five-year-old is comparatively young and has an average of 16.6 more years to live. Every study I know of indicates that for most elderly people, during most of these years, continued, active employment is the best insurance against illness and senility.

During the Depression, privately financed pension plans were a novelty, available to very few workers. Today, about half of the work force is covered by some form of private pension, with about 750 billion dollars already set aside.

Finally, the Depression made plausible the new Keynesian theory that government could restore prosperity by discouraging "excess" savings and promoting consumption. Today, we face an economy starved for savings, and capable of vast excesses of consumption. In addition, during the 1930s we did not have the variety of institutions and programs (such as pension plans) that are now engaged in collecting and recycling savings. Today not only can we collect savings more efficiently but, in addition, they are recycled instantaneously.

The basic idea of Social Security—providing pensions for the elderly from taxes assessed on the earnings of their children and grandchildren—answered directly to the peculiar needs of the 1930s. If we were starting fresh today, a different system would deserve serious consideration—one in which each generation of workers, individually and through public taxes and funds, saved amounts that were adequate to support its own needs during retirement. But now the important question is how to rescue what is good in the original conception of Social Security from the foolish optimism of the last decade [*] and from the perverse distortions introduced into the system during the past forty years.

We are constantly told that reforms would violate elementary precepts of common fairness and social justices. Supposedly, such reforms would amount to legalized theft from today's beneficiaries, would unfairly violate a solemn compact between generations, or would strike a cruel blow at the poor. In the next issue, I will deal with these arguments, which are based on fictions, and will suggest concrete reforms to answer the real questions of fairness raised by the Social Security system. A sounder system that will also allow for future prosperity is consistent with a fairer system that does not rob the son to pay the father, or the private worker to pay the government worker, or the poor to pay the rich. Social Security, one of the principal legacies of the New Deal, must be rescued and transformed during the next few years. Otherwise it will visit upon our children the same conditions of economic chaos that attended the system's birth.

[*] President Carter, in 1978, in signing the Social Security tax legislation, said, ". . . from 1980 to 2030 the Social Security system will be sound.

SOCIAL SECURITY—THE NEED FOR ACTION!

(By Robert A. Beck)

This booklet is based on an address by Robert A. Beck, chairman and chief executive officer of the Prudential Insurance Company of America, to the Economic Club of Detroit on March 22, 1982. Since then, he has spoken to many other groups about the Social Security system and the reforms needed to keep it financially sound.

Last December Mr. Beck was appointed by President Reagan to the National Commission on Social Security Reform. The Commission was established by the President and Congress to try to develop recommendations for reforming Social Security that both major political parties will support.

Mr. Beck is chairman of the Business Roundtable's Social Security and Pension Planning Task Force. The Business Roundtable is an organization of nearly 200 chief executive officers of major corporations.

SOCIAL SECURITY—IS IT HERE TO STAY?

There are 36 million people receiving Social Security benefits today. Most of those people depend on these benefits as basic income.

I think everybody recognizes how important the program is. There isn't any question at all—Social Security is here to stay.

Both of our major political parties support the program. Neither the Democrats nor the Republicans in Congress want to see the system fail. But neither party is doing very much right now to put Social Security on a sounder footing.

You'll see why as we go along.

Social Security: Problems are real; Solutions are available; Consequences are not severe; Legislative action needed.

Some politicians say we don't have any real problems with the Social Security system. That's just not true.

The problems are very real. But there are also solutions. And the solutions are not nearly as painful as many people imagine.

We need legislative action to correct the problems, and that will require both political parties to work together. If Social Security becomes a political football—as it did last year—nothing will be enacted, and the problems will get much worse.

Getting our lawmakers to take the actions that are needed is difficult because there's so much misunderstanding about Social Security.

To illustrate what I mean, let me test your knowledge with a few basic questions.

Within what time period will current retirees receive benefits equal to their total contributions?

1. 1½ years
2. 3 years
3. 6 years
4. 10 years

Let's assume we're talking about people who retire at 65, who paid the maximum Social Security taxes right along, and who have no spouses.

The correct answer is 1½ years. And that's the longest repayment period.

Most people think they've paid for the benefits they receive from Social Security. They believe they're just getting back money they put into the program. But they're mistaken.

The average wage earner, with a spouse who doesn't work outside the home, gets back all his contributions within just 11 months after he retires. And since either the husband or wife is likely to live for another 25 years, they can expect to receive Social Security benefits for that long.

In 1950, 16.5 workers supported each Social Security beneficiary. How many workers now support each beneficiary?

1. 15
2. 10
3. 5
5. 3

The last answer is correct. Actually, the number of workers who support each beneficiary today is 3.2

When the program was started, the number of people receiving benefits was relatively small. But we have a lot more older people nowadays. They're becoming a bigger and bigger portion of our population.

When the "baby boom" generation retires, there will only be two workers to pay the benefits of each beneficiary—or even fewer if the birth rate doesn't increase.

During the past three years, average wages increased by 30 percent. During this period, by what percentage did Social Security benefits increase?

1. 10 percent
2. 20 percent
3. 30 percent
4. 40 percent

The correct answer is No. 4. Social Security benefits, which are tax-free, increased by 40 percent during the past three years.

So the question really is this: Should the benefits for people on Social Security go up faster than the wages of those who are paying for the benefits?

If the increase in Social Security benefits has been held to the level of wage increases, the cost of the program this year would be $11 billion less.

In 1940, the life expectancy of a person age 65 was 12.8 years. How many years can a person who is age 65 today expect to live?

1. 10 or less.
2. 12.
3. 14.
4. 16 or more.

The last answer is correct. Today, someone who is 65 can expect to live 16.6 more years.

Life expectancy is increasing, and the rate at which it is increasing has accelerated. In the future, people will no doubt live even longer.

That may be great news, but it's creating a tremendous financial strain on the Social Security system, which must pay benefits for so many years.

The increase in longevity shown above added about $30 billion to the cost of Social Security last year.

In 1981, Social Security payments represented what percentage of the national budget?

1. 10 percent or less.
2. 15 percent.
3. 20 percent.
4. 25 percent or more.

The correct answer is 25 percent or more.

Last year Social Security benefits cost $184 billion. This year the cost will exceed $200 billion. That's more than one-quarter of all federal spending—more than we spend on defense. In 1950—just to show you how much the cost has grown—Social Security accounted for only 1 percent of all federal spending.

The cost of Social Security has gone up so dramatically because many more people are receiving benefits, more benefits are being provided, and the level of benefits is indexed to keep up with inflation. When the Consumer Price Index rises, so do Social Security benefits.

FOUR MAJOR PROBLEMS

Just from the sheer magnitude of the benefits being paid, it's easy to see how important Social Security is.

Now let's take a look at where the problems are. There are four major problems, and we've got to address each of them.

Problem No. 1—Lack of public understanding; Public misinformed; Not a funded insurance program.

The first problem is that most people don't understand how the program actually works.

They've been led to believe that Social Security is a funded insurance program and, when they receive benefits, they're really just getting back money they've contributed.

But as we've seen, that's not what happens. The Social Security taxes collected from workers and their employers are paid out almost immediately to those who are receiving benefits.

Take, for example, someone who has paid the maximum amount of Social Security taxes, who has a spouse who also is 65. They receive an annual social Security retirement benefit of $14,206. The *maximum* amount that any individual paid into Social Security from the beginning of the program in 1937 through 1981 was $14,767.

That's how large Social Security benefits have become—and how quickly an individual's contribution to the program is recovered.

Problem No. 2—Lack of public confidence; Younger workers skeptical; Retirees terrified.

The second major problem is the public's lack of confidence in the Social Security system. It's at an all-time low. People see the headlines about the danger that Social Security will run out of money, and they're worried.

Three out of four persons between the ages of 25 and 44 say they have little or no confidence that the program will be able to pay them benefits when they're ready to retire.

And many older people who are already receiving benefits are terrified. They're afraid their monthly checks will be cut.

Nobody in Washington and no responsible study group has ever recommended the kinds of cutbacks that many of our older people fear. So we must remove their fears and restore their confidence in Social Security. We need the public's support to enact the kinds of changes that are necessary.

Problem No. 3—Short-term financing; Retirement fund bankrupt in 1983; Caused by adverse economic conditions.

Short-term difficulties in financing Social Security are the third major problem.

There are three Social Security trust funds. The largest of the three—the one that pays retirement benefits—is expected to run out of money by the middle of next year.

The primary reason is that retirement benefits paid out have increased more than the amount of Social Security taxes collected. As we saw earlier, benefits, indexed for inflation, went up 40 percent during the last three years while wages went up only 30 percent. That 10 percent differential costs Social Security an additional $11 billion each year.

Another short-term problem is high unemployment. That reduces the amount of money collected in Social Security taxes.

This shows how the balance in the Social Security retirement trust fund has dwindled since 1960. The balance is represented here as a percentage of annual outlays—benefits paid out—in each of the years shown. Many experts say the percentages should equal or exceed 100 percent.

Until the 1970s, the balances were adequate. But since then the program has been living beyond its means. You can see how low the balance is right now.

If the balance drops below 9 percent, there won't be enough assets to cover the checks issued each month.

Problem No. 4—Long-term financing; Caused by demographic changes; Costs double or triple current level.

If we look further ahead, financing difficulties get much worse. That's the fourth major problem area.

When the "baby boom" generation retires, there will be many more people receiving benefits—and proportionately fewer workers paying the taxes. And retired people will be living longer, too.

Unless changes are made in the Social Security program, our children and our grandchildren will face Social Security taxes that are two or three times the rate we're paying today.

Four Major Problems: Lack of public understanding; Lack of public confidence; Short-term financing problems; Long-term financing problems.

So these are the four major problems. The real question is what can we do about them?

For one thing, the public needs a better understanding of how the Social Security program really works. And people need to understand the necessity of making reforms now.

Those who are already receiving Social Security benefits are a very potent political force. Their elected representatives in Washington are very sensitive to their fears about the Social Security program.

We need to reassure people that the program isn't going to fold. We've got to bolster public confidence in the program if we're going to put it on sounder footing.

The solutions aren't that severe or difficult. We have both the time and the ability to solve the problems.

Why do we have these problems? Benefits grew faster than taxes; Program expanded substantially; Demographic trends adverse; Unfavorable economic conditions.

We've seen that Social Security's financial problems have several causes. Benefits over the last few years have grown faster than taxes. The program has been greatly expanded. And demographic trends and economic factors have compounded the problems.

Let's examine some of these causes more closely by reviewing the history of Social Security.

1935: Social Security enacted; Retirement benefits payable at age 65; Covered 60 percent of work force; Tax=1 percent of first $3,000 (until 1950).

Franklin Roosevelt would hardly recognize the Social Security program today. It has evolved way beyond what was originally envisioned or intended.

The bill that he signed in 1935 provided modest cash benefits to workers who retired after age 65. Coverage was limited to workers in industry and commerce—roughly 60 percent of the work force.

Back then, employees and their employers each paid taxes equal to 1 percent of the first $3,000 of earnings. So the maximum amount that an individual paid was only $30 a year.

That maximum didn't change until 1950.

1982: Payments total $200 billion; Program expanded substantially; Tax=6.7 percent of first $32,400; 36 million beneficiaries.

But look at Social Security today.

Total payments now exceed $200 billion a year. There has been substantial expansion in both the types and amounts of benefits paid. The program now covers 90 percent of the work force. Payroll taxes and the wages subject to taxes have soared.

The maximum tax for both the worker and the employer is now $2,171. That's an increase of more than 7,000 percent.

And 36 million people are now receiving benefits.

EXPANSION OF SOCIAL SECURITY

Social Security has been expanded again and again. In the parlance of our lawmakers, it has become a Christmas tree.

Each ball on this tree represents one of the years when there was a major expansion in the types of benefits provided, in benefit levels, or in Social Security taxes.

In the past, benefits could be added without any serious effect on current costs. In those days Social Security was not a mature program, and the costs could be deferred to future generations.

We're just now beginning to feel the effects of some of those deferred costs.

Major Changes in Social Security—1939: Spouse and survivor benefits added; 1956: Disability benefits added; 1961: Early retirement benefits added; 1965: Medicare benefits added.

These are some of the major expansions in the Social Security program.

In 1939—even before the first Social Security benefits were paid—spouse and survivor benefits were added. In 1956, disabled workers became eligible for benefits. Five years later benefits were extended to people retiring early. In 1965, Medicare benefits were established.

And there have been many other smaller but expensive additions that aren't on this list.

Significant Demographic Changes Since 1935: Post-World War II "baby boom"; Improving life expectancies; Increasing percentage of elderly citizens; Trend toward early retirement.

Demographic changes have helped the program in some ways but hurt it in others.

The post-World War II "baby boom" is helpful right now because there are more workers paying taxes into Social Security.

But other changes work against the program. People are living longer, which means benefits are paid for a longer period. Our elderly population has been growing steadily. (In 1935, 6 percent of our total population was over 65; now it's 11 percent.) And people are retiring earlier. Almost two-thirds of our work force now retire before 65.

At Prudential, for example, 87 percent of our people who retired last year were under 65.

Significant Demographic Changes Expected: Post-World War II "baby boom" retires; "Baby bust" generation pays all the bills; Continued increases in life expectancies.

What can we expect for the future?

The "baby boomers" may be helping the program now, but they're going to hurt it seriously when they retire because they're not replacing themselves. The "baby bust" generation will have to pay the bills.

Moreover, life expectancies will probably keep increasing. In the not-too-distant future, the percentage of people over 65 in the country will be greater than the percentage over 65 in the state of Florida today.

Major Myths—(False): The program is funded; Recipients have paid for their own benefits; Solutions require reductions in benefits; General revenues are a painless solution.

These are the major myths about Social Security. They exist because people don't really understand how the program works, what the problems are, or what the solutions involve.

These myths have been used to build support for the program. Social Security has been described with words like "insurance," "trust funds," "accounts" and "contributions." Older people have been led to believe that they paid for—and thus "earned"—their benefits.

The solutions to the problems of Social Security don't require reductions in present benefits. And using general tax revenues, as some people advocate, isn't a painless solution. All you have to do is listen to the debate over the current budget to realize that there aren't any general revenues available.

And increasing the federal deficit still more would only create more inflation. In the end, using general tax revenues would weaken the relationship between benefits and the way they're financed—and lead to still higher taxes.

OPTIONS AVAILABLE—INCREASE TAXES OR CONTROL BENEFITS

Legislation is required to solve Social Security's financing problems. And Congress has two choices—either to increase taxes or control the growth of benefits in the future (or a combination of both).

Let's take a look at those choices.

TAX DEMANDS ON WORKERS FROM 1949 TO 1981

The tax burden on workers has increased tremendously since 1949.

Average wages rose 470 percent, but income taxes increased 570 percent. During the same period, average Social Security taxes shot up almost 3,700 percent. And maximum Social Security taxes soared almost 6,500 percent.

Most economists feel that workers ultimately pay not only their own Social Security taxes but also, in effect, the Social Security taxes paid by their employers.

Someone earning more than $32,400 this year will be responsible—either directly or indirectly—for the transfer of more than $4,300 to people receiving Social Security benefits.

More Tax Increases? Resistance to increased taxes; Four rate increases since 1977; More rate increases scheduled; 1990—Maximum tax $4,636 (est.)

Should we increase Social Security taxes still further?

There's not much support for that. The Social Security legislation enacted in 1977 has already brought four tax increases, with more to come. There has been considerable public resistance to these increases, and they've already proved insufficient.

By 1990, the maximum tax paid by an employee is expected to be more than $4,600. The employer will pay the same amount. So, in effect, workers will be paying—directly and indirectly—more than $9,000 a year in Social Security taxes.

Control Benefits: Gradual changes can be absorbed; No decrease for present qualified beneficiaries.

The other option is to control the growth of future benefits.

We think that's the best solution. And it can be accomplished by gradual changes that will allow people time for planning.

Such changes can and should be made without reducing the benefits of people who are already receiving them or who are planning to retire soon.

SHORT-TERM SOLUTIONS

There are a number of things we can do to solve the short-term financial problems of the Social Security system.

Last year many people had hoped that transfers of money from one Social Security trust fund to another could prevent bankruptcy of the retirement fund—the least solvent of the three trust funds. But all three funds combined are now considered insufficient to permit that.

So there is general agreement that other steps are needed as well.

Limit Benefit Increases: Benefits will still increase; Fair to all; Economic safety valve.

We've got to limit increases in the level of benefits. People must be protected from inflation, but full indexing of Social Security benefits to the Consumer Price Index is overdoing it.

The Consumer Price Index overstates the rate of inflation, and tying benefit increases to it actually contributes to inflation. As we saw earlier, average wages have increased 30 percent over the last three years while Social Security benefits, tied to the Consumer Price Index, have increased 40 percent. That's unfair to workers.

We must consider alternatives such as limiting benefit increases to the average wage increases of all workers. Benefits would still increase, but they wouldn't rise faster than the taxes that pay for them. That would preserve the solvency of Social Security and act as a "safety valve" for the program.

Other Short-term Solutions: Eliminate windfall benefits; Continue retirement earnings test; Disability reform; Three-month deferral of benefit increases; Extend interfund borrowing; Complete correction of faulty indexing procedures.

There are other steps we can take to solve short-term financing problems.

Excessive or "windfall" benefits should be eliminated for public employees who retire on government pensions, then work in other jobs to qualify for Social Security as well.

We should continue the retirement earnings test because it's consistent with the purpose of Social Security—to replace income lost upon retirement. Eliminating the test, as some advocate, would mean paying benefits to many people who continue to earn substantial income.

More changes are needed in the disability program, where high benefit levels may serve as an incentive not to work.

Members of both political parties have recommended deferring cost-of-living increases in Social Security benefits for three months. That would be a small price to pay for bolstering the program's solvency and reducing people's fears and anxieties.

Borrowing between the Social Security trust funds should be extended beyond the end of this year.

And faulty indexing procedures should be corrected. Besides tying future benefit increases to the Consumer Price Index, legislation enacted in 1972 inadvertently caused benefit levels to be adjusted for inflation twice—once for wages and again for prices. That error has been largely corrected, but

benefits were still locked in at higher levels than originally intended.

LONG-TERM SOLUTIONS

What about Social Security's long-term problems? They're more serious, and the solutions require more significant changes.

As we've already seen, when the "baby boom" generation retires, tax rates to support benefits already promised will have to be two or three times what they are now. That's not the kind of legacy we want to leave to our children and grandchildren.

Our promises for future benefits must be realistic. And long-term solutions must be geared to that reality.

Gradually Increase—Retirement Age to 68: Age 62 still acceptable; Reduces deficit; Widespread support; Enact now—permit planning.

One long-term solution is to raise the normal retirement age to 68. Such a change wouldn't be put into effect immediately or all at once, but gradually—beginning sometime between 1990 and the year 2000.

This is a much more modest change than many people think. By the year 2000, people who reach age 74 are likely to have the same life expectancy as people who were 65 in 1940.

Those who want to retire at 62 could still receive reduced benefits. But they would receive 64 percent of full benefits—instead of the current 80 percent—because the amount would be based on a normal retirement age of 68.

Raising the normal retirement age would go a long way toward reducing Social Security's long-term deficit. And there's widespread support for the idea. It's recommended by every major study group, and in a recent *New York Times* poll, the public favored the idea by a margin of 5 to 4.

People who are already close to retirement age wouldn't be affected. Those who would be affected first—if we enact the change soon—would have time to adjust their personal and financial planning. Most are 45 to 50 right now.

Mandate Social Security Participation: Federal, state, municipal and non-profit employees; Protect accrued benefits; Study groups support recommendation.

We also need to require all employees to participate in Social Security.

At present, civilian employees of the federal government—including Congress and the President—aren't covered by Social Security. And participation is elective for state and local government employees and employees of non-profit organizations.

Everyone should be under the program. And there are ways to accomplish this without causing people to lose benefits they've accrued under other retirement programs.

This is another measure that virtually every study group has recommended.

Minimum First Steps: All new federal employees; Eliminate windfall benefits; Eliminate option to elect out.

Achieving universal participation in Social Security won't be easy. Many employers and employees want to remain outside the program.

To be realistic, the first steps should provide for coverage of all new federal employees, eliminate windfall benefits, and remove the option to stay out of the program. After all, those who want to remain outside of Social Security add to its financing problems.

As for windfall benefits, there are two major types—Medicare benefits and disproportionately large retirement benefits. Both need to be addressed, and there are solutions for both problems.

Expand Individual Savings and Pension Plans: Increase IRA limits; Permit tax deferral of mandatory contributions; Favorable pension legislation and regulation.

President Carter's Commission on Pension Policy was right. This country has become far too dependent on Social Security. We must reduce that dependence by encouraging individual savings and the expansion of private pension plans.

The legislation enacted last year to permit millions of additional people to open tax-deferred Individual Retirement Accounts was a big step in the right direction. Now we need to raise the limits on the contributions allowed each year. And taxes on mandatory employee contributions to qualified pension plans also should be deferred.

We should get rid of unnecessary government regulations that interfere with the development of private savings and pension programs. We applaud the Reagan Administration's efforts in this regard. Our government should encourage—not discourage—the expansion of our private pension system.

Long-term Recommendations: Gradually increase retirement age to 68; Mandate Social Security participation; Expand individual savings and pension plans.

So these are the measures I believe must be taken to solve the long-term problems of Social Security.

The long-term problems are more difficult than the short-term problems. So they require more significant changes.

But the solutions are really not that tough. It would be foolish—and unfair—to wait until the "baby boom" generation retires before we address these long-term problems. We must take action now.

A Strong Economy is Essential: Private plans and savings enhance economy; Social Security does not.

Everybody should be able to look forward to a secure retirement. But making that possible requires a strong and productive economy.

Private pension plans and individual savings are an important source of capital formation—the money that's needed to expand business operations and create jobs.

Social Security doesn't provide that capital because it is a transfer system. The money comes in and goes right out again. In fact, Social Security probably causes many people to feel it's unnecessary to save for the future.

So we must reduce our dependence on Social Security and put much more emphasis on private pension plans and individual savings.

National Commission on Social Security Reform: Report due before end of 1982; Bipartisan solutions needed.

I'm deeply honored to be a member of the National Commission on Social Security Reform that has been established by President Reagan and the Congress. Five members were appointed by the President and 10 others by the House and Senate. The Commission includes seven members of Congress.

This is a bipartisan commission, and we are trying to develop recommendations for reforms that both political parties will support. Our recommendations are due by the end of this year.

One of our primary objectives is to remove the emotionalism that surrounds Social Security so that reasonable people—working together—can reach agreement on reasonable solutions.

Now is the Time for Reason and Action: Moderate solutions are available; The public must be reassured; Contact your legislators.

Reasonable solutions are available. The consequences of these solutions are not severe. But if we fail to act now, the consequences will be *very* severe.

We must eliminate the uncertainty and anxiety that exist today and restore public confidence in the Social Security program. We must reassure our older people that the solutions do not require cutting present benefits and that future changes will be gradual.

Last year the legislative process broke down. Congress didn't hear from taxpayers. It didn't hear from the business community. We can't let that happen again.

You can play a critical role. I encourage you to let your elected representatives know how you feel.

Send This Message: Action needed; Reject general revenues; Not time for partisan politics.

I hope the points I've made here will move you to send a message to members of Congress.

Tell them: You want them to solve the problems of Social Security. You want them to solve these problems without resorting to general tax revenues that don't exist. You want them to enact the kinds of changes I have outlined here.

These changes would allow Social Security to serve its vital role not only for this generation but for the generations to come.

We need decisive and intelligent action.

The opportunity is here and the time is right!

OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE AND HOSPITAL INSURANCE PROGRAMS

ACTUARIAL COST ESTIMATES FOR OASDI AND HI AND FOR VARIOUS POSSIBLE CHANGES IN OASDI AND HISTORICAL DATA FOR OASDI AND HI

INTRODUCTION

This background book has been prepared for the meeting of the National Commission on Social Security Reform on November 11-13, 1982.

It presents actuarial cost estimates for various possible changes in the Old-Age, Survivors, and Disability Insurance program. The changes presented are intended to represent an objective selection which covers all of the major options open for resolving the short-range and long-range financing problems of the OASDI program. Quite naturally, there are many permutations and combinations of the several options—varying by effective dates, benefit percentages, normal retirement ages, etc. However, it is believed that the changes presented are reasonably representative. The effect of different proposals than these can usually be seen from the data presented here.

Also presented are a number of tables which show the past experience of the OASDI and Hospital Insurance programs and their estimated future experience. Attention is particularly directed to Tables 5 and 9, which address the short-range problem, and to Tables 6, 7, and 8, which address the long-range problem.

NOTES

(1) Increased cost is indicated by a plus (+) sign.

(2) Cost reduction is indicated by a minus (−) sign.

(3) All estimates are on the basis of calendar years.

(4) All estimates are for the OASDI Trust Funds only, unless otherwise indicated.

(5) A "0" means that the cost effect for the year is zero, while a ".0" means that it is less than $50 million.

(6) References to "long-term" mean the years 1982-2056.

(7) Long-term estimates are on the basis of the Alternative II-B assumptions of the 1982 OASDI Trustees Report.

(8) When all of the short-term cost figures are zero, no short-term cost table is presented.

SECTION A—COVERAGE

Option number and description	OASDI cost 1983-89 (billions)		Long-term cost (percent)
	II-B	III	
A-1: Cover all Federal, State and local, and nonprofit employees	−$110	−$117	−0.53
A-2: Cover all Federal and nonprofit employees	−62	−68	−.31
A-3: Cover all nonprofit employees and all new Federal employees	−19	−21	−.31
A-4: Cover all new State and local employees	−13	−14	−.24
A-5: Prohibit withdrawal from coverage by State and local governments and by nonprofit organizations by not permitting notices to be filed after 1983	+50	+53	(1)
A-6: Prohibit withdrawal from coverage by State and local governments and by nonprofit organizations by providing that any notice of termination filed after 9/30/82 is invalid	(1)	(1)	(1)
A-7: Eliminate windfall benefits for persons with pensions from noncovered employment	−¼	−¼	−.09

[1] Not available.

Note.—Long-term costs are presented as a percentage of taxable payroll, for OASDI only.

A. *Coverage*

Present law. OASDI coverage now applies to almost all types of employment. The types of employment not covered are the following: (1) employees of nonprofit organizations which have not elected such coverage (about 15% of such employees), (2) permanent civilian employees of the Federal government, and (3) employees of State and local governments which have not elected coverage (about 30% of such employees).

Options. A-1 Extend coverage to all Federal employees, State and local employees, and employees of nonprofit organizations [1], effective in 1984.[2]

COST
[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-89
II-B, OASDI	0	−14.0	−16.7	−18.0	−19.3	−20.6	−22.0	−110.5
III, OASDI	0	−14.2	−17.0	−18.7	−20.5	−22.4	−24.4	−117.2
II-B, HI	0	−1.6	−2.0	−2.3	−2.5	−2.7	−2.9	−14.2
III, HI	0	−1.6	−2.0	−2.4	−2.6	−2.8	−3.1	−14.5

25-Year Cost, OASDI: −.45% of taxable payroll.
50-Year Cost, OASDI: −.60% of taxable payroll.
Long-Term Cost, OASDI: −.53% of taxable payroll.
25-Year Cost, HI: −.25% of taxable payroll.

[1] Such organizations which have religious principles against any form of government insurance would be permitted to opt out on a permanent basis.
[2] If the effective date were later than 1984, the long-term cost effect would be about the same as shown. The short-term cost effects would be zero, of course, for years before the effective date and about the same as shown for the effective year and thereafter.

A-2 Extend coverage to all Federal employees, and all employees of nonprofit organizations [1], effective in 1984.[2]

COST
[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-89

III, OASDI	0	−8.4	−9.8	−10.7	−11.8	−12.9	−14.1	−67.6
II-B, HI	0	−.2	−.3	−.3	−.3	−.3	−.4	−1.8
III, HI	0	−.2	−.3	−.3	−.3	−.4	−.4	−1.9

25-Year Cost, OASDI: −.24% of taxable payroll.
50-Year Cost, OASDI: −.35% of taxable payroll.
Long-Term Cost, OASDI: −.31% of taxable payroll.
25-Year Cost, HI: −.02% of taxable payroll.

[1] Such organizations which have religious principles against any form of government insurance would be permitted to opt out on a permanent basis.
[2] If the effective date were later than 1984, the long-term cost effect would be about the same as shown. The short-term cost effects would be zero, of course, for years before the effective date and about the same as shown for the effective year and thereafter.

A-3 Extend coverage to all employees of nonprofit organizations [1] and all new Federal employees, effective in 1984.[2]

COST
[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-89
II-B, OASDI	0	−1.2	−2.1	−2.7	−3.4	−4.2	−5.0	−18.6
III, OASDI	0	−1.2	−2.2	−2.9	−3.7	−4.7	−5.8	−20.6
II-B, HI	0	−.2	−.3	−.3	−.3	−.3	−.4	−1.8
III, HI	0	−.2	−.3	−.3	−.3	−.4	−.4	−1.9

25-Year Cost, OASDI: −.26% of taxable payroll.
50-Year Cost, OASDI: −.36% of taxable payroll.
Long-Term Cost, OASDI: −.31% of taxable payroll.
25-Year Cost, HI: −.02% of taxable payroll.

[1] Such organizations which have religious principles against any form of government insurance would be permitted to opt out on a permanent basis.
[2] If the effective date were later than 1984, the long-term cost effect would be about the same as shown. The short-term cost effects would be zero, of course, for years before the effective date and about the same as shown for the effective year and thereafter.

A-4 Extend coverage to all new State and local employees, effective 1984.[1]

COST
[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89
II–B, OASDI	0	–.3	–1.1	–1.8	–2.6	–3.3	–4.2	–13.3
III, OASDI	0	–.3	–1.0	–1.8	–2.6	–3.5	–4.5	–13.7
II–B, HI	0	–.1	–.2	–.5	–.7	–.9	–1.1	–3.5
III, HI	0	–.1	–.2	–.5	–.7	–.9	–1.1	–3.5

25-Year Cost, OASDI: –.23% of taxable payroll.
50-Year Cost, OASDI: –.34% of taxable payroll.
Long-Term Cost, OASDI: –.24% of taxable payroll.
25-Year Cost, HI: –.23% of taxable payroll.

[1] If the effective date were later than 1984, the long-term cost effect would be about the same as shown. The short-term cost effects would be zero, of course, for years before the effective date and about the same as shown for the effective year and thereafter.

A-5 Prohibit opting out of coverage of employees of State and local governments and employees of nonprofit organizations by not permitting withdrawal notices to be filed after 1983.

COST
[In billions of dollars] [1]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89
II–B, OASDI	0	+.5	+4.0	+9.6	+11.2	+12.1	+13.1	+50.5
III, OASDI	0	+.5	+4.0	+9.8	+11.6	+12.6	+14.1	+52.6

[1] It is estimated that such a provision would result in increased costs over the short run, because the actuarial cost estimates assume that many more entries would feel constrained to withdraw at once, before they would no longer have the opportunity to do so. Long-term cost data are not available, due to the diverse effects possible.

A-6 Prohibit opting out of coverage of employees of State and local governments and employees of nonprofit organizations by providing that any notice of termination filed after September 30, 1982 is invalid.[1]

[1] Cost estimates for the savings involved are not available, because the actuarial cost estimates for the present program assume that no withdrawals will occur. Obviously, this proposal will have significant cost savings if it is enacted.

A-7 Eliminate "windfall" old-age and disability benefits for persons with pensions from noncovered employment, effective for those becoming first eligible after 1983 (in the absence of changes which would result in universal coverage being applicable).

COST
[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89

50-Year Cost, OASDI: –.03% of taxable payroll.
Long-Term Costs, OASDI: –.09% of taxable payroll.

SECTION B—COVERAGE

Option number and description	OASDI cost 1983–89 (billions) II–B	OASDI cost 1983–89 (billions) III	Long-term cost (percent)
B–1: Accelerate the 1900 OASDI tax to 1984	–$133	–$135	–0.09
B–2: Accelerate the 1985 OASDI tax to 1984	–10	–10	–.01
B–3: Accelerate the 1985 and 1986 OASDI–HI tax rate to 1984 and assign increase to OASDI	–19	–18	–.02
B–4: Increase the OASDI–HI tax rate for self-employed persons to the combined employer-employee rate	–18	–17	–.20
B–5: Reduce the 1990 OASDI tax rate from 6.2% to 6.0% for 1990–2009	0	0	+.11
B–6: Move the 19085 OASDI tax rate to 1984; for 1985–87, such rate would be mid-way between the 1985 and 1990 tax rates in present law; for 1988 and after, such rate would be the 1990 rate in present law	–86	–89	–.05
B–7: Increase the OASDI tax rate on employers and employees each by 1% in 2020	0	0	–.99
B–8: Increase the OASDI tax rate on employers and employees each by 1.25% in 2030	0	0	–.90
B–9: Remove the taxable earnings base for employers only	–41	–42	–.56
B–10: Set a limit of 25% of total compensation as to the amount of fringe benefits not subject to payroll tax. Tax-exempt fringes in excess of such limit would be subject to OASDI–HI tax on only the employer and would not be counted as creditable wages for benefit purposes	([1])	([1])	([1])
B–11: Maintain a constant OASDI tax rate on total compensation, effective 1990	0	0	–1.61
B–12: Make wages deferred under Section 401(k) (salary reduction plans) be subject to OASDI–HI tax	([1])	([1])	([1])

[1] Not available.

B. *Tax rates*

Present law. **See Table 2 for schedule of OASDI–HI tax rates under present law.**

Options. **B–1 Accelerate the 1990 OASDI tax rate to 1984.[1]**

COST
[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89
II–B	0	–25.1	–18.7	–19.7	–21.3	–23.1	–24.9	–132.8
III	0	–24.3	–18.4	–19.8	–21.8	–24.1	–26.4	–134.8

25-Year Cost: –.26% of taxable payroll.
50-Year Cost: –.13% of taxable payroll.
Long-Term Cost: –.09% of taxable payroll.

[1] In conjunction with this proposal, a portion of the OASDI–HI tax could be made deductible for income-tax purposes or a tax credit provided—the portion would be such that the reduction in personal income taxes would equal the additional OASDI–HI taxes paid by workers and employers. Thus, there would be no effect on the overall Federal budget deficit. The loss to the General Fund of the Treasury if % of the OASDI–HI tax were made deductible would be $ billion in 1983–89.

B-2 Accelerate the 1985 OASDI tax rate to 1984.

COST
[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-89
II-B	0	−9.4	−0.6	0	0	0	0	−10.0
III	0	−9.1	−.6	0	0	0	0	−9.7

25-Year Cost: −.02% of taxable payroll.
50-Year Cost: −.01% of taxable payroll.
Long-Term Cost: −.01% of taxable payroll.

B-3 Accelerate the 1985 and 1986 OASDI-HI tax rates to 1984.[1]

COST
[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-89

Long-Term Cost, OASDI:
25-Year Cost, HI:

B-11 Maintain, in effect, constant OASDI tax rate on total compensation, effective in 1990. If the "cash earnings plus taxable fringe benefits" portion of total compensation decreases, the tax rate on covered wages would increase so as to maintain a constant tax rate on total compensation.

25-Year Cost: −.28% of taxable payroll.
50-Year Cost: −.91% of taxable payroll.
Long-Term Cost: −1.61% of taxable payroll.

B-12 Make wages deferred under Section 401(k) of the Internal Revenue Code (salary reduction plans) be subject to the OASDI-HI tax.

Long-Term Cost: Cannot be estimated, because no experience data are available. However, the loss of revenues to the OASDI and HI Trust Funds, without this change, may become substantial in future years.

SECTION C—ALTERNATIVE SOURCES OF REVENUES

Option number and description	OASDI cost 1983–89 (billions)		Long-term cost
	II–B	III	
C–1: Reallocate 50 percent of HI tax rate to the OASDI Trust Funds	−$174	−$177	−1.41
C–2: Same as C–1, except that effective date is 1990	0	0	−1.30
C–3: Allow OASDI Trust Funds to borrow from General Fund whenever the combined fund ratio is below 15 percent	[2]75	[2]201	[1]
C–4: Impose a new inheritance tax earmarked for OASI Trust Fund	−22	−22	[1]
C–5: Impose a surtax on gasoline, earmarked for OASI Trust Fund	−23	−23	−.02
C–6: Impose a 5 percent surcharge on individual income tax, earmarked for OASI Trust Fund	−134	−134	−.09
C–7: Increase excise tax on alcohol and tobacco, earmarked for DI or HI Trust Funds	−14	−14	−.01
C–8: Credit OASDI Trust Funds with cost for military-service wage credits based on service before 1957	−6	−6	0
C–9: Credit OASDI Trust Funds with excess of past benefit payments over past reimbursements for military-service wage credits based on service before 1957	−1	−1	0
C–10: Pay OASDI taxes for current military-service gratuitous wage credits	−2	−2	−.01
C–11: Credit OASDI Trust Funds for OASDI checks that have gone uncashed for 1 or more years, effective in 1983	−1	−1	0
C–12: Provide that OASDI administrative expenses be paid from general revenues	−18	−19	−.15
C–13: Provide a general-revenue contribution, in a given month, equal to excess of the unemployment rate over 6 percent, times total OASDI taxes	−16	−30	[1]

[1] Not available.
[2] Amount borrowed from General Fund in period.

C. *Alternative Sources of Revenues*

Present law. **Income to the OASDI and HI Trust Funds comes from the payroll tax which is paid by employers, employees, and the self-employed. (In addition, there are certain payments to the trust funds from the General Fund of the Treasury to cover the cost of certain transitional benefits for closed groups of persons.)**

Options. C-1: **Reallocate 50% of the HI tax rates to the OASDI Trust Funds, and make up this loss to the HI Trust Fund by payments from the General Fund of the Treasury, effective in 1984.**

OASDI COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89
II–B	0	−20.4	−24.4	−28.5	−30.9	−33.5	−36.1	−173.8
III	0	−19.7	−24.1	−28.6	−31.7	−34.9	−38.3	−177.3

25-Year Cost: −1.32% of taxable payroll.
50-Year Cost: −1.39% of taxable payroll.
Long-Term Cost: −1.41% of taxable payroll.

C-2: Same as Option C-1, except effective in 1990.

25-Year Cost: —.99% of taxable payroll.
50-Year Cost: —1.22% of taxable payroll.
Long-Term Cost: —1.30% of taxable payroll.

C-3: Allow the OASDI Trust Funds to borrow from the General Fund of the Treasury whenever their combined balance (assuming interfund borrowing between them) is lower than 15% of the next year outgo, effective at the end of 1983. The amounts would be paid back to the General Fund, with interest, when the combined OASDI Trust Fund ratios reach 50%. If necessary, the OASDI tax rate would be increased to assure pay-back.

AMOUNT BORROWED FROM GENERAL FUND IN YEAR [1]

[In billion of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89
II–B	22	15	7	8	8	8	7	75
III	26	26	20	25	30	34	40	201

[1] Interest that would be accumulating on the amounts borrowed is not shown.

C-4: Impose a new inheritance tax, which would apply only if there is no surviving spouse. It would include the first $100,000 in the estate. The next $100,000 would be taxed at a 10% rate, and the third $100,000 would be taxed at a 15% rate, effective for 1985. After 1989, the thresholds for taxation would be indexed by the CPI increases. The proceeds of the tax would be earmarked for the OASDI Trust Fund.

[1] Long-term cost estimates are not available, because those made do not assume any economic cycles over the long range.

SECTION D—COST-OF-LIVING ADJUSTMENTS

Option Number and description	OASDI cost 1983–89 (billions)		Long-term cost (percent)
	II–B	III	
D–1: Delay COLA by 1 mo per yr for 3 yr	–$20	–$31	–.14
D–2: Delay the effective date for the cost-of-living adjustment for 3 mo	–23	–35	–.14
D–3: Provide for no COLA for 1983. Resume present procedure thereafter	–94	–119	–.13
D–4: Provide guaranteed COLA of 4 percent for 1983 and 1984; thereafter, the COLA would equal the annual increase in wages, minus 1½ percentage points	–100	–180	–.16
D–5: Provide guaranteed benefit increase of 4 percent or $14 (whichever is higher) for 1983 and 1984; Thereafter, the COLA would equal the annual increase in wages, minus 1½ percentage points	–96	–176	–.15
D–6: Provide COLA's equal to 75 percent of what the benefit increases would be under present law	–88	–128	–1.45
D–7: Provide COLA's equal to increase in the CPI, minus 2 percentage points	–103	–113	–2.58
D–8: Provide COLA equal to present-law increase, minus 2 percentage points for 1983 and 1984; thereafter present-law procedure would resume	–66	–72	–.07
D–9: Same as D–8 for 1983 and 1984; thereafter, COLA's would be equal to the annual increase in wages, minus 1½ percentage points	–75	–97	–.10
D–10: Provide COLA's equal to annual percentage increase in wages, minus X percentage points. The value of X could be 1, 1½ or 2	([1])	([1])	([1])
D–11: Provide COLA's based on lesser of increase in wages or prices, with a "catch-up" provision	–1	–60	–([2])
D–12: Provide COLA's based on lesser of increase in wages or prices, with no "catch-up" provision	–4	–66	–.43

[1] Various alternatives are considered (see subsequent pages for details).
[2] None.

D. *Cost-of-living adjustments for benefits in payment status*

Present law. Benefits are increased each year when the annual increase in the Consumer Price Index (CPI) is 3% or more. The amount of the benefit increase is equal to the increase in the CPI from the first quarter of one year to the first quarter of the next year. The benefit increase is effective for June, and is first reflected in the check sent in early July.

Options. D-1 Delay the cost-of-living adjustment by one month per year for 3 years, effective in 1983, so that, in 1985 and after, the benefit increase would be effective at the beginning of the fiscal year.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89

III	−3.6	−4.4	−4.8	−5.1	−5.5	−5.8	−6.1	−35.3

25-Year Cost:—.12% of taxable payroll.
50-Year Cost:—.13% of taxable payroll.
Long-Term Cost:—.14% of taxable payroll.

D-3 Provide no cost-of-living adjustment for 1983.[1] Resume present-law benefit increases in 1984.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89
II–B	−6.2	−12.9	−13.8	−14.5	−15.0	−15.4	−15.7	−93.5
III	−7.3	−15.4	−16.8	−18.1	−19.3	−20.5	−21.5	−118.9

Long-Term Cost: −13% of taxable payroll.

[1] A parallel change could be made in the indexing of the bend points in the PIA benefit formula (which is based on wage changes). This would be done so as to prevent "notch" situations from occurring as between persons first becoming eligible in the year of the revised benefit increase and those first becoming eligible in the next year. Such a change would have relatively little cost effect in the short run, but would have a significant effect over the long run.

D-4 Provide a guaranteed benefit increase of 4% for 1983 and 1984, regardless of the change in the CPI.[1] In 1985 and thereafter, the annual benefit increase would equal the annual percentage increase in wages, minus 1½ percentage points.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89
II–B	−2.9	−9.3	−14.0	−16.2	−18.1	−19.5	−20.4	−100.4
III	−4.0	−13.4	−22.1	−27.8	−32.8	−37.7	−42.3	−180.1

Long-Term Cost: −.16% of taxable payroll.

[1] A parallel change could be made in the indexing of the bend points in the PIA benefit formula (which is based on wage changes). This would be done so as to prevent "notch" situations from occurring as between persons first becoming eligible in the year of the revised benefit increase and those first becoming eligible in the next year. Such a change would have relatively little cost effect in the short run, but would have a significant effect over the long run.

D-5 Same as Option D-4, except that the benefit increase in 1983–84 would not be less than that resulting from an increase of $14 in the PIA.[1]

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89

E–5: Same as E–1, except effective date is 2020	0	0	−.36
E–6: Index "bend points" by 75 percent of increase in wages for 3 yr, beginning 1987	−¼	−¼	−.22
E–7: Change computation point for determining average indexed monthly earnings from age 62 to age 65	−3	−3	−.39
E–8: Reduce percentages in PIA benefit formula gradually over time	−2	−2	−1.1

E. *Level of Primary Benefits*

Present law. The Primary Insurance Amount, which is the benefit payable to a worker retiring at age 65 (and also to a disabled worker) is determined from a formula based on Average Indexed Monthly Earnings. This formula involves three different percentages which are applied to different levels of the AIME (as separated by the "bend points"), so as to give relatively higher benefits to lower-earnings persons than to higher-earnings persons.

Options. E-1 Increase the "bend points" in the PIA benefit formula by 75% of the increase in wages (rather than by 100% as under present law) for "X" years (until such bend points are 80% of what they would have been under 100% wage indexing), effective in 1984.

COST

F. *Retirement Age*

Present law. Unreduced retirement benefits are available to insured workers, spouses, and widows and widowers at age 65 (the "normal" retirement age). Actuarially reduced benefits are available at age 62 for insured workers and spouses and at age 60 for widows and widowers (age 50 if disabled). For insured workers who delay receipt of benefits beyond age 65, retirement benefits are increased by 3 percent for each year of delay (for persons attaining age 65 after 1981). See table at bottom of this page for actuarial benefit factors under present law and under each option as to normal retirement age.

Options. F-1 Gradually increase the "normal" retirement age to 66 in 1999, beginning the phase-in with those who attain age 62 in 1990.[1]

25-Year Cost: —.14% of taxable payroll.
50-Year Cost: —.38% of taxable payroll.
Long-Term Cost: —.52% of taxable payroll.

F-2 Gradually increase the "normal" retirement age to 66 in 2014, beginning the phase-in with those who attain age 62 in 2005.[1]

25-Year Cost: —.00% of taxable payroll.
50-Year Cost: —.23% of taxable payroll.
Long-Term Cost: —.41% of taxable payroll.

[1] Early-retirement benefits would continue to be available beginning at age 62 for insured workers and spouses and at age 60 for widows and widowers, but the actuarial benefit factors would be made smaller. The minimum age for eligibility for Medicare benefits would continue to be the "normal retirement age for OASDI benefits. Disability benefits would be available to those disabled between age 65 and the increased "normal" retirement age, under the more lenient definition now applicable at ages 60–64.

ACTUARIAL BENEFIT FACTORS

[In percent]

Normal retirement age	Worker, age 62	Spouse, age 62	Widow, age 60	Disabled widow, age 50
65	80.0	75.0	71.5	50.0
66	75.0	70.0	66.5	50.0
67	70.0	65.0	61.5	50.0
68	65.0	60.0	56.5	50.0
69	60.0	55.0	51.5	50.0

F-3 Gradually increase the "normal" retirement age to 66 in 2024, beginning the phase-in with those who attain age 62 in 2015.[1]

25-Year Cost: None.
50-Year Cost: —.12% of taxable payroll.
Long-Term Cost: —.31% of taxable payroll.

F-4 Gradually increase the "normal" retirement age to 67 in 2012, beginning the phase-in with those who attain age 62 in 2000.[1]

25-Year Cost: —.03% of taxable payroll.
50-Year Cost: —.54% of taxable payroll.
Long-Term Cost: —.86% of taxable payroll.

F-5 Gradually increase the "normal" retirement age to 67 in 2022, beginning the phase-in with those who attain age 62 in 2010.[1]

25-Year Cost: None.
50-Year Cost: —.32% of taxable payroll.
Long-Term Cost: —.69% of taxable payroll.

F-6 Gradually increase the "normal" retirement age to 67 in 2032, beginning the phase-in with those who attain age 62 in 2020.[1]

25-Year Cost: None.
50-Year Cost: —.09% of taxable payroll.
Long-Term Cost: —.48% of taxable payroll.

F-7 Gradually increase the "normal" retirement age to 68 in 2017, beginning the phase-in with those who attain age 62 in 2000.[1]

25-Year Cost: —.03% of taxable payroll.
50-Year Cost: —.72% of taxable payroll.
Long-Term Cost: —1.22% of taxable payroll.

F-8 Gradually increase the "normal" retirement age to 68 in 2027, beginning the phase-in with those who attain age 62 in 2010.[1]

25-Year Cost: None.
50-Year Cost: —.40% of taxable payroll.
Long-Term Cost: —.95% of taxable payroll.

F-9 Gradually increase the "normal" retirement age to 68 in 2037, beginning the phase-in with those who attain age 62 in 2020.[1]

25-Year Cost: None.
50-Year Cost: —.09% of taxable payroll.
Long-Term Cost: —.63% of taxable payroll.

F-10 Gradually increase the "normal" retirement age to 69 in 2022, beginning the phase-in with those who attain age 62 in 2000.[1]

25-Year Cost: —.03% of taxable payroll.
50-Year Cost: —.88% of taxable payroll.
Long-Term Cost: —1.53% of taxable payroll.

F-11 Gradually increase the "normal" retirement age to 69 in 2054, beginning the phase-in with those who attain age 62 in 2000.[1]

25-Year Cost: —.01% of taxable payroll.
50-Year Cost: —.36% of taxable payroll.
Long-Term Cost: —.96% of taxable payroll.

F-12 Gradually increase the "normal" retirement age to 66 in 2002, beginning the phase-in with those who attain age 62 in 1995. Beginning with those who attain age 62 in 2002, automatically adjust such age (on a phased-in basis) so that the ration of the retirement-life expectancy to the potential working-lifetime (from age 20 to the "normal" retirement age) remains the same over the years.

Long-Term Cost: —1.81% of taxable payroll.

SECTION G—DISABILITY BENEFITS

Option number and description	OASDI cost 1983–89 (billions)		Long-term Cost (percent)
	II–B	III	
G–1 Use medical-only definition of disability	—$11	—$12	—.06

SECTION H—PROPOSALS AFFECTING PRIMARILY WOMEN

Option number and description	OASDI cost 1983-89 (billion)		Long-term cost (percent)
	II-B	III	
H-1: Divorced and disabled widow(er)'s benefits not to be terminated upon remarriage	[1]	[1]	[1]
H-2: Provide benefits of 71.5% of deceased worker's PIA to disabled widow(er)'s claiming benefits at ages 50-59	+$1	+$1	+ .01
H-3: Provide benefits of 100% of the deceased worker's PIA to disabled widow(er)'s claiming benefits at ages 50-64	+6	+6	+ .03
H-4: Permit widow(er)'s to rescind an early-retirement decision in certain cases by counting the reduction in the widow(er)'s benefit as "repayment" of the early-retirement benefits paid	[1]	[1]	[1]
H-5: Provide indexing of earnings records for purposes of deferred survivor benefits by wages instead of by prices	[1]	[1]	+ .05
H-6: Permit a divorced spouse to receive benefits regardless of whether the insured former spouse has retired	[1]	[1]	+ .01
H-7: Change special-minimum benefit to allow credit for 10 childcare years; increase number of years countable toward the special-minimum benefit from 30 to 35 years	+15	+16	+ .14
H-8: Allow up to 3, 5, or 10 childcare drop-out years in computing the average earnings	[3]	[3]	[2]
H-9: Adopt comprehensive earnings sharing	[3]	[3]	− .06
H-10: Adopt earnings sharing at divorce, and inheritance of earnings credits	[3]	[3]	− .35
H-11: Adopt limited earnings sharing at divorce, and inheritance of earnings credits	[3]	[3]	[2]
H-12: Adopt the HHS development of the recommendations of the 1979 Advisory Council regarding earnings sharing	[3]	[3]	+ .12

[1] Less than $½ billion or less than .005% of payroll (as the case may be).
[2] The costs of each of these alternatives are shown on subsequent pages.
[3] Not available.

H. *Proposals affecting primarily women*

Widow(er)'s benefits: Present law. Benefits for widow(er)s who are divorced spouses and for disabled widow(er)s terminate when the beneficiary remarries.

Option. H-1 Do not terminate such benefits upon remarriage, effective in 1984.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-89
II-B	0	+.0	+.0	+.0	+.0	+.0	+.0	+.1
III	0	+.0	+.0	+.0	+.0	+.0	+.0	+.1

Long-Term Cost: Negligible.

Disabled widow(er)'s benefits: Present law. Reduced benefits for widow(er)s without dependent children are available at ages 60-64 (71½% of PIA at age 60), and 100% of the PIA is available at age 65. Disabled widow(er)s are eligible for reduced benefits at ages 50-59 (50% of PIA at age 50).

Option. H-2 Provide benefit of 71.5% of PIA (same as widow(er)'s benefits at age 60) to disabled widow(er)s claiming benefits at ages 50-59, effective in 1984.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-89
II-B	0	+.2	+.2	+.2	+.2	+.3	+.3	+1.4
III	0	+.2	+.2	+.2	+.2	+.3	+.3	+1.4

Long-Term Cost: +.01% of taxable payroll.

H-3 Provide benefit of 100% of PIA to disabled widow(er)s aged 50-64, effective in 1984.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-89
II-B	0	+.8	+.8	+.9	+1.0	+1.0	+1.1	+5.6
III	0	+.8	+.8	+.9	+1.0	+1.1	+1.2	+5.8

Long-Term Cost: +.03% of taxable payroll.

Limit on widow(er)'s benefits: Present law. There is an over-riding limit which is only applicable when the deceased worker had received early-retirement benefits; then, the widow's benefit cannot exceed the larger of the early-retirement benefit or 82.5% of the PIA. This maximum is applicable only when the widow is at least age 62 and has the most effect when the woman was older than her husband.

Option. H-4 When such limit on widow(er)'s benefits is applicable, and the retired worker dies before age 65, the widow(er) may "rescind" the early-retirement decision by counting the reduction in the widow(er)'s benefit resulting from such limit as "repayment" of the early-retirement benefits paid (including any auxiliary benefits). The period of repayment should be determined from the amounts payable to the beneficiaries who are eligible as of the date of the worker's death.

Long-Term Cost: Negligible.

Computation of deferred widow(er)'s benefits: Present law. If a worker dies before reaching age 62, benefits for the widow(er) are based on the worker's earnings, as indexed to average wage levels in the second year preceding death; the benefit is indexed in and after the year of death to reflect changes in the CPI.

Option. H-5 Index earnings records for purposes of *deferred* survivor benefits (e.g., a woman widowed at age 55 is first eligible for widow's benefits at age 60) through the earlier of (1) the year that the worker would have reached age 60, or (2) two years before the survivor becomes eligible for aged widow's benefits at age 60, effective in 1985.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-89
II-B	0	0	+.0	+.0	+.0	+.1	+.1	+.2
III	0	0	+.0	+.0	+.0	+.1	+.1	+.2

Long-Term Cost: +.05% of taxable payroll.

Divorced persons: Present law. A divorced spouse cannot receive spouse's benefits until the former spouse begins to receive benefits.

Option. H-6 A divorced spouse (divorced at least 3 years) would be able to receive benefits if he or she meets the age requirements for eligibility, regardless of whether or not the insured former spouse, aged 62 or over, has retired (the earnings test would apply to each independently), effective in 1984.[1]

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-89
II-B	0	+.0	+.0	+.0	+.0	+.0	+.0	+.1
III	0	+.0	+.0	+.0	+.0	+.0	+.0	+.1

Long-Term Cost: +.01% of taxable payroll.

[1] As an alternative, the option could provide for a 1-year divorce requirement, instead of a 3-year requirement.

Childcare credits: Present law. To compute the Average Indexed Monthly Earnings of retired workers, the 5 lowest years of indexed earnings are dropped from the appropriate averaging period. For workers attaining age 62 in 1991 or later, retirement benefits will be based on the highest 35 years of indexed earnings. Present law also provides a special minimum benefit as an alternative computation based on the worker's "years of coverage," which is designed for long-service workers with earnings at approximately the Federal minimum-wage level.

Options. H-7 Change provisions for special-minimum benefit so as to allow credit for up to 10 childcare years (in which the worker had a child age 6 or under and did not earn enough to gain a year of coverage). Increase the number of years countable toward the special minimum benefit from 30 to 35, effective in 1984.

COST

[In billion of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89
II–B	0	+1.8	+2.1	+2.4	+2.6	+2.9	+3.2	+15.0
III	0	+1.8	+2.2	+2.5	+2.8	+3.2	+3.6	+16.1

Long-Term Cost: +.14% of taxable payroll.

H-8 Allow up to (alternatively) 3, 5, or 10 childcare drop-out years in computing Average Indexed Monthly Earnings for the purpose of calculating benefits under the regular benefit formula for each year the worker had a child under age 7 and did not earn more than half of the average wage of all covered workers during the year, effective in 1984.[1]

Long-Term Cost for Allowing up to 3 Years: +.21% of taxable payroll.
Long-Term Cost for Allowing up to 5 Years: +.36% of taxable payroll.
Long-Term Cost for Allowing up to 10 Years: +.60% of taxable payroll.

[1] Cost data for the short-term period are not available, but relatively little increase in cost would be involved during 1983–89.

Earnings sharing proposals: H-9 *Comprehensive "No-Cost" Plan.* the DHEW report, "Social Security and the Changing Roles of Men and Women," presented a comprehensive earnings-sharing proposal, within a "no cost" framework. Under the proposal, a person's Social Security protection would be based on her or his earnings when unmarried and, when married, on one-half of the total earnings credits of the married couple. A couple's annual earnings would be divided equally during years of marriage. The earnings would be split equally on divorce or when one spouse reaches age 62. Such split would not apply under certain conditions: (1) on death of a spouse, 80% of total earnings would be inherited, but not less than 100% of the earnings of the higher earner; (2) for purposes of benefits for young survivors, earnings would not be transferred between spouses with regard to a marriage in effect at time of death; and (3) for purposes of disability benefits, earnings would not be shared with regard to a marriage in effect at time of disability. The proposal did not include any transitional proposals.

Long-Term Cost: −.06% of taxable payroll.

H-10 *1979 Advisory Council Plan for Earnings Sharing at Divorce and Inheritance of Earnings Credits.* Credits earned during years of marriage would be divided equally between spouses at divorce. Benefits for each person would be based upon earnings before and after the marriage, plus half the couple's earnings during the marriage. Earnings would be shared only for years after 1980. If the higher-earner retired or became disabled before the lower-earner, he or she would receive benefits based on the higher-earner's full earnings, rather than half of the couple's combined earnings. Under a transitional provision (phased out by 2020), couples would receive the higher of the benefit calculated under earnings sharing or the benefit calculated under a transitional formula assuring the same purchasing power as under present law. A survivor would inherit the earnings credits of a deceased spouse acquired during the marriage. The survivor would receive 100% of the couple's combined earnings credits, plus any credits which the survivor had earned before or after the marriage.

Long-Term Cost: −.35% of taxable payroll.

H-11 *Inheritance of Earnings Credits at Death of Spouse and Limited Earnings Sharing at Divorce.* A survivor could inherit the earnings credits of a deceased spouse from work that occurred during their marriage. At ages 60–61, reduced widow(er)'s benefits would be calculated only from inherited earnings credits. At age 62, the individual would be eligible for retired worker's benefits based on inherited earnings credits combined with own earnings credits. Inheritance would also eliminate disabled widow(er)'s benefits eligibility for DI could be established through inheritance.

Upon request by either partner in a marriage of at least 10 years that ended in divorce, earnings credits would be split, for purposes of calculating retirement benefits only.

Long-Term Cost: +.06% of taxable payroll, without hold-harmless provision.[1]
+.23% of taxable payroll, with hold-harmless provision for those becoming widowed after 1980.[1]

[1] Hold-harmless provision would provide present benefits for aged and disabled widow(er)s forever, if higher.

H-12 *HHS Development of the Recommendations of the 1979 Advisory Council.* Either partner, at time of divorce, could apply to have earnings credits shared for years during a marriage. Disability benefits would be calculated based on shared earnings, but entitlement to disability could not be gained therefrom. Credits acquired during years of marriage would be credited to the earnings record of the surviving spouse. Inherited credits would substitute for all present-law benefits payable to aged and disabled widow(er)s. Benefits for surviving children, widowed mothers and fathers, and children of retired or disabled workers would not be affected. Under the transition provision, those reaching age 62 before 2010 would be eligible for the new basis, but would continue to be eligible for anxiliary and survivor benefits if higher.

Long-Term cost: +.12% of taxable payroll.

SECTION I—OTHER OPTIONS FOR BENEFIT CHANGES

Option number and description	OASDI cost 1983–89 (billions)		Longterm cost (percent)
	II-B	III	
I–1: Eliminate child's benefits for early-retirement cases	−$2	−$3	−.02
I–2: Eliminate all auxiliary benefits for early-retirement cases	(1)	(1)	−.03
I–3: Apply same Maximum Family Benefit for OASI cases as currently used for DI cases	−4	−4	−.10
I–4: Phase out retirement earnings test for persons aged 65 and over in 1988, with annual exempt amount increasing in 1985–87	+10	+11	+.14
I–5: Maintain age 72 as age at which earnings test does not apply	−5	−5	−.03
I–6: Increase delayed-retirement credit from 3% to 6% for each year that retirement is postponed past age 65	(1)	(1)	+.07
I–7: Provide partial refundable income tax credit at ages 65 and over when benefits are withheld under the earnings test	0	0	0
I–8: Provide 10% benefit increase for beneficiaries when they reach age 80, gradually phased in	+6	+7	+.26

[1] Not available.

I. *Other Options Regarding Benefit Changes*

I-1 Eliminate benefits for children of retired workers who have not attained age 65, effective for persons attaining age 62 in 1984.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89
II–B	0	−.1	−.2	−.4	−.5	−.6	−.7	−2.5
III	0	−.1	−.2	−.4	−.6	−.7	−.8	−2.8

Long-Term Cost: −.02% of taxable payroll.

I-2 Eliminate all auxiliary benefits for early-retirement cases, effective for persons attaining age 62 in 1984.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89
II–B	0	(1)	(1)	(1)	(1)	(1)	(1)	(1)
III	0	(1)	(1)	(1)	(1)	(1)	(1)	(1)

Long-Term Cost: −.03% of taxable payroll.

[1] Cost data not now available, but reductions in cost would be substantial in 1983–89 (which would tend to be offset over the long run, because the reductions for "early" claim of benefits would be eliminated in some cases and would be lower in other cases).

I-3 Apply same Maximum Family Benefit for OASI cases as is currently used for DI cases, effective for persons attaining age 62 after 1983 and for deaths before age 62 occurring after 1983. (in DI cases, family benefits are limited to the lesser of 85% of AIME or 150% of PIA, but never less than 100% of PIA.)

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89
II–B	0	−.2	−.4	−.6	−.8	−.9	−1.0	−3.9
III	0	−.2	−.4	−.7	−.9	−1.0	−1.0	−4.5

Long-Term Cost: −.10% of taxable payroll.

I-4 Phase out retirement earnings test for beneficiaries aged 65 and over, with annual exempt amount increasing to $10,000 in 1985, $15,000 in 1986, and $20,000 in 1987, and with elimination of test in 1988.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89
II–B	0	0	+.6	+1.2	+1.8	+2.9	+3.1	+9.6
III	0	0	+.7	+1.4	+2.1	+3.3	+3.6	+11.1

Long-Term Cost: +.14% of taxable payroll.

I-5 Maintain age 72 as age at which earnings test no longer applies.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89
II–B	−.6	−.6	−.7	−.7	−.8	−.9	−.9	−5.2
III	−.6	−.6	−.7	−.7	−.8	−.9	−.9	−5.2

25-Year Cost: −.02% of taxable payroll.
50-Year Cost: −.03% of taxable payroll.
Long-Term Cost: −.03% of taxable payroll.

I-6 Increase the delayed-retirement credit from 3% to 6% for each year that receipt of benefits is postponed past age 65 up until age 70, beginning in 1983.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983–89
II–B	(1)	(1)	(1)	(1)	(1)	(1)	(1)	(1)
III	(1)	(1)	(1)	(1)	(1)	(1)	(1)	(1)

25-Year Cost: +.02% of taxable payroll.
50-Year Cost: +.05% of taxable payroll.
Long-Term Cost: +.07% of taxable payroll.

[1] Cost data not now available, but costs would be small in 1983–89.

I-7 Provide a partial refundable income tax credit for persons aged 65 and over who do not receive benefits because of the earnings test (recommendation of 1981 National Commission on Social Security), effective in 1983.

No short-term or long-term cost to trust funds.

I-8 Provide a 10% increase in benefit amounts for beneficiaries when they attain age 80, phased in over a 10-year period (i.e., a 1% increase during 1984, rising to 10% during 1993 and after).

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-89
II-B	0	+.2	+.5	+.9	+1.3	+1.6	+2.0	+6.5
III	0	+.2	+.5	+1.0	+1.5	+1.8	+2.3	+7.3

Long-term Cost: +.26% of taxable payroll.

SECTION J—TAXATION OF BENEFITS

Option number	description
J-1	Include 50% of OASDI benefits in adjusted gross income for income-tax purposes, with the proceeds credited to the OASDI Trust Funds.
J-2	Same as Option J-1, except that 100% of OASDI benefits would be included in adjusted gross income.
J-3	Include OASDI benefits in adjusted gross income for purposes of the income tax in the same manner as are unemployment benefits, with the proceeds being credited to the OASDI Trust Funds.
J-4	Include all OASDI benefits in adjusted gross income as soon as such benefits first exceed the total employee OASDI taxes paid, with the proceeds being credited to the OASDI Trust Funds.
J-5	Consider OASDI benefits as "income" for purposes of determining marginal income tax rates applicable to *other* income (OASDI benefits would *not* be taxable), with the proceeds being credited to the OASDI Trust Funds.
J-6	Include 50% of OASDI benefits in adjusted gross income, phased-in over 40 years, with the proceeds being credited to the OASDI Trust Funds. Also, there would be a phased-in exclusion of the employee OASDI taxes from such gross income.
J-7	Same as Option J-6 except that 100% of benefits would be included in adjusted gross income.

Note.—See subsequent pages for cost data, which are not summarized here because of the diverse nature of the estimates for the various proposals.

J. Taxation of benefits[1]

Present law. OASDI benefits are not subject to income tax.

Options. J-1 Include 50% of OASDI benefits in adjusted gross income for Federal income-tax purposes, with the proceeds credited to the OASDI Trust Funds, effective in 1984.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-88
These estimates, which are for fiscal years, are based on data provided by the Office of Tax Analysis, Department of the Treasury	0	−3.0	−8.9	−9.9	−10.6	−11.4	−12.3	−56.1

[1]All proposals in this section assume that the tax credit for persons aged 65 and over is eliminated. Such elimination provides most of the additional revenue in the early years for proposals J-3, J-4, J-6, and J-7.

Long-Term Cost: −.6% of taxable payroll.

J-2 Same as Option J-1, except that 100% of OASDI benefits would be included in adjusted gross income.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-88
These estimates, which are for fiscal years, are based on data provided by the Office of Tax Analysis, Department of the Treasury	0	−6.5	−22.1	−23.8	−25.4	−27.2	−29.3	−134.3

Long-Term Cost: −1.4% of taxable payroll.

J-3 Include 50% of OASDI benefits in adjusted gross income for Federal income-tax purposes in the same manner as unemployment benefits are taxed (namely, if benefits plus other income exceed $12,000 for single persons or $18,000 for married couples, then 50% of such benefits are included in adjusted gross income). The proceeds would be credited to the OASDI Trust Funds, effective in 1984.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-89
These estimates, which are for fiscal years, are based on data provided by the Office of Tax Analysis, Department of the Treasury	0	−3.4	NA	NA	NA	NA	NA	NA

Long-Term Cost: Not available.

J-4 Include all OASDI benefits in adjusted gross income for Federal income-tax purposes as soon as such benefits first exceed the total employee OASDI taxes paid, with the proceeds being credited to the OASDI Trust Funds, effective in 1984.

Short-Term Cost: Little effect in the early years. Ultimately, the effect would be similar to Option J-2.
Long-Term Cost: −1.3% of taxable payroll.

J-5 Consider OASDI benefits as "income" for purposes of determining the marginal Federal income tax rates applicable to other income, but continue to exclude OASDI benefits from such taxation. The additional proceeds resulting from such changed procedure would be credited to the OASDI Trust Funds, effective in 1984.

COST

[In billions of dollars]

Estimate	1983	1984	1985	1986	1987	1988	1989	1983-89
These estimates, which are for fiscal years, are based on data provided by the Office of Tax Analysis, Department of the Treasury	0	−31.1	NA	NA	NA	NA	NA	NA

Long-Term Cost: Not available.

J-6 Include 50% of OASDI benefits in adjusted gross income for Federal income-tax purposes, phased in over 40 years, with the proceeds being credited to the OASDI Trust Funds, effective in 1984. At the same time, there would be a phased-in exclusion of the employee OASDI taxes from such gross income (the resulting loss in tax revenues would not be taken from the OASDI Trust Funds).

Short-Term Cost: Little effect in the early years.
Long-Term Cost: −.4% of taxable payroll.

J-7 Same as Option J-6, except that 100% of OASDI benefits would be included in such adjusted gross income.

Short-Term Cost: Little effect in the early years.
Long-Term Cost: −1.20% of taxable payroll.

SECTION K—OTHER ISSUES

Option No.	*Description*
K-1	Trust-fund investment procedures.
K-2	Social Security and the unified budget.
K-3	Social Security Administration to become an independent agency.
K-4	Benefits to certain overseas beneficiaries.

OTHER ISSUES

K-1. Trust-fund investment procedures

Present law. The OASI, DI, HI, and SMI Trust Funds are invested in U.S. Government obligations, primarily in special issues, but also in publicly available obligations of the Federal government or certain Federal agencies. Maturity dates for the special issues are intended generally to be spread in equal amounts over the next 15 years. The interest rate for new special issues is equal to the average market-yield rate on all marketable government obligations that are not due or callable for at least 4 years.

Option. Revise the investment procedures of the four trust funds in the following manner—(1) in the future, all special issues would be invested on a month-to-month basis, at an interest rate based on the average market rate of all public debt obligations outstanding, exclusive of "flower" bonds; (2) all present special issues would be redeemed; (3) all "flower" bonds would be redeemed at their current market values (not their face or maturity values); and (4) all other current holdings would be held until maturity.

K-2. Social security and the unified budget

Present law. The operations of the OASI, DI, HI, and SMI Trust Funds are included in the Unified Budget.

Option. Remove the operations of the four trust funds from the Unified Budget.

K-3. Social Security Administration to become independent agency

Present law. The Social Security Administration is under the jurisdiction of the Department of Health and Human Services.

Option. Establish an independent Social Security agency, removed from the Department of Health and Human Services, and reporting directly to the President. This agency would be headed by a board, which might consist of three members appointed by the President, with Senate confirmation (e.g., the Chairman would have a term corresponding with that of the President, while the other two members would have to be of different political parties, with 4-year terms expiring at the end of 1986, 1990, etc.)

K-4. Benefits to certain overseas beneficiaries

Present law. OASDI benefits are payable outside of the United States—whether to citizens or non-citizens—on exactly the same basis as in the United States, except when the individual is a non-citizen of a country which does not pay benefits to U.S. citizens under parallel circumstances, or when the individual is residing in a country where there is no reasonable assurance that checks can be cashed at full value.

Option. Prohibit benefit eligibility for auxiliary benefits for spouses and children of beneficiaries living abroad when such auxiliary beneficiary had not resided in the U.S. for at least 5 years and when such auxiliary beneficiary continues to reside abroad.

Long-Term Cost: −.01% of taxable payroll.

LIST OF TABLES

1. Summary of current Social Security information.

2. Past and future OASDI-HI tax rates and taxable earnings bases (Table A—employer and employee, each; Table B—employer and employee combined; Table C—self-employed.

3. Growth of OASDI-HI programs, selected years 1940-81 and estimated future operations during CY 1982-86 under Alternatives II-A and II-B. (Tables A-C refer to OASDI and Table D refers to HI.)

4. Historical trust-fund ratio levels for OASDI, DI, and HI Trust Funds, 1950 to present.

5. Estimated operations of the OASI, DI, and HI Trust Funds in the short range, Alternatives, I, II-A, II-B, and III.

6. Long-range status of OASDI-HI Trust Funds under Alternatives I, II-A, II-B, and III.

7. Estimated cost rates of the OASDI-HI system under Alternatives II-A and II-B and comparison with tax rates, 1982-2060. (Tables A and B.)

8. Estimated OASI and DI Trust Fund ratios under Alternatives I, II-A, II-B, and III, 1982-2060.

9. Estimated cost of OASDI and HI systems as percent of Gross National Product, 1982-2060. (Tables A and B.)

10. Additional resources required under present law in near term to bring OASDI reserves up to certain levels (trust fund ratios of 15%, 25%, 50%, and 75%) under Alternatives II-B and III. (Tables A-D.)

11. Comparison of OASDI beneficiaries and covered workers; includes worker to beneficiary ratios, historical and projected under Alternatives I, II-A, II-B, and III, 1945-2060.

12. Demographic data—historical and assumptions under Alternatives I, II-A, II-B, and III regarding total fertility rate and life expectancy (at birth and at age 65), 1940-2060.

13. Economic data—historical and assumptions under Alternatives I, II-A, II-B, and III, 1960-2060.

14. Comparison of estimated and actual key economic indicators—1972 and 1977 forecasts.

15. Social Security coverage (includes information on percentage of workers covered, percentage of earnings covered and taxable payroll).

16. Social Security taxes paid by workers at Federal minimum, average, and maximum wage levels, 1937-90 (employees and the self-employed).

17. Historical comparison of average wage increases and increase in the CPI to Social Security benefit increases. (Tables A and B.)

TABLE 1.—SUMMARY OF CURRENT SOCIAL SECURITY INFORMATION

1. *Retirement test* (Annual exempt amounts in 1982): Age 65 and over—$6,000; under age 65—$4,440.

2. *SMI premium:* $12.20 per month (eff. 7/82).

3. *SSI payment standard:* $284.30 individual, $426.40 couple (eff. 7/82),

4. *Benefit formulas for 1982 cohort:*

PIA: 90% of first $230 of AIME, plus 32% of AIME over $230 thru $1,388, plus 15% of AIME over $1,388.

Maximum family benefit: 150% of first $294 of PIA, plus 272% of PIA over $294 thru $425, plus 134% of PIA over $425 thru $554 plus 175% of PIA over $554.

5. *Average benefits in current pay status:* [1]

	12/81	5/82	6/82
Retired worker alone	$377	$378	$406
Retired couple	643	647	695
Aged widow or widower	349	351	377
Young survivor family	858	851	914
Disabled worker alone	397	398	428
Disabled worker and family	802	793	851

[1] Office of the Actuary, Social Security Administration.

6. *Benefit examples:*

RETIRED WORKER AGE 65 IN 1983

	1/83 PIA
Federal minimum wage earner	$368.70
Average earner	552.50
Maximum earner	709.50

LONG-RANGE CONSTANT REPLACEMENT RATE UNDER DECOUPLED SYSTEM

	Percent
Federal minimum wage earner	55
Average earner	42
Maximum earner	28

7. *Poverty level:*

	1980 (actual) [1]	1981 (preliminary) [2]	1982 (projected)
Aged individual	$3,949	$4,360	$4,680
Couple, aged head	4,983	5,500	5,900
Family of four	8,414	9,290	9,970

[1] 1982 Trustees Report, Alternative II–B assumptions.
[2] Office of Research and Statistics, Social Security Administration.

TABLE 2A.—PAST AND FUTURE TAX RATES FOR EMPLOYERS, EMPLOYEES, AND SELF-EMPLOYED PERSON

[In percent]

Period	OASDI	HI	OASDI–HI
Employers and employees, each:			
1977	4.95	0.90	5.85
1978	5.05	1.00	6.05
1979–80	5.08	1.05	6.13
1981	5.35	1.30	6.65
1982–84	5.40	1.30	6.70
1985	5.70	1.35	7.05
1986–89	5.70	1.45	7.15
1990 and after	6.20	1.45	7.65
Self-employed persons:			
1977	7.00	0.90	7.90
1978	7.10	1.00	8.10
1979–80	7.05	1.05	8.10
1981	8.00	1.30	9.30
1982–84	8.05	1.30	9.35
1985	8.55	1.35	9.90
1986–89	8.55	1.45	10.00
1990 and after	9.30	1.45	10.75

TABLE 2B.—PAST AND FUTURE TAX RATES AND TAXABLE EARNINGS BASES FOR EMPLOYER AND EMPLOYEE COMBINED

Period	Taxable earnings base	Tax rate (percent) OASDI [1]	HI	Total	Maximum employee annual tax
1937–49	$3,000	2.0	.....	2.0	$30.00
1950	3,000	3.0	.....	3.0	45.00
1951–53	3,600	3.0	.....	3.0	54.00
1954	3,600	4.0	.....	4.0	72.00
1955–56	4,200	4.0	.....	4.0	84.00
1957–58	4,200	4.5(.5)	.....	4.5	94.50
1959	4,800	5.0(.5)	.....	5.0	120.00
1960–61	4,800	6.0(.5)	.....	6.0	144.00
1962	4,800	6.25(.5)	.....	6.25	150.00
1963–65	4,800	7.25(.5)	.....	7.25	174.00
1966	6,600	7.7(.7)	0.7	8.4	277.20
1967	6,600	7.8(.7)	1.0	8.8	290.40
1968	7,800	7.6(.95)	1.2	8.8	343.20
1969	7,800	8.4(.95)	1.2	9.6	374.40
1970	7,800	8.4(1.1)	1.2	9.6	374.40
1971	7,800	9.2(1.1)	1.2	10.4	405.60
1972	9,000	9.2(1.1)	1.2	10.4	468.00
1973	10,800	9.7(1.1)	2.0	11.7	631.80
1974	13,200	9.9(1.15)	1.8	11.7	772.20

[1] Adjusted to exclude benefits for December 1981 that were paid on December 31, 1981 rather than January 3, 1982 which was a Sunday. These benefits are included in the 1982 figure so that amounts for 1981 and 1982 each reflect 12 months of benefit payments and are comparable to figures for other calendar years.

[2] Less than $500,000.

[3] Includes $779 million assumed to be borrowed from the HI Trust Fund under the interfund borrowing provisions.

[4] Includes $5,313 million assumed to be borrowed from the HI Trust Fund under the interfund borrowing provisions.

Note. Projections do not reflect the effects of the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97–248). See Table 5 for summarized cost estimates including such effects.

[1] Includes costs of experiments and demonstration projects.
[2] No transfer is made in 1976 because of the change in transfer dates from December to March. The 1977 transfer is for benefits and administrative expenses during the 15-month period beginning July 1976 and ending September 1977.
[3] No transfer is made in 1977 because of the change in transfer dates from August to June. The 1978 transfer is for contributions during the five-quarter period covering the transition quarter and fiscal year 1977.
[4] Includes $2 million in reimbursement from general revenues for costs arising from the granting of noncontributory wage credits to persons of Japanese ancestry who were interned during World War II.
[5] Total income for 1982 is reduced by the amounts assumed to be loaned on December 31, 1982, by the HI Trust Fund under the interfund borrowing provisions. These amounts are $779 million and $5,313 million under alternatives II–A and II–B, respectively.

Note: Projections do not reflect the effects of the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97–248). See Table 5 for summarized cost estimates including such effects.

Notes: 1. The income figures for 1982, and the end-of-year asset figures for 1982 and later, reflect the transfer of funds from the DI and HI Trust Funds to the OASI Trust Fund under the interfund borrowing authority provided by Public Law 97–123. Under this set of assumptions, a total of $11.6 billion would be transferred to OASI in 1982, $6.2 billion from DI and $5.5 billion from HI.

2. The estimated operations for OASI, OASDI, and OASDI and HI combined in 1983 and later are theoretical since, following the expiration of the present law interfund borrowing authority, the OASI Trust Fund would become depleted in July 1983 when assets would become insufficient to pay benefits when due. Similarly, the HI Trust Fund operations in 1991 are theoretical, since the fund would be depleted in 1991 under this set of assumptions.

ACTUARIAL BALANCE OF THE HOSPITAL INSURANCE PROGRAM, UNDER ALTERNATIVE SETS OF ASSUMPTIONS [1]

[As Percent of taxable payroll]

	Alternative			
	I	II–A	II–B	III
Average contribution rate, scheduled under present law [2]	2.86	2.86	2.86	2.86
Average cost of the program, for expenditures and for trust fund maintenance [3]	[1] 3.72	[1] 4.49	[1] 4.93	[1] 6.59
Actuarial balance	−0.86	−1.63	−2.07	−3.73

[1] Does not reflect the effect of the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97–248). When the effect of this legislation is taken into account, the average 25-year cost exclusive of trust-fund building and maintenance under Alternative II–B is 4.34% of taxable payroll (as contrasted with the comparable figure of 4.83% before enactment of such legislation).

[2] Average for the 25-year period, 1982–2006.

[3] Average for the 25-year period, 1982–2006, expressed as a percentage of taxable payroll.

Note: Taxable payroll is adjusted to take into account the lower contribution rates on self-employment income, on tips, and on multiple-employer "excess wages" as compared with the combined employer-employee rate.

75-year average:					
1982–2056	12.59	1.50	14.09	12.27	−1.82

[1] The tax rate minus the OASDI cost rate. Positive differences are referred to as surpluses, and negative differences, as deficits.

Note.—These estimates do not take into account the effect of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97–248). If this had been done, the cost rates would have been slightly lower.

2045	11.21	2.90	−8.31	28.87	15.30	−12.57
2050	11.19	2.90	−8.29	27.91	15.30	−12.61
2055	11.17	2.90	−8.27	27.98	15.30	−12.68
Averages:						
1982–2006	4.34	2.86	−1.48	15.71	14.87	−.84
2007–31	8.78	2.90	−5.88	22.86	15.30	−7.56
2032–56	11.19	2.90	−8.29	28.00	15.30	−12.70
1982–2056	8.10	2.89	−5.21	22.19	15.16	−7.03

[1] These cost rates do not include any allowance for building up and maintaining the trust-fund ratio at 50 percent (which would require an additional .10 percent of taxable payroll in 1982–2006).

[2] For employer and employee combined.

[3] Tax rate minus cost rate. Positive differences are referred to as cash-flow surpluses, and negative differences as deficits.

Note.—These estimates for OASDI do not take into account the effect of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97–248), but those for HI do take this legislation into account. If this had been done, the cost rates for OASDI–HI would have been slightly lower.

Source: Table 27 of the 1982 OASDI trustees report and table 8 of the 1982 HI trustees report (extended beyond 2005 by Health Care Financing Administration under assumption that, then, hospital costs rise at the same rate as wages), in all cases reduced to allow for the effect of Public Law 97–248 (a reduction of about 10½ percent in all years after 1982).

Trust fund is projected to be first exhausted in	1983	(4)	1983	1983	(4)	1983	1983	(4)	1983	1983	(4)	1983

[1] Between −0.5 percent and zero.
[2] The fund is projected to be exhausted and not to recover before the end of the projection period.
[3] Between zero and 0.5 percent.
[4] The fund is not projected to be exhausted within the projection period.

Note.—The definitions of alternatives I, II–A, II–B, and III, and trust fund ratio are presented in the text. The ratios shown after the year a given fund is projected to be exhausted are theoretical and are shown for informational purposes only, see the section on "Estimated Operations and Status of the Trust Funds during the Period October 1, 1981 to December 31, 1986" for further discussion. In addition, the ratios for the total of the OASI and DI Trust Funds after 1982 are theoretical, also because under the current law, after 1982, the assets of one fund cannot be borrowed by another fund. The money assumed to be borrowed by the OASI Trust Fund in December 1982 is assumed to be repaid in 1992 under alternative I, in 1998 under alternative II–A, and not at any time in the long-range projection period under alternatives II–B and III.

These estimates do not take into account the effect of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97–248). If this had been done, the fund ratios would have been slightly higher.

Calendar year	I	II–A	II–B	III
75 year average:				
1982–2056	4.54	5.06	5.28	6.70

Source: Table 30 of 1982 trustees report.

TABLE 9B—ESTIMATED COST OF OASDI AND HI SYSTEMS AS PERCENT OF GNP UNDER ALTERNATIVE II–B, 1982–2050

Calendar year	OASDI	HI	OASDI–HI
1982	5.16	1.30	6.46
1985	5.05	1.18	6.23
1990	4.94	1.49	6.43
1995	4.76	1.90	6.66
2000	4.48	2.19	6.67
2005	4.36	2.50	6.86
2010	4.51	2.82	7.33
2015	4.92	3.05	7.97
2020	5.44	3.35	8.79
2025	5.90	3.67	9.57
2030	6.10	3.90	10.00
2035	6.05	3.97	10.02
2040	5.86	3.94	9.80
2045	5.70	3.84	9.54
2050	5.62	3.76	9.38
2055	5.54	3.68	9.22
Averages:			
1982–2006	4.75	1.81	6.56
2007–31	5.30	3.30	8.60
2032–56	5.78	3.85	9.63
1982–2056	5.28	3.04	8.32

Note.—These estimates for OASDI do not take into account the effect of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97–248). If this had been done, the figures for the OASDI–HI system would have been slightly lower.

Source: Derived from Tables 7A, 7B, and 9A.

TABLE 10A.—ESTIMATED TOTAL INCREASE IN SOCIAL SECURITY TAX INCOME REQUIRED DURING CALENDAR YEARS 1983–87 TO REACH ALTERNATIVE TARGET LEVELS OF TRUST FUND ASSETS BY BEGINNING OF 1988, UNDER ALTERNATIVES II–B AND III OF 1982 TRUSTEES REPORT

[In billions of dollars]

Trust fund	Asset goal at beginning of 1988 as percentage of expenditures in 1988			
	15	25	50	75
Alternative II–B:				
OASI	121	140	192	244
DI				
HI			7	23
OASDI	59	81	138	196
OASDI–HI	46	74	150	222
Alternative III:				
OASI	181	204	266	324
DI				
HI	3	11	29	48
OASDI	126	152	217	280
OASDI–HI	133	166	245	328

Notes.—The above estimates are based on the assumption that the target trust fund ratio would be approached in even steps between 1983 and 1988. Other patterns are possible and would lead to somewhat different estimates of the required tax increases.

The effects of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97–248) are reflected in these estimates.

Where no estimate is shown, it indicates that the asset goal is exceeded under present law.

TABLE 10B.—ESTIMATED TOTAL REDUCTION IN SOCIAL SECURITY BENEFITS REQUIRED DURING CALENDAR YEARS 1983–87 TO REACH ALTERNATIVE TARGET LEVELS OF TRUST FUND ASSETS BY THE BEGINNING OF 1988, UNDER ALTERNATIVES II–B AND III OF THE 1982 TRUSTEES REPORT

[In billions of dollars]

Trust fund	Asset goals at beginning of 1988 as percentage of expenditures in 1988 [1]			
	15	25	50	75
Alternative II–B:				
OASI	116	134	175	210
DI				
HI			6	19
OASDI	59	79	128	172
OASDI–HI	44	72	134	190
Alternative III:				
OASI	175	193	234	271
DI				
HI	2	9	24	37
OASDI	123	144	194	239
OASDI–HI	128	154	218	275

[1] Expenditures in 1988 are assumed to be reduced by about the same percentage as in 1983–87; the amount of the 1988 reduction is not included in the total reductions shown for 1983–87.

Notes.—The above estimates are based on the assumption that the target trust fund ratio would be approached in even steps between 1983 and 1988. Other patterns are possible and would lead to somewhat different estimates of the required benefit reductions.

The effects of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97–248) are reflected in these estimates.

Where no estimate is shown, it indicates that the asset goal is exceeded under present law.

TABLE 10C.—ESTIMATED TOTAL INCREASE IN OASDI TAX INCOME REQUIRED DURING 1983–89 TO REACH ALTERNATIVE TARGET LEVELS OF TRUST-FUND RATIOS BY BEGINNING OF 1988, UNDER ALTERNATIVES II-B AND III

[In billions of dollars]

Calendar year	1988 Trust-fund ratio of 15 percent		1988 Trust-fund ratio of 25 percent	
	Alternative II-B assumptions	Alternative III assumptions	Alternative II-B assumptions	Alternative III assumptions
1983	22	26	24	27
1984	15	26	20	32
1985	7	20	11	25
1986	8	25	13	30
1987	8	30	14	39
1988	8	34	8	35
1989	7	40	8	40
1983–89	75	201	98	228

Notes.—The "trust-fund ratio" is the ratio of the balance in the OASDI trust funds on a particular date to the outgo in the next 12 months.
The figures in the table do not include the repayment of the loan from the HI trust fund to the OASI trust fund in 1982 (about $5 billion).
The figures do take into account the effect of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97–248).

TABLE 10D.—ESTIMATED TOTAL REDUCTION IN OASDI BENEFIT OUTGO REQUIRED DURING 1983–89 TO REACH ALTERNATIVE TARGET LEVELS OF TRUST-FUND RATIOS BY BEGINNING OF 1988, UNDER ALTERNATIVES II–B AND III

[In billions of dollars]

Calendar year	1988 Trust-fund ratio of 15 percent		1988 Trust-fund ratio of 25 percent	
	Alternative II–B assumptions	Alternative III assumptions	Alternative II–B assumptions	Alternative III assumptions
1983	20	23	20	23
1984	17	26	20	30
1985	7	22	13	26
1986	8	24	13	29
1987	8	29	14	37
1988	8	34	9	35
1989	9	44	10	46
1983–89	77	202	99	226

Notes.—The "trust-fund ratio" is the ratio of the balance in the OASDI trust funds on a particular date to the outgo in the next 12 months.
The figures in this table do not include the repayment of the loan from the HI trust fund to the OASI trust fund in 1982 (about $5 billion).
The figures do take into account the effect of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97–248).

[1] Workers with taxable earnings at some time during the year.
[2] Beneficiaries with monthly benefits in current-payment status as of June 30.
[3] Preliminary.

Note.—The definitions of alternatives I, II–A, II–B, and III are presented in the text. The numbers of beneficiaries do not include certain noninsured persons aged 72 and over with less than 3 quarters of coverage, the costs for whom are reimbursable to the OASI Trust Fund by the general fund of the Treasury. The number of such persons is estimated to be 69,500 as of June 30, 1982, and less than 1,000 by the turn of the century.

TABLE 12.—SELECTED DEMOGRAPHIC ASSUMPTIONS BY ALTERNATIVE, CALENDAR YEARS 1940–2060—Continued

Calendar year	Total fertility rate [1]	Life expectancy [2]			
		At birth		At age 65	
		Male	Female	Male	Female
2010	1.70	76.8	86.0	18.1	25.1
2020	1.70	77.7	87.2	18.8	26.1
2030	1.70	78.5	88.3	19.5	27.2
2040	1.70	79.4	89.5	20.1	28.2
2050	1.70	80.2	90.6	20.8	29.3
2060	1.70	81.0	91.8	21.5	30.4

[1] The total fertility rate for any year is the average number of children who would be born to a woman in her lifetime if she were to experience the birth rates by age observed in, or assumed for, the selected year, and if she were to survive the entire child-bearing period.

[2] The life expectancy for any year is the average number of years of life remaining to a person if that person were to experience the death rates by age assumed for the selected year.

2000 & later	[7] 2.1	6.0	5.0	1.0	6.6	6.0

[1] The real GNP (Gross National Product) is the total output of goods and services expressed in constant dollars.

[2] The difference between the percentage increase in average annual wages in covered employment and the percentage increase in the average annual CPI.

[3] The average of the interest rates determined in each of the 12 months of the year for special public-debt obligations issuable to the trust funds.

[4] The ultimate rates are adjusted by age and sex based on the total labor force aged 16 and over as of July 1, 1970. Rates shown for earlier years are civilian unemployment rates for those years.

[5] Preliminary.

[6] The actual value of the 1981 increase in real GNP was 2.0 percent. This value was not available at the time the cost estimates were prepared; the cost estimates were based on the assumed increases in real GNP shown under the four alternatives.

[7] This value is for the year 2000. The annual percentage increase in real GNP is assumed to continue to change after 2000 under each alternative to reflect the dependence of labor force growth on the size and age-sex distribution of the population. The percentage increases for 2060 are 3.4, 2.5, 2.1, and 1.0 for alternatives I, II–A, II–B, and III, respectively.

[8] The economic assumptions in alternative II–A for 1981–87 are identical to or derived from the assumptions underlying the President's 1983 Budget, with the exception of the assumed 1981 increases in the nominal wage and the real wage as well as the assumed 1982 increases in the real wage and the CPI, all of which have been adjusted to reflect actual experience available since the Budget assumptions were released.

Source: Table 10 in 1982 OASDI trustees report.

TABLE 14.—COMPARISON OF ESTIMATED AND ACTUAL KEY ECONOMIC INDICATORS, 1972–73 FORECASTS [1]

[In percent]

Calendar year	Key economic indicators								
	CPI increase			Real wage differential [2]			Unemployment rate		
	Estimated		Actual	Estimated		Actual	Estimated		Actual
	In 1972	In 1973		In 1972 [3]	In 1973 [3]		In 1972	In 1973	
1972			3.3			4.0			5.6
1973			6.2			0.7			4.9
1974			11.0			−3.5			5.6
1975	2.75	3.3	9.1	2.25	2.9	−2.5	4.2	4.5	8.5
1976			5.8			2.5			7.7
1977		2.75	6.5			0.4			7.0
1978		2.75	7.7		2.25	0.5			6.0
1979		2.75	11.5		2.25	−3.1			5.8
1980		2.75	13.5		2.25	−5.0			7.1

[1] There were a number of legislative changes made to "automatic" provisions between July 1972 and December 1973.
[2] Real wage: Defined as the increase in average nominal wages over prices.
[3] Actually, the long-range trust fund projections had a safety margin of ⅜ of a percent built into the real wage differential. For trust fund projection purposes the average increase in real wages was assumed to be 1⅞ percent per year (reflected by an annual increase in the CPI of 3⅛ percent).

TABLE 14A—COMPARISON OF ESTIMATED AND ACTUAL KEY ECONOMIC INDICATORS, 1977 FORECAST [1]

[In percent]

Calendar year	Key economic indicators					
	CPI increase		Real wage differential		Unemployment rate	
	Estimated	Actual	Estimated	Actual	Estimated	Actual
1977	6.0	6.5	2.4	0.4	7.1	7.0
1978	5.4	7.7	2.7	0.5	6.3	6.0
1979	5.3	11.5	2.5	−3.1	5.7	5.8
1980	4.7	13.5	2.4	−5.0	5.2	7.1
1981	4.1	[2] 11.1	2.3	[2] −0.9	5.0	[2] 7.8

[1] The 1977 forecast was based on the intermediate set of assumptions in the 1977 trustees' report.
[2] Estimates based on the economic assumptions under the II–B path in the 1981 trustees' report.

Note.—In summary, what has occurred with respect to both the 1972–73 and 1977 Trust Fund forecasts is that the higher than projected inflation rate caused benefits to increase far beyond expectations, and aggregate expenditures to do likewise, while lower real wage growth and higher unemployment caused revenues to grow at an inadequate rate.

TABLE 15.—SOCIAL SECURITY COVERAGE INFORMATION

[Workers covered—estimates for 1980]

Type of employment	Number of persons (millions)		Proportion covered (percent)
	Total [1]	Covered [2]	
Wage and salary	108.9	97.5	89.5
Private sector	88.0	84.5	96.0
Industry and commerce	77.0	76.8	99.7
Farm	2.0	1.5	74.6
Domestic	1.9	.5	28.1
Nonprofit	6.5	5.1	78.8
Railroad	.6	.6	100.0
Public sector	20.9	12.9	62.0
Federal	3.7	.6	15.4
State and local	15.0	10.2	68.2
Military	2.1	2.1	100.0
Self-employment	8.6	6.5	75.5
Total, all employment	117.4	103.9	88.5

[1] Data on total employment are based upon class of worker of longest job as reported by the individual in the current population survey and total employment covers the noninstitutionalized population age 14 and over in the 50 States and the District of Columbia as well as members of the Armed Forces, at home and overseas.
[2] Data on covered employment are based upon class of worker of major job as determined by the highest amount of taxable wages as reported to the Social Security Administration by employers.

1987	9,907.00	708.35	20,609.56	1,473.58	46,800.00	3,346.20	4,680.00
1988	10,560.00	755.04	21,968.32	1,570.73	50,100.00	3,582.15	5,010.00
1989	11,231.00	803.02	23,363.63	1,670.50	53,400.00	3,818.10	5,340.00
1990	11,906.00	910.81	24,767.80	1,894.74	57,000.00	4,360.50	6,127.50

[1] Federal minimum wage first applicable in 1938.
[2] Self-employed first covered effective 1951.
[3] Earnings amounts after 1982 based on Alternative II–B asumptions used in 1982 OASDI Trustees Report.

TABLE 17A.—COMPARISON OF OASDI GENERAL BENEFIT INCREASES WITH INCREASES IN CONSUMER PRICE INDEX

[Amounts in percent]

Month when first effective	Percentage benefit increase [1]	Increase in CPI from previous effective date	Column (1) minus column (2)
September 1950	[2] 77	[6] 75.5	+1.5
September 1952	[3] 15	9.3	+5.7
September 1954	[3] 13	0.5	+12.5
January 1959	7	7.9	−0.9
January 1965	7	7.9	−0.9
February 1968	13	9.3	+3.7
January 1970	15	10.8	+4.2
January 1971	10	5.2	+4.8
September 1972	20	5.9	+14.1
June 1974	[4] 11	16.4	−5.4
June 1975	[5] 8.0	9.3	−1.3
June 1976	[5] 6.4	5.4	+1.0
June 1977	[5] 5.9	6.9	−1.0
June 1978	[5] 6.5	7.3	−0.8
June 1979	[5] 9.9	11.1	−1.2
June 1980	[5] 14.3	14.2	+0.1
June 1981	[5] 11.2	9.5	+1.7
June 1982	[5] 7.4	6.9	+0.5

[1] All benefit increases, except those for September 1950, 1952, and 1954, were uniform across-the-board percentage increases (at times, although not for 1965 and later, with somewhat larger proportionate increases in the minimum benefit).
[2] Measured from January 1940.
[3] Average increase in benefits for those then on the roll.
[4] Made in 2 steps, with 7 percent being effective for March 1974.
[5] Resulting from automatic-adjustment provisions.
[6] Increase from January 1940.

TABLE 17B.—COMPARISON OF OASDI GENERAL BENEFIT INCREASES WITH INCREASES IN AVERAGE WAGE LEVELS

[Amounts in percent]

Period	OASDI benefit increases [1]	Increase in average wages [2]	Column (1) minus column (2)
January 1940 to September 1950	77	121.8	−44.8
September 1950 to September 1952	15	15.8	−.8
September 1952 to September 1954	13	5.9	+7.1
September 1954 to January 1959	7	18.4	−11.4

TABLE 17B.—COMPARISON OF OASDI GENERAL BENEFIT INCREASES WITH INCREASES IN AVERAGE WAGE LEVELS—Continued

[Amounts in percent]

Period	OASDI benefit increases [1]	Increase in average wages [2]	Column (1) minus column (2)
January 1959 to January 1965	7	22.5	−15.5
January 1965 to February 1968	13	17.7	−4.7
February 1968 to January 1970	15	11.3	+3.7
January 1970 to January 1971	10	5.0	+5.0
January 1971 to September 1972	20	13.7	+6.3
September 1972 to June 1974	11	10.9	+.1
June 1974 to June 1975	8.0	7.4	+.6
June 1975 to June 1976	6.4	6.9	−.5
June 1976 to June 1977	5.9	6.0	−.1
June 1977 to June 1978	6.5	7.9	−1.4
June 1978 to June 1979	9.9	8.7	+1.2
June 1979 to June 1980	14.3	9.0	+5.3
June 1980 to June 1981	11.2	[3] 8.7	+2.5
June 1981 to June 1982	7.4	[3] 6.7	+.7

EXTENSIONS OF REMARKS

THE STRATEGIC BALANCE—FACT AND FICTION

HON. THOMAS J. DOWNEY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. DOWNEY. Mr. Speaker, on November 22, President Reagan took to the airwaves to announce his support for the Densepack MX ICBM system. The merits and demerits of this weapon will be debated in detail during the coming days; it is not my purpose to belabor that point today. But in the process of making his case for Densepack, he described the relative strength of United States and Soviet strategic forces in terms which were misleading and inaccurate on numerous counts.

So that my colleagues may have an explicit factual background on which to evaluate President Reagan's claims, here is a point-by-point discussion of them:

1. THE MEANING OF DETERRENCE

President Reagan: "This nation's military objective has always been . . . deterrence (which) is a matter of others knowing that starting a conflict would be more costly to them than anything they might hope to gain."

Fact: Here Mr. Reagan is precisely correct. If his words and deeds were consonant with this principle, the nation would be well served.

Unfortunately, this has not always been the case. Many of his words, including those in the speech now under discussion, seem to try to tell the Soviet Union that he believes us to be inferior, that he lacks confidence in our own military strength, and that therefore the Soviets can gain from starting a conflict because we will not fight back. To thus denigrate U.S. military strength is both a disservice to truth and a highly risky position for any President to take, in that it encourages Soviet aggression, I am unable to see what Mr. Reagan believes the nation can gain from his creation of this national security risk.

2. THE ARMS RACE

President Reagan: "The truth is that while the Soviet Union has raced, we have not."

Fact: During the 20-year period considered by the President, we have engaged in a massive arms race in which we, not the Soviets, have been continually pressing the leading edge of technology; in almost all cases, the Soviets have merely followed in our footsteps. These are some of the specific steps we have taken in the course of the strategic arms race:

Submarine-launched missiles

(1) Completed deployment of 41 advanced ballistic missile submarines of *George Washington, Ethan Allen,* and *Lafeyette* classes.

(2) Launched four still quieter and more advanced *Ohio* class submarines.

(3) Deployed three versions of the Polaris submarine-launched ballistic missile. This was the world's first underwater-launched ballistic missile. It was also the world's first solid-fuel SLBM, and except for a single ship equipped with their unsuccessful SS-N-17, the Soviets have yet to deploy a solid-fuel SLBM.

(4) Replaced the Polaris missiles with the Poseidon—the world's first multiple-warhead (MIRV) SLBM by a margin of 8 years.

(5) Replaced one third of the Poseidon SLBMs with the larger yield, longer range Trident I.

(6) Begun deployment of the Trident I missile in the Trident ship.

Air-breathing weapons

(7) Completed deployment of the B-52 bomber force. To this day, the B-52 carries a heavier payload over longer range than any operational Soviet bomber.

(8) Completed deployment of the FB-111A strategic bomber. With its fully automatic terrain-following radar and escape capsule, it remains more advanced than any deployed Soviet bomber.

(9) Completed deployment of the Short Range Attack Missile (SRAM), carried by both B-52s and FB-111As. This missile, for which the Soviets have no counterpart, is for practical purposes immune to any known or expected defense. With its very high supersonic speed and very small radar image, it frees our bombers from the need to overfly their targets.

(10) Progressively upgraded and modernized the technology of the B-52 electronics, although not to the limits of today's technology.

(11) Begun deployment of the super-accurate, long range strategic Air Launched Cruise Missile (ALCM), which is many years more advanced than any Soviet cruise missile.

(12) Equipped the B-52s with devices for simultaneous quick engine start.

Intercontinental ballistic missiles (ICBMs)

(13) Completed deployment of the Minuteman I, the world's first solid fuel ICBM. Except for the unsuccessful SS-13, the Soviets have yet to deploy or successfully test a solid-fuel ICBM.

(14) Replaced half the Minuteman Is with more advanced Minuteman IIs.

(15) Replaced the remaining Minuteman Is with Minuteman IIIs. Minuteman III was, by a five year margin, the world's first MIRV ICBM, and is far more resistant to nuclear effects than its predecessors.

(16) Replaced the warheads on a majority of the Minuteman IIIs with the new Mark 12A, which has double the explosive power of its predecessor but retains the same size and weight. The Mark 12A is far superior to any Soviet warhead in terms of explosive power per pound.

(17) Doubled the accuracy of the Minuteman III. Against hard targets, this is equivalent to quadrupling the number of missiles, or to octupling the explosive power of the warheads.

(18) Tripled the hardness of Minuteman silos.

(19) Installed a system for rapid remote retargeting of Minuteman. Under a worst-case situation, this would improve the effectiveness of our missiles hundreds of times, by ensuring that they are directed to the highest-value targets.

Command, control, and strategy

(20) Progressively upgraded our computer capacity to deal with complex wartime problems.

(21) Deployed the E-4A (Boeing 747) airborne command post, for which there is no Soviet equivalent.

(22) Begun deployment of the E-4B, a 747-based airborne command post hardened against nuclear effects.

(23) Continually evolved and improved our nuclear war plans. Unfortunately, security classification prevents specific discussion of this in a public forum. But I urge every Member of Congress to spend a day at SAC headquarters in Omaha and receive the full briefing on United States nuclear war plans. You will find that what we actually plan to do in a war makes a good deal more sense than the drivel we sometimes hear in Washington. I also wish that Mr. Andropov and his colleagues would receive the same briefing. It would leave no doubt in their minds that the consequences of nuclear retaliation by the United States against the Soviet Union would be so dreadful that nothing could possibly justify their starting a nuclear war.

Overview

Even this very superficial examination shows 23 major and significant steps we have taken in the strategic arms race. These 23 steps have given us a strategic force hundreds of times more effective than their predecessors.

It is true that the Soviet Union has also raced, and overall it has made more progress in the last 20 years than we have. But this is because it started from a lower baseline. To whatever extent this sterile comparison has meaning, the Soviet strategic forces were inferior to ours twenty years ago, and remain so today.

3. MILITARY SPENDING

President Reagan: "Our defense spending . . . went downward through much of the 1970s. The defense share of our United States federal budget has gone way down too. In spite of a stagnating Soviet economy, Soviet leaders invest 12 to 14 percent of their country's GNP in military spending, two to three times the level we invest."

Fact: Every American should be appalled to hear any U.S. government official, much less the President, discuss defense spending as if it were a virtue in and of itself. If we want to increase defense spending, we can easily do it by forcing every defense worker to work with one hand tied behind his back. Our costs will go up, but our security will not.

Defense is rationally measured by the security it creates. Good defense management consists of maximum security obtained at highest efficiency and therefore at minimum cost. The Soviet system is notoriously inefficient. By complaining that we are not spending as much as the Soviets, President Reagan is making a virtue of inefficiency and standing basic sound management practice on its head.

I do not say this in partisan criticism of Mr. Reagan. President Carter and Defense Secretary Harold Brown were guilty of the exact same sin. This does not make the sin any the less mortal. I don't need to remind anyone that we, too, are in a stagnating economy and cannot afford to spend for the sake of spending.

I must also point out that, even if we accept the highly anticonservative proposition that defense spending is a virtue, Mr. Reagan's statement is misleading, for the following reasons:

(1) He ignores the contribution of our allies. Correcting for this error alone, we find our military spending to have exceeded that of the other side by over $200 billion over the last decade.

(2) He ignores the fact that the gross national product of the Western alliance is approximately three times that of the Soviet Union.

(3) The dollar comparison is biased, in that it makes the unrealist assumption that we would try to duplicate Soviet forces using our methods—for example, that we would use Soviet manpower levels but our own military pay scales.

(4) The chronological comparison of defense spending as a percent of the government budget is faulty in that the method of counting the federal budget was changed during the Johnson Administration. In 1962, we did not count Social Security as part of the government budget; today we do.

4. MILITARY BALANCE

President Reagan: "Today, in virtually every measure of military power the Soviet Union enjoys a decided advantage."

Fact: This statement is so far from the truth that it seems to have embarrassed the White House spokesmen, who the next day sought to soften and equivocate on it. Very briefly, here is a summary of the military balance:

A. Strategic forces:

(1) Manned bombers: U.S. far superior.

(2) Submarine-launched missiles: U.S. superior.

(3) ICBMs: Soviets superior.

(4) Strategic defense: Soviets superior, but capability on both sides is relatively low.

B. Tactical forces:

(1) Tactical airpower: U.S. substantially superior.

(2) Aerial reconnaissance: U.S. massively superior.

(3) Sea-based airpower: U.S. massively superior.

(4) Surface combatants: Soviets superior in short conflict, U.S. superior in long conflict.

(5) Submarine and anti-submarine warfare: U.S. massively superior.

(6) Airlift: U.S. massively superior.

(7) Land forces: Soviets superior.

(8) Combat resilience: U.S. superior due to Soviet overdependence on centralized control.

(9) Psychological warfare: U.S. far inferior because of inaccurate statements by present and former U.S. government officials which have exaggerated Soviet strength and minimized U.S. strength.

5. NUMBERS OF ICBMS AND BOMBERS

President Reagan: "In 1962 and in 1972, the United States forces remained about the same (in ICBMs and bombers), even dropping some by 1982. In 1962, the Soviet Union could not compare with us. In 1972, we were nearly equal. But in 1982, that red Soviet bar stretching above the blue American bar tells the story."

Fact: Numbers of missiles and bombers is a coarse and sometimes misleading measure of military strength. Using this measure, we would appear to have been far stronger when we built thousands of B-17s in World War Two. We would also appear to now be heading for a period of declining military strength, as we plan to replace B-52 and Minuteman with much smaller numbers of B-1 and MX. In fact, qualitative improvements are far more important than mere gross numbers.

6. NUMBERS OF ICBMS.

President Reagan: "The Soviet Union has deployed a third more land-based intercontinental ballistic missiles than we have."

Fact: This is true, but only because of a major deficiency in Soviet strategic forces. We have a well-balanced three-armed deterrent if ICBMs, submarine-launched missiles, and bombers, each contributing about one third of our strategic striking power. The Soviets, in contrast, have about 75 percent of their strategic striking power, and a much higher proportion of their alert striking power, concentrated in their ICBMs. This places them at a severe disadvantage in that almost all their eggs are in one basket. But of course that basket therefore is larger than the corresponding U.S. basket and can be so cited out of context.

7. U.S. ICBM NUMBERS

President Reagan: "Believe it or not, we froze our number (of ICBMs) in 1965 and have deployed no additional missiles since then."

Fact: This is playing word games. We may have no "additional" missiles, but we have replaced our 1965 missiles and upgraded the replacements several times, with the result that our ICBM force is far more capable than if we had tripled our numbers without qualitative improvements.

8. U.S. STRATEGIC BOMBERS

President Reagan: "For 20 years, the United States has deployed no new strategic bombers."

Fact: Not so. We have deployed 66 FB-111A strategic bombers, which are more modern than any deployed Soviet bomber.

9. AGE OF U.S. BOMBERS

President Reagan: "Many of our B-52 bombers are now older than the pilots who fly them."

Fact: In some cases this is true, as it is with Soviet bombers. If age were the determining factor in a weapon, we wouldn't be now bringing four battleships out of retirement. The question is not the age of a weapon but its ability to perform its mission. The B-52 remains able to do this, although if we fail to conclude a nuclear freeze or otherwise probibit depressed trajectory missiles, the deterrent viability of all U.S. bombers, including the B-1B, will be lost.

10. INTERMEDIATE-RANGE LAND-BASED MISSILES

President Reagan: "The Soviet Union now has 600 of the missiles considered most threatening by both sides—the intermediate range missiles based on land. We have none. The U.S. withdrew its intermediate range land-based missiles from Europe almost 20 years ago."

Fact: Nobody who can do the most basic damage calculations considers these weapons to be of any military significance. An intermediate-range missile is simple an ICBM without intercontinental range. The subtraction of these missiles from the Soviet force would not perceptibly decrease Soviet ability to devastate the nations of the West. Correspondingly, the addition of these weapons has not perceptibly added to this ability. They are political rather than military weapons, and have no effect other than that which U.S. official statements give them.

As for U.S. land-based IRBMs, we withdrew them because we recognized their dubious military utility.

As for our missile submarines, although their deployment rate is almost quadruple that of their Soviet counterparts, none has ever been lost at sea, or disabled, or late returning from patrol. Soviet performance in submarine safety, in contrast, has been horrendous.

11. MISSILE SUBMARINE PROCUREMENT

President Reagan: "The Soviet Union put to sea 60 new ballistic missile submarines in the last 15 years. Until last year we had not commissioned one in that same period."

Fact: True, because the ships we had were more than good enough. Unless bankruptcy is our goal, we don't build weapons for the sake of building them; we build them because we need them, and we didn't need more or newer missile submarines.

The measure of a missile submarine's capability is how well it can remain at sea undetected.

Our submarines remain at sea more than 55 percent of the time. The newer Soviet ships can do no better than 15 percent.

Our ships are far more immune to detection. In fact, consider our ten oldest missile submarines, which have been recently retired because we judged it not worth keeping them up. If you were to take all ten ships and run them side by side, they would make less noise than one of the newest and quietest-Soviet nuclear ballistic missile submarines. More to the point, none of our ships has ever been detected by the Soviets.

The implication of Mr. Reagan's statement is that we don't want weapons that will maintain their effectiveness for the longest possible time, that we should only be happy when we're throwing money at a problem. I find this incomprehensible.

12. READINESS

President Reagan: "When I arrived in this office I learned that in our own forces we had planes that could not fly and ships that could not leave port, mainly for lack of spare parts and crew members."

Fact: We still have them. Every armed force in the world has always had them, and probably always will. This is a problem from which the Soviets suffer more severely than we do.

13. SAFETY OF U.S. EQUIPMENT

President Reagan: "Our deployed nuclear forces were built before the age of microcircuits. It is not right to ask our young men and women in uniform to maintain and operate such antiques. Many have already given their lives in missile explosions and aircraft accidents caused by the old age of their equipment."

Fact: Not so. Much of our strategic force is full of microcircuits, and few if any accidents have been due to age as such.

We have had two recent fatal missile accidents. One, which killed four people, involved a component of the brand new MX ICBM. The other, which killed one person, involved a Titan II ICBM, and was caused not by the age of the missile but by its inherently hazardous liquid fuel design.

I wonder if Mr. Reagan is aware that less than 4 percent of our strategic missiles still use liquid fuel, while more than 95 percent

of Soviet strategic missiles, including some of the very newest, use this dangerous design. The fact is that Soviet solid-fuel technology is far behind our own.

The B-52 is a tried and proven airplane. We fly it a lot, so it inevitably has some accidents. If we procure the B-1B, I hope it will be safer, but nobody knows. We sometimes forget that the introduction of any new airplane is usually marked by a number of accidents before the bugs are worked out. Almost certainly, there will be a period of several years in which fatalities per flight hour will be higher in the B-1 than in the B-52. Newer is not necessarily safer. Some airplanes, such as the B-58, were inherent widow-makers because they pushed available technology beyond the limit. They deserved early retirement for safety reasons. The B-52 is not such a plane; the G and H versions have many safe years left in them. Will the B-1B be a safe airplane? Nobody knows.

14. WILLINGNESS TO NEGOTIATE

President Reagan: "Unless we demonstrate the will to rebuild our strength and restore the military balance, the Soviets, since they are so far ahead, have little incentive to negotiate with us."

Fact: The Soviets are already willing to negotiate. They have indicated willingness to accept a mutual and verifiable freeze on the testing, production, and deployment of nuclear weapons; the Administration has refused. The Soviets have indicated strong interest in the Gore plan for elimination of destabilizing weapons; the Administration has not. The Soviets have signed SALT II and are willing to ratify it; the Administration refuses to do the same.

In no sense do I mean to criticize my own country and praise the Soviet government, which is a vicious authoritarian state under which no rational person would wish to live. I am not now critizing my own country. The public opinion polls, the various freeze referenda, and the 1982 elections demonstrate beyond a shadow of a doubt that we as a nation are determined to have arms control. The problem is not the U.S. as a nation. It is not the American people. It is the Reagan administration which refuses to seriously negotiate strategic arms.

The Soviets are not ahead, nor do they perceive themselves as ahead. On the contrary, they see the Reagan defense program as seeking to create U.S. strategic superiority—whatever that may mean. I have no inside knowledge of Kremlin thought, but all logic and all presently available evidence argues that the Soviet response to the Reagan defense program will not be greater amenability to negotiations but rather an augmented strategic program of their own.

15. ARMS REDUCTION

President Reagan: "We will modernize our military in order to keep the balance for peace, but wouldn't it be better if we both simply reduced our arsenals to a much lower level? Our proposals would eliminate some 4,700 warheads and some 2,250 missiles. I think that would be quite a service to mankind."

Fact: Arms control is a service to mankind to the extent that it reduces the probability of nuclear war, reduces the expense of the arms race, and/or reduces the damage which would occur in a nuclear war. Let us evaluate the Reagan arms control and national security program by these yardsticks:

(1) The probability of nuclear war depends, not upon the balance between the total strategic forces of the two sides, but upon the balance between the first-strike war-initiating forces versus the second-strike war-deterring reataliatory forces in both directions. Under the Reagan plan, the strategic ballistic missile forces of the two sides would be made up of MX and D5 Trident II missiles, which are weapons primarily designed for first strike. The ratio of ICBM warheads to ICBM launchers—a key measure of ICBM vulnerability—would be six to one, which is higher than it is today. Thus, under the Reagan program, the probability of nuclear war would be higher than it is today.

(2) START would not impair the MX, Trident II, B-1, Stealth, or cruise missile programs. Thus, it will not save any of the taxpayers' money.

(3) While START would force reductions in the numbers of deployed ballistic missiles and warheads on them, it would permit an increase in the total destructive power of the world's strategic arsenals. This is because it sets no limit on deployed throw-weight which can be translated into explosive power, and it sets no limit on the payload, aircraft numbers, or warhead numbers of manned bombers. (SALT II does all these things.)

I would like to believe that START is a service for mankind. I would like to hear Mr. Reagan explain precisely why this is so. I would also like to hear him, or somebody in the Administration explain why they feel anything I have said here today is wrong.●

TOUGH CHOICE—PRO BALL OR THE BUSINESS WORLD

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. MOTTL. Mr. Speaker, when Robert J. Kane of Parma, Ohio, was a young man, his abilities on the ball diamond were drawing rave notices from major league scouts around the country.

Bob was a good enough amateur shortstop to be offered tryouts by both the Phillies and the Cubs. It was tough for him to turn both offers down, but looking back some 36 years later, Bob Kane has few regrets.

Many of my colleagues in the House know Bob Kane. He is here on almost a weekly basis as vice president of government relations for the Cleveland-Cliff Iron Co. He has been of great help to many of us as we weigh and ponder the issues in his field. We have learned to rely upon his wisdom, integrity, and dedication.

Bob enlisted in the Armed Forces during the height of World War II, after he graduated from high school at age 17. At 18, he was commissioned a second lieutenant in the Army Air Force and he served his country well in that capacity from 1943 through 1945.

Bob went to work for Cleveland-Cliff 32 years ago and has risen through the ranks from buyer and traffic manager to his present lofty position which he assumed in 1975. Along the way, he had found time to raise a family of five children, be a devoted husband to his wife, Grace, and take part in a number of civic affairs in Parma.

He has retained his interest in sports and coached Parma youngsters at the grade school level over the years. He served as Parma Recreation Director from 1952 to 1956.

I ask my colleagues in the House to join with me as we pay tribute to Robert J. Kane, husband, father, government relations professional, coach, athlete, and civic leader.●

TRIBUTE TO HON. EDWARD J. DERWINSKI, HON. PAUL FINDLEY, HON. ROBERT McCLORY, AND HON. TOM RAILSBACK

HON. G. V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. MONTGOMERY. Mr. Speaker, I was in my hometown of Meridian, Miss., Tuesday night to attend their annual chamber of commerce banquet and thus was forced to miss the special order by Representative BOB MICHEL in honor of four of our colleagues from the State of Illinois who are leaving this Chamber, Representatives ED DERWINSKI, ROBERT MCCLORY, TOM RAILSBACK, and PAUL FINDLEY.

I want to take this space to add my thoughts to the words of a great many of my other colleagues who have served with these outstanding gentlemen.

ED DERWINSKI has walked these Halls for 24 years since being elected to the 86th Congress. He has been a strong voice for the people of the Fourth District of Illinois and for the Republican Party.

ED has been counted on over the years for guidance and leadership, and he has always come through. I know he has the respect of his peers on both sides of the aisle.

Besides working for his constituents, he has contributed his abilities to the Foreign Affairs Committee and he was the ranking minority member of the Post Office and Civil Service Committee.

I want to wish the very best to ED as he moves over to the State Department. I know he will make a great contribution in his new position.

ROBERT MCCLORY'S retirement this year ends a truly distinguished 20-year career in service to the State of Illinois and to this Nation.

Prior to coming to Congress, BOB worked in the Illinois General Assembly for 12 years.

During his most notable career in this Chamber, he brought leadership to the most important Judiciary Com-

mittee, and retires as the ranking minority member on the committee. He also worked hard on the Permanent Select Committee on Intelligence.

I am honored to have served with this distingushed gentleman and I know his presence will be missed on Capitol Hill when the 98th Congress convenes. I am sure the people of Illinois will also miss his abilities and great integrity. He can truly be proud of these past 20 years. The people of his State can also be proud of his accomplishments.

TOM RAILSBACK has given this country and the State of Illinois 16 great years of service. TOM can be most proud of his efforts on the House Judiciary Committee. He was the ranking member of the Judiciary Committee's Subcommittee on Courts, Civil Liberties and the Administration of Justice.

I know he also spent a great amount of time working in the House Select Committee on Narcotics Control and Abuse.

TOM RAILSBACK is a man of high integrity and it has been a pleasure to serve in this Chamber with a man of his character. I know that he will go on to the vice presidency of the Motion Picture Association and make great contributions in that position. We will miss him.

PAUL FINDLEY has been a distinguished Member of the House of Representatives for 22 years. His leadership and expertise, especially in the fields of agriculture and foreign affairs will indeed be missed.

PAUL has become an expert on the problems faced by America's farmers and the agriculture industry. He has been a leader in this area and I know many of my colleagues have looked to his guidance on agricultural matters.

I know also that PAUL is proud of his accomplishments on the Foreign Affairs Committee. His interest in the field of international relations has been a great asset to the committee and to this Nation. His contributions in these areas will indeed be missed in the years to come.●

HON. ROBERT MOLLOHAN

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. FUQUA. Mr. Speaker, the retirement of ROBERT MOLLOHAN of West Virginia at the end of the 97th Congress marks the end of an illustrious career of public service dating back more than four decades and capped with 18 years of dedicated service in this House spread over 30 years.

During his two separate terms of service in the House, BOB MOLLOHAN was a member of the Armed Services Committee where he has been a strong and effective advocate of American strength of arms.

But even though he may be best known for his work on the Armed Services Committee, his authorship and successful management of the Emergency Medical Services Act of 1973 is a legacy for which generations of Americans can give thanks for years to come.

This legislation has saved countless thousands of lives by establishing the system for effective treatment of emergency medical cases at sites away from the hospital.

While we will all miss BOB MOLLOHAN'S contributions to our deliberations, I take particular pleasure in the knowledge that West Virginia's First District will continue to be represented by Congressman Mollohan, BOB'S son, Alan, who was elected this month to succeed his father.●

THE BEIRUT MASSACRE

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. HOLLENBECK. Mr. Speaker, for the benefit of my colleagues, I submit the following article authored by Rabbi Aryeh L. Gotlieb of the Jewish Community Center of Paramus, N.J., to today's CONGRESSIONAL RECORD.

THE BEIRUT MASSACRE

(By Aryeh L. Gotlieb)

At long last, the world has been compelled to witness a scene that has been enacted over and over again in Lebanon during the last decade. For years Israel alone had alerted the world to tragedies like the massacre that occurred last week in West Beirut. But the world had never stopped to care or even listen. Until now.

There is cause for outrage here on more than one account. There was cold-blooded, brutal murder of uncommon barbarity. The murderers were fueled by a hatred so intense as to blind them to the sight of human anguish and deafen them to cries that should have pierced their ears.

But is wasn't the murderers who were denounced. The blood and guilt were instantly put on the hands of Israel. It was Lebanese who were the murderers in the dreadful massacre. To put the blame on Israel directly or indirectly is to imply that the Lebanese are mad dogs on a leash that were set loose upon the Palestinians—mad dogs, not human beings, not adult, responsible men.

Not all the facts are yet known. The truth as to how many unfortunate victims there were may be buried forever with the victims. But Yasir Arafat can say with assurance that more than 1,500 were killed and that Israel is to blame. With this same assurance he had previously announced that the casualties of Israel's Lebanon action came to 10,000 dead and 100,000 wounded—figures that were proved to be grossly inaccurate.

But accuracy is never the intent of the PLO chief. He has an image to sell. To him the killers and the would-be killers are the victims. Their intended victims become murderers, especially if they can and do fight back effectively.

The movement of Israeli troops into West Beirut was in clear violation of the ceasefire agreement to which Israel was a party. But why does no one cite the PLO for violation of the agreement?

It kept back some 2,000 guerrilla fighters in West Beirut when all were directed to leave. The PLO also kept heavy armaments and weapons which it was ordered to surrender according to the signed agreement. On this score there were protests from no one except Israel.

Did the PLO remain in Beirut with peaceful intentions? Its past history makes this doubtful. Its presence constituted a serious threat to the peace of Lebannon and to the security of Israel, for which Israel sacrificed so many of her sons. The unlawful presence of the PLO required action. When the Lebanese army refused to act, the Christian Phalangists were allowed to enter West Beirut to clear out the PLO.

Old hatreds surfaced last week, seeking vengence for Christians massacred in Damur in 1976. The Damur citizens, in turn, had been murdered in retaliation for Palestinians massacred in Tel Zaatar. Massacre for massacre. Festering feuds of long-standing are a way of life there. The world should know and accept this truth.

Native American and European diplomats concoct plans for peace for this feuding society. If Arab brother can kill Arab brother and mount killing sprees against each other, one can well understand Israel's concern for her own security and her insistence on secure boundaries.

Menachem Begin may lack the TV charisma of other government heads. He also carries the label of intransigence. But Mr. Begin is a man of his word. He gave up the Sinai and forcibly removed Israeli citizens from Yamit. Those who witnessed it on TV will long remember that traumatic experience.

The evacuation from the Sinai cost Israel $17 billion. But Mr. Begin kept that commitment to Camp David. So much for his intransigence.

No one, however, has accused Mr. Begin of being a liar. If he says the Israeli government didn't know of the Beirut massacre, on his past record he deserves to be believed.

That there are protests in Israel tells us more than that the protesters want Mr. Begin and Mr. Sharon to resign. It tells us that Israel is a democracy and its people are free to protest. In the Arab dictatorships there are no protests.

Opposition parties in Israel will do almost anything to get in power, but the stormy debates in Israel's parliament also show that Israelis are a people with a highly developed conscience and moral code. They cannot tolerate the thought that they may in some way be responsible for this kind of bloodshed. This causes them greater anguish than even the loss of lives among their own.

What other nation on earth has shown this kind of moral sensitivity to the value of human life, even the life of an enemy sworn to one's own destruction?

Which Arab nation, which Arab individual was ever heard to protest the PLO murder of innocent Israeli men, women, and children? Such protesters would have been swiftly silenced. Many West Bank Arab leaders died violently because they were ready to negotiate with Israel.

In the Lebanon war, Israel suffered heavy casualties because she sought to avoid casualties among Lebanese civilians. Israel sacrificed the element of surprise in the attacks on Sidon, Tyre, and elsewhere. Leaflets were dropped on the population calling on them to leave the cities and be spared.

In the past, Israel hasn't violated international law in the wars she has fought. Israel's past record of humaneness shouldn't be ignored. This much alone is certain: Those who committed the murders are guilty of murder. And no Israeli soldiers took part in the slaughter.

The demand for an investigation has a hypocritical ring. Where were the demands for an investigation during the last eight years, when Christians, Moslems, Syrians, and PLO forces bathed Lebanese soil in the blood of 100,000 murdered citizens? Where was the investigation when Syrians shelled the Christian quarters of East Beirut?

Where was the investigation when Syria bombarded the Christian city of Zahle in 1981 and kept it under seige? Who was outraged when the 150,000 inhabitants of Zahle suffered from shortages of food, water, and medicine? Israel repeatedly called on the world to respond.

An investigation indeed is in order. The U.N., the Vatican, and all freedom-loving people should be investigated. Why have they all been silent until now?●

HON. ROBERT MOLLOHAN

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. PANETTA. Mr. Speaker, I want to express my gratitude for this opportunity to pay tribute to an outstanding Member of this body who will not be with us in the next Congress, BOB MOLLOHAN. BOB has served with distinction in the House for 18 years, and both we, his colleagues, and his constituents will miss him a great deal. Of course, we are not going to lose sight entirely of the Mollohan family, as BOB's son Alan will replace him in the 98th Congress. We can only hope that he follows the excellent example set by his father.

I know my colleagues join me in wishing BOB MOLLOHAN the best of luck following his retirement. He has served his country and his constituents well.●

DECLARATION ON PREVENTION OF NUCLEAR WAR

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. WYDEN. Mr. Speaker, I rise today to join the world's most distinguished scientists in issuing a plea to all nations to save mankind from the devastation that would result from a nuclear war—a devastation from which no nation is immune.

Last September, 67 of the world's leading scientists representing 27 countries met at the Vatican's Pontifical Academy of Science to discuss nuclear weapons and nuclear war. Their meeting was convened by the Pope, and included the president of the U.S. Academy of Scientists and his counterpart in the Soviet Union.

This meeting was the culmination of a series of efforts by these scientists, which began with a meeting convened last February in Vienna by Cardinal Konig of Austria. The scientists then met at the Royal Society in London and again at the Pontifical Academy last June.

Never has such a distinguished group of scientific experts come together to use their creative energy to shed the light of science on a public issue. That they have done so now attests to the unprecedented danger posed to life on our planet by the existence of nuclear weapons.

It also reflects the awakening alarm in millions of citizens around the globe—millions of citizens who have joined together to call for an end to the peril of living on the brink of annihilation.

These scientists came together because they feel a special responsibility to mankind; after all, it is the perversion of their achievements which has resulted in the greatest known threat to mankind.

And after months of careful deliberation and study, they issued a final resolution, which they presented to the Pope. The delegates' inescapable conclusion was that there can be no higher moral or political obligation than to prevent the outbreak of a nuclear war. They recognized that no nation can be secure unless we reduce this threat, and they specified several steps needed to do this.

We cannot afford to let the fruits of this meeting of our greatest minds slip by us. The prevention of a nuclear holocaust will take all of the creativity we can muster—and it must be our most pressing goal.

That is why today I am introducing a joint resolution declaring the prevention of nuclear war a central security goal of the United States. This resolution, already introduced in the Senate by Senator ALAN CRANSTON, also calls on the President to give urgent consideration to the resolution developed by the delegates to the pontifical assembly in Rome.

I urge my colleagues to join me in this effort. As Senator CRANSTON pointed out in introducing this resolution in the Senate, "Whether you and I agree in whole or in part with the statements contained in this declaration (by the scientific community), they are of transcendent importance."

It is my hope that by focusing attention on the findings of this distinguished group, we will all feel the sense of urgency we need to bring mankind back from the brink of nuclear disaster. And it is not a false urgency. As each moment passes, our world, and that of our children, becomes less secure.

Again, I invite my collegues to join me in cosponsoring this joint resolution. We must make the prevention of nuclear war the central security goal of the United States. We must explore with other nations alternative methods of resolving conflict. As long as nuclear weapons exist on our planet, we must make every effort to insure they are never used.

H.J. RES. 626

Whereas leading scientists from more than thirty countries, including presidents of the scientific academies in the United States and many other nations, have met in Rome in an assembly convened by the Pontifical Academy of Sciences to consider the unprecedented threat of nuclear war;

Whereas these leading scientists on September 24, 1982, unanimously issued a Declaration on the Prevention of Nuclear War outlining the overwhelming dangers of nuclear destruction, including the possible annihilation of all civilization;

Whereas this declaration, as the culmination of careful study of the threat facing the world, proposes a succession of steps to curb the development, production, testing and deployment of nuclear weapons systems, and to reduce them to substantially lower levels with the ultimate aim of their complete elimination; and

Whereas the Governments of the United States and the Soviet Union have never joined to make the all-out, determined creative effort that must be undertaken to prevent nuclear war: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress of the United States—

(1) declares and affirms that a central goal of United States international security policy should be to achieve a mutually verifiable agreement for the curbing of the development, production, testing and deployment of nuclear weapons and for their reduction and ultimate elimination so that no such weapon is ever again used on the face of the earth; and

(2) requests the President of the United States to give special and urgent consideration to the facts presented and the specific steps recommended in the Declaration on Prevention of Nuclear War, and by March 1, 1983, to report to the Congress and to the American people whether he accepts, in whole or in part, the findings and recommendations in this Declaration, and, further, to report the reasons for such acceptance or rejection.

DECLARATION ON PREVENTION OF NUCLEAR WAR, SEPTEMBER 24, 1982

(Presented to His Holiness the Pope by an assembly of Presidents of Scientific Academies and other scientists from all over the world convened by the Pontifical Academy of Sciences.)

I. PREAMBLE

Throughout its history, humankind has been confronted with war, but since 1945 the nature of warfare has changed so profoundly that the future of the human race, of generations yet unborn, is imperilled. At

the same time, mutual contacts and means of understanding between peoples of the world have been increasing. This is why the yearning for peace is now stronger than ever. Mankind is confronted today with a threat unprecedented in history, arising from the massive and competitive accumulation of nuclear weapons. The existing arsenals, if employed in a major war, could result in the immediate deaths of many hundreds of millions of people, and of untold millions more later through a variety of aftereffects. For the first time, it is possible to cause damage on such a catastrophic scale as to wipe out a large part of civilization and to endanger its very survival. The large-scale use of such weapons could trigger major and irreversible ecological and genetic changes, whose limits cannot be predicted.

Science can offer the world no real defense against the consequences of nuclear war. There is no prospect of making defenses sufficiently effective to protect cities since even a single penetrating nuclear weapon can cause massive destruction. There is no prospect that the mass of the population could be protected against a major nuclear attack or that devastation of the cultural economic and industrial base of society could be prevented. The breakdown of social organization, and the magnitude of casualties, will be so large that no medical system can be expected to cope with more than a minute fraction of the victims.

There are now some 50,000 nuclear weapons, some of which have yields a thousand times greater than the bomb that destroyed Hiroshima. The total explosive content of these weapons is equivalent to a million Hiroshima bombs, which corresponds to a yield of some three tons of TNT for every person on earth. Yet these stockpiles continue to grow. Moreover, we face the increasing danger that many additional countries will acquire nuclear weapons or develop the capability of producing them.

There is today an almost continuous range of explosive power from the smallest battlefield nuclear weapons to the most destructive megaton warhead. Nuclear weapons are regarded not only as a deterrent, but there are plans for their tactical use and use in a general war under so-called controlled conditions. The immense and increasing stockpiles of nuclear weapons, and their broad dispersal in the armed forces, increase the probability of their being used through accident or miscalculation in times of heightened political or military tension. The risk is very great that any utilization of nuclear weapons, however limited, would escalate to general nuclear war.

The world situation has deteriorated. Mistrust and suspicion between nations have grown. There is a breakdown of serious dialogue between the East and West and between North and South. Serious inequities among nations and within nations, shortsighted national or partisan ambitions, and lust for power are the seeds of conflict which may lead to general and nuclear warfare. The scandal of poverty, hunger, and degradation is in itself becoming an increasing threat to peace. There appears to be a growing fatalistic acceptance that war is inevitable and that wars will be fought with nuclear weapons. In any such war there will be no winners.

Not only the potentialities of nuclear weapons, but also those of chemical, biological and even conventional weapons are increasing by the steady accumulation of new knowledge. It is therefore to be expected that also the means of non-nuclear war, as horrible as they already are, will become more destructive if nothing is done to prevent it. Human wisdom, however, remains comparatively limited, in dramatic contrast with the apparently inexorable growth of the power of destruction. It is the duty of scientists to help prevent the perversion of their achievements and to stress that the future of mankind depends upon the acceptance by all nations of moral principles transcending all other considerations. Recognizing the natural rights of humans to survive and to live in dignity, science must be used to assist humankind towards a life of fulfillment and peace.

Considering these overwhelming dangers that confront all of us, it is the duty of every person of good will to face this threat. All disputes that we are concerned with today, including political, economic, ideological, and religious ones, are small compared to the hazards of nuclear war. It is imperative to reduce distrust and to increase hope and confidence through a succession of steps to curb the development, production, testing, and deployment of nuclear weapons systems, and to reduce them to substantially lower levels with the ultimate hope of their complete elimination.

To avoid wars and achieve a meaningful peace, not only the powers of intelligence are needed, but also the powers of ethics, morality, and conviction.

The catastrophe of nuclear war can and must be prevented. Leaders and governments have a grave responsibility to fulfill in this regard. But it is humankind as a whole which must act for its survival. This is the greatest moral issue that humanity has ever faced, and there is no time to be lost.

II

In view of these threats of global nuclear catastrophe, we declare:

Nuclear weapons are fundamentally different from conventional weapons. They must not be regarded as acceptable instruments of warfare. Nuclear warfare would be a crime against humanity.

It is of utmost importance that there be no armed conflict between nuclear powers because of the danger that nuclear weapons would be used.

The use of force anywhere as a method of settling international conflicts can entail the risk of military confrontation of nuclear powers.

The proliferation of nuclear weapons to additional countries seriously increases the risk of nuclear war and could lead to nuclear terriorism.

The current arms race increases the risk of nuclear war. The race must be stopped, the development of new more destructive weapons must be curbed, and nuclear forces must be reduced, with the ultimate goal of complete nuclear disarmament. The sole purpose of nuclear weapons, as long as they exist, must be to deter nuclear war.

III

Recognizing that excessive conventional forces increase mistrust and could lead to confrontation with the risk of nuclear war, and that all differences and territorial disputes should be resolved by negotiation, arbitration or other peaceful means, we call upon all nations:

Never to be the first to use nuclear weapons;

To seek termination of hostilities immediately in the appalling event that nuclear weapons are ever used;

To abide by the principle that force or the threat of force will not be used against the territorial integrity or political independence of another State:

To renew and increase efforts to reach verifiable agreements curbing the arms race and reducing the numbers of nuclear weapons and delivery systems. These agreements should be monitored by the most effective technical means. Political differences or territorial disputes must not be allowed to interfere with this objective;

To find more effective ways and means to prevent the further proliferation of nuclear weapons. The nuclear powers, and in particular the superpowers, have a special obligation to set an example in reducing armaments and to create a climate conducive to non-proliferation. Moreover, all nations have the duty to prevent the diversion of peaceful uses of nuclear energy to the proliferation of nuclear weapons;

To take all practical measures that reduce the possibility of nuclear war by accident, miscalculation or irrational action.

To continue to observe existing arms limitation agreements while seeking to negotiate broader and more effective agreements.

IV

Finally, we appeal.

1. To national leaders, to take the initiative in seeking to reduce the risk of nuclear war, looking beyond narrow concerns for national advantage; and to reject military conflict as a means of resolving disputes.

2. To scientists, to use their creativity for the betterment of human life, and to apply their ingenuity in exploring means of avoiding nucler war and developing practical methods of arms control.

3. To religious leaders and other custodians of moral principles, to proclaim forcefully and persistently the grave human issues at stake so that these are fully understood and appreciated by society.

4. To people everywhere, to reaffirm their faith in the destiny of humankind, to insist that the avoidance of war is a common responsibility, to combat the belief that nuclear conflict is unavoidable, and to labor unceasingly towards insuring the future of generations to come.

HON. ROBERT H. MOLLOHAN

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. MINISH. Mr. Speaker, the final adjournment of the 97th Congress will mark the end of the congressional service of our distinguished colleague, BOB MOLLOHAN, of West Virginia. My service with him on the Administration Committee has allowed me many opportunities to observe BOB'S dedication to public service as well as his many amiable personal qualities. His dedication to the public interest and his tireless work on behalf of his constituents in West Virginia make him an asset which the Congress will sorely miss.

BOB retires with the unusual gratification of being succeeded by his own son and namesake, who we hope will carry on in the fine tradition of his father. The younger Mr. Mollohan's election is certainly in some measure a tribute to the esteem his constituents feel for his father, as well as to his own good qualities. This must be a happy time for the Mollohan family, and they certainly deserve this happiness.

I want to extend to my friend my congratulations and hearty best wishes upon his retirement.●

HAIL TO THE BRAVE

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. MOTTL. Mr. Speaker, I would like to recognize the proud veterans of the 508th Parachute Infantry Regiment (PIR) of the 82d Airborne Division, 3d Battalion. It was known as the Diablo Regiment.

In October of this year, the 508th PIR Museum was created in Wollanton Hall, just outside Nottingham, England. Wollanton Hall overlooks the exact location of the base camp of the 508th during World War II. From there, the regiment embarked for Normandy and Holland—part of the largest invasion force ever put together.

The 508th also was actively a part of the Ardennes (Battle of the Bulge) and Germany campaigns. The 508th served as part of Gen. Dwight D. Eisenhower's honor guard during the occupation of Germany. The regiment was deactivated in 1946 after distinguishing itself during the course of World War II.

Recently, veterans of the 508th assembled at the Arlington National Cemetery to be honored with a marble monument and a special grove of newly planted blue spruce trees. Special ceremonies then took place at the Tomb of the Unknown Soldier, and the 508th, led by Col. Louis Mendez, C.O. 3d Battalion—retired, presented a plaque honoring our Nation's veterans.

Donald I. Jakeway, staff sergeant—508th from 1942-45 of Johnstown, Ohio, is coordinating efforts to add to the collection of the PIR museum. I hope this museum flourishes in perpetuating the memory of the valiant efforts of the men of the 508th PIR who joined with other American fighters to free Europe and much of the world from the terrifying rule of Nazis and Fascists.●

STUDENT AID AND POLITICS

HON. PETER A. PEYSER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. PEYSER. Mr. Speaker, I would like to call to the attention of my colleagues a paper on "Student Aid and Politics, The Importance of the Student Vote," written by David K. Trowbridge of Bedford, N.Y. David recently served as a congressional intern and through this experience had an opportunity to view the legislative process first hand.

The paper examines the potential impact students could have in the electoral process. I personally believe that the best way for students to effectively voice their views is through the ballot box.

I commend this paper to my colleagues' attention, and ask that it be inserted at this point in the RECORD.

The material follows:

STUDENT AID AND POLITICS: THE IMPORTANCE OF THE STUDENT VOTE

(By David K. W. Trowbridge)

Ever since the Reagan Administration proposed to cut financial aid to students and universities by more than 25 percent, there has been a strong outcry from the some seven million students who turn to the government for aid. Reductions in these $11 billion programs, which President Reagan intends to either phase out or drastically cut, directly affect the future of these young people. It is therefore imperative that students collectively vote to ensure the safety of these programs. But will they? Since the establishment of the 18 year old voting age students have demonstrated one of the poorest voting percentages.

Not since the Vietnam War (the major reason for allowing 18 year olds to vote) have students had an issue touch their lives so closely. Although there has been a strong vocal resentment against any such cuts students must take stronger actions. They must vote to select candidates who will restore their programs. However, this has not been the case. In the 1980 Presidential election only 35.7 percent of the 18 to 20 year olds voted while 59.2 percent of the overall population voted.

Under the Administration's proposed new budget no student financial aid program would go unscathed. Pell Grants ($2.346 billion appropriations in Fiscal Year 1981) which are based on a student's ability to demonstrate financial need, would be cut by 40 percent. Supplemental Ed. Opp. Grants which are awarded to students with exceptional financial need, would be eliminated altogether. And even the largest program, which affects the most number of students (3.5 million) is planned to be cut 18.8% with an appropriations budget of $2.485 billion. That program is the Guaranteed Student Loan Program (GSL).

The current GSL program entitles families with an income of under $30,000 without regard for need to apply, and families above $30,000 are eligible if they can demonstrate exceptional financial need. Recently Congress raised the maximum loan amount for undergraduates to $2,500 annually and $12,500 cumulatively, while graduate students are now eligible to borrow $5,000 a year and an aggregate amount of $25,000. The increase was to compensate for the substantial growth in tuition fees. After an application has been approved, the student is required to pay 5% of the loan to the lender who transfers it to the federal treasury as an origination fee. This measure reduces the financial burden on the government. The origination fee is the only payment a student makes on the loan until after the grace period of six months after the student graduates or drops below half time status expires and then he must pay monthly installments. There is no specified federal time limit on when the loan must be repaid.

The program allows students to borrow money at low interest rates, currently 9%, from banks, savings and loan associations and credit unions with the obligation of fully repaying these loans. The federal government or a guaranty agency guarantees these loans completely because students are considered such a "high risk". Since thrift institutions still hesitate to make such loans, the government has promulgated two special enticements; the in-school interest subsidy and the Special Allowance. The former refers to the federal government paying any interest compounded on the loan during the students enrollment. The Special Allowance is a bonus paid by the government to the lender based quarterly on a percentage of the total principal still outstanding until the loan is fully repaid. These two enticements have expanded the costs of the program considerably and lead many experts to believe the program to be "uncontrollable." Because it is an entitlement program there is no federal limit on (1) the number of new GSL loans, (2) the total amount of new loan volume, and (3) the interest and the insurance costs.

In order to reduce the GSL program by an estimated $576 million (18.8%) the Reagan Administration has recommended a six point plan to amend certain aspects of the program.

1. Reagan intends to double the origination fee from the present 5% to 10%. This in effect reduces the amount available to the student by 5%.

2. All applicants, including those students with an income of under $30,000, must meet the proposed financial needs test.

3. No graduate students would be eligible to receive GSLs and could borrow only under a separate and new 14% "auxiliary" loan program which would increase the interest rate for graduate students by more than 50%.

4. The Special Allowance interest payments would be eliminated two years after the borrower leaves school. "This would allow lenders to convert the loan to either a new fixed or variable repayment contract with no further federal interest subsidies", but would also deter many potential lenders who depended on the bonus.

5. and 6. The final two amendments refer to the insurance and reinsurance premium for both guaranty agencies as well as direct insurance from the federal government, which would make the loans more restrictive and less attractive to prospective private capital.

If the Administration receives all of these amendments, the GSL program will be appropriated $2.485 billion instead of the current $3.061 billion.

The rationale behind the Administration's FY83 budget for GSLs stems from the same ideology that is the foundation of President Reagan's economic policies. In order to reduce the role of big government in American lives, there must be a reduction in federal domestic spending. This would alleviate the $110 billion deficit and help to stimulate the American economy. Furthermore, the primary responsibility for financing college should originate from the family and not the government. This strategy side steps the policy that the federal government is responsible for providing sufficient funds to permit students of any income to attend any university regardless of the cost. The proposed budget is also an attempt to "reform" the GSL program to be a more cost effective "entitlement" program, thereby reducing federal expenditures. Reagan contends that these cuts still allow the "needy students" access to higher education. "A lot of people have simply been misled," Reagan says. "We haven't cut loans. We've cut the cost to taxpayers of making these loans available." Reagan's point was that "despite budget cuts in the program, the volume of student loans would increase".

"The Administration is advocating abandonment of a 25 year old commitment that college will not be denied to any person because of financial conditions", stated Jack Peltason, President of the American Council of Education. This response was indicative of the negative attitude of the higher education community concerning Reagan's proposed cuts. Many believe as does the President of the National Association of Independent Colleges and Universities "that attrition (of the student body) will increase drastically if the Administration's budget proposals are enacted in large part", and that it will deny many students the opportunity to attend more challenging schools that meet their academic needs. Some opponents strongly suggest that the results of these cuts will lead to a "two tiered system of higher education, offering elite private education for the rich and state or municipal colleges for everyone else". Another argument, fostered by critics, is that it would inhibit the already strained "cash flow" from lenders who consider the auxiliary loans a "poor risk". The auxiliary loans, which would be the exclusive source of GSLs for the 600,000 graduate students, remains a new, untested part of the GSL program. Congressman Peter Peyser advocates that there should be "absolutely no further cuts in the student programs" and that Americans "stay with education as the strongest defense we have to protect this country and its future".

As the Administration's Economic Recovery Act of 1982 begins to take effect and with the threat of further reductions in GSLs, students, universities and states are looking for alternative ways of financing post secondary education. Some states are creating new loan programs to compensate for the federal cuts. Illinois has established an agency which has authority to issue tax free bonds with the proceeds going to private colleges to help lend low interest rate money to students. Massachusetts has also enacted legislation to raise money that will be loaned to students at an interest rate of 10%. Colleges as well are demonstrating innovative ways of financing. Dickerson College provides a ten year loan program at 13% interest rate for students who were excluded from GSLs because of more stringent eligibility requirements. Other schools such as Washington University are allowing parents to pay all four years of tuition in advance so that they can avoid the increases in tuition. Unfortunately some colleges have withdrawn from the policy of "blind admissions", accepting students regardless of their ability to pay. Students are also beginning to participate by once again working their way through college. Johns Hopkins has tentative plans to create a jobs program with the local business community.

Students, however, now have the opportunity to select candidates who will implement legislation beneficial to their needs which was not the case before the 26th Amendment was ratified. In 1970 President Nixon backed a proposal to lower the voting age from 21 to 18, thus initiating the Voting Rights Act of 1970. This legislation passed Congress with a majority vote on June 17. The Supreme Court, however, challenged the legality of the Bill with critics saying that "the Constitution gives voter qualification power to the individual states not to the federal government". In a split 5-4 decision the Court ruled that 12 to 21 year olds could vote in federal elections (Congressional and Presidential) but in another split decision it declared that Congress does not have the right to fix state voting age. After the Court had thus ruled it would require two-thirds of the states to ratify this legislation in order for it to become the 26th Amendment. On June 30, 1970 Ohio was the state that granted any citizen 18 years or older the right to vote.

Students should voice their protest against any "cuts" by going directly to the polls. Still, if they wish to have any impact, there must be an increase in the number of voters. Congressman Peyser announced that "a nationwide campaign is being launched on the college campuses throughout this country to enroll at least one million students who are not presently registered to vote". The campaign consists of a coalition of student organizations that would be campus based with statewide coordinators. Through this network of campuses, these groups will concentrate on close election districts and will conduct seminars to educate students about registration. In a trial run last year the American Democratic Association in conjunction with the Young Democrats registered a "few thousand" students according to Charlie King with Student PAC. In addition a coalition of different student groups is attempting to initiate a resolution in Congress that would make the last week in September "Student Registration Week". This plan has not been brought before any committee and no action has been taken on it in Congress.

"It was not many years ago this Congress passed the legislation enabling the 18 year old to vote. At that time it was said that if these young men were old enough to fight for their country, they were old enough to vote. Today if they are old enough to be in college, certainly they should be smart enough to register to vote and make their voices heard in the 1982 election." (Congressman Peter Peyser, March 31, 1982.)●

MORE INACTION

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. BEREUTER. Mr. Speaker, an editorial from the Norfolk Daily News examined the House failure to forward the balanced budget amendment to the States for ratification and pointed out that the action suggest that more than one-third of the Members regard deficits as something either tolerable or incurable.

I would like to include the commentary in the RECORD now for the benefit of my colleagues.

[From the Norfolk Daily News, Oct. 8, 1982]

MORE INACTION

The effort to obtain early ratification of a balanced-budget amendment failed. It was not because a majority in Congress disapproved, but because the two-thirds margin required was missing. The Senate had passed the measure 69-31, but the House 236-187 vote was 46 short of the two-thirds majority necessary to forward the amendment to the states for ratification.

The issue is not dead. It will rise again in the next session of Congress. Sentiment in the Senate is unlikely to change markedly. With a majority in the House willing to have the issue reconsidered, it can be revived by the new cast of characters on Capitol Hill.

They are likely to feel some heat from state legislatures on the issue. Thirty-one out of a needed 34 states have taken the initiative in calling for a constitutional convention to present the budget-balance measure. Some fear that approach to constitutional change as offering an opportunity for unwanted, extraneous issues to be presented. The aim of action by the state legislatures, however, was for consideration of a narrow issue—balanced budgets.

It is preferable that Congress take the initiative and adopt a simple measure—that which is now rejected was appropriate. It allowed for necessary emergency exceptions, while stating clearly that budget-balances are to be the rule. Today, budget imbalances are the rule, balances an exception.

Critics of an amendment on this subject believe it to be the sort of detail which ought no be reflected in the Constitution. Obviously the framers of the document never thought of it. That is because they could not then conceive of successive Congresses and chief executives getting the deficit habit.

For Congress now to oppose change suggest that a little more than one-third of its members, enough to stop action, regard deficits as either something to be tolerated or incurable. So why bother? Deficits are a sinister way to levy taxes, however, and a certain way to eventual ruin of a free economy.●

A TRIBUTE TO EDITOR TRUDI COWAN OF BELLMORE

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. LENT. Mr. Speaker, I rise to bring to the attention of my colleagues the career and achievements of a remarkable newspaper woman who had made outstanding contributions to the community of Bellmore, N.Y., in the Fourth Congressional District which I have the honor to represent.

I refer to Trudi Cowan, editor of the Bellmore Life newspaper. Her energy, ability, and dedication have made her professional career a brilliant one, which, by itself, would be worthy of our commendation. But Trudi Cowan has gone far beyond the heavy demands of her position as editor of the Bellmore Life to become deeply involved in the civic activities and projects of her community of Bellmore.

Never is there an activity of interest or concern to the people of Bellmore without Trudi offering her assistance. Whatever might be involved—civic projects, community events, neighborhood programs to promote safety, or other civic activities—Trudi Cowan is always volunteering her services, her stimulating and productive ideas, and her time. She is a true community leader.

Trudi Cowan is also tremendously interested in the history of the Bellmore community. She is currently the president of the Bellmore Historical Society. Her special project is a concerted effort to rekindle interest in the historical events that have involved Bellmore and the people of Bellmore. In this effort, her position as editor of the Bellmore Life gives her a unique platform to stimulate interest in Bellmore's past.

As one who is a regular reader of the Bellmore Life I have great admiration for Trudi Cowan's abilities as a journalist. She never hesitates to take a stand on issues of community interest. She battles fiercely for the public's right to know, including going to court in an effort to uphold the right to publish the names of law violators in the Bellmore area. Her close attention to the problems and the activities of the Bellmore community have made her newspaper must reading for residents of the area. The Bellmore Life is a powerful and respected force for community betterment.

Mr. Speaker, I know that my colleagues in this Chamber join me in saluting the career and achievements of Editor Trudi Cowan, and in offering all good wishes for continued success in the future.●

LAW OF THE SEA TREATY

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. FIELDS. Mr. Speaker, I share with my colleagues a recent commentary from the Houston Post concerning the Law of the Sea Treaty. It is so evident to the American people that this so-called treaty is nothing but a sellout of American interests and principles, and it is only supported by a small group of left-leaning elitists and one-world idealists.

I commend the Houston Post for taking interest in this significant and timely issue.

The article follows:

[From the Houston Post, Nov. 7, 1982]

SEABED RIPOFF

The tenet that the oceans are the common heritage of mankind was accepted in a spirit of brotherhood when there was little or no thought of material gain to be had from the depths of international waters. Discovery through modern technology of rich mineral deposits on the seabed has altered that thinking.

The intensity of the scramble to divvy up the undersea mineral wealth continues to be demonstrated as the proposed international Law of the Sea Treaty moves nearer to ratification. The plenary session of the Third United Nations Law of the Sea Conference convened in New York could put the stamp of final approval on the treaty, which contains a seabed mining control provision that is counter to the interests of the United States. It would discourage interests in this country and other industrial nations from conducting offshore mining operations.

Under the proposed provision, rights would be assigned to mine "the seabed and ocean floor and subsoil thereof beyond the limits of national jurisdiction." At stake are rights to known and yet undiscovered deposits of oil, gas, cobalt, manganese, nickel and other strategic minerals. Rights to those minerals occurring in highly concentrated form in nodules on the ocean floor were unimportant when no one had the technology to recover them. That technology is now available in the United States, where millions in private capital have been spent in preparation for the day when seabed mining can begin. The United States has agreed not to allow commercial mining of the seabed before 1988 unless the treaty is ratified sooner. The treaty will become effective a year after it is ratified by at least 60 nations.

So far 130 nations have, by vote, agreed in principle to the treaty's terms. The United States, along with Israel, Turkey and Venezuela, voted against the draft treaty in April. Seventeen other countries, including Britain, West Germany and the Soviet Union, abstained. Significantly, the 21 countries opposing or abstaining in that vote account for 60 percent of the gross national product in the world. The treaty probably would have clear sailing if it were not for the seabed mining provisions, which the United States should continue to oppose as inequitable and counterproductive.

Under the current draft, deep-sea resources would be administered by a Seabed Authority composed of international representatives empowered to set quotas, control marketing and fix prices on a one-nation, one-vote basis with no veto privileges. Most of the backers of the treaty are developing nations and landlocked countries. They would have a strong influence on determining how the seabed wealth is shared, whether or not they participated in the mining or financing. Countries such as Zambia, Zaire, Gabon and the Dominican Republic have vested interests in how production quotas might be set for nickel, cobalt and manganese. They are the world's major sources of those strategic metals.

Further, the United States and other industrial nations whose industries are capable of conducting off-shore mining would be subject to Seabed Authority control, fees and taxes to the extent that they would, in effect, have to share profits with countries that contribute nothing. Also, there is no provision that mining groups, such as U.S. consortiums that have already invested millions of dollars in research and development, will be assured of a license to work areas they have explored. The Seabed Authority system as drafted offers too much risk and too little incentive for ventures by the only ones capable of mining the ocean floors.●

CORRECTIONS OFFICERS DESERVE OUR SUPPORT

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. FUQUA. Mr. Speaker, the men and women who serve as corrections officers in prison facilities throughout our Nation deserve to be congratulated for the outstanding work they do. Often theirs is a thankless task. It seems the only time we really stop to consider these people as individuals is when there is trouble in the facility.

I am today including in the RECORD a letter I received from the employees of the Baker Correctional Institution in Olustee, Fla. In paying special attention to Lt. Joseph H. Kennedy, I believe we honor all these fine people for the work they do and the bravery they exhibit.

SEPTEMBER 19, 1982.

DEAR SIR: We the officers at Baker Correctional Institution, would like to take this opportunity to bring to your attention, the admiration and appreciation we feel for Lt. Joseph H. Kennedy, C.S.S.S.I.

On the day of September 14, 1982, at approximately 2:40 PM, a disturbance broke out in the library, in H Building, at Baker Correctional. Sgt. Joseph M. Combs, O.I.C., was notified of the situation and he along with Lt. Kennedy and several other officers responded to the call. Almost simultaneously another incident occurred in the Multipurpose Building, located at the other end of the compound. Between 2:40 PM and 2:50 PM there had been four officers injured (one requiring emergency medical treatment at an outside facility), and several inmates injured (two requiring emergency medical treatment at RMC) and property damage to the Library and East end canteen.

It is our belief that Lt. Kennedy's prompt and precise actions prevented a major disturbance from occurring and limited injury and damage.

At approximately 2:50 PM Lt. Kennedy ordered the Control Room to sound Recall, wait five minutes, sound Recall again and allow the inmates five minutes to clear the compound, and lock down the dorms. This was done! Sir, this one action gave us back the control, that had been slipping away, allowing us to secure the compound and our positions.

Unless you've been in a situation such as this, there is no understanding the respect and admiration we feel for Lt. Kennedy. By knowing his job and being in control of himself, he prevented further injury and damage to his officers, the inmates and the compound, that would certainly have occurred had the situation been allowed to continue.

Often a man in Lt. Kennedy's position comes under fire for their action and impromptu decisions, decisions that can literally mean life and death. We, the officers that work with Lt. Kennedy know him to be a man who stands steadfast in his beliefs, knows the rules and goes by the book. He is, also, a man who cares for his officers and can be counted on to stand by them. With men like this it makes it easy to be a team, and teamwork is what we had. Under his supervision approximately thirty unarmed men (security and administrative) went up against approximately 911 inmates armed with weights, rocks, chairs and broom handles. With teamwork we cleared the compound, locked down the dorms, quelling a possible major disturbance. After the compound was cleared, no other incidents were reported.

A disturbance, major or minor, is certainly every Correctional officer's nightmare. It gives you confidence to know that you have men such as Lt. Kennedy working with you. This is our way of saying thank you, Lt. Kennedy for being there . . .

Sincerely yours,

THE EMPLOYEES AT BAKER CORRECTIONAL.●

TRIBUTE TO ROBERT H. MOLLOHAN

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. FORD of Michigan. Mr. Speaker, I will miss ROBERT MOLLOHAN as both a friend and colleague when he retires at the end of the 97th Congress. I have had the pleasure of serving with BOB for the past seven Congresses. As a member of the executive committee of the Congressional Steel Caucus, BOB has been instrumental in our attempts to insure that the American steel industry receives equitable treatment in the world markets.

More importantly, BOB has ably represented the interests of West Virginia, without bowing to pressure from special interests. His unwavering commitment to fairness and justice in our society will be greatly missed in the Halls of Congress. I wish BOB all the luck in the world in his endeavors outside of Congress, and I look forward to serving with his son.●

FOREIGN IMPORTS

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. APPLEGATE. Mr. Speaker, I want to take this opportunity to share with my colleagues in the House an open letter to President Reagan regarding a problem of increasing severity, that being the adverse impact of foreign imports on the U.S. economy. It is a matter that must be addressed by both the administration and Congress if we are ever to regain the manufacturing superiority that this Nation once enjoyed.

The text of the letter is as follows:

DEAR MR. PRESIDENT: How can you be so insensitive to America's fourteen million unemployed people?

You have within your power the ability to take steps that would slow, if not halt, the current influx of imported goods of all kinds to this country and thus eliminate much of our unemployment problems. I assume, however, that you refuse to do this on the basis of your free trade philosophy. While free trade in its purest form may be proper, to hold the theory now at a time when there is total inequity between the trade laws of this nation and our foreign competition is to deny many of our unemployed the opportunity to return to their jobs. With this philosophy at this time, you are allowing other nations to exercise their control over our economic market. You are permitting these nations to do to us what we seemingly cannot, or would not, do to them.

If you would give careful consideration to this nation's basic industries such as steel, autos, electronics, footwear, pottery and hand and machine tools just to mention a few, it would be obvious that some help is needed from the Federal government to allow these industries to be competitive in the world market. You can provide this help by supporting some type of parity in our existing trade laws. A good start on this road to recovery would be your open endorsement of Senate Bill 2094, a bill to amend the Trade Act of 1974, to ensure reciprocal trade opportunities. This has already passed the Senate and is now pending in the House of Representatives.

Mr. President, how can you refuse to restrict steel and auto imports when you imposed sugar quotas in 1981 to get the votes you needed to pass your economic reform package. Even now, you are threatening those European countries which subsidize their agricultural products by dumping excess dairy products into the world market. These actions are all well and good, not to mention justifiable; however, America's basic industries deserve equal treatment as well. Your free trade principles must apply across the board to all industries, not just a select few that are politically advantageous at a certain time.

Think about it, Mr. President. Care about the people and do something to help them.

Sincerely,

DOUGLAS APPLEGATE,
Member of Congress.●

A DAY OF SORROW

HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. WALKER. Mr. Speaker, I would like to take this opportunity to submit in the RECORD the following statement entitled "A Day of Sorrow" compiled by the Congress of Russian-Americans. I believe my colleagues will find this proclamation concerning the suppression of freedom and basic human rights by the Soviet Government of great interest.

The statement follows:

A DAY OF SORROW

On the 65th anniversary of the "October Revolution", we, as Russian-Americans, wish to remind the Free World that on November 7, 1917 the Bolshevik Communist Party deprived the peoples of Russia of their liberty.

Since that day the Soviet government under the leadership of its Communist Party has continually perpetrated crimes that are an affront to humanity. Among them:

The creation of an Orwellian state founded on a basis of human fear and ignorance and maintained by a ruthless military police;

The "reedification" of the Russian peoples, a policy inaugurated by the heinous murder of the royal family and pursued in the hopes of stripping the Russian peoples of their heritage and thereby creating the ideal human cipher, Homo Sovieticus;

The desecration and destruction of over 50,000 churches and monasteries;

The forcible collectivization of peasants, an act which resulted in the death by starvation of seven million people;

The exploitation of workers and the reduction of peasants to the status of government serfs;

The abandonment of Soviet P.O.W.'s (branded "traitors" by the Soviet regime) in Nazi war camps, resulting in the death of 4,650,000 native sons by starvation and disease;

The forceable repatriation of Soviet citizens remaining in Western European countries after the war and the subsequent imprisonment of these citizens in concentration camps;

The extermination of tens of millions of people in concentration camps and prisons;

The mental and physical torture of countless millions without regard to human rights or dignities;

The military suppression of any popular uprisings within the Soviet Union or any of its satellite nations, particularly Hungary, Czechoslovakia, and Poland;

The creation, through the wanton exploitation of natural resources and environment, of an aggressive military machine which continues to grow at the expense of the people's needs and aspirations;

The suppression of the freedoms of religion, thought, speech, and the press and the persecution of individuals for their religious convictions and their beliefs in basic human rights.

No document can enumerate the countless crimes perpetrated by the Soviet Government against its peoples. Only the tears of an anguished and suffering people can serve

to measure these atrocities. To these tears we direct our hopes, our prayers, and our actions.

The 7th of November, the day of pompous Soviet celebrations, parades and deceitful proclamations about the "struggle for peace" and about the "joyous life" of Soviet citizens, we designate as a Day of Sorrow and Irreconcilability.

This Day of Sorrow and Irreconcilability has been faithfully observed by Russian-Americans and by all Free Russians for the past six decades. Throughout all these years Russians free in mind and spirit have continually attempted to warn the Free World of the threatening Communist danger, but to no avail.

Once again, we appeal to the government of the United States of America to proclaim this day as a Day of Sorrow and Irreconcilability and we invite the citizens of this country to join us in prayers for those who perished at the hands of Communism and for the deliverance of those presently living under the yoke of Communism.●

BOB McCLORY—THE DEDICATED PUBLIC SERVANT

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. O'BRIEN. Mr. Speaker, one of my great pleasures while serving in Congress has been knowing BOB MCCLORY.

He is a fine and dedicated public servant. He is also a true gentleman, the kind of Congressman we all aspire to be!

BOB's crucial role in the Watergate proceedings of a decade ago may well go down as his finest hour, which is just, because BOB did a first-rate job with that very distasteful responsibility.

Mentioning that one episode of his 20-year congressional career should not cause us to overlook another distinction of this 20-year veteran: his involvement in the day-to-day business of his district and committees.

No constituent inquiry has ever been too small, nor any committee matter too insignificant for BOB's full attention. His procedure in all cases—from lost social security checks to the mammoth bills before the Judiciary Committee—has been to make an informed judgment and then get results. There are people from Waukegan to Aurora who can tell you that BOB has done right by them, and there are people from Maine to California who can also make that statement.

In this way BOB has been an exemplary Congressman: Tending to the needs of his district, and ever mindful of the national interest. He has made a great difference in this body, and he will be sorely missed as he retires from public life.●

THE PEOPLE'S PARADISE

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. FIELDS. Mr. Speaker, some form of socialism/communism is dominant in many nations and every continent. The idea of socialism is especially attractive to intellectuals who are able to maintain a comfortable distance from actual socialist practices.

Though socialism is a god that fails continuously, and causes more human suffering and tragedy than any idea or practice in history, there are those who stubbornly cling to its high-minded idealism. They religiously close up their eyes to the reality that the Socialist promise of instant utopia brings on the tyranny of a real dystopia.

It is for them that the following glimpse of reality is provided:

[From U.S. News & World Report, Nov. 22, 1982]

A NEW REPORT: SOVIETS' RECORD ON SLAVE LABOR

Russia leads the world—with millions forced to toil on state projects. It's the Kremlin's answer to rising crime and a worker shortage.

Amid allegations that the Soviet Union is using slave labor to build a controversial natural-gas pipeline to Western Europe, the Central Intelligence Agency levels an even graver charge against the Kremlin.

The agency, in a detailed study just released, describes the U.S.S.R. as the world's No. 1 employer of forced labor.

No fewer than 4 million prisoners—including 10,000 political inmates—are compelled to toil at arduous tasks ranging from logging and mining to road building and farming.

Massive as it is, the use of slave labor in the Soviet Union is likely to increase, according to the intelligence study. The reason: The rise of serious crime is sending more and more people to jail at a time when the country faces a worsening labor shortage.

The authorities find it easier and cheaper to coerce prisoners to fill jobs in remote areas than to employ ordinary workers. That is a policy that has been pursued since shortly after the Bolshevik Revolution 65 years ago and that saw as many as 15 million in slave-labor camps under Joseph Stalin in the late 1940s.

While documenting evidence that Stalin's slave-labor policy continues, the CIA is circumspect in dealing with the allegations concerning the Siberia-to-Western Europe pipeline. The intelligence agency says that most of the tasks being done on the project at this stage require skilled workers, jobs that few prisoners can perform.

However, since 100 camps exist along the pipeline route, the agency adds that it is very likely that forced labor was used earlier to prepare the area by clearing swamps, cutting timber and building access roads. In a letter accompanying the CIA report, the State Department says: "We are not claiming to have evidence resembling a 'smoking gun.'"

In its study, prepared at the request of a Senate resolution, the intelligence agency paints this picture of slave labor in Russia today:

An estimated 3 percent of the country's entire work force consists of prisoners compelled to perform jobs for the state. Included in this number are several thousand Vietnamese and Southeast Asians imported to help ease the labor shortage. Wages their labor would earn are deducted from Vietnam's huge debts to the Soviet Union. Information is fragmentary, but officials say there are indications that more Asians may be brought in, while others will be sent to Eastern Europe.

About 2 million of the forced laborers are in prison or at the more than 1,100 prison-like camps near big cities or in frontier areas across the country. An estimated 1.5 million convicted criminals, instead of being sent to jail, have been sentenced to "compulsory involvement in labor"—generally construction work thousands of miles from their homes. An additional half-million people have been paroled but are working off the rest of their jail terms.

The type of work a prisoner is given depends on the severity of the crime. One of 4 persons convicted of a serious crime in the Soviet Union is sentenced for hooliganism—a category that covers a broad range of charges including political disobedience.

DANGEROUS WORK

Prisoners generally labor for six 8-hour days a week, but that does not include the time it takes to get to and from work, which is considered time "donated" to the state. Many tasks are extremely hazardous. Former prisoners report that conditions in most cases violate all normal health and safety practices.

Forced labor, according to the CIA, is used in a wide variety of economic activity, including construction, mining, agriculture, manufacturing and logging. Dams, canals, pipelines, railroads and highways have been built by such workers, as well as the Kama River truck plant, the world's largest. In cities, forced labor has been used in hospitals, apartments, hotels, government buildings and on the Moscow subway.

Entire cities have been built by such labor. Examples: Shevchenko, a showplace on the Caspian Sea, and Navoi, a petrochemical city in Central Asia. One source says he daily saw 40 trucks loaded with 40 prisoners each head off from a camp near Nizhnekamsk to nearby sites where a petrochemical complex, an automotive-repair facility and a concrete-products plant were being built.

While many prisoners are employed producing metal goods and electricial equipment, others make clothing, furniture, clocks and even souvenirs.

SUDDEN BREAKTHROUGH

Until now, the Soviet Union has turned a deaf ear to international complaints. The United Nations International Labor Organization has received protests over Soviet slave labor for 30 years, but got no response until early November. Then, Soviet leaders, apparently stung by the accusations that they were using slave labor on the trans-Siberian pipeline, agreed to discuss the allegations with an ILO representative.

Still, few see any real change in prospect and, in fact, expect the use of forced labor to increase. The CIA report points out that crime is a serious problem in the Soviet Union and that the criminal population is increasing. Juvenile crime reportedly is rising rapidly, and alcoholism, blamed for

much of the illegal activity, has reached epidemic proportions.

At the same time, growth in the regular Soviet labor force in the 1980s is expected to decline to half of what is was in the 1970s. Concludes the CIA: "Forced labor is thus likely to become a more important means of relieving serious manpower shortages, particularly in inhospitable areas. . . . Unconfined forced labor provides a flexible and inexpensive source of labor for hazardous or unhealthy duty or for work in remote locations."●

CIVILITY AND DISSENT

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. BEREUTER. Mr. Speaker, an editorial from the Norfolk Daily News took a critical look at the kind of attention that the mass media has tended to give to small and frequently unrepresentative groups of protesters at the appearances of public officials.

This article certainly deserves the consideration of my colleagues.

The article follows:

[From the Norfolk Daily News, Oct. 21, 1982]

CIVILITY AND DISSENT

Americans have more education, more information and more culture available to them today than ever before. No generations have had more opportunities to be literate, learned and informed. None have had greater access to forums which would allow their own opinions to be heard. In brief, the things which are supposed to "civilize" a society have not only been available, but virtually force-fed to increasing numbers of people. Educational institutions, the press and broadcast media leave people in no region without an opportunity to be fully and immediately informed.

With such progress in the delivery of knowledge and growth in the literacy rates, how is it that American society seems to be increasingly afflicted with senseless demonstrations?

The ultimate examples are provided with the announced visits of an American president to any area of the United States. Picket lines are posted outside the arenas where he is to appear; there is usually a chanting chorus with a catchy slogan. A mock "soup line" staged to catch special attention, perhaps. Each such protest is designed to detract from a presidential appearance, to call attention to a special cause.

A free society must tolerate such distractions, though it need not tolerate the boobirds who show up not to picket quietly but to disrupt the utterances of a president or any other speaker.

The days when an administration spokesman, never mind the party, could not appear on a college campus without having to engage in a shouting match or depart without giving a speech may be gone. Fortunately, that and the mass demonstrations characteristic of the Vietnam War era seem a thing of the past. But they seem to have left a legacy of organized and mostly senseless demonstrators who make a profession of picketing.
